March 1, 2018

Greetings!

It is my pleasure to welcome Society for Personality and Social Psychology to Atlanta. On behalf of Atlanta Convention & Visitors Bureau and the entire hospitality community, we hope that you have a wonderful experience in our city.

Whether this is your first visit or you are a returning guest, Atlanta continues to offer new experiences. A visitor's journey begins Downtown, the perfect starting point for exploring Atlanta. Steps away from your meeting, you are surrounded by world-class attractions including Centennial Olympic Park, Georgia Aquarium, World of Coca-Cola, Center for Civil and Human Rights and College Football Hall of Fame & Chick-fil-A Fan Experience. Atlanta Streetcar connects our walkable convention and entertainment district to hotels, Martin Luther King Jr. National Historic Site and nearly 300 dining options Downtown.

Atlanta is the epicenter of the South, offering an accessible destination for visitors. Eighty percent of the U.S. population is within a two-hour flight of Hartsfield-Jackson Atlanta International Airport, and the Maynard H. Jackson Jr. International Terminal provides access to more than 75 international destinations in 50 countries.

Once you're in Atlanta, navigating the city is a breeze. From the airport, hop on a MARTA train for a 15-minute ride to Atlanta's convention and entertainment district. Midtown's arts and cultural district is just a few MARTA stops away from Downtown or a quick drive up Atlanta's famous Peachtree Street. If you continue into Buckhead, you will find the finest shopping destination in the Southeast. With so much to see and do in Atlanta, there's something for everyone.

Once again, we extend a warm welcome and hope everyone attending SPSP 2018 Annual Convention has an enjoyable time in Atlanta.

Sincerely,

A handwritten signature in black ink that reads "William C. Pate".

William C. Pate
President and CEO
Atlanta Convention & Visitors Bureau

Convention Code of Conduct

In order to provide all participants with the opportunity to benefit from SPSP events and activities, SPSP is committed to providing a friendly, safe, supportive and harassment-free environment for all convention attendees and participants, regardless of gender, age, sexual orientation, gender identity, gender expression, disability, physical appearance, body size, race, ethnicity, religion or other group identity.

This code of conduct outlines SPSP's expectations for all convention attendees and participants, including all members, speakers, vendors, media representatives, commentators, exhibitors, sponsors and volunteers. Cooperation is expected from everyone and organizers will actively enforce this code throughout this event. Violations are taken seriously.

Expected Behavior

SPSP expects convention participants to communicate professionally and constructively, whether in person or virtually, handling dissent or disagreement with courtesy, dignity and an open mind, being respectful when providing feedback, and being open to alternate points of view. Likewise, when sharing information about the organization or any attendees or participants via public communication channels, SPSP expects participants to share responsibly and clearly distinguish individual opinion from fact.

Alcohol is available at evening social networking events during the convention and may be consumed only by those of legal age. Alcohol at SPSP events will only be distributed by commercial hosts following local and state statutes, which may include limiting consumption.

Unacceptable Behavior

SPSP does not tolerate harassment of convention attendees or participants in any form. Harassment includes offensive verbal or written comments, and negative behavior, either in real or virtual space, including those which are related to or are based upon gender, age, sexual orientation, gender identity, gender expression, disability, physical appearance, body size, race, ethnicity, religion or other group identity. Harassment also includes deliberate intimidation, stalking, following, harassing photography or recording, sustained disruption of talks or other events, and unwelcome physical contact or sexual attention.

Alcohol may not be brought into SPSP-sponsored events nor may alcohol be consumed by those not of legal age. Because excessive alcohol can lead to impaired decision-making, SPSP strongly discourages excessive drinking at any point during the convention.

Consequences of Unacceptable Behavior

If an attendee or participant, in either real or virtual space, engages in inappropriate, harassing, abusive or destructive behavior or language, the convention organizers and SPSP Leadership will determine and carry out the appropriate course of action, including warning the offender, expulsion from the convention with no refund and/or banning the offender from future SPSP events and activities.

All participants are expected to observe these rules and behaviors in all convention venues, including online venues and convention social events. Convention participants have the right to learn, network and enjoy themselves, free from any type of harassment. Please participate responsibly and with respect for the rights of others.

Reporting

If you are being harassed, notice that someone else is being harassed, or have any other concerns about an individual's conduct, please contact Executive Director **Chad Rummel**, crummel@spsp.org, (202) 869-3241 or **Annie Drinkard**, Public Relations & Media Manager, adrinkard@spsp.org, (202) 869-3243. Your concerns will be held as confidential as you would like them to be and you may remain anonymous. If you would like to discuss your concerns during the convention, ask for Chad or Annie at the convention onsite registration desk.

Welcome to Atlanta!

2018 is shaping up to be a peach of a year for the SPSP Annual Convention. After many years in convention centers, we are back in a hotel and look forward to regaining the close knit feel of earlier conventions.

The program offers a little something for everyone: 29 preconferences including 6 new topics on Thursday followed by two days of over 80 Symposia. This year will continue to feature some of the recent additions including 20 Professional Development sessions, 8 Workshops, 3 Data Blitz sessions, 5 Mentoring sessions, Pop-up Programming, Round Table Lunch discussions, and poster presentations. Additionally, this year will provide the unique opportunity to pull back the curtain on a grant panel at the Inside the Grant Panel event. This event is perfect for conference attendees who are curious about what really gets discussed in those grant panel discussions. Regardless of whether you're looking to fill up on recent findings or hone your science skills, there's plenty of fish in the sea for everyone.

Speaking of plenty of fish, this year offers a new social event: **SPlish SPlash**. This event allows conference attendees to visit the world renowned Georgia Aquarium while enjoying refreshments and great company. The tradition of providing myriad opportunities to interact with colleagues continues this year. Check out the First Time Attendee Welcome Reception, the Opening Reception, the LGBT and Ally Reception, the Diversity and Climate Committee Reception, the Non-Academic Employee Social Hour, and the post Awards Ceremony Reception to name just a few. Not sure what to wear? Check out the Exhibition Hall with 20 Exhibitors and Sponsors as well as the SPSP store which features the latest in fashion-forward, science-themed apparel.

The Student Committee has been hard at work and planned a number of events especially geared to attendees at the training stage of their career. Be sure to check out the Students Only space at the Aquarium on Thursday night. The SPSP Mobile App includes a full listing of student focused events.

We hope you will also find a chance to enjoy Atlanta. The convention is being held in an area that is vibrant with many cafes, restaurants, and bars as well as attractions such as the Martin Luther King Jr. National Historic Site, the King Center, World of Coca Cola, CNN Studio Tours and the National Center for Human and Civil Rights. In order to facilitate transitions between conference time and free time, please note that private space for families and nursing mothers is available at the convention center adjacent to the First Aid room in the Hyatt Regency.

You can't be everywhere at once so be sure to follow us (@SPSPNews) and stay tuned into the conversations on **Twitter** and **Facebook** using our official convention hashtag, #SPSP2018.

We hope to make this the most memorable convention yet!

Jenni Beer
Convention Committee Chair

Letter from the President

On behalf of the SPSP Board of Directors, I am delighted to welcome you to Atlanta and our 2018 Annual Convention. This year's convention features the best of contemporary personality and social psychological science in a program rich with opportunities to share your research

and learn about the cutting edge work of others; to gain exposure to state-of-the-art research skills and methods; to collaborate with colleagues and students; and of course to renew and affirm old friendships and make new ones, all in a collegial, supportive and fun environment. We hope your experience will be both rewarding and enriching.

This year's outstanding program is a collaborative product of a large number of extremely talented and hardworking individuals. The Convention Program Committee included Jenni Beer (Chair), Evan Apfelbaum, Nicholas Rule, Lisa Jaremka, and Eliot Berkman. Members of the program panels included Chris Fraley and Kerry Kawakami (Symposium Panel), Ken DeMarree and Amy Summerville (Single Presenter Panel), Wiebke Bleidorn and Yoel Inbar (Workshop Panel), and Katie Corker, Cami Johnson, and Vivian Zayas (Professional Development Panel). Please join me in thanking the committee and panels for putting together such a fabulous program!

While the annual convention continues to lie at the heart of SPSP's scientific and scholarly mission, I am excited to tell you about a new effort that SPSP will undertake in 2018. At its summer board meeting, SPSP approved the formation of a Globalization Task Force whose charge is to develop a blueprint to guide SPSP's efforts to become a more forward- and outward-looking, global organization. We live in an increasingly interconnected and complex world, a world in which global forces pervade every aspect of our daily lives. Because of this inescapable reality, many scholars have argued that professional organizations such as SPSP need to develop a coherent, global perspective and international policies and programs compatible with that perspective in order to be inclusive and maximally relevant as a discipline, and to derive theories and models that are sensitive to cultural variation and broadly applicable. Yet SPSP has no dedicated

governance structure and little formal programming to address international issues within the field or to promote an international focus within the society.

Accordingly, the task force is charged with identifying appropriate goals to address these gaps, and recommending strategies, approaches and specific activities aimed at meeting these goals. Possible goals might include strengthening ties with international psychological organizations; supporting and facilitating collaborations between SPSP members and international scholars; bringing more international scholars into the organization; sponsoring conferences or small meetings in foreign countries; building research capacity in less developed countries among other possibilities. The Task Force is charged with preparing a report that outlines the importance and/or value of increasing SPSP's global focus and ties, the costs of embarking (vs. not embarking) on this path, and key obstacles and barriers to pursuing this path. The report – which will be presented to the board at its August 2018 meeting - will additionally identify specific prioritized opportunities, strategies, and programs for moving this agenda forward.

The members of the task force are listed below. If you would like to discuss this initiative or are interested in becoming involved, please get in touch with me or any of the task force members. Please also consider attending the **Presidential Plenary** on Friday morning, which will address a related issue of psychology's reliance on an overly narrow database, a concern that in no small part motivated the establishment of the Globalization Task Force.

I look forward to sharing this celebration of our science with you over the next few days. Feel free to email me at President@spsp.org regarding the task force or any other concerns or questions you might have, or contact SPSP staff at info@spsp.org.

Enjoy the meeting!

General Information

Alcohol Policy

A number of social activities have been planned where alcoholic beverages will be offered. SPSP encourages the responsible consumption of alcohol. Alcohol will not be served to anyone under the age of 21. Please be prepared to show photo identification. All bars will be cash bars. If you chose drink tickets with your registration, drink tickets can be used at any bar at any social function during the convention. Alcoholic beverages are allowed only in specific areas and must not be taken out of those immediate areas.

Audiovisual Services, factor 110

Room: (HR) Chicago D

LCD projectors (e.g., for PowerPoint presentations) will be provided in all session rooms. Computers will NOT be provided. Presenters must bring their own computers and set them up before the start of the session in which they are presenting. Presenters are strongly encouraged to arrive in their scheduled session room 15 minutes before their start time for setup.

(HR) Chicago D will also serve as a speaker ready room. Feel free to stop by this room in advance of your presentation to test your computer connectivity to projectors, do a dry run through of your slides, or get additional tech support from onsite AV technicians.

Aquarium Networking Reception

NEW This Year! On Thursday night from 7:30 – 10:00 pm, SPSP will host a Welcome Reception at the Georgia Aquarium. Hors D'Oeuvres and a cash bar will be available. One drink ticket is included with the price of the event ticket. Convention drink tickets can also be used at cash bars. A special students only section will be available for students to meet and network.

Tickets for this event are required - Tickets for this event can be purchased in advance online and are available at the SPSP Store on Lower Level 2 in the Hyatt Regency.

Baggage Check

If you need to check out of your room prior to your departure from the convention, please secure your baggage with the bell desk in the lobby of your hotel.

Business Center

The Hyatt Regency has a full service FedEx Office onsite. This location can handle most business printing and copying needs. The phone number is 404-527-7075. The Marriott Marquis also has a business center onsite. Call their front desk for more information at 404-521-0000.

Child Care

Formal childcare services are not provided at the convention by SPSP.

Exhibits and Poster Sessions

All exhibits and poster sessions will be located in the Grand Hall of the Hyatt Regency, on Lower Level 2.

Thursday, March 1

4:30 PM – 6:00 PM
4:30 PM – 6:00 PM

Exhibits Open

Internet

Complimentary wireless internet will be available in the Hyatt Regency as well as in the Marriott Marquis. Wi-Fi will be available in session rooms. SPSP encourages respectful audience behavior and responsible/limited use of Wi-Fi during sessions.

Network: SPSPWifi

Password: SPSP2018

Lost and Found

For lost items, please visit the meetings team at Registration in the lobby of Lower Level 2 in the Hyatt Regency.

General Information

Mobile App

SPSP has a mobile app available on iOS and Android operating platforms for the 2018 Annual Convention. The easy-to-use app allows you to view the program, connect with other attendees and build your own convention schedule. Visit your app store within your device and search for "SPSP" to find us. Be sure to join the conversation on social media by following us on Twitter @SPSPNews and by using the official convention hashtag, #SPSP2018.

Search "SPSP" in Google Play or the App Store.

Name Badges

The Hyatt Regency and Marriott Marquis are both open to other guests of the hotel. For security purposes, attendees, speakers and exhibitors are required to wear their name badges to all sessions and events while on property.

Entrance to sessions and events is restricted to registered attendees only. Entrance to the Exhibit Hall will be limited to badge holders only. If you misplace your name badge, please visit the registration desk in the lobby of Lower Level 2 of the Hyatt Regency for a replacement.

Parking

Parking is available at both the Hyatt Regency and the Marriott Marquis. The daily parking rate is \$40 per day at the Hyatt and \$45 per day at the Marriott. Rates are subject to change.

Photography & Video Recording

SPSP asks that you do not photograph, audio or video record speakers, presentations or posters without the permission of the authors/speakers.

Poster Sessions

Poster sessions are scheduled on Thursday, March 1, Friday March 2, and Saturday March 3. Presenting authors should be present for at least one full hour during their assigned poster session. Other authors on the poster can be available for the remaining duration of the session to answer questions. All poster sessions are in Grand Hall on Lower Level 2 in the Hyatt Regency. Please see "Exhibits & Poster Sessions" for open times.

Please see the Poster Schedule on pages 20-21. Presenters will have 15 minutes between sessions for set-up and take down time.

Poster Check will be available in the lobby on Lower Level 2 on Friday from 7:00 AM – 5:00 PM and Saturday from 7:30 AM – 7:30 PM.

Printed Program

If you elected to receive a printed program during your registration process, you can pick up your copy at the SPSP Store in the Lower Level 2 lobby of the Hyatt with a printed program ticket (received at registration). Electronic PDF copies of the program can also be found online at spspmeeting.org. If you did not elect to receive a printed program but would like one, please check at the SPSP Store on Saturday after 2:00 PM for any available copies. Printed programs cannot be guaranteed to ticket holders after 2:00 PM on Saturday.

Registration & Badge Pick-Up

Hyatt Regency, Lower Level 2 Lobby

Convention Registration will be open during the following hours:

Wednesday, February 28	3:00 PM – 8:00 PM
Thursday, March 1	7:00 AM – 6:30 PM
Friday, March 2	7:00 AM – 6:00 PM
Saturday, March 3	7:00 AM – 6:00 PM

Social Events

The First Time Attendees Welcome Reception will be held in Hanover CD in the Hyatt on Wednesday, February 28 from 6:00 PM – 7:00 PM.

The Opening Reception will be held in Grand Hall in the Hyatt from 4:30 PM – 6:00 PM on Thursday, March 1.

The Awards Ceremony and Reception will be held Thursday, March 1 at 6:00 PM on the stage in Centennial I & II of the Hyatt.

New This Year – SPSP will host SPLish SPLash, a Welcome Reception at the Georgia Aquarium (separate tickets required) from 7:30 – 10:00 PM on Thursday, March 1. The Student Committee is hosting a special students only section at this reception as well.

The Diversity and Climate Committee is hosting their Diversity Reception in Regency Ballroom VII of the Hyatt on Friday, March 2 from 6:00 PM – 7:00 PM to honor their Diversity Fund Award Winners. More information can be found on page 23 from Diversity Highlights).

The Non-Academic Employee Social Hour, sponsored by Disney Research, will be held on Friday, March 2 from 5:15 PM – 6:15 PM in Hanover Hall FG in the Hyatt and offer attendees the chance to network with others from industry.

The LGBT Networking Reception will be on Friday, March 2 from 5:15 PM – 6:15 PM in Regency Ballroom V in the Hyatt. This reception, sponsored in part by GASP (GLBT Alliance in Social & Personality Psychology) will allow members of the LGBT community to meet and network.

The final poster session of the day on Saturday from 6:45 PM – 8:00 PM in the Grand Hall in the Hyatt will have a cash bar included with light Hors D'Oeuvres to allow attendees to meet, network and mingle before heading home.

Special Needs

Attendees with special needs should contact the SPSP meetings staff prior to the convention at meetings@spsp.org, or onsite by visiting Onsite Registration for any assistance. For specific information regarding ADA compliance and the hotels' accessibility, please contact the Hyatt directly at 404-577-1234, and the Marriott at 404-521-0000.

SPSP Store

Returning this year, the SPSP store will be located in the Lower Level 2 lobby of the Hyatt next to Registration. You can pick up your printed program (with ticket), your convention t-shirt (with ticket) or purchase SPLish SPLash tickets or other SPSP items. The store hours are:

Wednesday, February 28	3:00 PM – 8:00 PM
Thursday, March 1	7:00 AM – 6:30 PM
Friday, March 2	7:30 AM – 5:30 PM
Saturday, March 3	8:30 AM – 5:00 PM

Transportation

Airport

The Hartsfield-Jackson Atlanta International airport is 17 minutes (9 miles) from the Hyatt Regency and Marriott Marquis.

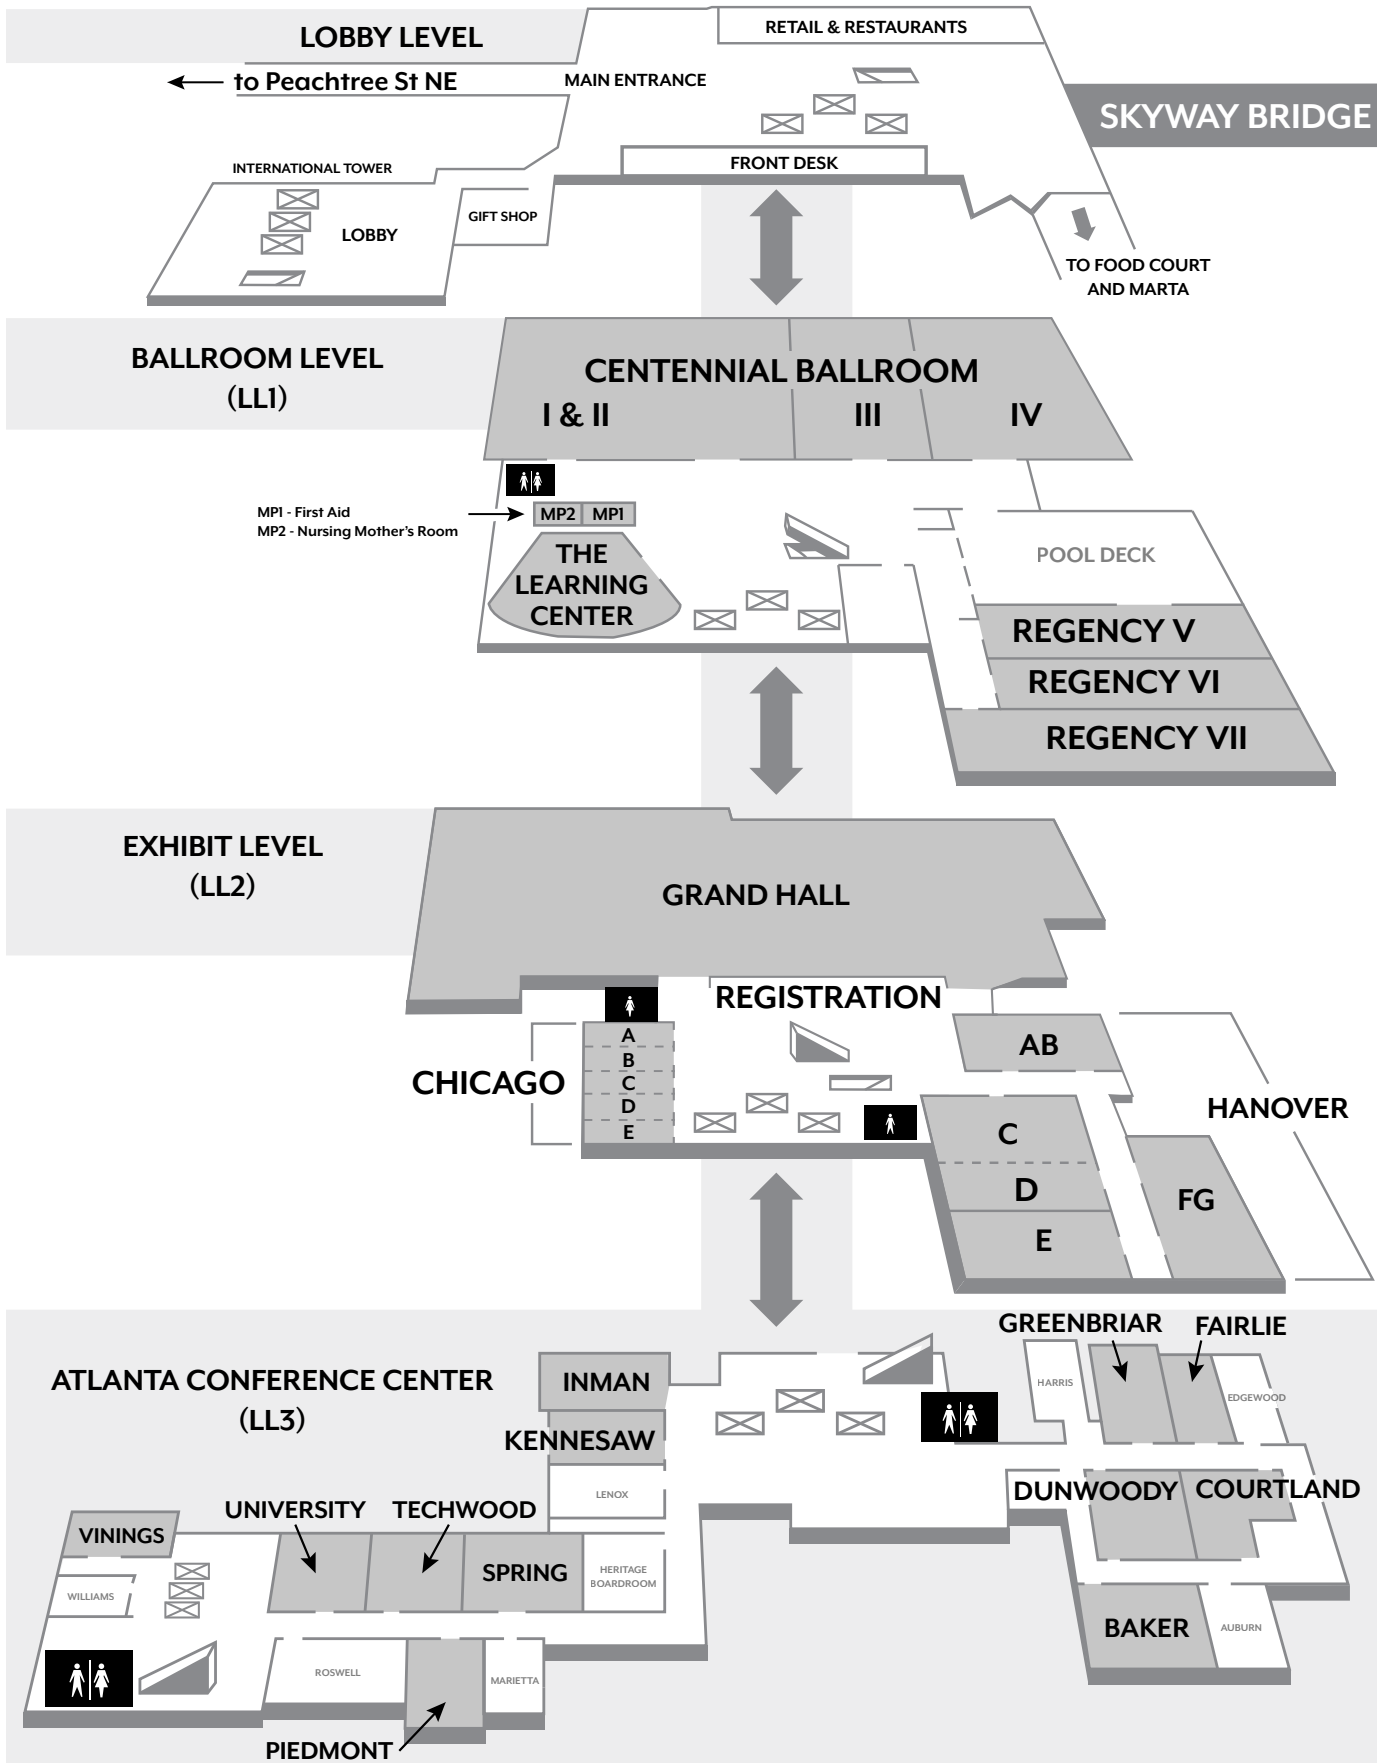

Public Transportation

Atlanta has a robust public transit system called MARTA. The MARTA will get you from the airport to all areas downtown for \$2.50. Taxicabs are also widely available in the city. Lyft, Uber and other popular ride-sharing companies are also available for discounted ground transportation.

Are You a Current SPSP Member?

Thank You!

Here are just a few things that your membership supports, by the numbers:

290

Number of travel and registration awards supporting students of diverse backgrounds, graduate student presenters & members who exclusively teach undergraduate students

80

Number of pre-doctoral students participating in the two-week long Summer Institute for Social and Personality Psychology

Up to
\$30,000

Amount in small research grants awarded each year to post-Ph.D. members who otherwise do not have the same amount of institutional resources to support a sustained record of external funding

Up to
\$20,000

Amount in support annually to members who wish to host small conferences relevant to the field

Presidential Plenary

Toward a More Broadly Generalizable Science of Psychology: Issues, Challenges, Opportunities

Friday, March 2, 9:30 - 10:45 AM
Room: (HR) Centennial Ballroom I & II

Chair: Lynne Cooper
University of Missouri
2018 SPSP President

From an early influential paper by David Sears (1986) to a more recent analysis by Joe Henrich and colleagues (2010), scholars have warned of the high costs to our field of over-reliance on limited and highly homogeneous samples, especially convenience samples of undergraduate students. Participants in this session will explore this issue, seeking to answer the following questions: To what extent is over-reliance on highly homogeneous and non-representative samples an ongoing concern in contemporary social/personality psychology? What are the costs of reliance on a narrow data base? What are key barriers to increasing the diversity of samples and what can be done to overcome these barriers in the short and long-term? Finally, are efforts to enhance sample diversity synergistic with or inimical to current efforts to address replicability concerns in our field? Speakers will offer brief introductory comments, followed by an extended question and answer period, drawing on both prepared and audience questions.

Panelists:

The Importance of Social Psychological and Personality Research in the Age of Trump

Friday, March 2, 2:15 - 3:30 PM | Room: (HR) Centennial Ballroom I & II

The primary goal of this symposium is to examine the importance of social psychological and personality research in the age of Donald Trump. Five presenters will describe their research and theorizing that either specifically investigates or speaks directly to issues related to the presidential election or the Trump government and policies.

Chair: Kerry Kawakami
York University
2018 Symposium
Panel Co-Chair

Justifying Social Inequalities in the Age of Trump: The Role of Social Darwinism

Laurie A. Rudman
Rutgers University

Americans who justify the gender, racial, or class system (i.e., social hierarchies) were respectively also more likely to reject Hillary Clinton in favor of Donald Trump (Study 1); reject the Black Lives Matter movement (Study 2); and support Trump's proposed budget cuts that harm the poor (Study 3). But why are social hierarchies deemed worthy of defense? Inspired by the Trump campaign, we designed a measure of social Darwinism: "survival of the fittest" beliefs that humans, like plants and animals, must ruthlessly compete for success. In each study,

social Darwinism explained significantly more variance when predicting gender, race, or class system justification than social dominance orientation and gender, race, or class essentialism, whether or not we adjusted for demographics (e.g., gender, political identity, religious identity, and SES). In summary, social Darwinism legitimizes viewing social hierarchies as just and fair, and justifying social hierarchies motivates responses that perpetuate them. In concert, the findings advance backlash theory and illuminate the appeal of Trumpism.

From Apprentice to President: The Role of Parasocial Connection in the Election of Donald Trump

Shira Gabriel
University at Buffalo,
SUNY

The election of Donald Trump came as a surprise to many pundits and citizens, including his own supporters (Norman, 2016). We conducted a study of 521 voters to examine the role parasocial bonds (i.e., one-sided psychological relationships) played in his surprising victory. Although most politicians fiercely compete for precious media time and work hard to form a likable yet authoritative impression - often with mixed results - Trump had 14 seasons of carefully edited primetime exposure to imprint a presidential impression on American minds. We suggest that these programs created an image of Trump as a presidential, led to the formation of parasocial bonds, and influenced the presidential campaign.

As predicted, the more participants were exposed to Trump, both through his TV shows and other media, the more likely they were to have a parasocial bond with Trump. That bond predicted having a positive attitude towards Trump, believing his promises, disregarding his inflammatory statements, and even voting behavior. In addition, these effects were particularly strong for those whose votes were a surprise in the election: people who did not identify with the Republican Party. This research suggests that Trump's election might have been influenced by his appearance on reality TV. Indeed, given the close election, it is possible that Trump would not be President if he were not on *The Apprentice* first.

Low Information Democracy

David Dunning
University of Michigan

Thomas Jefferson once famously observed that any nation expecting to be both ignorant and free expects what never was and never will be. Yet surveys of American citizens have shown for decades that voters are largely uninformed. In 2012, for example, one survey found that 35% of native-born citizens would fail a naturalization civics exam. More important, this voter ignorance is best described as being not uninformed but misinformed, in that voters harbor false factual beliefs about government and social conditions that

increasingly correlate with partisanship. Voters do not disagree on priorities for their country as much as they now argue about the ground truth taking place in their country. Voters also suffer the Dunning-Kruger effect, mistakenly thinking themselves as more informed to the extent they endorse both false and true political facts. I discuss the implications of misinformed "low information" voters for political debate, civic action, and classic arguments that democracy can survive the shortcomings of its citizens.

Donald Trump, Narcissism, and the U.S. Presidency

W. Keith Campbell
University of Georgia

Narcissism has been a recurring theme throughout the campaign and presidency of Donald Trump. Narcissism appears to potentially explain the rise and governance of President Trump in at least four ways. First, work on narcissism and emergent leadership describes the ability of assertive, narcissistic leaders like Trump to emerge in free-form leadership selection both because of a desire to lead and extraversion. Second, the association of narcissism with emerging media forms (e.g., social media use, reality television, and trolling), in conjunction with Trump's

masterful disintermediation of the corporate media, may explain part of Trump's campaign success. Third, the Energy Clash Model of narcissism and leadership (Sedikides & Campbell, 2017) describes well the intense and ongoing conflict between Donald Trump and the establishment (e.g., mainstream politicians, deep state). Ironically, this clash has included one soft coup attempt against Trump via the 25th amendment based on Trump's "malignant" narcissism. Fourth and finally, the complex outcomes experienced by previous narcissistic U.S. presidents are discussed (Watts et al., 2013).

The Prevalence and Potency of Blatant Dehumanization in Trump's America

Nour Kteily
Northwestern University

Even in an otherwise atypical presidential election cycle, one of the features that stood out in the 2016 campaign was the rhetoric used by Donald Trump towards members of minority groups such as Muslims and Mexican immigrants, and, in particular, its overtly dehumanizing nature. Surprising to many, Trump's comments and policy positions towards minorities appeared to help rather than hurt his presidential prospects. Here, we examine the prevalence of blatant dehumanization towards minorities among Americans, and its unique association with support for Trump and his

policies (e.g., travel ban; wall between the U.S. and Mexico). We employ a variety of samples (including a large sample of alt-right adherents) and methodologies (correlational, longitudinal, and experimental designs; reverse-correlation technique). We further consider how being on the receiving end of overt dehumanization affected members of minority groups (i.e., Muslim and Latino residents of the U.S.), and examine the potential for dehumanization to contribute to vicious cycles of reciprocal intergroup hostility. We conclude by discussing recent efforts at developing interventions.

Registered Reports and Results-Blind Reviews: Examples from Social/Personality Psychology

Saturday, March 3, 2:15 - 3:30 PM | Room: (HR) Centennial Ballroom I & II

This symposium highlights the value of the registered report format (i.e., results-blind reviewing) for research in social and personality psychology. The symposium features reports from

scholars who have proposed a study or are currently collecting data for registered studios.

Chair: R. Chris Fraley
UI at Urbana-Champaign
2018 Symposium
Panel Co-Chair
and Speaker

Results-Blind Reviews: The Importance of Unbiasing Our Science

The research we learn about at conferences and in journals is merely a small subset of research that is actually conducted. It is generally assumed that publicized research is of higher quality than non-publicized research. However, the decision to submit, report, and publish research findings is often made after the results are known. Thus, research is often promoted based on empirical findings rather than the quality of the methods used to produce them. This process can distort cumulative knowledge because it excludes data from informative studies that did not provide desirable outcomes while including

data from uninformative studies that did provide desirable outcomes. This presentation will elaborate on the nature of the problem, and introduce one potential solution: Registered reports. The registered report format is becoming increasingly common in scientific outlets (e.g., Chambers, 2017; Simons, Holcombe, & Spellman, 2014), but has yet to catch on in mainstream social-personality psychology. This talk introduces the need for this format, the pros and cons of the process, and will serve as a general overview of the talks that follow.

Sexual Behaviour and Relationship Quality

Lorne Campbell
University of
Western Ontario

Introducing a novel sexual behaviour into an existing relationship may help to improve relationship quality and potentially re-ignite feelings of passion and improve intimacy. A new sexual behaviour introduced into a couple's longstanding romantic relationship can constitute a shared, novel, exciting, and pleasurable activity, and such experiences may alleviate relationship boredom and improve partners' feelings for one-another and their relationship. Further, novel sexual behaviours that improve the frequency, quality, and timing of coital orgasm, within the romantic relationship may

have intrinsically positive effects on sexual satisfaction in both partners in and of themselves. This study examines the impact of novel sexual behaviours on relationship quality by asking heterosexual couples to engage in shared use of a novel vibrator while engaging in novel sexual positions, or engage in novel sexual positions without an accompanying vibrator, and compare changes in their feelings of intimacy, passion, sexual satisfaction and relationship satisfaction, to a group of couples who will not be asked to modify their sexual behavior. Modeling Dating Preferences within a Drift-Diffusion Framework: A Tinder-Style Study

William Chopik
Michigan State
University

What do we find attractive in initial encounters with potential dating partners? Despite considerable research on this topic, a consistent set of characteristics that predicts interpersonal attraction remains elusive (Finkel & Eastwick, 2015). In addition, the contexts in which people meet may affect what we find attractive (Finkel et al., 2012). One such setting that has yet to receive much empirical attention is mobile-based dating applications such as Tinder (LeFebvre, 2017). In the current study, we designed a swiping-based dating study in which participants nominate potential partners with whom

they would like to contact. To understand the processes underlying these decisions, we applied a sequential sampling technique—the drift diffusion model—to model dating decisions (Johnson et al., 2017). We predicted both behaviors and process-level mechanisms underlying attraction based on rater and target individual differences. Study design, measures, and hypotheses were pre-registered and will use both exploratory and confirmatory samples (<https://goo.gl/gr5Ktj>).

Confirmatory Research in Hard-to-Collect and Already-Analyzed Data

Simine Vazire
University of
California, Davis

Sometimes you have an extremely valuable and hard-to-collect dataset, but you can't pre-register anything because you know too much. Can you still do confirmatory research in such situations? How can we use these existing data to test confirmatory research questions? One solution is to solicit registrations of questions and analysis plans from people who

have not seen the data. For this talk, we will invite research parasites to mooch off PAIRS—a longitudinal, multi-method data set involving EAR audio data from over 400 people. We will share a description of our measures and materials, and invite researchers outside our lab to submit hypotheses and analysis plans.

Workshops

Workshops provide convention attendees with an in-depth learning experience at no additional cost. Pre-application to attend is required, but check in at the Registration Desk for any open seats. All workshops are held in the meeting rooms at the Marriott Marquis (MM).

Communicating Science: Tools for Scientists and Engineers

Room: (MM) A602, **Time:** Friday, March 2, 12:45 PM – 4:45 PM
SPSP has partnered with the American Association for the Advancement of Science (AAAS) to offer a science communication skills workshop for social personality psychologists at all career stages during the 2018 convention in Atlanta. The workshop format allows for collaborative learning through small-group discussion, facilitator presentations, attendee exercises, and individualized coaching.

An Introduction to Drift Diffusion Modeling

Room: (MM) A601, **Time:** Friday, March 2, 2:15 PM – 5:15 PM
Speaker: David Johnson, *Michigan State Univ.*
This workshop provides a primer on the drift diffusion model. It will cover the theory by which the drift diffusion model translates decision and response time data into cognitive processes. We will walkthrough how to estimate the model hierarchically and interpret results using the free software R and JAGS. Laptops are strongly encouraged.

An Introduction to Longitudinal Dyadic Analyses

Room: (MM) A601, **Time:** Saturday, March 3, 8:00 AM – 12:00 PM
Speakers: Robert Ackerman, *Univ. of Texas at Dallas*; Deborah Kashy, *Michigan State Univ.*
This workshop provides an introduction to Dyadic Growth-Curve Models and Cross-Lagged dyadic models within the Actor-Partner Interdependence Model context (Kenny, Kashy, & Cook, 2006). Students will learn basic features of longitudinal dyadic data and how to estimate and interpret the results of these models using Multilevel Modeling.

Introduction to Geo-Spatial Modeling for Social and Personality Psychology

Room: (MM) A602, **Time:** Saturday, March 3, 8:00 AM – 12:00 PM
Speaker: Joe Hoover, *Univ. of Southern California*
Social scientists have been increasingly interested, of late, in the geographic distribution of psychological phenomena. However, analyzing spatial data requires training that is not available in psychology departments. Through short lectures and small-group lab sessions, this workshop will provide attendees with a pragmatic, application focused introduction geo-spatial modeling in RStudio.

Web Scraping with R: Automating Data Collection from the Internet

Room: (MM) A601, **Time:** Saturday, March 3, 12:45 PM – 3:15 PM
Speaker: Ivan Hernandez, *DePaul Univ.*
The workshop will demonstrate a simple process for collecting data from the internet to facilitate research. Attendees will learn how to read a web page's source code, extract specific content from that page using R, save the information, and automate the process. Real-world problems will be presented to apply the lessons to, and attendees are encouraged to bring a laptop with RStudio installed.

A Guided Tour Through R

Room: (MM) A705, **Time:** Saturday, March 3, 2:15 PM – 5:45 PM
Speaker: Sean Murphy, *The Univ. of Melbourne*
This workshop will deliver a hands-on introduction to the statistical software package R, aimed at those with little to no prior experience. You'll work through examples that will demonstrate how to clean, visualize, and analyze your data in R. You'll also be shown some of the many ways that using R can make your research process easier, more efficient and more reproducible.

Understanding PROCESS v3: New Features, Building, and Editing Models

Room: (MM) A602, **Time:** Saturday, March 3, 3:45 PM – 6:15 PM
Speakers: Andrew Hayes & Amanda Montoya, *Ohio State Univ.*
PROCESS is a widely-used macro available for SPSS and SAS that greatly simplifies the analysis of mediation, moderation, and conditional process models. This workshop provides a tutorial on the use of new features available in version 3 of PROCESS, including commands for constructing custom models, editing existing preprogrammed models, as well as various undocumented tricks and hacks.

Practical MLM for Intermediate Users

Room: (MM) A601, **Time:** Saturday, March 3, 3:45 PM – 6:45 PM
Speaker: Amie Gordon, *UCSF*
Multilevel Modeling (MLM) workshop for researchers who have been exposed to it through a prior class or workshop but still have lots of questions. Topics include: Identifying if MLM is necessary for your data, figuring out the nested structure of your data (including cross-classified models), random effects, centering, mediation, moderation, lagged analysis, growth curve modeling.

Annual Convention Legacy Program

The Society for Personality and Social Psychology is pleased to announce **Alice Eagly** as the 2018 Annual Convention Legacy honoree. This program is designed to honor legacy figures in social and personality psychology.

At Northwestern University, Alice Eagly is Professor of Psychology, James Padilla Chair of Arts and Sciences, Faculty Fellow in the Institute for Policy Research, and Professor of Management and Organizations. She has also held faculty positions at Michigan State University, University of Massachusetts Amherst, and Purdue University.

Eagly received her bachelor's degree from Harvard/Radcliffe and her PhD from the University of Michigan. She is a social psychologist with research interests in many topics, including gender, feminism, attitudes, prejudice, stereotyping, and

leadership. Her work encompasses many meta-analyses as well as primary research. She is the author of over 200 articles and chapters in edited books. Among her several books are *The Psychology of Attitudes*, written with Shelley Chaiken and *Through the Labyrinth: The Truth About How Women Become Leaders*, written with Linda Carli.

Alice Eagly has received numerous awards for her contributions, including the Distinguished Scientific Contribution Award from the American Psychological Association, the Gold Medal Award for Life Achievement in the Science of Psychology from the American Psychological Foundation, and the Eminent Leadership Scholar Award from the Network of Leadership Scholars of the Academy of Management. She is also a member of the American Academy of Arts and Sciences.

The theme of the Legacy program is to trace the impact of the senior scholar's seminal contribution or body of work to contemporary work through a series of events as follows:

1. Legacy Symposium: Dr. Alice Eagly

Saturday, March 3, 11:00 AM – 12:15 PM, Room: (HR) Hanover Hall AB

This symposium addresses the psychology of gender from the perspective of social role theory. Alice Eagly provides an overview of the theory. Anne Koenig and Amanda Diekman present research that explores the theory's implications for stereotype content and choice of occupational roles, including careers in STEM.

The Social Roles of Women and Men Guide the Psychology of Gender

Alice Eagly, Northwestern University

Gender is a theme that is embedded within many topics in social and personality psychology. Social role theory, originally proposed 30 years ago, provides a general frame for understanding these phenomena of gender. The theory gives priority to the gender division of labor, which sets in place a cascade of psychosocial processes by which people come to understand the attributes of each sex and tend to enact them.

Groups' Social Roles Shape Their Stereotypes

Anne Koenig, University of San Diego

Social role theory argues that observations of groups' social roles create stereotype content. Both correlational studies relating role attributes to stereotypes across a variety of groups and experimental research manipulating roles and intergroup relations with fictional groups supported this hypothesis. Roles are an important piece of information about groups' location in the social structure.

A Goal Congruity Model of Gender Gaps in STEM Pursuits

Amanda Diekman, Miami University

Investigating how people view the goals afforded by social roles can inform understanding of role entry, engagement, and exit. I will explore women's lower participation in STEM, relative to other male-stereotypic fields, through the lens of goal congruity. Gender roles emphasize communal attributes for women, but STEM fields are consensually perceived as unlikely to afford communal goals.

2. Legacy Lunch (by invitation only)

Directly following the symposium, Alice Eagly will host a lunch for her academic legacies, major contributors to the research area, and other invited guests.

3. Legacy Posters

Posters accepted for the SPSP convention that can trace back to the Legacy (through a self-nomination process) will have the option to pick up a Legacy Badge onsite at the convention. Displaying this badge on their poster will signify all the work the legacy continues to touch.

Poster Schedule for Thursday/Friday

Legacy Posters

Posters accepted for the SPSP convention that can trace back to the Legacy of Alice Eagly will have the option to pick up a Legacy Badge onsite at the convention. Displaying this badge on their poster will signify all the work the legacy continues to touch.

See page 19 for more information on the Legacy Program and honoree, Alice Eagly.

Student Highlights

Professional Development Sessions

Many professional development sessions this year are focused on training or careers both inside and outside of academia. These sessions, while not specifically designed for student attendees, can offer valuable insight for students. Be sure to check out the professional development sessions scattered throughout the program and easily visible in the Program Grids for each day. For Friday's schedule, please see pages 52-53. For Saturday's schedule, please see pages 92-93.

Student Mentoring Luncheons

Friday, March 2 and Saturday, March 3, 12:30 PM – 1:45 PM, (HR) Hanover Hall CD

The mentoring lunch offers graduate students an informal opportunity to discuss their research interests and career development with an established professional in the field. **Pre-registration is necessary for this event.**

GASP Mentoring Lunch

Friday, March 2, 12:30 PM – 1:45 PM, (HR) Hanover Hall FG

Co-sponsored by the GLBT Alliance in Social and Personality Psychology (GASP) and the SPSP Diversity and Climate Committee, this event features volunteer faculty mentors hosting small group discussions of research and professional issues, including LGBT issues in the academic job market, positioning LGBT research for publication, obtaining funding for research on sexual-minority populations, and other diversity and professional development topics. **Pre-registration is necessary for this event.**

Student Social Night at SPLish SPLash

Thursday, March 1, 7:30 PM – 10:00 PM

Take some time out of your busy conference schedule to relax and socialize with your graduate student peers at SPLish SPLash, a Welcome Reception at the Georgia Aquarium on Thursday night. Join us for food, fun, and all the fish. A complimentary drink will be offered to all ticket holders. Hors d'oeuvres will also be served.

Student tickets are subsidized partially by *Sona Systems* and *Millisecond Software*.

This is a ticketed event. Tickets can be purchased in advance online, or at the SPSP Store on Lower Level 2 of the Hyatt Regency before the event.

Poster Check

Friday, March 2, 7:30 AM – 7:30 PM, (HR) Lower Level 2

Saturday, March 3, 7:30 AM – 7:30 PM, (HR) Lower Level 2

Tired of carrying your poster? Visit Poster Check on Lower Level 2 of the Hyatt. We'll hold onto it for you until you need it. Simply drop off your poster upon your arrival for the day, pick it up at the time of your poster session, and return it until you leave for the day.

Student Poster Awards and Wall of Fame

Thursday, March 1, 4:30 PM – 6:00 PM, Exhibit Hall, (HR) Grand Hall

Poster Session A, on Thursday evening will be the scene of intense excitement as the finalists in the Student Poster Award Competition strive to impress secret judges with their innovative research. Come watch them in action. Don't worry if you miss this event – you can view the winning posters all convention long on the Wall of Fame in the exhibit hall for the remainder of the convention. Stop by to admire the award-winning research and to pick up tips for enhancing your own poster for next year's convention.

Outstanding Research Award

Saturday, March 3, 9:30 AM – 10:45 AM, (HR) Regency VI

The Outstanding Research Award highlights student research conducted by graduate student members of SPSP. Five winners were chosen and will receive a \$100 honorarium. As an additional honor, winners are also given the opportunity to meet with a mentor of their choice. Winners will be announced on Saturday at 9:30 AM during the session *Crisis or Opportunity? Student Perspectives on Evolving Methodological Standards* in Regency VI of the Hyatt Regency.

Diversity Highlights

Undergraduate Mentoring Breakfast, Sponsored by Travel Portland

Friday, March 2, 8:00 AM – 9:15 AM, (HR) Hanover FG

The Undergraduate Mentoring Breakfast, hosted by the Diversity and Climate Committee, celebrates this year's winners of the Diversity Fund Undergraduate Registration Awards. Undergraduate award winners will be paired with past Diversity Fund Graduate Travel Award winners to share tips and, advice on topics related to research, applying to graduate school, networking, and professional development. Continental breakfast will be provided for all participants. ***This session is by invitation only.***

GASP Mentoring Lunch

Friday, March 2, 12:30 PM – 1:45 PM, (HR) Hanover FG

Co-sponsored by the GLBT Alliance in Social and Personality Psychology (GASP) and the SPSP Diversity and Climate Committee, this event features volunteer faculty mentors hosting small group discussions of research and professional issues, including LGBT issues in the academic job market, positioning LGBT research for publication, obtaining funding for research on sexual-minority populations, and other diversity and professional development topics. **Pre-registration is necessary for this event.**

Graduate Diversity Award Winners and Their Admired Scholars Meet-Up

Friday, March 2, 5:30 PM – 6:00 PM, (HR) Regency VII

This event is exclusively for this year's graduate diversity award winners and their selected admired scholars. This time will be spent to allow time for the grad winners and admired scholars to meet each other prior to the Diversity and Climate Committee Reception.

Diversity and Climate Committee Reception

Friday, March 2, 6:00 PM – 7:00 PM, (HR) Regency VII

Join the Diversity and Climate Committee for a reception to honor the Diversity Fund Graduate Travel and Undergraduate Registration Award winners. If you identify as a member of an underrepresented group within the SPSP Convention, or your work focuses on research concerning these groups, join the DCC for drinks and a light reception.

Drink tickets accepted.

Diversity Symposium

The Diversity and Climate Committee sponsors a symposium each year at the SPSP Annual Convention that is closely related to issues of diversity. This year's Diversity Symposium is the following:

Moving Beyond Diversity to Inclusion:

Building Inclusive Schools and Workplaces

Friday, March 2, 12:45 PM – 2:00 PM, (HR) Regency VII

Chair: Erika Hall, *Emory Univ.*

Co-Chair: Sarah Townsend, *Univ. of Southern California*

Speakers: Tessa Dover, Erika Hall, MarYam Hamedani, Tiffany Brannon

Diversity and inclusion efforts are commonly touted as ways to support underrepresented minorities in schools and workplaces. Although both are necessary, diversity – groups' numerical representation, is often trumpeted to the exclusion of inclusion – whether groups' ideas and values are embraced. Our research demonstrates the critical role of inclusion in promoting minority well-being.

SPSP: Increasing Diversity and Inclusiveness 2018

Saturday, March 3, 9:30 AM – 10:45 AM, (MM) A704

Chair: Kathy Espino-Pérez, *UC Santa Barbara*

Speakers: Cydney Dupree, Michael Kraus, Jin Xun Goh, Morgan Jerald

We will discuss strategies to help underrepresented social psychologists navigate academia at the personal and institutional level. We will discuss: (1) strategies to increase a sense of belonging for underrepresented minorities within social psychology, (2) strategies for both maintaining and increasing diversity within institutions, and (3) updates concerning SPSP's diversity initiatives.

Diversity Posters

Posters whose authors have selected the keyword or topic area of diversity to identify their work will be displayed on Thursday, March 1 from 4:30 PM – 6 PM (Poster Session A) and Friday, March 2 from 2:15 PM – 3:30 PM (Poster Session E), in the Exhibit Hall, (HR) Grand Hall.

Diversity Fund Travel Awards

SPSP is committed to increasing diversity within the field of personality and social psychology. As part of this initiative, each year the Diversity and Climate Committee selects exemplary students from the many undergraduate and graduate applicants to receive the Diversity Fund Undergraduate Registration Award and the Diversity Fund Graduate Travel Award. Students are eligible if they identify as a member of an underrepresented group in social/personality psychology. Each year the travel award winners include both international and domestic students. For the 2017 awards cycle SPSP was able to provide travel assistance to 99 students - 50 winners of the Diversity Fund Graduate Travel Award and 49 winners of the Diversity Fund Undergraduate Registration Award. Diversity Fund Graduate winners are listed beginning on page 29, and Undergraduate winners beginning on page 37. Join us to honor the winners at the Diversity and Climate Committee Reception on Friday evening.

Socials & Receptions

First Time Attendees Welcome Reception

Wednesday, February 28, 6:00 PM – 7:00 PM, (HR) Hanover CD

Is it your first time at the SPSP Annual Convention? Join us for the First Time Attendees Welcome Reception for some refreshments and mingling with convention “regulars.” Conventions can be large and overwhelming; let our seasoned repeat attendees give you some tips and tricks to make the most of your experience in Atlanta. We hope to see you there! *Drink tickets accepted.*

Opening Reception

Thursday, March 1, 4:30 PM – 6:00 PM, (HR) Grand Hall

Join us immediately following preconferences at the Opening Reception. Hors d'oeuvres and a cash bar will be available. Stop by to grab some food and a drink. Meet up with your colleagues as you browse the posters in #SPSP2018's first poster session. *Drink tickets accepted.*

Awards Ceremony & Reception

Thursday, March 1, 6:00 PM – 7:00 PM, (HR) Centennial I & II

Join us in honoring the 2017 SPSP and FPSP Award recipients. Grab a beverage and help us celebrate the winners of these prestigious awards. *Drink tickets accepted.*

Splish SPLash, a Welcome Reception at the Georgia Aquarium

Thursday, March 1, 7:30 PM – 10:00 PM, Georgia Aquarium

NEW This Year! SPSP will host a networking reception at the Georgia Aquarium. Hors d'oeuvres are included and a cash bar will be available. One drink ticket is included with the price of the event ticket. Convention drink tickets can also be used at the cash bars. A special students only section will be available for students to meet and network. Join us to mingle and check out more species of fish than in any other aquarium in more than 10 million gallons of water. Tickets can be purchased and picked up at the SPSP Store on Lower Level 2 of the Hyatt Regency prior to the event. *Drink tickets accepted.*

This is a ticketed event. Tickets can be purchased in advance online, or at the SPSP Store on Lower Level 2 of the Hyatt Regency before the event.

Student Social Night, at Splish SPLash

Thursday, March 1, 7:30 PM – 10:00 PM, Georgia Aquarium

Take some time out of your busy conference schedule to relax and socialize with your graduate student peers at the Georgia Aquarium on Thursday night. Join us for food, fun, and all the fish. A complimentary drink will be offered to all ticket holders. Hors d'oeuvres will also be served. Tickets can be purchased and picked up at the SPSP Store on Lower Level 2 of the Hyatt Regency. *Drink tickets accepted.* Tickets required for this event.

Student tickets are subsidized partially by *Sona Systems* and *Millisecond Software*.

Non-Academic Employee Social Hour, Sponsored by Disney Research

Friday, March 2, 5:15 PM – 6:15 PM, (HR) Hanover FG

Connect with those employed outside of academia at the Non-Academic Employee Social Hour. This event is sponsored by Disney Research. Stop by and chat with industry professionals about opportunities outside of academia. There will be a cash bar and light hors d'oeuvres.

Drink tickets accepted.

Early Career Mentoring Happy Hour

Friday, March 2, 5:15 PM – 6:15 PM, Room (HR) Hanover Hall CD

What do you get when you combine a little information, a lot of experience and a dash of fun? Early Career Happy Hour! Come connect with fellow early career members and talk with mentors during a happy hour session at the SPSP convention. *Pre-registration for this event is required.*

LGBT & Ally Networking Reception

Friday, March 2, 5:15 PM – 6:15 PM, (HR) Regency V

Are you a member or an ally of the LGBT community? Come to the LGBT & Ally Networking Reception, hosted by the GLBT Alliance in Social and Personality Psychology (GASP) to network with other attendees and discuss challenges, successes, and research surrounding topics of sexual orientation, gender, and identity in the field of social personality psychology. Light hors d'oeuvres will be provided and a cash bar will also be available. Meet new friends, catch up with old ones, or find a colleague to collaborate with. *Drink tickets accepted.*

SPSP Editorial Board Happy Hour, Sponsored by the SPSP Consortium (By Invitation Only)

Friday, March 2, 5:15 PM – 6:15 PM, (HR) Chicago AB

In appreciation of the valuable service they provide to the journal, SPSP would like to invite the editors and editorial board members to enjoy some refreshments on us.

Summer Institute for Social and Personality Psychology (SISPP) Reunion (By Invitation Only)

Friday, March 2, 5:15 PM – 6:15 PM, (HR) Regency VI

Were you an attendee, instructor, or organizer of a past SISPP? Stop by this reception to say hello to old friends in your cohort and share stories about your summer with other cohorts.

PSPR Editors' Reception

Friday, March 2, 5:15 PM – 6:15 PM, (HR) Hanover E

Come thank the outgoing editors of PSPR for all of their hard work and join us in welcoming the incoming editors into their positions! A cash bar and light hors d'oeuvres will be available. *Drink tickets accepted.*

Graduate Diversity Award Winners and Their Admired Scholars Meet-Up

Friday, March 2, 5:30 PM – 6:00 PM, (HR) Regency VII

This event is exclusively for this year's graduate diversity award winners and their selected admired scholars. This time will be spent to allow time for the grad winners and admired scholars to meet each other prior to the Diversity and Climate Committee Reception.

Diversity and Climate Committee Reception

Friday, March 2, 6:00 PM – 7:00 PM, (HR) Regency VII

Join the Diversity and Climate Committee for a reception to honor the Diversity Fund Graduate Travel and Undergraduate Registration Award winners. If you identify as a member of an underrepresented group within the SPSP Convention, or your work focuses on research concerning these groups, join the DCC for drinks and light receptions.

Drink tickets accepted.

Closing Reception

Saturday, March 3, 6:45 PM – 8:00 PM, (HR) Grand Hall

The final poster session of the day on Saturday will have light hors d'oeuvres and a cash bar included to allow attendees to meet, network and mingle one last time before heading home. *Drink tickets accepted.*

Primary Awards

BLOCK AWARD FOR PERSONALITY RESEARCH

Oliver John received his Ph.D. in Social and Personality Psychology from the University of Oregon. He is Professor of Psychology at UC Berkeley and Director of the Berkeley Personality Laboratory. His research focuses on personality functioning and change, including the Big Five hierarchical model, emotion regulation, and self-concept accuracy.

CAMPBELL AWARD FOR SOCIAL PSYCHOLOGY RESEARCH

Daniel Gilbert is the Edgar Pierce Professor of Psychology at Harvard University. He has won numerous awards for his research and teaching, wrote the international bestseller *Stumbling on Happiness*, and hosted the award-winning television series *This Emotional Life*. His three TED talks have been viewed more than 20 million times.

CAREER CONTRIBUTION AWARD

Judith A. Hall, University Distinguished Professor at Northeastern University, received her BA and PhD degrees from Harvard University. Her research examines interpersonal processes, including antecedents and consequences, especially with regard to nonverbal communication. Her research includes investigations of physician/patient relationships and the quality of health care.

CAREER CONTRIBUTION AWARD

Shinobu Kitayama is the Robert B. Zajonc Collegiate Professor of Psychology at the University of Michigan. He studies cultural psychology, cultural neuroscience, and the co-evolution of genes and culture. His honors include a Guggenheim Fellowship and the SESP Scientific Impact Award. He is a member of the American Academy of Arts and Sciences.

DIENER AWARD IN PERSONALITY PSYCHOLOGY

Samuel Gosling is a professor of psychology at the University of Texas, Austin. He has worked on developing and evaluating methods for collecting data in the behavioral sciences. He has published research on personality in non-human animals and on the psychological connections between individuals and the physical and virtual spaces they occupy.

DIENER AWARD IN SOCIAL PSYCHOLOGY

Carsten K. W. De Dreu (PhD, 1993) is professor of psychology at Leiden University, and is an elected fellow of the Royal Netherlands Academy of Sciences and the Society for Personality and Social Psychology. He studies the neurobiological and social psychological mechanisms underlying conflict and cooperation within and between groups.

APPLICATION OF PERSONALITY AND SOCIAL PSYCHOLOGY AWARD

Christina Maslach is a professor of social psychology (Emerita) at the University of California, Berkeley. She received her BA from Harvard University, and her PhD from Stanford University. She is the pioneering researcher on job burnout and has produced the standard assessment tool, books, award-winning articles, and the new e-journal, *Burnout Research*.

AMBADY AWARD FOR MENTORING EXCELLENCE

E. Tory Higgins is the Stanley Schachter Professor of Psychology, Professor of Business. He directs the Motivation Science Center at Columbia University and is a fellow of the American Academy of Arts & Sciences, and author of *Beyond Pleasure and Pain: How Motivation Works*.

UNDERGRADUATE TEACHING AND MENTORING AWARD

Andrew (Drew) Christopher received his undergraduate degree from Stetson University and his PhD from the University of Florida. Drew has taught at Albion College since 2001. His courses include Research Design and Analysis, Introductory Psychology, Industrial/Organizational Psychology, Research in Social Psychology, Senior Research Seminar, and a first-year seminar called Psychology in Film.

DISTINGUISHED SCHOLAR AWARD

Teresa M. Amabile, Baker Foundation Professor at Harvard Business School, received her psychology doctorate from Stanford University. Her research investigating the social psychology of creativity, motivation, and everyday work life has appeared in both psychology and organizational behavior journals.

CIALDINI PRIZE

David Brockman is an assistant professor at the Stanford Graduate School of Business. His research considers how voters and politicians decide, generally using field experiments and other approaches that allow for rigorous causal inferences to be drawn. His published work has appeared in *Science*, the *American Journal of Political Science*, and other outlets.

Joshua Kalla is a political science PhD student at the University of California, Berkeley, where he primarily uses novel field experiments to study the mechanisms through which organized interest groups and large donors influence political outcomes.

Primary Awards

CIALDINI AWARD

Dr. Jason Okonofua is an assistant professor at the University of California, Berkeley. Jason's research examines social-psychological processes that contribute to inequality. This focus spans education, criminal justice, and business. He utilizes field experimentation that refocuses mindsets to build stronger social relationships, better real-world outcomes, and offset the effects of bias.

Dave Paunesku is co-founder and executive director of PERTS, a Stanford University center that helps educators apply insights from psychological research in order to foster student engagement and success on a larger scale. PERTS and its partners have co-developed evidence-based resources that have reached millions of learners worldwide.

Gregory Walton is an associate professor of psychology and the Michael Forman University Fellow at Stanford University. Much of his research investigates psychological processes that contribute to major social problems, and how "wise" interventions that target these processes can address such problems and help people flourish, even over long periods of time.

METHODOLOGICAL INNOVATOR AWARD

Jim Blascovich earned his BS at Loyola University Chicago, and his PhD in the Interdisciplinary Social Psychology Program at the University of Nevada, Reno, where he focused on the philosophy of science, psychophysiology, and behavioral concomitants of social behavior. He has held faculty positions at the University of Nevada, Reno, Marquette University, SUNY Buffalo and the University of California, Santa Barbara.

WEGNER THEORETICAL INNOVATION PRIZE

Ara Norenzayan is professor of psychology at the University of British Columbia. He received his Ph.D. from the University of Michigan in 1999. He is the author of *Big Gods: How Religion Transformed Cooperation and Conflict*.

Will Gervais is an evolutionary and cultural psychologist whose research focuses on the cognitive, evolutionary, and cultural causes and consequences of both religious belief and disbelief. Will is also a strong advocate for reform in research methods to produce more robust results and a more transparent, effective science.

WEGNER THEORETICAL INNOVATION PRIZE

Dr. Joseph Henrich is a professor of Human Evolutionary Biology at Harvard University. He previously held the *Canada Research Chair in Culture, Cognition and Coevolution* at UBC and has been a tenured faculty member in Psychology, Economics and Anthropology. His latest book is *The Secret of Our Success: How culture is driving human evolution, domesticating our species, and making us smart*.

Rita Anne McNamara is a Lecturer in Cross-Cultural psychology at Victoria University of Wellington. Her work focuses on how culture shapes social cognition, with a particular focus on mind perception, religion, cooperation, and morality. She works with communities of Indigenous iTaukei Fijians and conducts lab-based studies in university settings.

Azim Shariff is an associate professor of psychology and social behavior at the University of California Irvine. There he directs the Culture and Morality Lab, which applies the insights of moral psychology to a range of topics from religion to economic attitudes to human-technology interactions.

Edward Slingerland is Distinguished University Scholar and Professor of Asian Studies at the University of British Columbia. His research specialties and teaching interests include Warring States (5th-3rd c. B.C.E.) Chinese thought, religious studies, cognitive linguistics, ethics, and the relationship between the humanities and the natural sciences.

Aiyana Willard, Ph.D., is a postdoctoral researcher at the University of Oxford. She conducts research on the religious, spiritual but not religious, and non-religious in North America, Europe, and Fiji and is currently exploring the prevalence, causes, and consequences of witchcraft and karma beliefs around the world.

BOOK PRIZE

Pre-Suasion: A Revolutionary Way to Influence and Persuade
Robert B. Cialdini is Regents' Emeritus Professor of Psychology and Marketing at Arizona State University. His earlier book, *Influence*—the result of a three-year program of study into the reasons people comply with requests in everyday settings—has sold over three million copies and has been translated into 32 languages.

Primary Awards

EXCELLENCE IN SCIENCE JOURNALISM

Ed Yong is an award-winning science journalist who reports for *The Atlantic*. His work has also appeared in *National Geographic*, the *New Yorker*, *Wired*, *Nature*, *New Scientist*, *Scientific American*, and many more outlets. His first book, *I Contain Multitudes*, was a *New York Times* bestseller, and has appeared on Bill Gates' blog, Mark Zuckerberg's bedside table, and *Jeopardy!*

SAGE YOUNG SCHOLAR AWARD

Nour Kteily is a psychologist at Northwestern University's Kellogg School of Management. His research examines the psychological mechanisms that influence the stability of social hierarchy and shape conflict between groups in society.

SAGE YOUNG SCHOLAR AWARD

Mark Brandt is an associate professor at Tilburg University. His research examines how ideological and moral beliefs – such as political ideology, religious fundamentalism, and moral conviction – influence attitudes and behaviors and provide people with meaning.

Michael W. Kraus is a father, basketball fan, and serious coffee drinker who works at the Yale University, School of Management. His current research explores the behaviors and emotional states that perpetuate economic and social inequality. University life is a privilege and a constant source of joy for Michael.

Molly Crockett is an assistant professor of psychology at Yale University and a Distinguished Research Fellow at the Oxford Centre for Neuroethics. She completed her PhD in experimental psychology at the University of Cambridge. Her research investigates the psychological and neural mechanisms of moral judgment, learning, and decision-making.

Kristin Laurin's research investigates how an individual's goals and motivations interact with their beliefs and ideologies. Under that general theme, she has investigated beliefs about politics, religion, and morality, both in terms of their motivational underpinnings, and how they influence a person's ability to self-regulate in pursuit of important goals.

Primary Awards

SAGE YOUNG SCHOLAR AWARD

Ryne Sherman received his PhD from the University of California, Riverside in 2011 and is an associate professor of psychology at Texas Tech University. His research concerns person-situation transactions, that is, how people navigate their social worlds on a daily basis. As part of his research, he has pioneered the use of wearable cameras in studying daily life.

STUDENT PUBLICATION AWARD

Gabrielle Filip-Crawford is an assistant professor of psychology at St. Catherine University. Her research explores how individuals and groups identify and manage social opportunities and threats, and the implications of this for interpersonal and intergroup relations. Dr. Filip-Crawford received her PhD from Arizona State University in 2015.

Erica Slotter is an associate professor of Psychology at Villanova University. She received her PhD from Northwestern University in 2011. Her work focuses on the social factors that influence identity. In particular, she examines how various social role transitions can influence the content and clarity of an individual's self-concept.

STUDENT PUBLICATION AWARD

Andrew H. Hales is a postdoctoral researcher in the Frank Batten School of Leadership and Public Policy at the University of Virginia. He researches social ostracism from the perspectives of those who are ostracized and those who ostracize others. He also studies social influence, impression management, and compliance techniques.

Joshua Tybur is an associate professor in the Department of Experimental and Applied Psychology at Vrije Universiteit Amsterdam. His work, which is often inspired by an evolutionary perspective, aims to better understand how people avoid infectious disease, select versus avoid potential mates, and advance personal interests via moral condemnation.

STUDENT PUBLICATION AWARD

Priyanka Joshi is a research associate at the University of Nevada, Las Vegas. Her research is broadly focused on two related areas: the shaping of self-construals through roles of power and leadership; and the impact of self-construals on personal decision-making, responses to deviance, and interpersonal communication.

SERVICE TO SPSP AWARD

Stacey Sinclair received her BA from Stanford University and her PhD from UCLA. She is currently a professor of psychology and African American studies at Princeton University. Her research examines how intergroup and within-group interpersonal interactions serve as vehicles by which prejudice and stereotypes are transmitted and acted upon.

STUDENT PUBLICATION AWARD

Matthew D. Rocklage is a postdoctoral fellow at the Kellogg School of Management at Northwestern University. He earned his PhD in social psychology from Ohio State University. He utilizes natural language to investigate attitude emotionality, extremity, and valence using a tool he developed called the Evaluative Lexicon.

SERVICE TO THE FIELD AWARD

Alison Ledgerwood is an associate professor of psychology at UC Davis. She was the associate editor for methods and practices submissions at *Perspectives on Psychological Science* from 2013 to 2017. In 2015, she founded PsychMAP, an online discussion forum designed to promote constructive conversations about research methods and practices in psychological science.

The Dilemma of Mismatched Sexual Ideals and the Buffering Effect of Sexual Responsiveness
 Rhonda Balzarini¹, Kiersten Dobson¹, Taylor Kohut¹, Amy Muise², Lorne Campbell¹
¹Univ. of Western Ontario, ²York Univ.

[A-009] Close Relationships

Implicit Partner Evaluations and Romantic Satisfaction: The Mediating Role of Nonverbal Behavior in Dyadic Interactions
 Ruddy Faure¹, Francesca Righetti¹, Magdalena Seibel², Wilhelm Hofmann²
¹VU Amsterdam, ²Social Cognition Center Cologne

[A-010] Culture

Pleasure as a Source or Motivator: Cultural Differences in Presence of Pleasure and Search for Meaning
 Emily Hong¹, Li-Jun Ji¹, Jinkyung Na²
¹Queen's Univ., ²Sogang Univ.

[A-011] Diversity

Want to Reduce Gender Inequality in Computer Science? Stop Steering Women Away from Predominately Male Subfields
 Adriana Germano¹, Sianna Zeigler¹, Sapna Cheryan¹
¹Univ. of Washington

[A-012] Emotion

The Role of Facial Emotion in Impressions of Women's Sexual Orientation
 R. Thora Bjornsdottir¹, Nicholas Rule¹
¹Univ. of Toronto

[A-013] Evolution

Religious Claims Lead to (Slow) Life History Inferences
 Jordan Moon¹, Jaimie Arona Krems¹, Adam Cohen¹
¹Arizona State Univ.

[A-014] Evolution

Do Women Expose Themselves to More Health-Related Risks in Certain Phases of the Menstrual Cycle?: A Meta-analytic Review
 Jordane Boudesseul¹, Kelly Gildersleeve², Martie Haselton³, Laurent Begue¹
¹Univ. Grenoble Alpes, ²Univ. Michigan, ³UCLA

[A-015] Gender

Intersection of Stigma: Identity Safety Cues Among Women of Color
 Jonathan Vides¹, Analia Albuja¹, Diana Sanchez¹
¹Rutgers Univ.

[A-016] Groups/Intergroup Processes

Identification with Extremist Groups: How Important is Entitativity?
 Angela Ma¹, David Rast¹
¹Univ. of Alberta

[A-017] Groups/Intergroup Processes

The Costs of Maintaining Popular Status in the Peer Group: A Latent Class Growth Model
 Hye-Young Yun¹, Sandra Graham¹
¹UCLA

[A-018] Groups/Intergroup Processes

Dehumanization as Basic Intergroup Process?: Evidence from Minimal Groups
 Leland Jasperse¹, Benjamin Stillerman¹, David Amodio²
¹NYU, ²Univ. of Amsterdam

[A-019] Groups/Intergroup Processes

Are Women of Color Relationally "Invisible"? Testing the Intersectional Invisibility Hypothesis Using Social Network Analysis
 Yeji Park¹, Kate Turetsky¹, Rebecca Mohr¹, Valerie Purdie Greenaway¹
¹Columbia Univ.

[A-020] Judgment/Decision-Making

Judging the Ecological Impact of "Green" Consumer Goods: Evidence of Quantity Insensitivity
 Byungdoo Kim¹, Jonathon Schuldt¹
¹Cornell Univ.

[A-021] Judgment/Decision-Making

Fighting Pain of Paying in Giving: How Adding Time Delays to Donation Pledges Increases Charitable Giving
 Emily Powell¹, Minah Jung², Eyal Pe'er³, Joachim Vosgerau⁴
¹NYU Stern School of Business, ²NYU, ³Bar-Ilan Univ., ⁴Bocconi Univ.

[A-022] Judgment/Decision-Making

When Less is (Not) More: Evoked Reference Sets and the 9 > 221 Effect
 Lim Leong¹, Craig McKenzie¹, Shlomi Sher², Johannes Muller-Trede¹
¹UC San Diego, ²Pomona College

[A-023] Motivation/Goals

Competition and Performance Goals: The Moderating Effects of Perceived Competence
 David Weissman¹, Emily Hangen¹, Christopher Thorstenson¹, Andrew Elliot¹
¹Univ. of Rochester

[A-024] Motivation/Goals

Co-Failing at Self-Control: Shared Indulgence Predicts Minimized Guilt and Biased Food Representation
 Janna Kline¹, Shana Cole¹
¹Rutgers Univ.

[A-025] Motivation/Goals

Conquer Together: Dyadic Regulatory Focus Complementarity and Perceptions of Joint Goals
 Jessica Paek¹, Katherine Zee¹, Andrew Hall², Daniel Molden², E. Tory Higgins¹
¹Columbia Univ., ²Northwestern Univ.

[A-026] Motivation/Goals

Avoiding the Fall: Prestige-Oriented Leaders Show Biased Attention to and Interpretation of Emotional Expressions When Their Social Approval is at Stake
 Katherine Bae¹, Charleen Case¹
¹Univ. of Michigan

[A-027] Motivation/Goals

Not Everyone Benefits from Having a Backup Plan: People with Relatively Lower Trait Power Get More Distracted by Backup Plans and Pursue Goals Less Successfully
 Leila Straub¹, Petra Schmid¹
¹ETH Zurich

[A-028] Norms and Social Influence

Characteristics of Women Who Use a Direct Diplomatic Response to Unwanted Sexual Advances
 Breanne Helmers¹, Antonia Abbey¹, Zunaira Jilani¹, Jacqueline Woerner², Sheri Pegram¹
¹Wayne State Univ., ²Yale Univ.

[A-029] Person Perception/Impression Formation

The Help-Giver's Dilemma: How to Decline Requests for Help at Work without Hurting One's Image
 Basima Tewfik¹, Timothy Kundrao², Philip Tetlock²
¹Wharton School, Univ. of Pennsylvania, ²Univ. of Pennsylvania

[A-030] Prosocial Behavior

"Setting a Price" for Charitable Giving Increases Donations
 Gordon Kraft-Todd¹, Michael Norton², David Rand¹
¹Yale Univ., ²Harvard Business School

[A-031] Prosocial Behavior

Charitable Giving and Social Influence: A Lab Experiment on Donor Similarity
 Yuan Tian¹, Sara Konrath¹
¹Indiana Univ.

[A-032] Religion/Spirituality

Religiosity and Attitudes Towards Mindfulness-Based Interventions
 Susan Brener¹, Roman Palitsky¹, Deanna Kaplan¹, Daniel Sullivan¹
¹Univ. of Arizona

HANDBOOK OF EMOTIONS
FOURTH EDITION

Edited by Lisa Feldman Barrett, PhD
Michael Lewis, PhD
Jeannette M. Haviland-Jones, PhD

“Assembles a brilliant set of chapters from the world’s foremost experts on every aspect of emotion. It is easy to see why this accessible and authoritative compendium has become, and still remains, the bible of the field.”

—Daniel Gilbert, Harvard University

March 21, 2018, 7" x 10" Paperback (© 2016), 928 Pages
ISBN 978-1-4625-3636-8, \$55.00, **\$44.00**

New

THE PSYCHOLOGY OF THINKING ABOUT THE FUTURE

Edited by Gabriele Oettingen, PhD
A. Timur Sevincer, PhD
Peter M. Gollwitzer, PhD

“A terrific resource for anyone wishing to be brought up to date on what psychology has learned about this vital aspect of everyday life. It is full of provocative ideas and surprising facts and findings.”

—Roy F. Baumeister, Florida State University and University of Queensland, Australia

2018, 7" x 10" Hardcover, 594 Pages
ISBN 978-1-4625-3441-8, \$85.00, **\$68.00**

New

ATLAS OF MORAL PSYCHOLOGY

Edited by Kurt Gray, PhD
Jesse Graham, PhD

“A gift for anyone interested in moral psychology. The *Atlas* is a masterful, state-of-the-art compendium of descriptive and theoretical work on moral judgments, emotions, and reasoning, as well as the compulsive force of parochial social norms and the human experience of self-evidently appealing universal values.”

—Richard A. Shweder, University of Chicago

2018, 7" x 10" Hardcover, 586 Pages
ISBN 978-1-4625-3256-8, \$75.00, **\$60.00**

New in Paperback

HANDBOOK OF COMPETENCE AND MOTIVATION, SECOND EDITION
Theory and Application

Edited by Andrew J. Elliot, PhD,
Carol S. Dweck, PhD, & David S. Yeager, PhD

“This edition brings together the world’s greatest experts on competence motivation to provide readers with the most important ideas and recent discoveries....More than ever, this is a ‘must-read’ handbook.”

—E. Tory Higgins, Columbia University

2018, 7" x 10" Paperback (©2017), 722 Pages
ISBN 978-1-4625-2960-5, \$55.00, **\$44.00**

☆ *Bestseller*

SELF-DETERMINATION THEORY
Basic Psychological Needs in Motivation, Development, and Wellness

Richard M. Ryan, PhD
Edward L. Deci, PhD

“Presents a synthesis of four decades of systematic work within one of the most comprehensive, profound research programs on human motivation in the history of psychology. It is a true milestone in motivational research.”

—Arie W. Kruglanski, University of Maryland, College Park

2017, 7" x 10" Hardcover, 756 Pages
ISBN 978-1-4625-2876-9, \$75.00, **\$60.00**

New in Paperback

ATTACHMENT IN ADULthood
SECOND EDITION
Structure, Dynamics, and Change

Mario Mikulincer, PhD
Phillip R. Shaver, PhD

“Combining insights from neuroscience, psychopathology, and developmental and social psychology, this beautifully written book offers a cutting-edge update to the first edition. Quite simply, it is indispensable.”

—Harry T. Reis, University of Rochester

2017, 7" x 10" Paperback (© 2016), 690 Pages
ISBN 978-1-4625-3381-7, \$45.00, **\$36.00**

New in Paperback

HANDBOOK OF SELF-REGULATION
THIRD EDITION

Research, Theory, and Applications
Edited by Kathleen D. Vohs, PhD
Roy F. Baumeister, PhD

“Vohs and Baumeister bring together diverse, state-of-the-art views in what can only be described as an integrative masterpiece. I’m certain the third edition of this handbook is destined to be a classic.”

—David DeSteno, Northeastern University

2017, 7" x 10" Paperback (© 2016), 640 Pages
ISBN 978-1-4625-3382-4, \$45.00, **\$36.00**

☆ *New Edition of a Bestseller—Revised & Expanded!*

INTRODUCTION TO MEDIATION, MODERATION, AND CONDITIONAL PROCESS ANALYSIS
SECOND EDITION

A Regression-Based Approach
Andrew F. Hayes, PhD

“A welcome addition to advanced regression books that can be used in doctoral courses in the social sciences or by social science researchers.”

—Ramona L. Paetzold, Texas A&M University

2017, 7" x 10" Hardcover, 692 Pages
ISBN 978-1-4625-3465-4, \$65.00, **\$52.00**

New

MEASUREMENT THEORY AND APPLICATIONS FOR THE SOCIAL SCIENCES

Deborah L. Bandalos, PhD

“A pleasure to read. Effective examples show me that the author really knows the information, and better yet, is able to communicate it well.... It covers much of the material I teach in my course.”

—John Wallace, Ball State University

2018, 7" x 10" Hardcover, 661 Pages
ISBN 978-1-4625-3213-1, \$75.00, **\$60.00**

Social Behavior and Personality

an international journal

Submit your next research paper to *SBP*!

We offer you

- A well-established international journal published monthly
- Personalized service from a core operations team
- Expert peer feedback from worldwide reviewers through a double-blind review process
- Indexing in the SSCI with an impact factor of 0.548 and in Scopus with a Citescore of 0.64.
- Relevant content, with citations of our articles having increased by 49% over the last impact factor period
- Global reach, with views from researchers in over 150 countries each year
- Published work of over 6,000 researchers and professionals
- A distinguished Editorial Board, featuring pioneers of psychology and up-and coming researchers

Social Behavior and Personality: an international journal (SBP), founded in 1973, publishes papers on all aspects of social, personality, and developmental psychology. In the past 45 years SBP has published the work of over 6,000 researchers and professionals, and our archive now contains several thousand articles.

[1] New Evidence on Forming and Changing First Impressions of Others**Room:** (HR) Centennial III, **Time:** 8:00 AM - 9:15 AM**Chair:** Jeremy Cone, *Williams College*

A common adage suggests that you “never get a second chance to make a good first impression.” However, we present new lines of work showing the surprisingly nuanced and sophisticated processes that govern impression formation and updating. Across 12 studies including over 2800 participants, we use a diversity of methodologies and approaches to better understand impression formation and change.

ABSTRACTS**Spontaneous Impressions: Cultural, Automatic, and Developmental Effects**

Euro-Americans form spontaneous impressions more than East Asians, but why? Americans exceed Japanese on automatic (but not controlled) processes in such trait inferences. But there are no age differences in when spontaneous evaluations emerge in Euro and Japanese infants. Mothers’ social evaluative speech predicts all infants’ preference for prosocial agents. Eye-tracking research is underway.

James Uleman¹, Yuki Shimizu²¹NYU, ²Saitama Univ.**Changing our Implicit Mind: Revision of Implicit First Impressions based on Visual Cues**

How do visual cues such as attractiveness influence how much a person’s actions influence evaluations? We find that diagnostic revelations can override salient visual information in implicit evaluations and that the diagnosticity of visual cues (i.e., beliefs about how much being overweight reflects on character) plays a role in the extent to which diagnostic revelations resonate implicitly.

Jeremy Cone¹, Thomas Mann², Brian Meagher³, Melissa Ferguson²¹Williams College, ²Cornell Univ., ³Indiana Univ.**Updating Implicit Evaluations and Trait Inferences: Does Learning About Contingency Information Lead to Spontaneous Updating?**

Two studies investigated changes in implicit and explicit attitudes and inferences in response to contingency information learned later (i.e., learning the ultimate goal of the actor). Both studies showed that implicit and explicit attitudes get updated with contingency information. Although explicit trait inferences were also updated with contingency, implicit trait inferences were retained.

Irmak Olcaysoy Okten¹, Erica Schneid², Gordon Moskowitz¹¹Lehigh Univ., ²Drew Univ.**Weighting Bias and the Updating of Spontaneous Evaluative and Trait Inferences**

These studies examine how weighting bias affects ultimate spontaneous evaluative and trait inferences when a perceiver is given evaluative and semantically incongruent pieces of information about targets. Positive weighting bias can reduce, but not override, the effects of a negative evaluation. However, the weighting bias does not have the same effect on trait inferences.

Erica Schneid¹, Eva Pietri²¹Bloombsburg Univ., ²Indiana Univ. - Purdue Univ., Indianapolis**Professional Development****[2] Funding Agencies and Grantees Offer Insights into Securing Funds for your Research****Room:** (HR) Centennial IV, **Time:** 8:00 AM - 9:15 AM**Chair:** Amber Story, *American Psychological Association*

Funding for social and personality psychology is available from a number of public and private organizations, but it is highly competitive. Attend this session and you will learn how to target different funding opportunities and gain insights from leaders of funding agencies and recent grantees.

Bill Klein¹, Steve Breckler², Nicholas Gibson³¹NIH/National Cancer Institute, ²National Science Foundation, ³Templeton Foundation**[3] Computational Social Psychology: Old Questions, New Methods****Room:** (HR) Regency VI, **Time:** 8:00 AM - 9:15 AM**Chair:** Sebastian Deri, *Cornell Univ.*

We revisit classic findings in social psychology using new computational methods. Specifically, we reexamine: Milgram’s research on the “Experience of the Living in Cities”; group decision-making when humans make decisions with computers; the similarity hypothesis of attraction using Facebook profile data; and Moral Foundations Theory using neural networks to model everyday moral language usage.

ABSTRACTS**Psychological Maps of the City**

How do people represent their social environments? Following closely the work of Stanley Milgram (1972), we build a web game that puts this question to the test—by challenging users to identify random locations from Google Street View in terms of closest subway station, borough, or region. Some areas are better represented cognitively than others, and this predicts several social welfare indices.

Daniele Quercia¹, Joao Paulo Pesce², Virgilio Almeida², Jon Crowcroft³¹Nokia Bell Labs, ²UFMG, Brazil, ³Univ. of Cambridge**Machine-Aided Group Decision-Making: The Case of Lie Detection**

We revisit research on group-decision making, examining how humans make decisions not only in collaboration with other humans, but machines as well. This is done in a nuanced social decision task—lie detection. Compared to humans alone (68.8%), and computers alone (66.2%), humans and computers deciding together are more accurate, but only when computers “make the final decision” (75.7%).

Sebastian Deri¹, Eva Sharma², Jeremie Rappaz³, Miriam Redi⁴, Luca Aiello⁴¹Cornell Univ., ²Georgia Tech Univ., ³EPFL, ⁴Nokia Bell Labs**Birds of a Feather Do Flock Together; Behavior-Based Personality-Assessment Method Reveals Personality Similarity Among Couples and Friend**

A classic finding in social psychology is that friends and spouses tend to be similar in a broad range of characteristics (e.g. age, race, religion). No such effect have been found for personality. Reference group effects inherent in typical measures may be to blame. Using two behavior-based measures which infer personality from Facebook profile data (N=46,483), we find evidence for similarity.

Michal Kosinski¹, Wu Youyou², Andrew Schwartz³, David Stillwell²¹Stanford Graduate School of Business, ²Univ. of Cambridge; Northwestern Univ., ³Stony Brook Univ.**Decoding Morality from Everyday Language**

What people believe to be moral and immoral is often reflected in the language they use. While these beliefs vary, it is thought that there are core, latent moral constructs (e.g. Moral Foundations Theory). In the current research, we demonstrate that the structure of moral values in natural discourse can be modeled using distributed representations of morally relevant terms.

Morteza Dehghani¹, Joe Hoover¹¹usc**[4] How Learning Gives Rise to Morality****Room:** (HR) Regency VII, **Time:** 8:00 AM - 9:15 AM**Chair:** Leor Hackel, *Stanford Univ.***Co-Chair:** Jamil Zaki, *Stanford Univ.*

This symposium explores how learning gives rise to moral cognition and prosocial behavior. Speakers will discuss how children develop theories that guide their moral judgments; how adults learn whom to trust or with whom to reciprocate through interaction; and how societal institutions can lead citizens to internalize kindness and cooperation.

ABSTRACTS**Moral Learning Across Development**

Learning plays an especially powerful role in informing moral understanding during the first few years of life. In this talk, we present two studies examining the learning processes that guide children in viewing moral rules as shaping intergroup relations. Implications for moral learning across development will be discussed.

Lisa Chalik¹, Yarrow Dunham¹, Marjorie Rhodes²¹Yale Univ., ²NYU**Propagation of Economic Inequality through Reciprocity: A Reinforcement Learning Account**

People tend to repay others’ generosity, and this tendency helps kindness spread. Yet, using economic games, we find that people reciprocate more towards wealthy, as opposed to less wealthy, individuals, exacerbating economic inequality. Computational modeling linked this tendency to reward-based reinforcement learning—people’s focus on material gains when forming impressions of others.

Leor Hackel¹, Jamil Zaki¹¹Stanford Univ.**Stimulus Generalization as a Mechanism for Learning Who to Trust**

What drives one to trust strangers? We find generalization mechanisms underpin decisions to trust. Strangers resembling past individuals previously known to be trustworthy or untrustworthy are trusted more,

or less, respectively. These behavioral gradients were mirrored neurally: patterns of amygdala activity were elicited in a graded fashion when perceiving increasingly untrustworthy strangers.

Oriel FeldmanHall¹, Joseph Dunsmoor², Alexa Tompary³, Lindsay Hunter⁴, Alexander Todorov⁴, Elizabeth Phelps³

¹Brown Univ., ²Univ. of Texas, Austin, ³NYU, ⁴Princeton Univ.

Institutions and Individual Prosociality

We examined the impact of institutions on prosociality. S1 (N=2,412, MTurk) found a positive correlation between self-reported institutional quality and Dictator Game giving. S2 (N=516, MTurk) and S3 (N=260, Nairobi) showed causality by manipulating centralized punishment in a repeated Public Goods Game and measuring subsequent DG giving. These results support a spillover account of prosociality.

¹Yale Univ.

Professional Development

[5] Novel Techniques to Improve Social Psychological Research

Room: (MM) Atrium A, **Time:** 8:00 AM - 9:15 AM

Chair: Naoyuki Sunami, *Univ. of Delaware*

Co-Chair: Lisa Jaremka, *Univ. of Delaware*

Social psychology has received many criticisms: too many significant results, low replicability, and questionable research practices. This professional development session covers innovative best practices to tackle these issues and to improve replicability of research findings. Attendees will be invited to join a facilitated discussion.

Naoyuki Sunami¹, Alexa Tullett², Michèle Nuijten³, Sanjay Srivastava⁴

¹Univ. of Delaware, ²Univ. of Alabama, ³Tilburg Univ., ⁴Univ. of Oregon

[6] The Psychological Consequences of Technological Advances

Room: (MM) Atrium B, **Time:** 8:00 AM - 9:15 AM

Chair: Juliana Schroeder, *UC Berkeley*

Co-Chair: Alicea Lieberman, *UC San Diego*

This session addresses the psychological consequences of technology. Four papers show that: concern of social evaluation increases preference for technological (vs. human) interaction; the presence of technology dampens social experiences; media sophistication influences social connection and communicator impression; and internet search enhances decision confidence and enjoyment of experiences.

ABSTRACTS

Simulating Social Closeness: The Psychological Consequences of Communication Technologies

This research presents a framework on the psychological consequences of immersion in technology. Four experiments demonstrate that media that enhance access to vocal cues increase social immersion (psychological closeness), enhancing impression of and empathy towards a communicator. In turn, greater social immersion leads listeners to be more persuaded by and more inclined to help communicators.

Juliana Schroeder¹, Alicea Lieberman², On Amir²

¹UC Berkeley, ²UC San Diego

Phones at the Dinner Table: Does Smartphone Use Undermine Enjoyment of Face-to-Face Social Interactions?

How does being constantly connected to the internet through our smartphones shape the benefits we derive from interacting with others right across the table? In a field experiment at a restaurant, participants derived less enjoyment from a meal with friends/family when phones were present vs. absent. An experience sampling study revealed the same negative effects across diverse social situations.

Elizabeth Dunn¹, Ryan Dwyer¹, Kostadin Kushlev²

¹UBC, ²Univ. of Virginia

Hiding Behind Technology: When and Why People Prefer Technology Over Humans

The present research examines when and why people prefer experiences with technology versus humans. Four experiments show that a) people are more likely to adopt behavior tracking products driven by technology (versus humans) because they believe it reduces social evaluation, and b) people use technology-based tools to avoid face-to-face interactions when concerned about social evaluation.

Nathanael Fast¹, Roshni Raveendhran¹

¹Univ. of Southern California

Google-Induced Decision Confidence Improves Experiences

This research demonstrates that online search increases decision confidence by eliciting a false feeling of already knowing information found online.

Wifi: SPSPWifi | Password: SPSP2018

When choosing experiences (e.g., films), this Google-induced decision confidence has a self-fulfilling influence on chosen experiences: increased confidence in the quality of the selected option increases enjoyment when this option is experienced.

¹Univ. of Texas at Austin

Professional Development

[7] Contributing to the Marketplace of Ideas: How to Publish Op-Eds

Room: (MM) A601, **Time:** 8:00 AM - 9:15 AM

Chair: Eli Finkel, *Northwestern Univ.*

Co-Chair: Dave Nussbaum, *Univ. of Chicago*

Personality/social psychologists study topics that interest the general public—prejudice, relationships, etc. The quality of the discussion of these topics will be higher if we contribute to it, including by writing interesting, careful op-ed articles summarizing the relevant science. This workshop provides a nuts-and-bolts overview of how to publish op-eds.

Eli Finkel¹, Dave Nussbaum²

¹Northwestern Univ., ²Univ. of Chicago

Presidential Plenary

[8] Toward a More Broadly Generalizable Science of Psychology: Issues, Challenges, Opportunities

Room: (HR) Centennial I & II, **Time:** 9:30 AM - 10:45 AM

Chair: M. Lynne Cooper, *Univ. of Missouri*

From an early influential paper by David Sears (1986) to a more recent analysis by Joe Henrich and colleagues (2010), scholars have warned of the high costs to our field of over-reliance on limited and highly homogeneous samples, especially convenience samples of undergraduate students. Participants in this session will explore this issue, seeking to answer the following questions: To what extent is over-reliance on highly homogeneous and non-representative samples an ongoing concern in contemporary social/personality psychology? What are the costs of reliance on a narrow data base? What are key barriers to increasing the diversity of samples and what can be done to overcome these barriers in the short and long-term? Finally, are efforts to enhance sample diversity synergistic with or inimical to current efforts to address replicability concerns in our field? Speakers will offer brief introductory comments, followed by an extended question and answer period, drawing on both prepared and audience questions.

Steven Heine¹, Veronica Benet-Martinez², Yuichi Shoda³, Richard Lucas⁴

¹Univ. of British Columbia, ²Universitat Pompeu Fabra, ³Univ. of Washington, ⁴Michigan State Univ.

Professional Development

[9] Psychological Scientist? Yes! Author for the General Public? Huh ... Maybe?

Room: (HR) Centennial I & II, **Time:** 11:00 AM - 12:15 PM

Chair: Eli Finkel, *Northwestern Univ.*

Some psychologists complement their research endeavors by communicating findings to the general public. They may publish blogs, submit opinion pieces, or write trade books. The esteemed scientists on this panel consider why scholars might want to contribute to the broader marketplace of ideas, the pros and cons of doing so, and how the process works.

Elizabeth Dunn¹, Lisa Feldman Barrett², Daniel Gilbert³, Jonathan Haidt⁴

¹Univ. of British Columbia, ²Northeastern Univ., ³Harvard Univ., ⁴NYU-Stern

[10] Relationship Insecurities: Interpersonal Consequences and Possible Improvements

Room: (HR) Centennial III, **Time:** 11:00 AM - 12:15 PM

Chair: Francesca Righetti, *VU Amsterdam*

Relationship insecurities, either in the form of low self-esteem or insecure attachment style, represent a major vulnerability in close relationships. In the present symposium, we first illustrate the negative interpersonal consequences of having relationship insecurities and we then show ways in which partners can help insecure individuals to become more secure over time.

ABSTRACTS

I Gave Too Much: Low Self-Esteem and the Regret of Sacrifices

An experience sampling study with 130 couples shows that, although low self-esteem individuals sacrifice goals and preferences for their relationship as much as high self-esteem individuals, they tend to regret those sacrifices more with negative consequences for their psychological well-being.

Francesca Righetti¹, Mariko Visserman¹

¹VU Amsterdam

How Self-Esteem Influences both Perceptions and Actual Offerings of Social Support

In this work, we show that people with low self-esteem (LSEs) rate social support as less available and responsive to them than do people with high self-esteem (HSEs). Further, support providers admit giving lower quality support to LSEs than to HSEs. More broadly, these findings indicate that some of LSEs' relationship insecurities may indeed be warranted.

Denise Marigold¹, Justin Cavallo²

¹Renison Univ. College at Univ. of Waterloo, ²Wilfrid Laurier Univ.

Relationship-Protective Properties of Insecurity: Attachment Anxiety, Security-Regulation Goals, and Pro-Relationship Behavior

The current research demonstrates that attachment anxiety triggers security regulation goals in anxious people and their romantic partners. These security regulation goals, in turn, motivate pro-relationship behaviors that improve the satisfaction and security of both partners, lowering attachment anxiety over time. These processes may alleviate anxiety and offset some of its interpersonal costs.

Nadya Teneva¹, Edward Lemay¹

¹Univ. of Maryland

The Attachment Security Enhancement Model

The Attachment Security Enhancement Model (ASEM) examines relational processes that may reduce attachment insecurity. ASEM proposes different pathways for reducing anxiety versus avoidance. This talk will describe situations that trigger insecurity, partner buffering strategies, and processes that are theorized to bolster security in working models.

Ximena Arriaga¹, Madoka Kumashiro²

¹Purdue Univ., ²Goldsmiths, Univ. of London

[11] Moral Emotions and Reputation

Room: (HR) Centennial IV, **Time:** 11:00 AM - 12:15 PM

Chair: Andrew Vonasch, Univ. of North Carolina at Chapel Hill

ABSTRACTS

Death before Dishonor: Incurring Costs to Protect Moral Reputation

Predicated on the notion that people's survival depends greatly on cooperation, and reputation damage may preclude cooperation, four studies tested the hypothesis that people would make substantial sacrifices to protect their reputations. In lab, people chose pain and touching disgusting worms over reputation damage. In hypothetical situations they also chose jail, amputation, and death.

Andrew Vonasch¹, Tania Reynolds², Bo Winegard², Roy Baumeister²

¹Univ. of North Carolina at Chapel Hill, ²Florida State Univ.

Where is the Harm?: Emotions Drive Moralization and Its Consequences

We tested how emotion is both an antecedent and a consequence of moral conviction. Study 1 showed that emotion increased moral conviction about an issue related to the Flint water crisis, independent of harm, which also moralized, but only when paired with emotion. Study 2 found that emotion drives the negative effect of moral conviction on views of the Supreme Court after a controversial ruling.

Daniel Wisneski¹, Linda Skitka², Brittany Hanson²

¹Saint Peter's Univ., ²Univ. of Illinois at Chicago

To Push or Not to Push?: Responses in Moral Dilemmas Reveal Aversion to Harmful Actions Rather than Moral Preferences

Do moral dilemmas compare moral preferences or aversion to harmful actions, and how are emotions involved in these judgments? By modifying the structure of commonly used moral dilemmas, participants judged harmful actions worse than omissions, and self-reported emotional responses predicted these judgments, all of which was independent of the outcome being utilitarian or deontological.

Alan Leigh¹, Jessica Stansbury¹, Geoffrey Munro¹, Jared McGinley¹

¹Towson Univ.

Beyond Single-Slice Judgments: The Ebb and Flow of Moral Beliefs, Affect, and Risk Perception

What are the temporal dynamics of moral beliefs, affect, and other beliefs? This question has gone unanswered because research on morality has focused almost exclusively on the factors contributing to in-the-moment moral judgments. Four longitudinal studies suggest that moral beliefs and affect mutually influence each other; the relation of risk to the other two factors appears less stable.

Skylar Brannon¹, Bertram Gawronski¹

¹Univ. of Texas at Austin

[12] Advancing Social Cognitive Theories Through Mouse-Tracking

Room: (HR) Regency V, **Time:** 11:00 AM - 12:15 PM

Chair: Paul Stillman, Ohio State Univ.

We showcase research using mouse-tracking to advance novel theories of social cognition across the domains of self-control, attitudes, person perception, and prejudice. The talks highlight cutting-edge methods of analyzing mouse trajectories, as well as demonstrate how mouse tracking can be used in conjunction with other methods (e.g., fMRI) to build comprehensive theories of social cognition.

ABSTRACTS

Resisting Temptation: Tracking How Self-control Conflicts are Successfully Resolved in Real-Time

We use mouse-tracking to probe how we resolve self-control conflicts. Counter to impulse inhibition – where we first experience an automatic impulse towards the temptation before controlled processes can override – we find trajectories to be overwhelmingly continuous (rather than abrupt), suggesting dynamic evolution of these decisions. We further find that trajectories predict real decisions.

Paul Stillman¹, Melissa Ferguson²

¹Ohio State Univ., ²Cornell Univ.

The Route of Doubt: Using Mousetracking to Examine the Relationship between Self-Control and the Resolution of Ambivalence

I examine the role of self-control in ambivalence resolution by tracking mouse trajectories during evaluation. Trajectories of ambivalent attitude objects showed more deviation towards the non-chosen response. Self-control influenced the temporal unfolding of conflict, but not its magnitude, suggesting self-control offers a temporal rather than quantitative advantage in resolving conflict.

Iris Schneider¹

¹Univ. of Cologne

Looking the Part (to Me): Effects of Racial Prototypicality on Race Perception Vary by Prejudice

Categorizing race is a dynamic process in which racial faces with less prototypical features activate multiple race categories more so than do prototypical faces (racial prototypicality effect). Across two studies, we found that racial prejudice predicts higher racial prototypicality effects, likely because high prejudice perceivers experience more conflict to low prototypical other race faces.

Anne Krendl¹, Brittany Cassidy¹, Jonathan Freeman²

¹Indiana Univ., ²NYU

Social-Conceptual Knowledge Shapes Visual Perception of Gender and Emotion

We use mouse-tracking alongside fMRI and reverse correlation techniques to demonstrate the influence of social-conceptual knowledge on perception of a face's gender and emotion categories. We show that individual differences in conceptual knowledge can bias perception of gender and emotion categories, and cause emotion categories that are more conceptually similar to be perceived more similarly.

Jeffrey Brooks¹, Ryan Stolier¹, Jonathan Freeman¹

¹NYU

[13] New Insights into Maximizing, Rationality, and Decision Making

Room: (HR) Regency VI, **Time:** 11:00 AM - 12:15 PM

Chair: Nathan Cheek, Princeton Univ.

Co-Chair: Rebecca Shiner, Colgate Univ.

Combining perspectives from developmental, social, and personality psychology, we examine new causes and consequences of maximizing – striving to make the best choice. We explore how maximizing shapes well-being across the lifespan, how anticipated regret and abundant choice lead to maximizing, and implications of this research for understandings of rationality and decision making in everyday life.

ABSTRACTS

Age Differences in Maximizing Decision Strategies and Experienced Emotional Well-Being

Maximizing involves seeking the best decision option. It is more elaborate and regret-inducing than choosing an option that is "good enough." In a large national sample, we found that older (vs. younger) adults maximized less, which was associated with their better experienced well-being. We discuss findings in light of the psychology of aging and decision making.

Wändi Bruine de Bruin¹, Andrew Parker², JoNell Strough³

¹Leeds Univ. Business School, ²RAND Corporation, ³West Virginia Univ.

The Role of Anticipated Regret in Maximizing

Three studies found that maximizing is associated with greater anticipated regret—the expectation that one might regret a future decision. In Studies 1 and 2, maximizing was associated with self-reported anticipated regret in decision making and with greater experiences of anticipated regret in a lab situation. Study 3 manipulated anticipated regret and found it increased maximizing behaviors.

Rebecca Shiner¹, Amy Osserman¹, Sierra Larson¹

¹Colgate Univ.

More Choice, More Problems: Self-Expression, Maximizing, and Choice Overload

Four studies (total N = 1452) show that larger choice sets cause people to see choices as more self-expressive, which leads them to try harder to maximize, which in turn increases their decision difficulty and stress. Thus, the modern explosion of choice may be increasing people's tendency to maximize, potentially making even trivial choices seem important and overwhelming.

Nathan Cheek¹, Barry Schwartz²

¹Princeton Univ., ²UC Berkeley

Maximizing and Rationality

Research on decision making relies on the principles of rational choice theory for a normative standard. According to this standard, rational choosers act to maximize utility, or preference, or expected value. I argue that “maximization” is the wrong standard—both logically and psychologically. If we are to assess the “rationality” of decisions, we need a new normative standard.

Barry Schwartz¹

¹UC Berkeley

[14] Emotions & Politics: The Inextricable Link

Room: (HR) Regency VII, **Time:** 11:00 AM - 12:15 PM

Chair: Brett Ford, *Univ. of Toronto*

New research has revealed crucial links between how people predict and manage their emotions on one hand, and their political ideology and engagement on the other. In four talks, we discuss how ideology shapes affective forecasting, how people cultivate ideologically-consistent (and decrease inconsistent) emotions, and how emotion regulation may unintentionally interfere with political action.

ABSTRACTS**Did Voters Accurately Predict Their Emotional Responses to Trump? Affective Forecasts of the 2016 U.S Presidential Election**

Do voters accurately predict their emotional responses to elections? In a sample of registered voters in a swing state, there were high rates of both affective polarization and affective forecasting accuracy. Furthermore, individuals with strong emotional ties to one candidate were more accurate while individuals with a strong dislike of both candidates were less accurate forecasters.

Allison Troy¹, David Ciuk¹, Bridget Johnston¹, Berwood Yost¹

¹Franklin & Marshall College

Holding on to Hope (or Fear): Justifying One's Ideology through Emotions in Times of Tension

We examine whether believing that a certain emotion justifies one's ideology provides motivation to experience that emotion in response to new information in the context of intergroup conflict. In four studies across different contexts we show that one's belief that an emotion justifies her ideology drives her experience of that emotion in response to an ambiguous target or political event.

Eran Halperin¹, Ruthie Pliskin², Maya Tamir³, John Jost²

¹Interdisciplinary Center Herzliya, ²NYU, ³Hebrew Univ.

Gut Check: Reappraisal of Disgust Helps Explain Liberal-Conservative Differences on Issues of Purity

Disgust plays an important role in conservatives' moral and political judgments, helping to explain why conservatives and liberals differ on purity-related issues. Here we show how the emotion regulation strategy reappraisal drives the disgust-conservatism relationship, finding that disgust has less influence on liberals because they reappraise their disgust reactions more than conservatives.

Matthew Feinberg¹

¹Univ. of Toronto

Using Reappraisal to Regulate Negative Emotion after the 2016 U.S. Presidential Election: Does Individual Emotion Regulation Trump Collective Political Action?

Although negative emotion may spur democracy-improving political action, our findings suggest that the use of effective emotion regulation can alter these emotions and hinder such action. As such, our findings suggest that

individually adaptive self-regulation processes may help restore emotional well-being after upsetting political events, but may collectively cost us democracy-shaping action.

Brett Ford¹, Matthew Feinberg¹, Phoebe Lam², Iris Mauss³, Oliver John³

[15] Racial/Ethnic Diversification in the U.S.: Emerging Social Psychological Issues

Room: (MM) Atrium A, **Time:** 11:00 AM - 12:15 PM

Chair: James Rae, *Oxford Univ.*

Co-Chair: Allison Skinner, *Northwestern Univ.*

Drawing on diverse samples and methods, we present data on a range of social psychological issues emerging out of the increasing racial/ethnic diversity in the U.S. From perceptions of multiracial people, to bias against interracial couples, and threats posed by growing minority groups, we present a broad sampling of the social psychological issues that increasing diversity has surfaced.

ABSTRACTS**Excluding Our Future's Face: Testing the Predictions of Hypodescent and the Ingroup Over-Exclusion Effect in Categorizing Multiracial and Racially Ambiguous Targets**

Are multiracial and racially ambiguous individuals categorized based on minority group status (hypodescent), or generally excluded from the perceiver's ingroup (ingroup over-exclusion effect; IOE)? A systematic review suggests that hypodescent is not supported beyond the predictions of the IOE. Discussion will include implications for the increasingly racially diverse USA.

Danielle Young¹, Diana Sanchez², Kristin Pauker³, Sarah Gaither⁴

¹Manhattan College, ²Rutgers Univ., ³Univ. of Hawaii at Manoa, ⁴Duke Univ.

A Robust Implicit (but not Explicit) Bias Against Interracial Couples: Evidence from Whites, Blacks, and Multiracials

Large samples of White, Black, and Multiracial participants recruited from the U.S. reported no explicit bias against Black-White interracial couples, yet participants of all races showed evidence of implicit bias against interracial couples. Personal experience with interracial romance and contact with interracial couples predicted reduced bias – but did not eliminate it completely.

Allison Skinner¹, James Rae²

¹Northwestern Univ., ²Univ. of Oxford

Loathe Thy Neighbor: Whites' Perceptions of Threat in Response to Residential and School Diversity

Four studies disaggregate racial and ethnic minority groups to demonstrate that Whites perceive the population growth of African Americans, Latinos, and Asian Americans to be threatening in distinct ways. Furthermore, these threats mediate the effect of different increasing minority populations on Whites' desires to move out of a residential community.

Linda Zou¹, Sapna Cheryan¹

¹Univ. of Washington

Interactive Effects of Outgroup Exposure and Intergroup Contact on Implicit and Explicit Racial Bias

This work tested the interactive effects of outgroup exposure (e.g., living near racial outgroup members) and contact on implicit and explicit racial bias. Among White respondents, exposure to Black people was associated with more racial bias for those with low (but not high) contact with Black people. Among Black respondents, exposure to White people was associated with less racial bias.

[16] Perspective Tanking: The Perils of Putting Yourself in Others' Shoes

Room: (MM) Atrium B, **Time:** 11:00 AM - 12:15 PM

Chair: Rhia Catapano, *Stanford Univ.*

Co-Chair: Zakary Tormala, *Stanford Univ.*

A large body of research suggests that trying to understand others, whether through perspective taking, empathy, or face-to-face contact, can have a wide range of positive consequences for human interactions. This symposium explores when and why these processes can backfire, and offers remedies for how these backfire effects can be circumvented.

Perspective Taking and Self-Persuasion: Why “Putting Yourself in Their Shoes” Reduces Openness to Attitude Change

We find that when people take the perspective of someone who endorses a counterattitudinal view, they become less receptive to that view and show reduced attitude change following a counterattitudinal argument generation task. This effect is driven by value incongruence and, thus, is attenuated when people instead take the perspective of someone who disagrees yet has similar values.

Rhia Catapano¹, Zakary Tormala¹, Derek Rucker²

¹Stanford Univ., ²Northwestern Univ.

Perspective Mistaking: Accurately Understanding the Mind of Another Requires Getting Perspective, Not Taking Perspective

Perspective taking is widely presumed to increase interpersonal understanding. A series of 25 experiments found no evidence for this presumption. If anything, explicit perspective taking tended to decrease accuracy. Only getting another person’s perspective directly, through conversation, increased accuracy. Understanding another mind requires getting perspective, not taking perspective.

Nicholas Epley¹, Tal Eyal², Mary Steffel³

¹Univ. of Chicago, ²Ben Gurion Univ., ³Northeastern Univ.

Empathy from the Target’s Perspective

Although the objective of empathy is to help targets, it often has negative implications for their experience. Extensive evidence for backfiring effects raises the question of when empathy does actually benefit targets. Analyzing mechanisms underlying negative outcomes, we identify several potential circumstances for positive effects of empathy on targets that have preliminary empirical support.

From Glue to Gasoline: How the Same Processes that Normally Bind People Together, Tear them Apart during Competition

We propose that the same forces that normally produce cooperative responses get perverted in competitive contexts, generating vitriol instead. Perspective-taking, similarity, flattery, and face-to-face contact are often glue that bind people together. We propose that competitive contexts transform these processes into gasoline: they inflame rather than retard already aroused competitive impulses.

[17] Is the World Shrinking? Advancing the Psychological Study of Globalization

Room: (MM) A704, **Time:** 11:00 AM - 12:15 PM

Chair: Sarah Huff, Univ. of Michigan

How does globalization influence psychological processes? Does increasing diversity improve intergroup relations? How are immigrants expected to fit in with the dominant group? This symposium brings together four papers that use innovative methods to understand intercultural contact and multicultural identities in diverse cultural contexts, including the United States, Spain, and Singapore.

ABSTRACTS

Friend or Foe? The Impact of Bicultural Identity Integration and Dominant Group Attitudes on Intercultural Relationships

Across two studies we find that bicultural students with higher bicultural identity integration (BII) are more likely to approach dominant group members. In the second study, we test whether this relationship is moderated by dominant group attitudes, and find that BII buffers against negative attitudes. Implications for intercultural relationships will be discussed.

Sarah Huff¹, Deborah Rivas-Drake¹, Muniba Saleem¹

¹Univ. of Michigan

When Cultures Contaminate: Culture Mixing Activates the Disgust Evaluation System

We tested whether fusion of ingroup and outgroup cultural representations is perceived as contamination. Supporting our predictions, participants rated culturally-fused stimuli as more disgusting than the ingroup and outgroup representations presented simultaneously without contact. Furthermore, pure ingroup representations were perceived as contaminated even after foreign influences were removed.

Bobby Cheon¹, George Christopoulos¹, Ying-yi Hong²

¹Nanyang Technological Univ., ²Chinese Univ. of Hong Kong

Beyond Acculturation: ‘Meta-Acculturation’, Intergroup Hostility and Support for Collective Action across Three Cultures

Across three cultural contexts, majority member’s support for social policies and minority group collective action are predicted both by majority

member’s acculturation preferences, and by perceived acculturation preferences of minority members (‘meta-acculturation’).

Ana Urbiola¹, Emile Bruneau²

¹Univ. of Granada, ²Univ. of Pennsylvania

Perceived Discrimination and Intergroup Behaviors: The Role of Muslim and American Identity Integration

The buffering effect of identity integration in promoting positive intergroup outcomes was tested with Muslim American adolescents. For adolescents who perceived their American and Muslim identities as conflicted, discrimination was positively related to avoidance of majority group. However, this trend was not significant for those who perceived their dual identities as integrated.

Ian Hawkins¹, Eric Dubow², Fiona Lee¹, Rowell Huesmann¹

¹Univ. of Michigan, ²Bowling Green State Univ.

[18] Using Big Language Data for Measurement and Feedback

Room: (MM) A706, **Time:** 11:00 AM - 12:15 PM

Chair: Anneke Buffone, Univ. of Pennsylvania

Natural language processing on large-scale social media datasets gives insights into the psychological predictors of health and well-being and provides individualized and policy-informing feedback. We examine social media language correlates of stress in individuals and communities, manifestations of ADHD, depression and anxiety, and variation of well-being across U.S. counties.

ABSTRACTS

Stress in Individuals and Communities? Big Data-Driven Insights into Individual and Community-Level Stress

We explored linguistic patterns from Facebook language in 3000 participants to characterize individuals’ stress levels overall and by age/gender. We created a language-based predictive model for stress and applied it to U.S. counties using geotagged tweets. Last, we present our prototype for a social media application which provides personalized health feedback to survey respondents.

Anneke Buffone¹, Daniel Riegan¹, Johannes Eichstaedt¹, Salvatore Giorgi¹, Lyle Ungar¹, Martin Seligman¹

¹Univ. of Pennsylvania

Assessing ADHD from Tweets

We computationally analyzed timelines of 1,399 Twitter users with self-reported diagnoses of ADHD. Users with ADHD are found to post more often, to write more about losing control, change and to use more negations, hedging and swear words -- expressing themes of low self-efficacy, emotional dysregulation, self-criticism and substance abuse.

Sharath Chandra Guntuku¹, Lyle Ungar¹, Raina Merchant²

¹Univ. of Pennsylvania, ²Univ. of Pennsylvania Perelman School of Medicine

Detecting Depression on Facebook

We identified the Facebook language most associated with depression and anxiety across 16,507 users (Study 1) and derived a prediction model which we applied to 148 million geotagged tweets (Study 2). We demonstrate convergent validity with county-level mental health statistics. Findings are a first step toward language-based prediction algorithms to automatically identify those at risk at scale.

Johannes Eichstaedt¹, Lyle Ungar¹, Raina Merchant², Sharath Chandra Guntuku¹

¹Univ. of Pennsylvania, ²Univ. of Pennsylvania Perelman School of Medicine

Mapping Well-Being Using Twitter

We applied models trained to predict personality from Twitter language to a set of 37 billion geolocated tweets to show variations of well-being and personality across U.S. counties. Results are visualized via the “Well-Being Map” (<http://map.wwpb.org/>), an interactive, freely available tool to inform individuals and policy makers about their communities of interest.

Lyle Ungar¹, Kokil Jaidka¹, Johannes Eichstaedt¹

¹Univ. of Pennsylvania

Professional Development

[19] Modest Coiffers, Meaningful Contributions

Room: (MM) A707, **Time:** 11:00 AM - 12:15 PM

Chair: Christopher Chartier, Ashland Univ.

How can you maintain research productivity and make meaningful contributions to your field without substantial funding? We will discuss three strategies: 1) pursue small grant opportunities and efficiently use all lab, department, and institutional resources, 2) exchange research resources via the StudySwap platform, and 3) initiate or join large-scale collaborations such as the Many Lab projects.

Leigh Ann Vaughn¹, Christopher Chartier², Charles Ebersole³

[21] Preregistration: A Debate

Room: (HR) Centennial I & II, **Time:** 12:45 PM - 2:00 PM

Chair: Joseph Cesario, *Michigan State Univ.*

Preregistration is emerging as an important research practice. However, some argue that there are unacknowledged costs. In this debate, Vazire opens arguing for preregistration. Molden argues that, in many circumstances, costs outweigh benefits. Cesario responds forcefully in favor. Ledgerwood presents a nuanced case highlighting the importance of recognizing potential costs.

Simine Vazire¹, Daniel Molden², Joseph Cesario³, Alison Ledgerwood¹

¹UC Davis, ²Northwestern Univ., ³Michigan State Univ.

[22] Turk 2.0: Moving Crowdsourced Data Collection Beyond Traditional Survey Experiments

Room: (HR) Centennial III, **Time:** 12:45 PM - 2:00 PM

Chair: Jesse Chandler, *Mathematica Policy Research*

Co-Chair: Leib Litman, *TurkPrime*

Mechanical Turk (MTurk) is widely used by psychologists to collect survey, survey experiment and reaction time data, but the platform is capable of so much more. We illustrate and present best practices for methods that go beyond these uses of MTurk including large scale replications, longitudinal data collection, group experiments and naturalistic observation of workers economic activity.

ABSTRACTS

The Replicability of Heterogeneous Treatment Effects Estimates Across Samples

We reanalyze 32 original-replication study pairs (encompassing over 100,000 individual survey responses) with a particular focus on the heterogeneity of treatment effects. We assess the extent to which a model of heterogeneity in treatment response estimated on the original dataset predicts the heterogeneity in the replication experiment, and vice-versa.

Alexander Coppock¹, Thomas Leeper², Kevin Mullinix³

¹Yale Univ., ²London School of Economics and Political Science, ³Appalachian State Univ.

Predicting Worker Retention in Longitudinal Studies Conducted on Mechanical Turk

Longitudinal studies require retaining participants across data collection waves, adding uncertainty to study design. We use meta-analysis to estimate retention rates and identify practices that can increase retention rates substantially. We incorporate these findings into a tool that can estimate the most cost-effective means of achieving a desired T2 sample size.

Jesse Chandler¹, Jonathan Robinson², Leib Litman²

¹Mathematica Policy Research, ²Lander College

How to Successfully Conduct Interactive Experiments in Amazon Mechanical Turk

Interactive experimentation is a fundamental tool for conducting research in the social sciences. Yet, it has been underused on Amazon Mechanical Turk because of its logistical complexity and uncertain reliability. Here we show that basic behavioral patterns in the lab are replicable online, and that its implementation is accessible. We then provide measures to improve designs and retention.

Antonio Arechar¹, David Rand¹

¹Yale Univ.

The Gender Wage Gap in Anonymous Online Labor Markets

We examine for the first time whether the gender wage gap emerges on anonymous labor markets in which workers self-select into tasks. Data from over 150,000 unique Mechanical Turk workers who completed over 6 million HITs reveals a gender wage gap that persists across all ages, racial groups, and education levels. On average, tasks completed by women pay 6% less compared to tasks completed by men.

[23] After 'I Do': Factors Predicting Marital Outcomes

Room: (HR) Centennial IV, **Time:** 12:45 PM - 2:00 PM

Chair: Juliana French, *Florida State Univ.*

ABSTRACTS

"Holding Your Tongue" is Costly: The Ironic Consequences of Avoiding Conflict in Newlyweds

A study of newlywed couples explored the consequences of suppressing one's emotions in order to avoid conflict. Both suppression and conflict engagement predicted poor same-day outcomes, although the effects of conflict engagement were stronger. However, over time, the frequency of suppression predicted increases in depression and declines in intimacy whereas the frequency of arguments did not.

Erin Crockett¹, Lisa Neff², Marci Gleason²

¹Southwestern Univ., ²Univ. of Texas

When Similarity Matters More: An Idiographic Approach to the Moderation of Similarity Effects in Marital Satisfaction

We examined the effects of similarity in personality traits (PTs) and characteristic values (CVs) and if the level of a trait or importance of a value moderated the similarity effect on relationship quality. Results replicate research showing small similarity effects for PTs and larger similarity effects in CVs. Many similarity effects in CVs were moderated, but only two stable PTs were moderated.

Jonathan Beber¹, Andrew Larsen¹, Taraneh Mojaverian¹, Steve Carter¹

¹eHarmony

The Implications of Sociosexuality for Spouses' Marital Satisfaction and Dissolution

We used two longitudinal studies of newlywed couples to examine the associations between intimates' sociosexuality and both spouses' trajectory of marital satisfaction and the probability of divorce. Sociosexually unrestricted intimates reported lower initial marital satisfaction, had spouses who experienced steeper declines in marital satisfaction over time, and were more likely to divorce.

Juliana French¹, Emma Altgelt¹, Andrea Meltzer¹

¹Florida State Univ.

Fighting More or Loving Less?: Changes in Positive and Negative Behaviors in Early Marriage

This study used daily diary and observational data to examine changes in the positive and negative behaviors newlywed couples exhibit over the first three years of marriage. Contrary to popular belief, levels of negativity remained stable, whereas levels of positivity decreased. Thus, relationship declines in early marriage may be due to a loss of positivity rather than an increase of negativity.

Krystan Farnish¹, Lisa Neff¹

¹Univ. of Texas at Austin

[24] Merging Psychology and Robotics: Evidence for How Humans Perceive Robots

Room: (HR) Regency V, **Time:** 12:45 PM - 2:00 PM

Chair: Melissa Ferguson, *Cornell Univ.*

This symposium showcases new interdisciplinary findings on how humans perceive and interact with robots. We discuss whether people consider robots as ingroup or outgroup members, how easily people form and then change first impressions of robots, how people make moral assessments of human versus robot decisions, and what predicts the phenomenon of psychological anthropomorphism.

ABSTRACTS

Applying the Psychology of Intergroup Behavior to Human-Robot Interaction

Two studies tested manipulations predicted to improve attitudes about robots. People favored ingroup robots (teammates in a competitive game), by giving them less intense blasts of noise. Another study manipulated aspects of perspective taking, but found no effects compared to a control condition. There may be boundary conditions for the effects of manipulations that work with human outgroups.

Eliot Smith¹, Eliot Smith¹, Marlena Fraune¹, Steven Sherrin¹,

Selma Sabanovic¹

¹Indiana Univ.

Forming and Updating Implicit Impressions of Robots

How do people judge the traits and capabilities of robots? We provide the first evidence of how people form and then update implicit impressions of the competence of a robot. After repeated interactions with a seemingly autonomous robot, participants rapidly formed and then updated their implicit impressions of the competence of the robot.

Melissa Ferguson¹, Melissa Ferguson¹, Minae Kwon¹, Thomas Mann¹,

Ross Knepper¹

Evaluating the Morality of Human versus Robot Decisions

We examine whether people evaluate morally significant decisions by artificial agents (e.g., AI, robots) differently from the way they evaluate such decisions made by humans. We show that people blame artificial agents less than human agents for going against an authority-favored action because people see artificial agents less as embedded in a chain of command.

Bertram Malle¹, Bertram Malle¹, Matthias Scheutz², Stuti Thapa Magar¹

¹Brown Univ., ²Tufts Univ.

A Social Psychological Perspective on Human-Machine Interaction

The paper discusses theoretical and practical gains and challenges associated with interdisciplinary research in human-machine interaction. These issues will be illustrated by a review of the author's empirical work on psychological anthropomorphism and social robotics.

Friederike Eysel¹, Friederike Eysel¹

¹Bielefeld Univ.

[25] Beyond Willpower: Finding New Sources of Motivation to Improve Health

Room: (HR) Regency VI, **Time:** 12:45 PM - 2:00 PM

Chair: Elliot Berkman, *Univ. of Oregon*

Poor habits are at the core of public health crises, including obesity, heart disease, and lung cancer. Traditional models attribute these failures of self-regulation to lack of willpower, but do not specify what it is. This symposium unpacks this concept by describing new accounts of the psychological mechanisms underlying health behavior, which suggest targets for more sustainable interventions.

ABSTRACTS**A Value-Based Choice Model of Health Goals, Self-Control, and Behavior Change**

Models of health behavior and self-control are construct-rich but process-poor. For example, much is known about grit, executive function, and self-efficacy, and far less about the processes by which those constructs interact during health-related decisions. In this talk, we argue that value-based choice is a viable process model of health behaviors and opens new avenues for targeted intervention.

Elliot Berkman¹, Jordan Livingston¹, Lauren Kahn¹

¹Univ. of Oregon,⁶

Dietary Self-Control: An Expected Value Model

Drawing on research on self-efficacy and value-based decision-making, we show that healthiness of foods more strongly influences choice among subjects who have high outcome expectations – the belief that eating behavior impacts health – than subjects with low outcome expectations. However, efficacy expectations – beliefs about whether you can control eating behavior – do not influence food choice.

Daniel O'Leary¹, Carina Hausladen², Andero Uusberg¹, James Gross¹

¹Stanford Univ., ²Passau Univ.

Can Imagining Your Future Self Make You Healthier?

As people live longer, eating right and exercising grow increasingly important. Does making the future vivid promote these behaviors? In Study 1, participants who reported vivid future selves reported healthier habits; in Study 2, when future selves were made vivid, participants expected to increase these behaviors. Thinking about the future may increase behaviors associated with long-term health.

Sarah Raposo¹, Tamara Sims¹, Laura Carstensen¹

¹Stanford Univ.

Training in Cognitive Strategies Reduces Unhealthy Food Choice, Eating, and Cigarette Smoking

Cigarette smoking and obesity are public health concerns. Cognitive strategies can reduce craving for food and cigarettes and modulate neural activity associated with craving. Across 5 studies here, we show that brief training in cognitive strategies (compared to control training) improves food choices, reduces unhealthy eating, and reduces cigarette smoking up to one month post-training.

Hedy Kober¹

¹Yale Univ.

[26] Moving Beyond Diversity to Inclusion: Building Inclusive Schools and Workplaces

Room: (HR) Regency VII, **Time:** 12:45 PM - 2:00 PM

Chair: Erika Hall, *Emory Univ.*

Co-Chair: Sarah Townsend, *Univ. of Southern California*

Diversity and inclusion efforts are commonly touted as ways to support underrepresented minorities in schools and workplaces. Although both are necessary, diversity – groups' numerical representation, is often trumpeted to the exclusion of inclusion – whether groups' ideas and values

are embraced. Our research demonstrates the critical role of inclusion in promoting minority well-being.

ABSTRACTS**Organizational Pro-diversity Messages: Unintended Consequences for Majority and Minority Groups**

We investigated whether an organization's pro-diversity rhetoric influences the psychological and cardiovascular responses of White and Latino men in a hiring simulation. Results indicate that simply mentioning pro-diversity values (vs. not) leads to negative consequences for White job-seekers, but does not strongly influence the cardiovascular or psychological responses for Latino job-seekers.

Tessa Dover¹, Brenda Major¹, Cheryl Kaiser²

¹UC Santa Barbara, ²Univ. of Washington,⁶

Authenticity as a Necessary Catalyst for Numerical Diversity's Effectiveness

In the present research, we explore the relative strength of diversity vs. inclusion efforts for truly fostering a psychologically safe environment for underrepresented minorities. Using a sample of 486 Black, Latino, and Asian minority businesswomen and men, we find that authenticity is a necessary catalyst for diversity to effectively decrease minorities' experiences with discrimination.

[29] The Importance of Social Psychological and Personality Research in the Age of Trump

Room: (HR) Centennial I & II, **Time:** 2:15 PM - 3:30 PM

Chair: Kerry Kawakami, *York Univ.*

ABSTRACTS

Justifying Social Inequalities in the Age of Trump: The Role of Social Darwinism

Americans who justify the gender, racial, or class system (i.e., social hierarchies) were respectively also more likely to reject Hillary Clinton in favor of Donald Trump (Study 1); reject the Black Lives Matter movement (Study 2); and support Trump's proposed budget cuts that harm the poor (Study 3). But why are social hierarchies deemed worthy of defense? Inspired by the Trump campaign, we designed a measure of social Darwinism: "survival of the fittest" beliefs that humans, like plants and animals, must ruthlessly compete for success. In each study, social Darwinism explained significantly more variance when predicting gender, race, or class system justification than social dominance orientation and gender, race, or class essentialism, whether or not we adjusted for demographics (e.g., gender, political identity, religious identity, and SES). In summary, social Darwinism legitimizes viewing social hierarchies as just and fair, and justifying social hierarchies motivates responses that perpetuate them. In concert, the findings advance backlash theory and illuminate the appeal of Trumpism.

¹*Rutgers Univ.*

From Apprentice to President: The Role of Parasocial Connection in the Election of Donald Trump

The election of Donald Trump came as a surprise to many pundits and citizens, including his own supporters (Norman, 2016). We conducted a study of 521 voters to examine the role parasocial bonds (i.e., one-sided psychological relationships) played in his surprising victory. Although most politicians fiercely compete for precious media time and work hard to form a likable yet authoritative impression - often with mixed results - Trump had 14 seasons of carefully edited primetime exposure to imprint a presidential impression on American minds. We suggest that these programs created an image of Trump as a presidential, led to the formation of parasocial bonds, and influenced the presidential campaign. As predicted, the more participants were exposed to Trump, both through his TV shows and other media, the more likely they were to have a parasocial bond with Trump. That bond predicted having a positive attitude towards Trump, believing his promises, disregarding his inflammatory statements, and even voting behavior. In addition, these effects were particularly strong for those whose votes were a surprise in the election: people who did not identify with the Republican Party. This research suggests that Trump's election might have been influenced by his appearance on reality TV. Indeed, given the close election, it is possible that Trump would not be President if he were not on The Apprentice first.

Shira Gabriel¹, Elaine Paravati¹, Melanie Green¹

¹*Univ. at Buffalo, SUNY*

Low Information Democracy

Thomas Jefferson once famously observed that any nation expecting to be both ignorant and free expects what never was and never will be. Yet surveys of American citizens have shown for decades that voters are largely uninformed. In 2012, for example, one survey found that 35% of native-born citizens would fail a naturalization civics exam. More important, this voter ignorance is best described as being not uninformed but misinformed, in that voters harbor false factual beliefs about government and social conditions that increasing correlate with partisanship. Voters do not disagree on priorities for their country as much as they now argue about the ground truth taking place in their country. Voters also suffer the

Dunning-Kruger effect, mistakenly thinking themselves as more informed to the extent they endorse both false and true political facts. I discuss the implications of misinformed "low information" voters for political debate, civic action, and classic arguments that democracy can survive the shortcomings of its citizens.

David Dunning¹

¹*Univ. of Michigan*

Donald Trump, Narcissism, and the U.S. Presidency

Narcissism has been a recurring theme throughout the campaign and presidency of Donald Trump. Narcissism appears to potentially explain the rise and governance of President Trump in at least four ways. First, work on narcissism and emergent leadership describes the ability of assertive, narcissistic leaders like Trump to emerge in free-form leadership selection both because of a desire to lead and extraversion. Second, the association of narcissism with emerging media forms (e.g., social

media use, reality television, and trolling), in conjunction with Trump's masterful disintermediation of the corporate media, may explain part of Trump's campaign success. Third, the Energy Clash Model of narcissism and leadership (Sedikides & Campbell, 2017) describes well the intense and ongoing conflict between Donald Trump and the establishment (e.g., mainstream politicians, deep state). Ironically, this clash has included one soft coup attempt against Trump via the 25th amendment based on Trump's "malignant" narcissism. Fourth and finally, the complex outcomes experienced by previous narcissistic U.S. presidents are discussed (Watts et al., 2013).

W. Keith Campbell¹

¹*Univ. of Georgia*

The Prevalence and Potency of Blatant Dehumanization in Trump's America

Even in an otherwise atypical presidential election cycle, one of the features that stood out in the 2016 campaign was the rhetoric used by Donald Trump towards members of minority groups such as Muslims and Mexican immigrants, and, in particular, its overtly dehumanizing nature. Surprisingly to many, Trump's comments and policy positions towards minorities appeared to help rather than hurt his presidential prospects. Here, we examine the prevalence of blatant dehumanization towards minorities among Americans, and its unique association with support for Trump and his policies (e.g., travel ban; wall between the U.S. and Mexico). We employ a variety of samples (including a large sample of alt-right adherents) and methodologies (correlational, longitudinal, and experimental designs; reverse-correlation technique). We further consider how being on the receiving end of overt dehumanization affected members of minority groups (i.e., Muslim and Latino residents of the U.S.), and examine the potential for dehumanization to contribute to vicious cycles of reciprocal intergroup hostility. We conclude by discussing recent efforts at developing interventions.

[30] Interpersonal Consequences of Existential Threats: Punishment, Unethical Behavior, Religiosity, and Stereotyping

Room: (HR) Centennial III, **Time:** 2:15 PM - 3:30 PM

Chair: Anyi Ma, *Duke Univ.*

Co-Chair: Krishna Savani, *Nanyang Business School*

This symposium investigates how existential threats influence people's interpersonal judgments and behaviors. People exposed to high variability are more likely to punish unethical behavior; people facing uncertainty are more likely to engage in unethical behavior; people experiencing threats to their sense of control become more religious and are more likely to engage in gender stereotyping.

ABSTRACTS

Psychological Consequences of Exposure to Variability: Harsher Ethical Judgments

Increased variability is one of the defining features of the 21st century, observed in diverse domains (e.g., temperature, rainfall, stock prices, currency rates). Six experiments found that people exposed to high environmental variability (e.g., in temperature and rainfall) experience a greater sense of societal threat, and are thus more likely to punish others who commit unethical behaviors.

Yu Ding¹, Krishna Savani²

¹*Columbia Business School*, ²*Nanyang Technological Univ.*

Punishment Contingency and Unethical Behavior: The Roles of Uncertainty and Empathy

We suggest that uncertainty crucially influences unethical behavior in the form of lying. Across three studies we find that uncertain (i.e., non-contingent) punishment, as compared to predictable (i.e., contingent) punishment, increases lying/unethical behavior, and that these effects are mediated by perceptions of uncertainty.

A Control-Based Account of Stereotyping

Drawing from Compensatory Control Theory, we posit a novel account of stereotyping motivated by a desire to re-establish control. Across 5 studies, we found that lower control was associated with greater stereotyping across cultures and over time. The link between control and stereotyping was mediated by greater need for structure and moderated by interdependent self-construal.

[31] Beyond the Spouse: Support from Nonspousal Relationships in Couples

Room: (HR) Centennial IV, **Time:** 2:15 PM - 3:30 PM

Chair: Lucy Shen, *Univ. of California, Los Angeles*

Co-Chair: Benjamin Karney, *UCLA*

When married people seek support, they naturally turn to their spouses, the most influential source of support in their lives. In satisfying relationships, does anyone else matter? This symposium brings together four lines of research that clarify how support from relationships outside the marriage benefits individual and dyadic well-being, over and above the effects of the spouse.

ABSTRACTS

Spousal Support for Fears About Aging and Goal Strivings Predicts Wellbeing in Older Adulthood

We identified behaviors responsible for the effects of social relations on health in older adulthood, focusing on spousal support for older adults' fears about aging and goal strivings (N= 250). Analyses of health outcomes assessed at two annual follow-ups indicated that effective spousal support promotes goal progress and attenuates the negative effects of fears about aging on health.

Who You Gonna Call? Supporter-Selection and Effectiveness in Support Networks

Support networks typically include 7 to 11 supporters, including family, friends, and more. Our research addresses (a) the relative frequency with which people seek support from supporters in different roles, (b) the effectiveness of support from supporters in these roles, and (c) the size of the association between how often a role is sought and the effectiveness of the support provided.

Lara Kammrath¹

¹Wake Forest Univ.

Sources of Social Support for Couples: Is a Supportive Partner All You Need?

Although the spouse is a crucial source of support for married people, support from outside the couple may further promote successful marriages. Longitudinal data from low-income newlyweds supports this idea, revealing concurrent and prospective positive associations between nonspousal support and marital satisfaction, over and above associations with spousal support alone.

[32] New Frontiers in Social Psychoneuroimmunology: Inflammation, Cognition, and Behavior

Room: (HR) Regency V, **Time:** 2:15 PM - 3:30 PM

Chair: Sarah Hill, *Texas Christian Univ.*

Co-Chair: Anastasia Makhanova, *Florida State Univ.*

This symposium presents emerging interdisciplinary research on the role of inflammation as both an antecedent and a consequence of social psychological processes. Our speakers will present exciting new evidence linking inflammatory processes to our engagement in close relationships

(both as a cause for our withdrawal and a consequence of it), impulsivity, and implicit prejudice.

ABSTRACTS

Integrating Psychoneuroimmunology into Social Psychological Research

The past 30 years has seen an explosion of research in the field of Psychoneuroimmunology (PNI). However, social psychologists have only recently started integrating ideas from PNI into their own work. The goal of this talk is to introduce the field of PNI to social psychologists, and suggest a variety of novel hypotheses that can be investigated by merging both fields.

Lisa Jaremka¹

¹Univ. of Delaware

Socioeconomic Status, Family Negative Emotional Climate, and Anti-Inflammatory Gene Expression among Youth with Asthma

We test the effects of socioeconomic status (SES) on expression of NR3C1, an important anti-inflammatory gene, via family emotional climate observed naturalistically in a sample of asthmatic youth and their parents. Although SES did not directly affect NR3C1 expression, we find a significant indirect path from SES to family negative (but not positive) emotional climate to NR3C1 expression.

Inflammation, Impulsivity, and the Problem of Delayed Rewards

Life history theory predicts that the preference for immediate versus distal rewards should respond to ecological cues of mortality risk, with more impulsivity favored when mortality risk is high. We examined if inflammation – an internal contributor to all-cause mortality – also modulates these preferences. Results revealed that inflammation – both in vivo and in vitro – predicted impulsivity.

[33] The Other Three Dimensions: Accounting for Space in Psychological Research

Room: (HR) Regency VI, **Time:** 2:15 PM - 3:30 PM

Chair: Joe Hoover, *Univ. of Southern California*

Co-Chair: Jesse Graham, *Univ. of Utah*

Human beings spend every moment of their natural lives in four dimensions, yet three of these dimensions – that is, space – are rarely considered by Personality and Social psychology. In this symposium, four sessions introduce the audience to: (1) what it might mean to account for space in Personality and Social psychology research; (2) how it can be accomplished; and (3) why it is important.

ABSTRACTS

Understanding People Through Space: Methodologies, Challenges, and Lessons Learned

In a series of studies aimed at understanding the relationships people have with their daily environments, I will demonstrate how people select and manipulate spaces to best fit their identities and daily goals. I will also highlight methodologies used, challenges and solutions for this type of data collection, and discuss how examining spaces can further understanding of psychological processes.

Lindsay Graham¹

¹Univ. of California, Berkeley

Data Analytic Techniques for Evaluating Psychological Phenomena Across Space

Research suggests that there are geographical differences in various psychological phenomena. However, much of the research has relied on analytic techniques that are suboptimal for working with spatial data. This presentation will describe some of the problems faced when working with spatial data and discuss analytic techniques for addressing them.

Peter Rentfrow¹, Tobias Ebert², Markus Jokela³

¹Univ. of Cambridge, ²Univ. of Mannheim, ³Univ. of Helsinki

How Ambient Cues Facilitate Ideological Segregation

This presentation summarizes a series of studies showing how liberals and conservatives are drawn to distinct communities. Liberals and conservatives pick these communities, in part, based on seemingly apolitical community characteristics that reliably differentiate liberal and conservative communities. These ambient community cues facilitate growing ideological segregation.

¹Univ. of Southern California

[34] Challenges and Advances in Research on Intergroup Violence

Room: (HR) Regency VII, **Time:** 2:15 PM - 3:30 PM

Chair: Mengyao Li, Max Planck Institute for Research on Collective Goods

Using diverse methodologies and in different contexts, this symposium explores various challenges in addressing intergroup violence (e.g., preferences for outgroup aggression, asymmetrical reactions between involved parties, the difficulty of studying violence in the lab). Despite these challenges, we also discuss the potential remedies for intergroup violence (e.g., outgroup humanization).

ABSTRACTS**Modeling Latent Preferences for Harming the Out-Group**

Numerous experiments indicate that people almost always prefer to avoid harming out-groups if they can benefit their in-group without doing so. We had participants complete a probabilistic decision-making task and used a reinforcement-learning approach to model their latent preferences. Across 3 experiments participants were far less averse to harming out-groups than previous experiments suggest.

Mina Cikara¹, William Moore III¹

¹Harvard Univ.

Close or Distant Past? The Role of Temporal Distance in Responses to Intergroup Violence from Victim and Perpetrator Perspectives

We demonstrated two temporal asymmetries in intergroup violence: 1. Whereas increased subjective temporal distance predicted more negative intergroup attitudes among perpetrator groups, it predicted more positive attitudes among victim groups; 2. Perpetrators perceived the violent past as more temporally distant than did victims. These effects were further moderated by ingroup glorification.

[36] Culture in a Globalizing World

Room: (MM) A704, **Time:** 2:15 PM - 3:30 PM

Chair: Kaidi Wu, Univ. of Michigan

How should we think about culture in an era of globalization? Cultural research has long focused on fixed cross-national differences. However, this formulation alone is increasingly insufficient. This symposium highlights diverse perspectives on the conceptualization of culture by examining intercultural perception, cultural change, reactions to intercultural contact, and cultural (dis)fluency.

ABSTRACTS**West is the... Best! Intercultural Perception in a Globalizing World**

We developed and validated the West Is The... Best (WIT-B) and East Is The... Best (EIT-B) scales to assess intercultural perception. Across studies, European Americans endorsed WIT-B to a greater extent than EIT-B, but so did Chinese. Findings suggest the transmission and adoption of Western values as integral parts of globalization—a globalizing culture reflects a globalizing Western culture.

Kaidi Wu¹, Edward Chang¹

¹Univ. of Michigan

Cultural Change in a Global Community: The How and the Why

Political events across the globe highlight the fluidity of norms and values. We discuss recent insights about temporal shifts in cultural values, attitudes, and behavior, shedding light on the processes and antecedents of cultural change. We suggest that the integration of evolutionary and cultural perspectives on societal change informs what brings about cultural shifts and how to predict them.

Igor Grossmann¹, Henri Santos¹

¹Univ. of Waterloo

How Does Culture Matter in the Age of Globalization?

Globalization has made exposure to multiple cultures not only possible, but often necessary and unavoidable. This presentation focuses on how people react and adapt to increasing globalization and multiculturalism are shaped by cultural experiences. Our discussion sheds light on the recent increased backlash against rising globalization and cultural diversity.

Ying-yi Hong¹, Bobby Cheon²

¹The Chinese Univ. of Hong Kong, ²Nanyang Technological Univ.

Cultural Fluency Means All is Right with the World

Being part of a culture means knowing what to expect. People experience cultural disfluency when observed reality does not match cultural expectations. Across 7 experiments in Israel, China and the U.S., cultural disfluency undermined inderence, the feeling that things are as they ought to be, which consequently reduced essentialist beliefs about cultures and the world.

[37] Beyond Pathogen Avoidance: The Many Facets of Disgust

Room: (MM) A706, **Time:** 2:15 PM - 3:30 PM

Chair: Hannah Bradshaw, Texas Christian Univ.

This symposium provides a new perspective on disgust by focusing on its social functions and cognitive implications. Talks consider the role disgust plays in regards to tolerance of ambiguity, mindfulness, and coalition formation as well as highlighting the importance of disgust as a signal of desirable interpersonal characteristics to others.

ABSTRACTS**Disgust Regulates Consumption, Contact, and Coitus**

Disgust evolved to navigate three separate ancestral challenges: what to eat, what to touch, and with whom to have sex. This model of disgust is new: there is no animal reminder disgust, pathogen disgust is conceived as two separate adaptations, and there is no proper domain of moral disgust.

Instead, disgust is proposed to be just one emotion used by moral systems guiding coalitional behaviors.

Debra Lieberman¹, Joseph Billingsley¹, Carlton Patrick¹

¹Univ. of Miami

Disgusting Immorality: Moral Disgust Relates to Indirect Aggression against Moral Offenders

In response to moral offenses, people often report feeling disgusted. Is this disgust equivalent to or distinct from anger? Four studies favor functional distinctions between the two emotions. Disgust increases when moral offenses target another person rather than oneself, but anger decreases. Further, anger relates to direct aggression, whereas disgust relates to lower-cost, indirect aggression.

Invited Session

[40] Block, Campbell, & Distinguished Scholar Addresses

Room: (HR) Centennial I & II, **Time:** 3:45 PM - 5:00 PM

Chair: Lisa Jaremka, *Univ. of Delaware*

Winners of the Block, Campbell, and Distinguished Scholar Awards will deliver their addresses.

Jack Block Awardee: Oliver John, *UC Berkeley*

Donald T. Campbell Awardee: Daniel Gilbert, *Harvard University*

Distinguished Scholar Awardee: Teresa Amabile, *Harvard Business School*

[41] Improving Diversity in Organizations: Translating from Lab to Field

Room: (HR) Centennial III, **Time:** 3:45 PM - 5:00 PM

Chair: Edward Chang, *Univ. of Pennsylvania*

This symposium tests social psychological insights in real workplaces to determine what works and what doesn't in improving diversity in

organizations. We present rigorous empirical evidence testing the effects of diversity training, institutional access, discourse on the "business case" for diversity, and social psychological theories of bias at improving diversity in organizations.

ABSTRACTS

A Field Experiment Testing the Impact of Gender Bias Training on Attitudes and Decisions

A field experiment (n=3017) offers evidence that diversity training can work. We tested an hour-long training about stereotypes and bias versus a placebo training. Our treatment significantly decreased modern sexism (p<0.001), driven entirely by men and international employees. Women in the U.S. showed no attitudinal change but were the only group to significantly improve their behavior (p<0.01).

Edward Chang¹, Katherine Milkman¹, Cade Massey¹, Angela Duckworth¹, Adam Grant¹, Dena Gromet¹

¹Univ. of Pennsylvania

Access is Not Enough: Considering Social Class Diversity & Institutional Inclusion

Considering how social class shapes inclusion may improve diversity efforts. Expanding institutional access is a popular D&I approach; however, our longitudinal data suggest those who do gain access continue to be hampered by classed cultural expectations over time. We must broaden organizational cultures to ensure those from diverse social class backgrounds reap similar institutional rewards.

L Taylor Phillips¹, Nicole Stephens², Sarah Townsend³, Sebastien Goudeau⁴

¹New York Univ., ²Northwestern Univ., ³Univ. of Southern California, ⁴Universite de Poitiers

Does the "Business Case for Diversity" Work or Hurt?

Organizations often tie diversity to benefits for their bottom-line. We define this as an instrumental diversity ideology and find in 2 studies (N=545) that instrumental (vs. non-instrumental) messages undercut stigmatized individuals' sense of belonging, thereby decreasing their attraction to organizations using them. Instrumentality may thus paradoxically undermine efforts to advance diversity.

Oriane Georgeac¹, Aneeta Rattan¹

¹London Business School

The Face of Psychology Departments Worldwide: How Diverse are We Really?

We leverage insights from social psychological theories of bias to interrogate the claim that psychology as a field is diverse. Analysis of top 30 domestic and international psychology departments reveal that gender and ethnic disparities continue to exist. Moreover, consistent with STEM "techy/fuzzy" gender stereotypes, faculty are balkanized by sub-discipline.

¹Columbia Univ.

[42] Who Persuades Others? Individual and Role-Based Differences in Social Influence

Room: (HR) Centennial IV, **Time:** 3:45 PM - 5:00 PM

Chair: Alexander Maki, *Vanderbilt Univ.*

Co-Chair: Kaitlin Raimi, *Univ. of Michigan*

Most persuasion research focuses on authority-based influence attempts. Yet persuasion often happens outside of these formal efforts. So who tries to persuade others? And how effective are they? Four talks explore the many faces of social persuasion, including how health attitudes, moral exporting, belief superiority, and extraversion are linked to different types of social persuasion approaches.

ABSTRACTS

Examining How Parents and Teens Influence Each Other's Health Behaviors Using a Dyadic Approach to the Theory of Planned Behavior

We extend the Theory of Planned Behavior to a dyadic context and, using a national sample of 1646 parent-teen dyads, show how the beliefs/intentions that teens and parents hold towards physical activity and fruit/vegetable consumption not only influence their own behaviors, but also each other's behaviors. We elaborate on the importance of relational theories in social influence and health research.

Keven Joyal-Desmarais¹, Richie Lenne¹, Lisa Auster-Gussman¹, Chloe Huelsnitz¹, Jeffrey Simpson¹, Alexander Rothman¹

¹Univ. of Minnesota,⁶

Pressuring Others to Become Green: Environmental Moral Exporting and Peer Influence

This research examines people high in environmental moral exporting and their efforts to influence the environmental actions of others. Moral exporters were high on extraversion and preferred two-way dialogues between individuals. Environmental moral exporting, compared to environmental attitudes, was a stronger predictor of efforts to influence others via modeling, conversation, and persuasion.

Alexander Maki¹

¹Vanderbilt Univ.

Not Persuadable but Trying to Persuade: Belief Superiority and Peer Influence

Belief superiority—the belief that one's opinions are more correct than alternatives—predicts attempts to persuade others and avoid being persuaded. The belief superior are more likely to post their views online (Study 1), selectively attend to congenial information (Study 2), and argue with their romantic partners (Study 3). Thus, the belief superior often attempt to persuade, but in flawed ways.

Kaitlin Raimi¹, **Katrina Jongman-Sereno**², **Mark Leary**³, **Michael Hall**¹

¹Univ. of Michigan, ²Harvard Univ., ³Duke Univ.

The Extravert Advantage: How and When Extraverts Influence Rapport within a Social Interaction

Extraverts are better than introverts at building rapport, but it has been unknown what they do behaviorally to influence affiliation. We find that extraverts mimic their interaction partner more when they have an affiliation goal and mimicry mediates the link between extraversion and rapport. This shows that extraverts influence their interaction partners through mimicry when it matters most.

Tanya Chartrand¹, **Korrina Duffy**²

¹Duke Univ., ²NIH

[43] Personality (Change) and Well-being

Room: (MM) Atrium A, **Time:** 3:45 PM - 5:00 PM

Chair: Maxwell Barranti, Univ. of Toronto Mississauga

ABSTRACTS**A Meta-Analysis of Research Examining the Intersection between Disease Avoidance and Personality**

This study provides a meta-analysis of 21 published and unpublished studies using over 32,000 participants to evaluate how individual differences in disease avoidance are correlated with personality. Consistent with behavioral immune system models, greater disease avoidance was associated with lower openness to experience and extraversion, and greater conscientiousness and neuroticism.

Benjamin Oosterhoff¹, **Natalie Shook**²

¹Baylor College of Medicine/Texas Children's Hospital, ²West Virginia Univ.

The Effects of Induced Extraverted Behavior on Personality Change and Well-Being

Two experiments explored whether people can increase their extraverted behavior over one or three weeks and the consequences of such changes. Both studies provide evidence that increases in extraverted behavior cause boosts in well-being and in self-reported extraversion. Openness-related behaviors produced similar effects in Study 2. Thus, personality change may be easier than previously thought.

¹UC Riverside

The Psychological Topography of Switzerland: Person-Environment-Fit in Personality Predicts Quality of Life Over Time

Building on regional clustering of Big Five traits in Switzerland (N = 8,414), personality-fit with one's geographical region was shown to predict quality of life over time. Participants with moderate Euclidian distance from, but high profile correlations with their environment's profile reported the greatest well-being. Thus, we point to the merit of fit constructs in psychogeographical contexts.

Friedrich Götz¹, **Peter Rentfrow**¹

¹Univ. of Cambridge

Is Personality Change Adaptive?

We utilize response surface analysis to answer if personality change is associated with wellbeing, if change in one direction is ideal, and if there is an optimal amount of change. Participants (n = 2316) reported about their Big 5 personality traits across 10-year intervals. For some traits stability is best for wellbeing, while for others there is an optimal amount of change.

Maxwell Barranti¹, **Norhan Elsaadawy**¹, **Erika Carlson**¹

¹Univ. of Toronto Mississauga

[44] The Secret World of Words: Psychological Insights from Language

Room: (MM) Atrium B, **Time:** 3:45 PM - 5:00 PM

Chair: Jonah Berger, Wharton School, UPenn

Language is an integral part of our lives. Whether thinking, speaking, or writing, the words we use can provide important insight into where we've been, who we are, and how we might change in the future. This session integrates a variety of perspectives to showcase how natural language processing provides insight into individual differences, social processes, and cultural dynamics more broadly.

ABSTRACTS**Cultural Shifts in the Presidents We Choose**

Computerized text analysis of Donald Trump's language reveals that he is the lowest of all presidents in analytic thinking and highest in confidence or clout. Rather than being an anomaly, he is part of a historical trend spanning over a century. Similar patterns exist among leaders in other countries. Changes in the media and the electorate are possible explanations.

James Pennebaker¹, **Kayla Jordan**¹

¹UT Austin

Quantifying Forward Motion in Naturalistic Thought and its Link to Creativity

Creativity requires moving forward and escaping the constraints of the past. We assess whether more creative people have, at baseline, more forward-moving streams of consciousness—assessed via the latent semantic analysis of words generated by free association. Seven studies reveal that those with higher forward flow perform better on divergent creativity problems and have more creative careers.

Kurt Gray¹

¹UNC at Chapel Hill

Enculturation Trajectories: Language, Cultural Adaptation, and Individual Outcomes in Organizations

How can we measure cultural fit and what are the consequences of enculturation for individual outcomes? We use natural language processing and 10M internal emails to analyze employees' enculturation trajectories. Results demonstrate that rapid adaptation reduces the risk of being fired, but not quitting, and that a decline in fit for people who had already enculturated portends quitting.

Amir Goldberg¹, **Sameer Srivasta**², **Govind Manian**¹, **Christopher Potts**¹

¹Stanford Univ., ²UC Berkeley

Atypicality and Cultural Success

Why do things catch on? While some have argued that success is random, we suggest that how similar cultural items are to their peers plays an important role. Textual analysis of thousands of songs demonstrates that songs with more differentiated lyrics are more popular. This relationship is weaker in genres where lyrics matter less (i.e., dance) or where differentiation matters less (pop).

¹Wharton School, UPenn, ²Wilfrid Laurier Univ.

[45] Antecedents and Consequences of Economic Objectification

Room: (MM) A701, **Time:** 3:45 PM - 5:00 PM

Chair: Eva Krumbhuber, Univ. College London

Co-Chair: Luca Andrighetto, Univ. of Genoa

Economic objectification is triggered by multiple factors that are intrinsic to work activities. Similarly, a focus on the economic or instrumental value of others can lead to objectification. This symposium aims to provide a comprehensive account of the antecedents and consequences of economic objectification, thereby considering research from both social and economic psychology.

ABSTRACTS**Feeling Like an Object: Working Self-Objectification Decreases Personal Free Will**

Three experiments showed that performing a manual or a computer objectifying task (vs. non-objectifying and vs. baseline condition) increases participants' self-objectification, and in turn decreases their belief in having personal free will. These results were expanded in a field study in which the perception of being objectified by superiors was considered as a source of self-objectification.

Effects of Money on Mind Perception and Affect-Based Responses

While the negative impact of money on interpersonal harmony has been well documented, the underlying social cognitive processes are relatively unknown. In 5 experiments, we show that the motivation for money leads people to exclude irrelevant targets from mental consideration, as shown in mind deprivation and indifference to others' emotions. This further causes undesirable behavioral outcomes.

Xijing Wang¹, Eva Krumhuber¹

¹Univ. College London

The Symbolic Value of Money and Focus on Agentic Self

We demonstrate that a) money is associated with a stronger accessibility of independent self-construal and the belief in being an autonomic agent, and b) the state of self-sufficiency induced by money results from a focus on the agentic self. These effects are moderated by money attitudes and are present especially among those who attach emotional/symbolic value to money.

Ostracism Boosts the Tendency to View Others as Instruments

Ostracized people may feel psychologically deprived of and thus entitled to more benefits, which may lead them to approach social targets based on their perceived instrumentality. Four studies provided converging support for our hypotheses. We repeatedly showed that ostracism increases objectification and that feelings of deprivation and entitlement account for such an effect.

[46] Academic Leadership: Yes You Can! Yes You Should!

Room: (MM) A703, **Time:** 3:45 PM - 5:00 PM

Chair: Camille Johnson, San Jose State Univ.

Academic leadership roles aren't always portrayed as a desirable. However, being an academic leader can be rewarding, providing opportunities to create meaningful change by putting ideas into practice and affecting a larger group. Join four experienced (and happy) administrator-scholars to learn about paths to leadership, kinds of positions, and the challenges and rewards of leading.

[47] Live or Let Die? Responses to Difficult Goal Pursuit

Room: (MM) A704, **Time:** 3:45 PM - 5:00 PM

Chair: Hannah Moshontz, Duke Univ.

Co-Chair: Anne Holding, McGill Univ.

Persistence in the face of difficulties is essential to achieving goals, but difficulties can also be signals to disengage from our pursuits. When faced with difficulties, how do pursuers respond and how should they? Four talks document responses to difficult pursuit and explore the predictors and consequences of persistence, disengagement, and deferral in everyday goals.

ABSTRACTS**Catch and Release: Autonomous Motivation Matters at Two Distinct Stages of the Goal Engagement and Goal Disengagement Cycle**

Using two multi-wave prospective longitudinal studies we examined students pursuing 3 personal goals across the academic year. MLM analyses revealed that high autonomous motivation protected students from goal disengagement 6 months later at both the between- and within-person level. However, autonomous reasons for disengagement were associated with increased disengagement progress at 9 months.

Who and How? Self-Regulatory Traits and Strategies Predict Persistence During Aversive Goal Pursuit in Everyday Life

We investigated the strategies that people use to self-regulate their persistence during daily goal-directed activities. Individuals high in conscientiousness and trait self-control more frequently thought about positive consequences of goal attainment, regulated their emotions, set (sub) goals, and monitored their goal progress. Using these strategies increased momentary self-regulatory success.

Goal Disengagement, Relationship Conflict and Cold Symptoms in Romantic Couples: The Moderating Role of Dyadic Coping

People confront difficulties in their personal goals, and in their interpersonal goals. This 2-year longitudinal study explores couples' responses to relationship difficulties and identifies dyadic coping as a key moderator. Actor and partner goal adjustment capacities buffer changes in relationship conflict and cold symptoms only if individuals also report high levels of common dyadic coping.

Meaghan Barlow¹, Carsten Wrosch¹

¹Concordia Univ.

Responses to the Unique Difficulties of Long-Term Goal Pursuit

Many people are initially successful in sticking with personal goals (e.g., weight loss) but later fail. To elucidate the source of such long-run failures, we present the continuing-and-returning model of persistence. Using data from New Year's Resolutions, we illustrate the unique difficulties of episodic, long-term goal pursuit and identify successful and unsuccessful responses to them.

[48] Creating and Running an Online Writing Accountability Group

Room: (MM) A705, **Time:** 3:45 PM - 5:00 PM

Chair: Natalie Sabik, Univ. of Rhode Island-Kingston

Writing is a critical aspect of a successful academic career at all levels and across all types of institutions. This workshop will demonstrate how to create and maintain an online writing accountability group that can be shared with colleagues across institutions. Best practices in maintaining a regular writing practice will be reviewed and are integrated into the writing group.

[49] Student/Early Career Data Blitz 1

Room: (MM) A706, **Time:** 3:45 PM - 5:00 PM

ABSTRACTS**How Perceptions of One's Organization can Affect Perceptions of the Self: Membership in a Stable Organization Can Sustain Individuals' Sense of Control**

Building on perspectives regarding the role that group identification can play in sustaining control motives, we find that being a member of a stable organization, one experienced as predictable and consistent rather than changing, can maintain individuals' sense of control. Membership in a stable organization can provide a buffer against threats to control encountered in daily life outside work.

Devon Proudfoot¹, Aaron Kay²

¹Cornell Univ., ²Duke Univ.

The Stabilizing Effect of Mindfulness on Emotions

Dispositional mindfulness relates to emotions stability. Study 1 shows that mindfulness is negatively linked to emotional reactivity to self-relevant positive and negative events. Study 2a replicates Study 1 with four-wave longitudinal data, and Study 2b shows that mindfulness predicts lower baseline levels and smaller fluctuations of negative affect, while buffering the effect of negative events.

¹Univ. of Padua

Choosing Unhealthy to Appear Warm and Healthy to Appear Competent: How Consumers Signal Personality Traits via Food Choice

Drawing upon previous research on food choice, the stereotype content model, and social cognition, we examine the role of impression management on food choice in social contexts. Three laboratory experiments and a field survey reveal that consumers tend to choose unhealthy food when they are motivated to signal warmth, and healthy food when intending to signal competence.

Suffering and Compassion: Overcoming the Numeracy Bias

Experiencing hardship may foster prosocial orientation. We examined if this effect on prosociality would generalize to a context that is challenging to compassionate responding. We found that individuals who have suffered in the past are less susceptible to a numeracy bias when faced with the mass suffering of others via elevated efficacy to help as a potential explanatory mechanism.

Daniel Lim¹, David DeSteno¹

¹Northeastern Univ.

Social Power Increases Neural Efficiency

Experiencing psychological power facilitates performance in cognitive tasks, but how? Using electroencephalography, we examined how manipulated power affects how people allocate their cognitive resources during a working memory task. Results suggest that high-power participants performed the task with greater neural efficiency compared to low-power participants.

Undervaluing Gratitude: Expressors Misunderstand the Consequences of Showing Appreciation

Expressing gratitude improves well-being for both expressors and recipients, but we find that expressors systematically undervalue its positive impact on recipients; they underestimate benefits and overestimate costs. Because choices are guided in part by the expected value of possible outcomes, people may not express how grateful they feel, to the detriment of their own—and others'—well-being.

Amit Kumar¹, Nicholas Epley¹

¹Univ. of Chicago

Utilizing Purpose to Increase Respect and Motivation

In a randomly assigned experiment of N = 481, researchers showed 9th and 12th-grade students a purpose for learning related rationale appended to a tedious math assignment. Results indicate students in the rationale condition had greater motivation for completing the assignment and felt greater respect from the teacher. The increase in motivation was partially mediated by feelings of adult respect.

Fortunato Medrano¹, David Yeager¹

¹Univ. of Texas at Austin

Wunderkind Wisdom: Younger Advisers Discount Their Impact

Reverse mentorship, when individuals give advice to someone older, has become increasingly more common. Five studies explore the psychology of these younger advisers. Comparing advisers' predictions to advisees' actual perceptions reveal that younger advisers systematically overweighted the importance of their age and underweighted the importance of their expertise.

Ting Zhang¹, Michael North²

¹Columbia Business School, ²New York Univ.

Regulatory Effectiveness of Social Support

Social support offers key benefits in times of stress. We propose a new construct to understand the ingredients of effective support: Regulatory Effectiveness of Social Support (RESS). In six studies using diverse methods (daily diaries, dyadic paradigms, coding), RESS more strongly predicted self-regulatory outcomes following support, but responsiveness more strongly predicted relational outcomes.

Katherine Zee¹, Niall Bolger¹, Tory Higgins¹

¹Columbia Univ.

Music Evokes Fourteen Distinct Varieties of Reported Emotional States Lying along Continuous Categorical Gradients

Using novel methods to analyze reports of emotions elicited by 1841 crowdsourced music samples, we uncover 14 varieties of emotion. Categories such as "romantic" are more informative than dimensions such as valence and arousal. However, many categories are linked by smooth gradients, contrary to discrete theories. We present and compare interactive maps of emotion in music and vocal expressions.

¹Columbia Univ.

Cultivating the Good Life: Wise Beliefs Lead to Increased Subjective Well-Being over Twenty Years

While past studies have associated wisdom with well-being, it is unclear whether wisdom predicts well-being or vice-versa. We examined 20 years of longitudinal data from a representative sample of U.S. adults aged 25-75 at recruitment (N = 7,108). We found that having wisdom-related beliefs about life predicts well-being in later years, particularly for young (age 25-34) and older adults (age 65+).

[50] How Crowds Create Threats and Opportunities for Individuals

Room: (MM) A707, **Time:** 3:45 PM - 5:00 PM

Chair: Iris Wang, *Univ. of Michigan*

Talks spanning areas of decision making, threat management, and creativity focus broadly on the role of crowds as posing threats and opportunities to individuals. Crowds afford unique threats to individuals from the perspective of infection risk. Depending on their composition, crowds can inhibit or promote creativity and can help or hinder accurate decisions.

ABSTRACTS**The Infectiousness of Crowds: Crowding Experiences are Amplified by Pathogen Threats**

Why are crowded social situations aversive? Five studies demonstrate that exposure to disease threats leads people to see dense environments as more negative, more crowded, and less appealing to inhabit. These responses are unique to disease threat compared to threat of physical harm, suggesting that crowds are perceived as affording increased risk of pathogen transmission.

Iris Wang¹, Joshua Ackerman¹

¹Univ. of Michigan

The Influence of Social Crowding on Creativity

This research demonstrates that social crowdedness shapes creative performance. Specifically, socially crowded environments worsen creative performance due to the activated negative arousal. However, this effect is moderated by crowd composition and an individual's need for arousal, and attenuated for sensation seekers and for crowds perceived positively.

Ahreum Maeng¹, Robert Tanner²

¹Univ. of Kansas, ²Univ. of Wisconsin-Madison

Feeling Crowded? Get Creative: Crowding Cues Lead to Increases in Creative Thinking

Two studies tested whether cues of crowding lead to increases in creativity. Participants viewed a crowding or control prime, and then completed measures of openness and creativity. Results supported the notion that crowding leads to more creativity, with resource concerns mediating and individual differences in childhood environment moderating this relationship.

Marjorie Prokosch¹, Randi Proffitt Leyva², Thomas Blue², Sarah Hill²

¹Tulane Univ., ²Texas Christian Univ.

Overestimating the Wisdom of Diverse Crowds

People think demographically diverse crowds are wiser than homogeneous crowds (Study 1). People are more likely to choose (S2), heed (S3), and to pay more for advice (S2) when they think it comes from a demographically diverse crowd than from a homogeneous one. This is partly due to stereotyping (S4); people overestimate cognitive diversity between groups and underestimate it within groups.

[52] Challenges to and Opportunities for Increased Intergroup Equality and Inclusion

Room: (HR) Centennial I & II, **Time:** 8:00 AM - 9:15 AM

Chair: Arnold Ho, *Univ. of Michigan*

Co-Chair: Nour Kteily, *Northwestern Univ.*

This session examines challenges to and opportunities for increased intergroup equality and inclusion in the U.S., both across the majority-minority divide, and among minority groups. We suggest that inaccurate perceptions of inequality and cynicism around outgroup members' fairness and alliances may hinder racial progress, but also highlight some paths forward to greater equality and inclusion.

ABSTRACTS

The Misperception of Racial Economic Equality

This talk documents the widespread overestimation of racial economic equality in America. Correlational and experimental evidence reveals the motivational and structural predictors of this widespread perceptual inaccuracy. Overall, these findings suggest a profound misperception of and unfounded optimism regarding societal race-based economic disparities along with their policy implications.

Michael Kraus¹, Julian Rucker¹, Jennifer Richeson¹

¹*Yale Univ.*

Assuming the Worst: Pessimistic Beliefs about Outgroups' Intentions for Power

We examine what advantaged group members think would happen if they were displaced at the top by disadvantaged group members. Evidence from representative surveys suggests that White Americans are more pessimistic about Black Americans' intentions than warranted based on Black Americans' actual reported desires for (and reasons for wanting) power. We consider implications for intergroup tolerance.

Nour Kteily¹, Frank Kachanoff², Arnold Ho³, Jennifer Sheehy-Skeffington⁴

¹*Northwestern Univ.*, ²*McGill Univ.*, ³*Univ. of Michigan*, ⁴*London School of Economics*

Perceived Discrimination Leads Asian Americans to Exclude Biracials from the In-group

Five studies found that Asian Americans excluded Asian-White biracials from the in-group, categorizing them as more White than Asian. Perceiving discrimination against the in-group predicted greater exclusion of biracials because it led Asian Americans to believe that biracials prefer to identify as White and would not be loyal to Asian Americans.

Jacqueline Chen¹, Nour Kteily², Arnold Ho³

¹*Univ. of Utah*, ²*Northwestern Univ.*, ³*Univ. of Michigan*

"You're One of Us": Black Americans' Use of Hypodescent and its Association with Egalitarianism

In 4 studies, we show that both Blacks and Whites categorize Black-White multiracials as more Black than White. However, whereas Whites' Black categorization bias is associated with anti-egalitarianism, Blacks' tendency to categorize multiracials as Black is associated with egalitarianism and related beliefs that multiracials face discrimination and share a linked (disadvantaged) fate with Blacks.

Arnold Ho¹, Nour Kteily², Jacqueline Chen³

[53] Psychology in the Real World: Longitudinal Studies of Behaviors, Decisions, and Intervention Outcomes

Room: (HR) Centennial III, **Time:** 8:00 AM - 9:15 AM

Chair: Rebecca Hofstein Grady, *Univ. of California, Irvine*

ABSTRACTS

Boosting Hand Hygiene with a Worse Option: Decoy Effect in the Real World

The decoy effect refers to the phenomenon that an additional but worse option can boost the appeal of an existing option. In three longitudinal field experiments, we demonstrate the power of decoys in the real world for the first time. Specifically, we show that the presence of a decoy sanitizer option drastically boosted sanitizer use among food workers, with effect lasting for at least 20 days.

[54] Leveraging Social-Psychological Insights to Promote Public Health and Wellbeing

Room: (HR) Centennial IV, **Time:** 8:00 AM - 9:15 AM

Chair: Octavia Zahrt, *Stanford Univ.*

This symposium sheds new light on social-psychological interventions to improve public wellbeing. Four presentations show how sugary drink intake can be reduced in a publicly acceptable way; how Apple Watch activity feedback shapes user behavior and health; how pre-commitment nudges can backfire if not framed right; and that default and loss-frame nudges are sometimes ineffective or even harmful.

ABSTRACTS

Graphic Warning Labels Curb Purchasing of Sugary Drinks

Three studies test the impact of psychologically-informed ways of labelling sugary drinks (to reduce their consumption). S1 is a field study conducted in a cafeteria, indicating that graphic warning labels reduce the share of sugary drink purchases by 15.5 percent. S2 sheds light on the psychological mechanism underlying this effect, while S3 assesses public support for graphic warning labels.

¹*Stanford Univ.*

Framing the Future in the Field: Pre-Commitment Nudges and Fresh Start Messaging

Nudges can leak information about the implicit recommendations of their designers. Our field experiment shows that a widely-used nudge—encouraging pre-commitment—can backfire, and fresh-start framing counteracts the negative effect. A lab study suggests an account: when a nudge encourages good behavior "later", it implies that the target behavior is not urgent, undermining the nudge's efficacy.

From Evaluation to Investigation: Designing Field Studies to Measure Underlying Theoretical Mechanisms

Behavioral science insights are increasingly applied in the field. But extant theory cannot account for the resulting varied effects. Indeed, our research shows that default effectiveness varies widely; and loss framing is more effective when personal (vs. societal) losses are emphasized. Field applications of behavioral science therefore require clearer theoretical specifications to be effective.

[57] Women in High Places: Helping or Hurting Other Women?

Room: (HR) Centennial I & II, **Time:** 9:30 AM - 10:45 AM

Chair: Andrea Vial, *Yale Univ.*

As the representation of women in certain social roles and fields (e.g., management and science) slowly increases, many expect that women in these positions will promote gender equality. Four talks examine the impact that the presence of women in non-traditional roles can have on other women's choices and career prospects. We show that women can both help and hinder the advancement of other women.

ABSTRACTS

The Demand- and Supply-Side Effects of Women in Leadership

This research explores two distinct pathways through which having women in leadership affects gender inequality in labor market outcomes. The first study takes a demand-side perspective focusing on the direct implications of female managers for employee pay inequality. The second study examines

supply-side factors focusing on how perceptions of women in leadership affect job applicant choices.

Mabel Abraham¹, Vanessa Burbano¹

¹Columbia Univ.

Women's Accommodation of Gender-Based Third-Party Prejudice

Four studies show that, despite their own attitudes, women in charge of hiring decisions accommodate others' gender-based prejudice (whether real or inferred). Such accommodation is mediated by performance and interpersonal concerns consistent with the demands of the decision maker role identity. These demands constrain women's freedom to support fellow women in the face of gender-based prejudice.

Andrea Vial¹, John Dovidio¹

¹Yale Univ.

When Do White Female Leaders Function as Role Models for Black Women?

Three experiments explored when female leaders act as role models for Black women. Experiment 1 found Black female and male leaders promoted more belonging at a company than a White female leader. Experiments 2 and 3 demonstrated that increasing Black women's awareness of sexism enhances Black women's identification with White female leaders and transformed these women into role models.

Evava Pietri¹, India Johnson²

¹Indiana Univ. Purdue Univ. Indianapolis, ²Elon Univ.

Breaking the Glass Ceiling: For One and All?

Challenging the assumption that exposure to female leaders automatically "breaks the glass ceiling" for all women, we provide evidence that gender salience, stemming from the perceived mismatch of women and leadership, leads to a generalization from the performance of a female leader to the evaluations of subsequent female candidates.

Francesca Manzi¹, Madeline Heilman¹

¹New York Univ.

[58] Beyond Replication: Assumptions, Moderators, and Models

Room: (HR) Centennial III, **Time:** 9:30 AM - 10:45 AM

Chair: Alexander Danvers, *Univ. of Oklahoma*

Recent improvements in scientific reliability and transparency have been spurred by concerns about replication, yet this is just one hallmark of good science. Prediction and explanation through formal modeling also provide theoretical insight. We present work that goes beyond whether an effect is present or absent, using modeling and big data to understand psychological effects.

ABSTRACTS

The Virtuous Cycle of Theory-Building: Improving Theoretical Understanding in the (Online) Lab and in the Wild

Recent technological advances have opened new opportunities for theory-building while improving our openness, transparency, and reproducibility. We present complementary efforts to strengthen theory by exploring human behavior across contexts: Dallinger (an online experiment platform: <http://docs.dallinger.io/>) and Data on the Mind (a community resource for big data: <http://dataonthemind.org>).

Alexandra Paxton¹, Jordan Suchow¹, Thomas Morgan¹, Thomas Griffiths¹

¹UC Berkeley

What is Shooter Bias and How Should it be Measured?

Studies of shooter bias have used several types of analysis (ANOVA, PDP, signal detection) that make mutually contradictory assumptions about underlying nature of the data. Receiver operating characteristic curves (ROCs) from four experiments support the signal detection assumptions, leaving many previous studies at risk of having been misinterpreted. Implications for replication are considered.

Caren Rotello¹

¹Univ. of Massachusetts

Uncovering Hidden Moderators with Machine Learning

We use machine learning on Many Labs replication data to uncover non-linear, higher order interactions between predictors. Examining participant demographic characteristics, date and timing of the study, and experimenter characteristics, we find that in those outcomes with the smallest effects, moderators add the greatest prediction (e.g. 10% or 20% increase in R2 for priming).

[60] Decomposing Total Utility from Experience Over Time

Room: (HR) Regency V, **Time:** 9:30 AM - 10:45 AM

Chair: Ailixandra Barasch, *New York Univ.*

People's decisions about how to spend their limited time are crucial to their overall well-being. This session sheds new light on how multiple sources of utility relate and shift over time. Four papers investigate utility derived at different stages of experience: predicted utility in anticipation, experienced utility in the moment, and expected utility from repeating an experience in the future.

ABSTRACTS

The Primacy of Experience: Comparing the Contributions of Anticipation, Experience, and Memory to Total Utility

The total utility of an event is the sum of the utility provided by its anticipation, experience, and recollection. Most models of total utility

propose to weight phases equally, by duration. By contrast, we find that people accord experience more weight than other phases, regardless of its duration.

Masha Ksendzova¹, Carey Morewedge¹, Michael Norton²

¹Boston Univ., ²Harvard Univ.

The Influence of Creating Event Markers on Experienced Time and Enjoyment

We examine the effects of creating event markers, or generating content about an experience (e.g., texting, writing notes), as that experience unfolds. While prior research has found that event markers elongate retrospective judgements of duration, six studies demonstrate that generating markers within an experience have the opposite effect on experienced duration, ultimately increasing enjoyment.

Alixandra Barasch¹, Gabriela Tonietto²

¹New York Univ., ²Rutgers Univ.

Repeated Experiences: Underappreciating the Thrill of the Familiar

Participants underestimated their enjoyment for repeated experiences (e.g., revisiting a museum; replaying a game; rewatching a video; re-chatting with a stranger): Predictors assumed repetition would quickly grow dull, whereas actual Experiencers enjoyed even immediate repetition much more than expected. People may wait too long to repeat the same fun activity and instead pay a novelty premium.

Ed O'Brien¹, Michael Kardas¹

¹Univ. of Chicago

Uncertainty Incentives Reinforce Behavioral Repetition

The surprising finding of two field experiments and four lab experiments, all involving real consequences, is that: people repeat a behavior more if the incentive is ex ante uncertain than if it is certain, even when the uncertain incentive is financially worse. We explain this finding with a resolution-as-reward account and reveal the hidden power of uncertain incentives.

[63] New Perspectives on the Social Functions of Emotions

Room: (MM) Atrium A, **Time:** 9:30 AM - 10:45 AM

Chair: Sara Algoe, *Univ. of North Carolina at Chapel Hill*

Co-Chair: Christopher Oveis, *UC San Diego*

Emotions coordinate social life in a variety of ways. This symposium presents four novel or understudied ways in which that happens, focusing on within-individual biological factors, the perspective of each member of a social dyad, and how incidental 3rd party witnesses behave toward emotion expressers. These talks advance theory and methods for understanding the social functions of emotions.

ABSTRACTS

Biological Bases of Social Emotion: Considering Gratitude, Oxytocin, and the Attachment System

Two studies address the possibility that the social functions of the emotion of gratitude build on the biological architecture for bonding, via the neuropeptide oxytocin. Data from videorecorded social interactions between romantic partners and daily reports provide suggestive evidence in support of the co-evolved bio-psycho-social mechanisms supporting gratitude's social functions.

Sara Algoe¹

¹Univ. of North Carolina at Chapel Hill

More than Mirth: Laughter Serves the Social Functions of Reward, Affiliation, and Dominance

Current accounts of laughter cannot explain the full variability of its form and function. Complementing existing approaches, a new social functional account classifies laughter by its effects on the self and others. Acoustic analyses combined with perceiver judgments suggest laughter can accomplish the social tasks of rewarding behavior, managing affiliative bonds, and signaling dominance.

Adrienne Wood¹, Jared Martin¹, Paula Niedenthal¹

¹Univ. of Wisconsin-Madison

The Regulation of Emotions by Close Others across the Temporal Spectrum

In three studies (total N = 1700), we present support for an expanded view of extrinsic interpersonal emotion regulation which encompasses strategies to increase or decrease the positive or negative emotions of others at various temporal points of their emotional experiences. Our results indicate that extrinsic interpersonal emotion regulation is a common and important close relationship process.

Margaret Boyer¹, Chance Adkins¹, Shelly Gable¹

¹UC Santa Barbara

The Social Functions of Gratitude at the Group Level of Analysis: Effects on 3rd Party Witnesses' Behaviors

We present new theory and evidence regarding the group social functions of the emotion gratitude. Three experiments find that witnessing gratitude expressions increases helpful and affiliative behavior from 3rd party witnesses to 1st party expressers. These data suggest one person's gratitude

has multiple direct social effects simultaneously, and advance theory and research on other emotions.

[66] Do War Metaphors for Cancer Foster Helpful or Harmful Beliefs?

Room: (MM) A706, **Time:** 9:30 AM - 10:45 AM

Chair: David Hauser, *Univ. of Southern California*

War metaphors for cancer are ubiquitous (e.g., “join the fight against cancer”), but do they promote helpful or harmful health beliefs? Interdisciplinary research examines how they affect peoples’ sense of control over their health, inferences about patients’ emotions, their empowering nature, and their use with other metaphors by cancer patients. Implications for health behaviors are discussed.

ABSTRACTS

Fight Like Hell or Give Up?: How Enemy Metaphors for Cancer Affect Perceptions of Cancer and Health

How do metaphors that say to “fight cancer” affect how people think about their health? Six studies suggest they imply that cancer treatment is difficult. However, they fail to motivate people to take action when threatened by cancer, and they decrease the sense of control over whether one gets cancer. In essence, these metaphors may push lay persons to “give up” rather than “fight like hell.”

David Hauser¹, Norbert Schwarz¹

¹*Univ. of Southern California*

Effects of Battle and Journey Metaphors for Emotional Inferences about a Cancer Experience

We explore the impact of battle and journey metaphors on emotional inferences about a cancer experience. We also examine how the metaphors encountered affect the language people produce about cancer, and discuss the implications for how people conceptualize the illness experience. This work sheds light on the role of linguistic metaphor in shaping the way people make emotional appraisals.

[H-021] Close Relationships

What Factors Underlie the Desire for Anthropomorphized Romantic Relationships?

Mayu Koike¹, Steve Loughnan¹, Sarah Stanton¹
¹Univ. of Edinburgh

[H-022] Close Relationships

He Loves Me... He Loves Me Not: Understanding Relationship Security

Megan Nadzan¹, Lisa Jaremka¹, Nancy Collins²
¹Univ. of Delaware, ²UC Santa Barbara

[H-023] Close Relationships

Dyadic Analysis of Interpersonal Chemistry and Satisfaction in the Transition to Marriage

Reese Tou¹, C. Knee¹, Lindsey Rodriguez²
¹Univ. of Houston, ²Univ. of South Florida St. Petersburg

[H-024] Close Relationships

Divergent Implications of Gratitude: Gratitude Increases Recipients' Commitment by Increasing Liking, Yet Decreases Commitment by Increasing Perceived Differences in Relational Value

Shae Montalvo¹, Levi Baker¹
¹UNC at Greensboro

[H-026] Close Relationships

Causal Uncertainty and Romantic Relationships

Shana Needham¹, Jill Jacobson²
¹Queen's Univ. at Kingston, ²Queen's Univ.

[H-027] Close Relationships

Self-Esteem and Agreeableness as Predictors of Accommodation Processes in Romantic Relationships

Sherman (Shiu Man) Kwok¹, Linden Timoney¹, Joanne Wood¹
¹Univ. of Waterloo

[H-028] Close Relationships

Does Pursuing Sex with an Ex Hinder Breakup Recovery over Time?

Stephanie Spielmann¹, Samantha Joel², Emily Impett³
¹Wayne State Univ., ²Univ. of Utah, ³Univ. of Toronto Mississauga

[H-029] Close Relationships

How Close Relationships Facilitate Self-Compassion: The Association between Compassionate Goals and Self-Compassion

Tao Jiang¹, Iris Liu¹, Jennifer Crocker¹
¹Ohio State Univ.

[H-030] Close Relationships

The Protective Role of Maternal Prenatal Felt Security in the Transmission of Poor Maternal Health to the Infant

Thomas Khullar¹, Faby Gagne², John Lydon¹
¹McGill Univ., ²Southern New Hampshire Univ.

[H-031] Close Relationships

Love Songs as Stress Buffers: Experimental Investigation

Ting Ai¹, Omri Gillath¹, Emma Murrugarra¹, Dustin Brockert¹
¹Univ. of Kansas

[H-032] Close Relationships

Does Social Avoidance Motivation Promote the Partners' Avoidance Motivation?: The Convergence Process of Behavior According to Avoidance Motivation in Dyadic Relationships

Toshihiko Soma¹, Koji Hasegawa²
¹Hiroshima Univ., ²Shinshu Univ.

[H-033] Close Relationships

Optimism and the Longitudinal Decline of Sexual Passion in Newlywed Couples

Yasaman Ghodse-Elahi¹, Patrick Shrout¹, Lisa Neff²
¹NYU, ²Univ. of Texas at Austin

[H-034] Motivation/Goals

"We Don't Win Anymore!": How Low Power Affects Immigration Attitudes in White Men, A Terror Management Study

Aaron Szczech-Johnson¹, Kerry Kleyman¹
¹Metropolitan State Univ.

[H-035] Motivation/Goals

Contextual Variability Promotes Abstraction

Alexa Hubbard¹, Yaacov Trope¹
¹NYU

[H-036] Motivation/Goals

Effort Allocation in the Course of Goal-Pursuit

Aviv Emanuel¹, Nira Liberman¹
¹Tel Aviv Univ.

[H-037] Motivation/Goals

Achieving Optimal Distinctiveness through Religion

Craig Brinkman¹, Shira Gabriel¹
¹Univ. at Buffalo

[H-038] Motivation/Goals

Anxious Uncertainty and Approach Motivation Sensitivities as Predictors of Boredom Proneness and Low Self-Control

Emily Britton¹, Ian McGregor¹, Konstantyn Sharpinski¹
¹Univ. of Waterloo

[H-039] Motivation/Goals

Self-Critical Perfectionism and Decreased Goal Progress: The Role of Positive Goal-Related Affect

Emily Moore¹, Anne Holding¹, Brenda Harvey¹, Amanda Moore¹, Richard Koestner¹
¹McGill Univ.

[H-040] Motivation/Goals

The "Magritte Effect": Adherence to Conspiracy Beliefs as Fluid Compensation after a Meaning-Threat

Jaïs Adam-Troian¹, Florent Varet¹, Alexis Akinyemi², Eric Bonetto¹
¹Aix-Marseille Univ., ²Univ. Paris Nanterre

[H-041] Motivation/Goals

Developing Science Identities through Social Recognition Feedback among Underrepresented Minority Science Students

Jeanette Zambrano¹, Christina Curti¹, Dustin Thoman¹
¹San Diego State Univ.

[H-042] Motivation/Goals

Empathy as a Mediator for Academic Self-Efficacy

Jessica Schurz¹, Jo-Ann Tsang¹
¹Baylor Univ.

[H-043] Motivation/Goals

Do Narcissists Benefit from Materialistic Pursuits?: A High-Powered Replication and Extension of Abeyta, Routledge, and Sedikides (2017)

Kaitlyn Werner¹, Marina Milyavskaya¹
¹Carleton Univ.

[H-044] Motivation/Goals

Family Value as Antidote: Interdependence Buffers Extrinsic Aspiration for Children

Kaiyuan Chen¹, Jinhyung Kim¹, Rebecca Schlegel¹
¹Texas A&M Univ.

[H-045] Motivation/Goals

Examining the Why and How of Goal Pursuit: Cybernetic Processes Underlying Self-Determined Motivation's Effects on Goal Progress

Laverl Williamson¹, Benjamin Wilkowski¹
¹Univ. of Wyoming

[H-046] Motivation/Goals

Effects of Regulatory Focus on the Evaluation of Messages: Focus the Familiarity as Moderators

Masato Nagamine¹, Miki Toyama^{1,2}, Li Tang^{1,2}, Shuhei Miwa^{1,2}, Ryo Kurozumi^{1,2}, Atsushi Aikawa^{1,2}
¹Univ. of Tsukuba, ²Center for Research on Educational Testing (CRET)

[H-047] Motivation/Goals

(Stop) Thinking like an Engineer

Maxwell Burns¹, Jessi Smith¹, Megan Bruun¹, Brock LaMeres¹, Dustin Thoman²
¹Montana State Univ., ²San Diego State Univ.

[H-048] Motivation/Goals

Does Identification with a Successful Character in the Story Video Impair Viewer's Academic Performance as Positive Fantasy Does?

Megumi Komori¹
¹Shitennoji Univ.

[H-049] Motivation/Goals

No Flow at the Dark Side: Depression Hinders the Experience of Flow

Michael Wagner¹, Johannes Keller², Christian Montag², Christiane Waller²
¹Ulm Univ., ²Univ. of Ulm

[H-050] Motivation/Goals

The Impact of Moderation Messages on Food Consumption

Mitchell Lee¹, Michelle vanDellen¹
¹Univ. of Georgia

[H-051] Motivation/Goals

Social Comparisons Influence Migrants' Language Mindsets and Cultural Adjustment

Nigel Mantou Lou¹, Kimberly Noels¹
¹Univ. of Alberta

[H-052] Motivation/Goals

Concurrent Validity of a Scale Measuring Motivation and Learning in Social Support and Attachment

Rachel Gardetto¹, Lane Beckes¹
¹Bradley Univ.

[H-053] Motivation/Goals

The Effects of Situations and Personality on Goal Pursuit

Roberto De La Rosa¹, Ryne Sherman¹
¹Texas Tech Univ.

A Matter of Taste: Gustatory Sensitivity Predicts Political Conservatism

Benjamin Ruisch¹, Rajen Anderson¹, Yoel Inbar², David Pizarro¹
¹Cornell Univ., ²Univ. of Toronto

[H-100] Politics

Effects of New Leadership on Schismatic Intentions

Bryan Sherburne¹, Olivia Kuljian¹, Joseph Camarena¹, Amber Gaffney¹, Zachary Hohman²
¹Humboldt State Univ., ²Texas Tech Univ.

[H-101] Politics

Taking a Bite Out of the Free Speech Apple: College Students' Attitudes toward Disinvitation of Campus Speakers

Cynthia Meyersburg¹, Kelsey Naughton¹
¹Foundation for Individual Rights in Education

[H-102] Politics

Looking Back to Move Forward: Reactionism in the 2016 Presidential Election and Beyond

Derrick Till¹, Austin Eubanks¹, David Sparkman¹, Scott Eidelman¹, Patrick Stewart¹, Robert Wicks¹
¹Univ. of Arkansas

[H-103] Politics

Conservatives and Liberals Disagree about How Bad Humans Are

Ellen Reinhart¹, Alana Conner²
¹Stanford SPARQ, ²Stanford Univ.

[H-104] Politics

Who is Intolerant?: Political Ideological Symmetries and Asymmetries in Predictions About Intolerance

G. Scott Morgan¹, Emily Kubin¹
¹Drew Univ.

[H-105] Politics

Unfriending Increases Political Homogeneity

Ian Miller¹
¹Univ. of Toronto

[H-106] Politics

Enduring Elephants and Dynamic Donkeys: The Effect of Conservatism on Ideal-Discrepancy Resolution

J. Randell¹, Jeff Seger¹, Curtis Holmes¹, Leanne Perales¹, Dawn Becker-Miller¹
¹Cameron Univ.

[H-107] Politics

"You Chose Poorly": Free Will Beliefs Mediate the Relationship between Conservatism and Internal Attributions of Those in Need

Janelle Sherman¹, Julie Eyink¹, Joshua Clarkson², Edward Hirt¹
¹Indiana Univ., ²Univ. of Cincinnati

[H-108] Politics

Impact of a Shared Identity on Latinos' Engagement in Political Action

Jesus Serrano-Careaga¹, Yuen Huo¹
¹UCLA

[H-109] Politics

The Effects of Political Polarization on News Consumption and Trust

Julia Bottesini¹, Travis Riddle¹, Kate Turetsky¹, Valerie Purdie-Vaughns¹
¹Columbia Univ.

[H-110] Politics

Christopher to Kerry: An Analysis of Secretaries of State Integrative Complexity

Laura Gornick¹
¹Virginia Military Institute

[H-111] Politics

System Justification Depends on Temporal Comparison: Conservatives Support Regressive, but not Progressive Change

Laura Van Berkel¹, Matthew Baldwin¹, Joris Lammers¹
¹Univ. of Cologne

[H-112] Politics

The Relationship between the 2016 Presidential Election on Twitter Language Use

Chase Ehrig¹
¹Univ. of Texas at Austin

[H-113] Politics

#Election2016: How Importance of Politics Predicted Presidential Election-Relevant Posts on Social Media

Maureen Coyle¹, Cheryl Carmichael²
¹The Graduate Center, CUNY, ²Brooklyn College

[H-114] Politics

Effects of Nationalist Leadership on Identification with Humanity

Olivia Kuljian¹, Bryan Sherburne¹, Joseph Camarena¹, Josue Rodriguez¹, Justin Hackett², Amber Gaffney¹
¹Humboldt State Univ., ²California Univ. of Pennsylvania

[H-115] Politics

Continuous When Convenient: Reminders of Historical Injustice Prompt Defensive Revisions of Historical Group Continuity

Sarah Williams¹, Anne Wilson¹
¹Wilfrid Laurier Univ.

[H-116] Politics

Tobacco Retailers' Compliance with FDA Regulations in Ethnically Diverse Neighborhoods

Vanessa Altamirano¹, Lourdes Baezconde-Garbanati², Rosa Barahona², Yaneth Rodriguez²
¹California State Univ., Long Beach, ²Univ. of Southern California

[H-117] Politics

Through Blue and Red Glasses: The Role of Media in Political Attitudes, Impressions, and Assumptions

Victoria Parker¹, Anne Wilson¹
¹Wilfrid Laurier Univ.

[H-118] Politics

Where We Live Affects What We Feel about Political Candidates

Zachary Melton¹, Matt Motyl¹
¹Univ. of Illinois-Chicago

[H-120] Religion/Spirituality

Translating Environmental Concern into Action: The Contribution of Eco-Spiritual Beliefs and Sacred Values

Adam Baimel¹, Ara Norenzayan¹
¹Univ. of British Columbia

[68] Out of the Lab with Brenda Major
Room: (HR) Centennial I & II, **Time:** 11:00 AM - 12:15 PM
Interviewer: Keith Maddox, *Tufts Univ.*
Interviewee: Brenda Major, *UC Santa Barbara*
 In the first of a new annual series, Brenda Major steps "Out of the Lab" in an interview with Keith Maddox. Through both her service and groundbreaking research, Dr. Major is without exaggeration a giant contributor to social and personality psychology. A past president of SPSP and also SESP, Dr. Major's research on stigma and resilience has garnered numerous awards and left an indelible impact on other scientists and society. Please join us to hear about her storied career on the road less traveled.

[69] Dynamics of Personality Change and Close Relationships
Room: (HR) Centennial III, **Time:** 11:00 AM - 12:15 PM
Chair: Katherine Finnigan, *UC Davis*
Co-Chair: Simine Vazire, *UC Davis*
 A growing body of research suggests that aspects of close relationships (e.g., friendships, romantic relationships) are related to personality traits. In this symposium, we will examine how close relationships and personality develop together over time, and how patterns in development relate to life outcomes.

ABSTRACTS
Through the Good Times and Bad: A Longitudinal Study of Personality Change and Perceived Partner Responsiveness
 The present study examines the relationship between the trajectory of personality traits and perceived partner responsiveness in response to positive and negative life events. Data were collected on a weekly basis over the course of a year. The study results show that weekly changes in personality traits co-vary with weekly changes in partner responsiveness.

Jia Chong¹, R. Chris Fraley¹

Personality Trait Development in Enduring Marriages
 This talk provides an interpersonal perspective on personality development. Self-reports were obtained in 1990 and 2015 from 253 couples. Stability coefficients supported the cumulative continuity perspective. Mean-level changes supported the maturity hypothesis. Couples didn't become more similar over time; however, some attributes of wives were related to future attributes of husbands.

M. Donnellan¹, Jennifer Senia¹
¹Texas A&M Univ.

Change in Personality Similarity and Similarity in Personality Change among Married Couples
 Across several large, nationally representative longitudinal studies of married couples, we investigate (1) if couples become more similar in their personality trait levels over time and (2) if they have similar trajectories of personality change over time. We find little evidence to suggest that spouses become more similar or change in similar ways in regards to their personality traits.

The Contingencies of the Need to Belong: Two Longitudinal Studies of Different Life Phases
 Do contingencies of self-worth moderate the effect of social inclusion on self-esteem? In Study 1, popularity among peers of the in- but not the out-group predicted self-esteem in 1,057 high-school students. In Study 2, job beginners' self-esteem destabilized due to agentic but not communal events in 209 college students. Findings highlight the developmental contingencies of the need to belong.

[71] The Budding Collectivism Revolution**Room:** (HR) Regency V, **Time:** 11:00 AM - 12:15 PM**Chair:** Thomas Talhelm, *Univ. of Chicago Booth School of Business***Co-Chair:** Shi Liu, *Columbia Univ.*

Different labs around the world are converging on the idea that the traditional image of collectivism does not reflect real life. Four talks argue collectivism is not feeling close to "others." Instead, it is tight, duty-bound relationships, where tension can live on under the surface. It also includes low relational mobility, which may explain lower intimacy and East-West cognitive differences.

ABSTRACTS**Collectivism Scales Find America is More Collectivistic than Japan Because They Measure the Wrong Concept**

A quiet revolution is converging on the idea that the commonly used concept of collectivism does not fit the data. We review evidence that the most-used scales don't work because they measure liking "other people" rather than a tight system of stable relationships and duty. Then we show that writing new items measuring tight ties versus generalized positivity reliably detects cultural differences.

Thomas Talhelm¹, Xiaopeng Ren², Jonathan Haidt³, William Chopik⁴¹*Univ. of Chicago Booth School of Business*, ²*Chinese Academy of Science*, ³*NYU*,⁴*Michigan State Univ.***Passion, Relational Mobility and Proof of Commitment: Why "Independent" Cultures Foster Greater Relational Commitment than "Interdependent" Cultures**

We argue that proactive relational engagement should be more adaptive in social ecologies with greater relational mobility where valued partners can be easily poached. Consistent with this, three cross-societal studies between US and Japan found that greater relational mobility led to greater "commitment proving behaviors" (Study 1a/1b) and passion in romantic relationships (Study 2).

Masaki Yuki¹, Junkyo Yamada¹¹*Hokkaido Univ.***Beneath Eastern Harmony: Covert Competition and Ingroup Suspicion**

East Asian social relations have been described as harmonious, but we argue this is merely the surface. Our studies test whether conflict lies beneath that harmony. We theorize low relational mobility makes competition among ingroups covert and hence suspicion more common. Five studies, using self-report scales, scenarios, and storytelling, support the theory.

Shi Liu¹, Michael Morris¹, Qian Yang²¹*Columbia Univ.*, ²*Zhejiang Univ.***Relational Mobility Predicts Cultural Differences in Analytic and Holistic Thinking**

Relational mobility may be an important socioecological factor explaining cultural variation in cognition. Correlational and experimental data from six different countries showed that relational mobility increased dispositional bias and analytic (vs. holistic) attention. Relational mobility mediated these cultural differences and showed better predictive ability than common cultural constructs.

Alvaro San Martin¹, Joanna Schug², William Maddux³¹*IESE Business School*, ²*College of William and Mary*, ³*Univ. of North Carolina at Chapel Hill***[72] Making an Impact: Taking Meaningful Action on Real-Life Goals****Room:** (HR) Regency VI, **Time:** 11:00 AM - 12:15 PM**Chair:** Benjamin A. Converse, *Univ. of Virginia***Co-Chair:** Ayelet Fishbach, *Univ. of Chicago*

We examine self-regulation in the real world. Field experiments and experience-sampling studies show that perceiving behaviors as meaningfully impacting the goal is a key for sustained goal pursuit. Four talks (spanning philanthropy, education, health, and work) investigate the role of geographical distance, goal relevance, concrete feedback, and self-control in perceptions of impact.

ABSTRACTS**Too Far to Help: The Effect of Perceived Distance on the Expected Impact and Likelihood of Charitable Action**

Six studies, including lab and field experiments, and secondary data from fundraising campaigns, show that people expect charitable donations—much like snowballs—to have more impact on nearby (vs. faraway) targets. Therefore, because making an impact is a powerful motivator of prosociality, people are more willing to take action to help nearby (vs. faraway) causes independent of social distance.

Ayelet Fishbach¹, Maferima Toure-Tillery²¹*Univ. of Chicago*, ²*Northwestern Univ.***Person X Context Interactions in Real-World Goal Pursuit: A Field Experiment to Promote a Purpose for Learning in Middle School Classrooms**

A 2x2 double-blind field experiment with N=345 7th and 8th grade students assigned students to an online purpose for learning intervention or a control. Two weeks later, hand-written notes appended to a worksheet either aligned the assignment with one's deeper purpose for learning or not. Students earned higher scores only when they had completed the online exercise and the note reinforced it.

David Yeager¹, Stephanie Reeves², Nick Medrano¹, Geoffrey Cohen³¹*UT Austin*, ²*Ohio State Univ.*, ³*Stanford Univ.***Making Calorie Information Meaningful**

Three studies tested whether converting calories into the brisk-walking time needed to expend the energy in food items improves food choice. Relative to calorie labeling, the walking time metric led to less underestimation of the energy density (Study 1), greater implicit avoidance (Study 2), and reduced purchase (Study 3), of high-calorie foods.

Paschal Sheeran¹, Charles Abraham², Aya Avishai¹, Katelyn Jones¹¹*Univ. of North Carolina at Chapel Hill*, ²*Univ. of Exeter***Willful Wanting: Self-Control and the Reasons Behind Our Goals**

Motivation derived from truly valuing one's pursuits is associated with success and well-being. But what determines the quality of motivation? Suggesting that good self-regulators can will their way to autonomous motivation, two experience-sampling studies, two cross-sectional studies, and one experiment documented a goal-dependent association between trait self-control and autonomous motivation.

Benjamin Converse¹, Lindsay Juarez², Marie Hennecke³¹*Univ. of Virginia*, ²*Duke Univ.*, ³*Univ. of Zurich***[73] Political and Intergroup Dynamics Within and Between Marginalized Groups****Room:** (HR) Regency VII, **Time:** 11:00 AM - 12:15 PM**Chair:** Chadly Stern, *Univ. of Ill. at Urbana-Champaign***Co-Chair:** Maureen Craig, *NYU*

Examining relations among members of marginalized groups is vital for understanding intergroup relations and political behavior in a diversifying 21st century. These talks explore intra-minority dynamics at several levels: relations within a single minority group, relations between different minority groups, and how relations with the majority group affect intra-minority intergroup relations.

ABSTRACTS**Status Quo Support Among Minorities Predicts Devaluation of Stereotypical Ingroup Members**

Who do minorities view as positive representatives of their community? We found that civil rights groups and sexual minority participants who supported the societal status quo were more likely to express preference for group members who challenged (vs. embraced) stereotypes. This effect was explained in part through thinking that group members who challenge stereotypes are better representatives.

Chadly Stern¹, Tessa West², Nicholas Rule³¹*Univ. of Ill. at Urbana-Champaign*, ²*New York Univ.*, ³*Univ. of Toronto***The Relationship Between Intra-Group Discrimination and Intra-Group Attitudes**

Making use of the recent Collaborative Multiracial Political Study (2016), I find that while most minority respondents report experiencing discrimination from a White individual, a substantial amount report that they were discriminated against by another minority. Experiencing discrimination from another minority subsequently shapes minorities' intragroup attitudes.

Gabriel Sanchez¹¹*Univ. of New Mexico***Structural Solidarity: Lay Theories of Group Disadvantage and Coalitional Attitudes among Stigmatized Groups**

Do individuals' lay theories about what drives their own group's disadvantage influence expressed solidarity with other stigmatized groups? In 3 studies, among protestors and the general public, beliefs that ingroup disadvantage is driven by structural factors (v. interpersonal bias), are associated with and lead to more support for coalescing with other stigmatized groups to pursue equality.

Maureen Craig¹, Julian Rucker²¹*NYU*, ²*Yale Univ.*

On Majority-Minority Triadic Relations: The Role of Majority-Group Contact and Context in Shaping Interminority Relations

Three studies explore how majority-group contact and a majority-group context shape interminority relations. Whereas majority-group contact can undermine political solidarity between minority groups, perceptions of commonality among minorities are strengthened within predominantly majority-group contexts, compared to predominantly minority-group contexts.

Invited Session

[74] Legacy Symposium: Alice Eagly

Room: (HR) Hanover AB, **Time:** 11:00 AM - 12:15 PM

This symposium addresses the psychology of gender from the perspective of social role theory. Alice Eagly provides an overview of the theory. Anne Koenig and Amanda Diekman present research that explores the theory's implications for stereotype content and choice of occupational roles, including careers in STEM.

ABSTRACTS

The Social Roles of Women and Men Guide the Psychology of Gender

Gender is a theme that is embedded within many topics in social and personality psychology. Social role theory, originally proposed 30 years ago, provides a general frame for understanding these phenomena of gender. The theory gives priority to the gender division of labor, which sets in place a cascade of psychosocial processes by which people come to understand the attributes of each sex and tend to enact them.

Alice Eagly¹

¹Northwestern Univ.

Groups' Social Roles Shape Their Stereotypes

Social role theory argues that observations of groups' social roles create stereotype content. Both correlational studies relating role attributes to stereotypes across a variety of groups and experimental research manipulating roles and intergroup relations with fictional groups supported this hypothesis. Roles are an important piece of information about groups' location in the social structure.

Anne Koenig¹

¹Univ. of San Diego

A Goal Congruity Model of Gender Gaps in STEM Pursuits

Investigating how people view the goals afforded by social roles can inform understanding of role entry, engagement, and exit. I will explore women's lower participation in STEM, relative to other male-stereotypic fields, through the lens of goal congruity. Gender roles emphasize communal attributes for women, but STEM fields are consensually perceived as unlikely to afford communal goals.

Amanda Diekman¹

¹Miami Univ.

[75] Inequality, Social Justice and Collective Action: How Society Informs Science

Room: (MM) Atrium A, **Time:** 11:00 AM - 12:15 PM

Chair: Anup Gampa, Univ. of Virginia

ABSTRACTS

Racial Bias in the Real World: Social Dominance Orientation and Police Use of Force

We collected psychological measures of bias from police officers in a large Southern city and linked survey data with officers' behavioral histories. Our findings reveal Social Dominance Orientation (SDO) predicts both the frequency with which White and Latino officers use force, and the severity of that force. This relationship was robust to controls for officer characteristics and implicit bias.

¹John Jay College of Criminal Justice,

²Center for Policing Equity and John Jay College of Criminal Justice

Intergroup Contact and Support for Social Change in Advantaged and Disadvantaged Groups

Results of a pre-registered survey study (N = 10,977; 23 countries) suggest that intergroup contact is positively associated with support for social change among ethnic majorities and (cis-)heterosexuals, but negatively among ethnic and sexual/gender minorities. Satisfaction of needs for empowerment and acceptance during contact were positively associated

with support for social change.

¹Univ. of Wisconsin, Madison

[76] When Good is Bad: Surprising Limits and Consequences of Prosociality

Room: (MM) Atrium B, **Time:** 11:00 AM - 12:15 PM

Chair: Lily Jampol, Queen Mary, Univ. of London

As a society, we strive toward and encourage prosociality (acts or intentions of behaving in the interest of another). But is good always good? Here we present four ways in which our desires and undertakings to do good by others fall short of intended consequences or others' perceptions.

ABSTRACTS

Charity as Hypocrisy: When Good Deeds Seem Less Praiseworthy

Four studies demonstrate that moral cleansing – doing good deeds to compensate for bad ones – may seem hypocritical to observers. Individuals are judged as less praiseworthy when their private volunteering (e.g., helping people quit smoking) was attributed to a motivation to reduce feelings of guilt about their work (e.g. tobacco company), a finding mediated by increased judgments of hypocrisy.

Kieran O'Connor¹, Daniel Efron², Brian Lucas³

¹Univ. of Virginia, ²London Business School, ³Cornell Univ.

Noticing Need Reduces Future Helping: An Exploration of Need Salience in Real-World Helping

A helper's belief that he or she is making an impact can motivate future helping, but not every helping experience creates a perception of impact. We demonstrate in two field studies examining daily helping and direct donations that when a single helping experience leads helpers to notice more people in need, it can reduce their perceived impact, thereby reducing future willingness to help again.

Daron Sharps¹, Juliana Schroeder¹

¹UC Berkeley

Kind or Candid? Gender Influences Feedback Approach to Poor Performers

Does feedback kindness depend on the recipient's gender? In three studies, we find that people think kind feedback is more important and helpful for female (compared to male) poor performers. We also find that these biased assumptions may affect the quality of feedback to women. Kindness stemming from group-based beliefs may not be as prosocial as we think.

Lily Jampol¹, Aneeta Rattan²

¹Queen Mary, Univ. of London, ²London Business School

Are Kantians Better Social Partners? People Making Deontological Judgments are Perceived to be More Prosocial than they Actually Are

Why do people make deontological decisions, even though they often lead to unfavorable outcomes? One possibility is that deontological decisions signal prosociality. In five studies we find that deontologists are perceived as more trustworthy, altruistic and cooperative while their actual behavior is not. Deontological judgments are not universal, reliable signals of prosociality.

[77] New Naturalistic Methods for Understanding Well-Being through Everyday Behavioral Traces

Room: (MM) A704, **Time:** 11:00 AM - 12:15 PM

Chair: Aaron Weidman, *Univ. of Michigan*

Co-Chair: Jessie Sun, *UC Davis*

What can everyday behavioral traces reveal about well-being and mental health? Four speakers will demonstrate how new naturalistic technologies can be harnessed to capture everyday behavioral residue (e.g., speech sound and content, social media posts, and both in-person and smartphone-mediated interactions) that help us to better predict and understand the experience of well-being.

ABSTRACTS

Hearing Happiness: Predicting Momentary Happiness from Acoustic Analysis of the Voice

To circumvent the limits of self-report assessment, we developed a method for predicting happiness without asking people. Participants (N=502) completed 3,926 one-minute audio recordings on their smartphones, and reported their momentary happiness. We used machine learning analyses to predict momentary happiness at above-chance levels from acoustic features extracted from each of these recordings.

Aaron Weidman¹, Elizabeth Dunn²

¹*Univ. of Michigan*, ²*Univ. of British Columbia*

The Language of Well-Being: Tracking Within-Person Emotion Fluctuations through Everyday Speech

We examined within-person associations between everyday spoken language and state positive and negative emotions among 165 participants (1,406 observations). Dictionary-based and data-driven analyses of the transcripts suggest that everyday spoken words are behavioral markers of the experiences (e.g., positive relationships, sociability, less math) that are associated with momentary well-being.

Language Analyses Across Time for Mental Health Forecasting and Discovery

We used time series analysis to understand how social media language and posting behaviors reflect mental health diagnoses and forecast significant mental health events (e.g. suicide attempt). We validated the ability to forecast events, beyond chance and out of sample, and explored specific pre-event signals (e.g., changes in affect expressions, temporal orientation, and posting behaviors).

H. Andrew Schwartz¹

¹*Stony Brook Univ.*

Sensed Sociability Behaviors and their Relationship to Subjective Well Being

Sociability is a preference for affiliating with others (vs. being alone). Yet, we know very little about how sociability manifests in daily life. Using data from a 2-week study (N = 562), this talk illustrates a smartphone-sensing approach to capturing social behaviors (calls, texts, ambient conversations), and shows how such behaviors map onto subjective well-being (e.g., loneliness).

Gabriella Harari¹

¹*Stanford Univ.*

[78] Overcoming Group Bias and Fostering Intergroup Helping in Children

Room: (MM) A706, **Time:** 11:00 AM - 12:15 PM

Chair: Antonia Misch, *Yale Univ.*

Co-Chair: Jellie Sierksma, *Univ. of Wisconsin-Madison*

Intergroup bias and discrimination develop early in life. This symposium presents the latest and most promising developmental accounts on how slight changes in context can reduce intergroup bias (Study 1 & 2), and how certain ways of thinking about the outgroup can foster intergroup helping (Study 3 & 4) in children, including data from the US, UK, and the Netherlands.

ABSTRACTS

Intergroup Bargaining Eliminates Discriminatory Behavior in Children and Adults

Can we reduce discrimination by changing contexts in which behavior occurs? We explore the shift from a unilateral context in which one party has all the power to a bilateral context in which both parties must reach a deal. We show that adults and children as young as 6 spontaneously cease

discriminatory behavior in the bilateral context, suggesting a promising means of bias reduction.

Yarrow Dunham¹

¹*Yale Univ.*

Expectation of Future Collaboration Diminishes Minimal Ingroup Bias in Children

This study investigates whether children's preferences for their own group disappear when they expect to collaborate with members of their outgroup rather than with their ingroup. Indeed, children in the experimental condition liked both ingroup and outgroup members equally, while children in the control condition showed a clear ingroup bias in attitudes and preference measures.

Antonia Misch¹, Yarrow Dunham¹

¹*Yale Univ.*

Negative Stereotypes Can Motivate Children To Help Out-Group Peers More

Two studies examined when and why children (10-13 years) help ethnic in-group and out-group peers. Children intended and actually helped an out-group peer more with a word-guessing game than an in-group peer, despite a more positive evaluation of the in-group. Study 2 suggests when children endorsed the stereotype that the out-group is 'less smart', they wanted to help them more.

Jellie Sierksma¹, Tessa Lansu², Gijs Bijlstra², Johan Karremans²

¹*Univ. of Wisconsin-Madison*, ²*Radboud Univ.*

Encouraging Young Children to Humanize the Outgroup

We investigated whether encouraging children to mentalize about, and thus perhaps humanize, a geographically based outgroup would elicit more empathic helping towards them. Across two studies, we found that this manipulation increased their willingness to help a novel outgroup victim. Our results highlight a potential strategy that could enhance interventions aimed at reducing intergroup bias.

[79] How Groups Help and Hinder Sustainability: Insights Beyond the Lab

Room: (MM) A707, **Time:** 11:00 AM - 12:15 PM

Chair: Jonathon Schuldt, *Cornell Univ.*

Co-Chair: Adam Pearson, *Pomona College*

From government "nudge units" to citizen groups, interest in social psychological approaches to sustainability has grown rapidly in recent years; yet, real-world dynamics that breed social conflict on environmental issues remain poorly understood. Four papers move beyond the lab to reveal group processes that impede environmental goals and highlight intervention pathways in a hyper-partisan era.

ABSTRACTS

How Political Partisanship Shapes Perceptions of Public Opinion on Global Warming

We shed new light on factors that shape perceptions of public opinion about whether global warming has been happening. A survey of a national probability sample of American adults (N=804) suggests that political partisans project the opposite opinion onto out-group members, and that alignment between one's own opinion and the perceived norm of a political party moderates social projection.

Adina Abeles¹, Lauren Howe¹, Jon Krosnick¹, Bo MacInnis¹

¹*Stanford Univ.*

Group Norm Violations in an Online Environmental Social Network: Effects on Impression Formation and Intergroup Judgments

We explore the use of norm violations as a cue to judge others' commitment to sustainability in a real-world social network. In an experiment conducted with users of an online citizen science network (N=292), norm violators were judged as less pro-environmental by dissimilar than by similar others, suggesting that dissimilarity may heighten use of normative information during impression formation.

[81] Bullshitting: Empirical and Experiential Examinations of a Pervasive Social Behavior
Room: (HR) Centennial I & II, **Time:** 12:45 PM - 2:00 PM
Chair: John Petrocelli, Wake Forest Univ.

Bullshitting involves communicating with little to no regard for evidence or truth. Very little is known, empirically, about this seemingly pervasive social behavior. This symposium demonstrates the value of understanding bullshitting by examining its antecedents and consequences, when people are receptive and sensitive to it, and conditions under which people identify it for what it is.

ABSTRACTS

Some Antecedents and Consequences of Bullshitting Behavior
 Little is known about the antecedents and consequences of bullshitting. Social conditions under which bullshitting is likely to occur are identified. Social perceptions of bullshitting, relative to lying and communicating with a concern for evidence, are explored. Bullshitting can also enhance

persuasion when arguments are weak, yet undermine persuasive attempts when arguments are strong.

John Petrocelli¹

Knowledge Does Not Automatically Protect Against Illusory Truth, But it Can

Repeated statements are typically judged as more true than novel statements. Across 3 experiments, we find that prior knowledge does not protect against this illusory truth effect. False statements that were read twice were given higher truth ratings than novel statements, even when the statements contradicted prior knowledge. Explaining why a statement was true or false did eliminate the effect.

Are People Good at Detecting Pseudo-Profound Bullshit?

“Hidden meaning transforms unparalleled abstract beauty.” Although this is a random sentence, many think it is profound. Is this driven by a failure to detect so-called pseudo-profound bullshit, or is it simply open-mindedness? Is bullshit receptivity reflexive, or are receptive people actually finding hidden meaning? I will provide a series of immaculate resolutions to these indomitable queries.

Gordon Pennycook¹
¹Yale Univ.

Calling Bullshit in the Age of Big Data

The world is awash in BS. Pandering politicians, winking advertisers, startup soothsayers, television “experts”, and even some scientists use the news media to promulgate half-truths, misrepresentations and sometimes outright lies. In response, we created a new class aimed at combatting this misinformation — callingbullshit.org — with an emphasis on data, figures, visualizations and statistics.

Professional Development

[82] Thriving and Surviving those First Years Post-PhD and Pre-tenure

Room: (HR) Centennial III, **Time:** 12:45 PM - 2:00 PM
Chair: Valerie Taylor, Spelman College

Co-Chair: Shantal Marshall, Nevada State College
 Successfully navigating the first few years post-PhD and pre-tenure are essential in thriving as a new faculty. This session will address some of the challenges with starting a new position and offer suggestions for a successful transition. Many topics will be audience-driven, though some will include negotiating start-up packages, working with students, and balancing work and personal life.

[83] New Frontiers in Social Norms: Understanding Perception, Mechanism and Application

Room: (HR) Centennial IV, **Time:** 12:45 PM - 2:00 PM
Chair: Gregg Sparkman, Stanford Univ.

Co-Chair: Sohad Murrar, Univ. of Wisconsin-Madison
 This symposium highlights new developments in social norms research. We discuss how group members' rank shapes norm perception, how normative information about views of diversity impacts inclusion and intergroup attitudes, how normative appeals framed as “working together” are more effective, and how dynamic norms (reflecting changes in others' behavior) motivate personal and social change.

ABSTRACTS

Who Is the Exception, and Who is the Rule?: Target's Hierarchical Rank Affects Norm Perception

We examine how individuals weigh the behavior of higher versus lower ranking group members in inferring the average group behavior. Individuals trying to learn the social norm prefer to learn the behavior of lower ranking individuals and give more weight to the behavior of lower ranking individuals. Perceptions are influenced more by the behavior of lower than higher ranking group members.

Jennifer Dannals¹, Em Reit¹, Dale Miller¹
¹Stanford Univ.

Using Descriptive Norms Messaging to Create Inclusive Climates

In 3 field and laboratory experiments, we tested the effectiveness of descriptive norms messages embedded in a poster or 5-minute video. Messages expressed to students that most of their peers welcome people from all backgrounds into their community and behave inclusively. These

messages increased positive intergroup attitudes and feelings of inclusion; effects persisted more than 5 weeks.

Sohad Murrar¹, Markus Brauer¹

¹Univ. of Wisconsin-Madison

Normative Appeals are More Effective When They Invite People to Work Together toward a Common Cause

Five experiments demonstrate that working-together normative appeals, appeals to social norms that invite others to “join in” and “do it together,” inspire conformity more. Working-together normative appeals increased charitable donations, reduced paper towel use, and increased interest in reducing personal carbon emissions, while appeals that included normative information alone had no effect.

Lauren Howe¹, Priyanka Carr², Greg Walton¹

¹Stanford Univ., ²SurveyMonkey

Dynamic Norms: How Others’ Change Facilitates Personal Change and Help Remedy Social Problems

We examine how dynamic norms—information about changes in norms or others’ behavior over time—can inspire personal change through a variety of mechanisms. In online and field settings, we explore impacts on self-efficacy, prescriptive norms, and identity compatibility, as well as possible contributions of dynamic norms to diverse social problems in environmental, health, and political contexts.

Gregg Sparkman¹, Greg Walton¹

¹Stanford Univ.

Special Event

[84] Inside the Grant Panel

Room: (HR) Regency V, **Time:** 12:45 PM - 2:00 PM

SPSP is pleased to announce the return of our small grants competition at the 2018 annual convention, formerly Q&pAy, now known as Inside the Grant Panel (IGP). IGP will showcase the grant applications of three small research grant finalists being evaluated LIVE by a panel of experienced social and personality grant reviewers on factors such as significance, research methods, innovation, budget, etc. In the end, the expert reviewers will pick a winner to receive a \$5,000 grant for their research. The two runners-up will each receive \$2,500. Inside the Grant Panel is an educational experience for both applicants and audience members and is open to any current SPSP member or student. If you are attending the convention and interested in participating, complete the application.

Professional Development

[85] Midway Through The Maze: Strategies for Post-Tenure Women of Color

Room: (HR) Regency VI, **Time:** 12:45 PM - 2:00 PM

Chair: Kristin Dukes, *Simmons College*

Co-Chair: Jeannetta Williams, *St. Edward’s Univ.*

An emphasis is placed on completing doctorate programs, securing tenure-track positions, and earning tenure, but what happens once tenure is earned? This panel aims to provide advice about life beyond tenure, with special attention to the challenges women of color may face after earning tenure and strategies for overcoming barriers to earning full professorship and holding leadership positions.

[86] Inferring Psychological Traits from Faces: Accuracies, Errors, and Mechanisms

Room: (HR) Regency VII, **Time:** 12:45 PM - 2:00 PM

Chair: Poruz Khambatta, *Stanford Univ.*

ABSTRACTS

You’re Not (Trust)Worthy: Male and Female Atheists and Christians Can Be Differentiated from Their Faces

Terribly maligned, atheist identity is perceptually ambiguous—or is it? Across six studies, faces of male and female atheists were reliably differentiated from Christians. Participants accurately categorized above chance the individual facial features (e.g., face only, eyes only) of atheists and Christians. Faces categorized accurately as atheist were perceived as less trustworthy and warm.

Shane Pitts¹, John Paul Wilson², Caralyn Patton¹

¹Birmingham-Southern College, ²Montclair State Univ.

Neural Detection of Socially Valued Community Members

Using a combination of social network and neuroimaging approaches, we tested the possibility that people in new communities track their peers’ ability to attract strong ties. In support of this idea, freshman dorm residents engaged brain systems associated with social cognition and reward processing when they viewed peers nominated by their broader community

as important sources of strong ties.

¹Univ. of Illinois at Chicago, ²Stanford Univ.

Computational Physiognomy: Using a Data-Driven Approach to Determine the Relationship between Personality and the Human Face

We link personality traits to facial features using a novel computational approach and visualize these relationships. Then, using this model, we test competing hypotheses regarding person perception inaccuracy. Our findings suggest that errors during person perception may be explained by inaccurate feedback during prior social interactions, rather than simply a poverty of the stimulus.

Poruz Khambatta¹, Michal Kosinski¹

¹Stanford Univ.

The Illusion of a Facial Action Unit: How Head Pitch Rotation Influences Perceptions of Dominance from an Inactive Face

Social perception research often focuses on faces, but perceivers almost always view the face as it rests upon its physiological foundation: the head. Yet little is known about the effects of head pitch rotation on perception. Across five studies, we show that head pitch influences judgements of dominance by mimicking the appearance cues associated with corrugator muscle activation.

¹Univ. of British Columbia

[87] Honor and Morality

Room: (MM) A704, **Time:** 12:45 PM - 2:00 PM

Chair: Patricia Rodriguez Mosquera, *Wesleyan Univ.*

The symposium presents novel studies on how honor and morality interact in a variety of social contexts. Leach and Garcia examine honor and trustworthiness in in-group’s self-stereotypes. Travaglino and Drury focus on masculine honor and morality. Brown and Green present on honor and loyalty. Rodriguez Mosquera examines social image concerns and emotions about academic honor code violations.

ABSTRACTS

The Honor in Claiming our Moral Integrity (and Other Virtues): Gender Stereotypes Revisited

If there is honor in claiming moral integrity, then trustworthiness should be central to in-group’s self-stereotypes and positive evaluation. Four studies of implicit, and two studies of explicit, gender stereotypes supported this view. Compared to warmth, trustworthiness was more strongly linked to in-group favoritism and satisfaction with group membership.

Colin Leach¹, Randi Garcia²

¹U of Connecticut, ²Smith College

Masculine Honor, Morality, and Contact with Criminal Organizations

Italian criminal organizations (COs) draw legitimacy from values of honor and masculinity. A longitudinal study demonstrates that individuals’ endorsement of these values longitudinally affect individuals’ frequency of contact with COs’ members. A cross-sectional study shows that frequency of contact mediates the relationship between masculine values and individuals’ tendency to romanticize COs.

Giovanni A. Travaglino¹, Lisbeth Drury²

¹Univ. of Kent, ²Birkbeck, Univ. of London

Semper Fidelis: Honor Ideology and the Moral Value of Loyalty

Three studies explore the connection between honor and loyalty. Two studies (n = 475) show that honor-oriented people value loyalty and respond harshly to loyalty violations. A third study shows that soldiers awarded the U.S. Congressional Medal of Honor in WWII – many of them having given their lives for their comrades – were more likely to hail from honor states than from non-honor states.

Ryan Brown¹, Kevin Green²

¹Rice Univ., ²Univ. of Oklahoma

Morality-Based Honor, Moral Emotions, and Social Image Concerns

Little research has been done on how morality-based honor operates within groups. In two experimental studies (Study 1: N = 147; Study 2: N = 185), I examined the emotional and social consequences of violations of academic honor codes. The studies show that moral emotions and social image concerns play a key role in maintaining moral behavior within groups.

Invited Session

[89] Registered Reports and Results-Blind Reviews: Examples from Social/Personality Psychology

Room: (HR) Centennial I & II, **Time:** 2:15 PM - 3:30 PM

Chair: R. Chris Fraley, *UI at Urbana-Champaign*

This symposium highlights the value of the registered report format (i.e., results-blind reviewing) for research in social and personality psychology. The symposium features reports from scholars who have proposed a study or are currently collecting data for which the results are currently (at the submission stage) unknown.

ABSTRACTS

Results-Blind Reviews: The Importance of Unbiasing Our Science

The research we learn about at conferences and in journals is merely a small subset of research that is actually conducted. It is generally assumed that publicized research is of higher quality than non-publicized research. However, the decision to submit, report, and publish research findings is often made after the results are known. Thus, research is often promoted based on empirical findings rather than the quality of the methods used to produce them. This process can distort cumulative knowledge because it excludes data from informative studies that did not provide desirable outcomes while including data from uninformative studies that did provide desirable outcomes. This presentation will elaborate on the nature of the problem, and introduce one potential solution: Registered reports. The registered report format is becoming increasingly common in scientific outlets (e.g., Chambers, 2017; Simons, Holcombe, & Spellman, 2014), but has yet to catch on in mainstream social-personality psychology. This talk introduces the need for this format, the pros and cons of the process, and will serve as a general overview of the talks that follow.

R. Chris Fraley¹

¹UI at Urbana-Champaign

Sexual Behaviour and Relationship Quality

Introducing a novel sexual behaviour into an existing relationship may help to improve relationship quality and potentially re-ignite feelings of passion and improve intimacy. A new sexual behaviour introduced into a couple's longstanding romantic relationship can constitute a shared, novel, exciting, and pleasurable activity, and such experiences may alleviate relationship

Invited Session (cont.)

boredom and improve partners' feelings for one-another and their relationship. Further, novel sexual behaviours that improve the frequency, quality, and timing of coital orgasm, within the romantic relationship may have intrinsically positive effects on sexual satisfaction in both partners in and of themselves. This study examines the impact of novel sexual behaviours on relationship quality by asking heterosexual couples to engage in shared use of a novel vibrator while engaging in novel sexual positions, or engage in novel sexual positions without an accompanying vibrator, and compare changes in their feelings of intimacy, passion, sexual satisfaction and relationship satisfaction, to a group of couples who will not be asked to modify their sexual behavior. (<https://osf.io/yksxt/>)

Lorne Campbell¹, Taylor Kohut¹, William Fisher¹

¹Univ. of Western Ontario

Modeling Dating Preferences within a Drift-Diffusion Framework: A Tinder-Style Study

What do we find attractive in initial encounters with potential dating partners? Despite considerable research on this topic, a consistent set of characteristics that predicts interpersonal attraction remains elusive (Finkel & Eastwick, 2015). In addition, the contexts in which people meet may affect what we find attractive (Finkel et al., 2012). One such setting that has yet to receive much empirical attention is mobile-based dating applications such as Tinder (LeFebvre, 2017). In the current study, we designed a swiping-based dating study in which participants nominate potential partners with whom they would like to contact. To understand the processes underlying these decisions, we applied a sequential sampling technique—the drift diffusion model—to model dating decisions (Johnson et al., 2017). We predicted both behaviors and process-level mechanisms underlying attraction based on rater and target individual differences. Study design, measures, and hypotheses were pre-registered and will use both exploratory and confirmatory samples (<https://goo.gl/gr5Ktj>).

William Chopik¹, David Johnson¹

¹Michigan State Univ.

Confirmatory Research in Hard-to-Collect and Already-Analyzed Data

Sometimes you have an extremely valuable and hard-to-collect dataset, but you can't pre-register anything because you know too much. Can you still do confirmatory research in such situations? How can we use these existing data to test confirmatory research questions? One solution is to solicit registrations of questions and analysis plans from people who have not seen the data. For this talk, we will invite research parasites to mooch off PAIRS—a longitudinal, multi-method data set involving EAR audio data from over 400 people. We will share a description of our measures and materials, and invite researchers outside our lab to submit hypotheses and analysis plans.

[91] Inequality, Perceived Mobility, and Economic Growth: Advances and Future Directions

Room: (HR) Centennial IV, **Time:** 2:15 PM - 3:30 PM

Chair: Dylan Wiwad, *Simon Fraser Univ.*

Economic inequality in the United States is at its highest. Yet, despite Americans' preference for greater equality, little progress has been made. Four talks address this conundrum by introducing new measures of tolerance for inequality, and examining Americans' perceptions of poverty, economic inequality, and upward social mobility.

ABSTRACTS

Not So Well-Endowed? Perceived and Ideal Levels of U.S. College Endowments

How much inequality of opportunity should there be? In two studies (n = 551), we examine estimations of, and preferences for, the amount of wealth owned by the top and bottom US colleges, and whether estimates are affected by different levels of inequality. Results indicate that people

consistently underestimate college endowment inequality and prefer a more equal distribution.

Martin Day¹, Michael I. Norton²

¹Memorial Univ. of Newfoundland, ²Harvard Business School

The “Intuitive” Great Gatsby Curve: Lay Perceptions of Economic Inequality and Economic Mobility

People accept vast economic inequality because they underestimate the scope of inequality and overestimate the amount of mobility. I examine the perceived relationship between inequality and mobility. I find that people (accurately) perceive a negative relationship between these two factors. As a consequence, the tendency to underestimate inequality leads people to overestimate economic mobility.

Shai Davidai¹

¹New School for Social Research

Economic Scarcity and Demoning the Poor

Economic inequality is at staggeringly high levels in the U.S. Although we may expect people to be most generous to the poor during times of economic downturn (compared to economic boom), we find that people create the most negative images of the poor under these conditions. These images, in part, lead to reduced willingness to give government benefits to those in need.

Stephanie McKee¹, Jazmin Brown-Iannuzzi¹, Ryan Lei²

¹Univ. of Kentucky, ²Northwestern Univ.

Tolerance for Economic Inequality: Development and Validation of a New Scale

Psychologists have shown a recent flood of interest in attitudes towards economic inequality, yet no valid instrument captures this construct. In two studies we develop and adjudicate a brief, reliable, and valid measure of tolerance for economic inequality with hopes that this scale will aid researchers seeking to understand the perceptions of economic inequality.

[92] An Integrative Perspective on Social Rank

Room: (HR) Regency V, **Time:** 2:15 PM - 3:30 PM

Chair: Christopher Cannon, Northwestern Univ.

This symposium explores social rank from an integrative perspective. While early work has focused on dimensions of social rank in isolation, this symposium will simultaneously explore multiple social rank dimensions: (1) the relationship between power and status; (2 & 3) the distinction between prestige and dominance; and (4) an overarching theory that bridges these four social rank constructs.

ABSTRACTS

Do I Feel Powerful or Respected? Competition and Cooperation as Triggers of Power and Status Salience

Emerging research highlights important differences in the psychological experience of power versus status. However, these two bases of hierarchy positively covary in most settings. How might high-ranking individuals who have power and status think and behave? In three studies, we find that competition (vs. cooperation) increases the salience of power relative to status in high-ranking individuals.

Russell Johnson¹, Nicholas Hays¹, Zhiya Guo¹

¹Michigan State Univ.

In Pursuit of Prestige: Social Approval Concerns Cause Leaders to Vigilantly Monitor Social Cues

Two studies (N=361) reveal that, when anticipating providing subordinates with criticism publicly (v. privately), leaders' motivation for prestige (but not dominance) is positively associated with (1) heightened attention to (negative) social cues and (2) a self-protective tendency to misidentify genuine smiles as disingenuous. These low-level processes might help leaders maintain social approval.

Charleen Case¹, Katherine Bae¹, Jon K. Maner²

¹Univ. of Michigan, ²Florida State Univ.

Dominance and Prestige: Debates, Misunderstandings, and New Evidence

Two studies of lab task groups (N=248 in 64 groups; N=840 in 210 groups) address the debated foundations of social hierarchy. Strong evidence indicates that dominance (force and intimidation) and prestige (respect and expertise) are two avenues to social rank. Each strategy promotes influence for leaders and non-leaders, operates in men and women, and cannot be explained by perceived contribution.

Joey Cheng¹, Jessica Tracy², Joseph Henrich³

¹Univ. of Illinois at Urbana-Champaign, ²Univ. of British Columbia, ³Harvard Univ.

An Integrative Theory of Social Rank: A Motivational Perspective

This work introduces a motivational perspective to integrate four distinct social rank constructs: power, status, prestige, and dominance. Specifically, these social rank constructs can be related and distinguished through distinct motivational orientations: internal agency, external agency, and communion. Further, this motivational perspective explains effects of social rank on behavior.

Christopher Cannon¹, Derek Rucker¹

¹Northwestern Univ.

[93] Longitudinal Investigations of Personality Development

Room: (HR) Regency VI, **Time:** 2:15 PM - 3:30 PM

Chair: Lucy Zheng, UC Davis

ABSTRACTS

Why Do You Like Yourself?: Sources of Self-Esteem across the Lifespan

We present self-reported qualitative sources of global self-esteem from a lifespan sample. Responses from children aged 5-13 differ from those of adolescents and adults in frequency but not content, indicating meaningful self-conceptions from young children. We also show associations between categories of responses and self-esteem mean levels to inform individuals' understanding of self-esteem.

Michelle Harris¹, Brent Donnellan², Kali Trzesniewski³

¹Univ. of Texas at Austin, ²Texas A&M Univ., ³UC Davis

Remembering Personality Change: The Accuracy of Self- and Informant-Recollections of Personality Change Across Time

The accuracy of personality change recollections is not often tested empirically. One-thousand, six-hundred and thirty older adult targets and informants completed the NEO and a 30-item change measure at three time points across 7-10 years. Latent growth curve models indicated that people were accurate about change, with informants being slightly more accurate. Informants added incremental validity to self-reports of actual change.

Joshua Oltmanns¹, Joshua Jackson², Thomas Oltmanns²

¹Univ. of Kentucky, ²Washington Univ. in St. Louis

Does Conscientiousness Predict Positive Outcomes During Middle School?: Testing Longitudinal Reciprocal Relations between Conscientiousness and Academic Achievement

Conscientiousness is a powerful predictor of school and work outcomes during adolescence and adulthood. However, less is known about its prospective effects on school outcomes at younger ages. This study (N=768), across a year of middle school, found that grades predicted increases in conscientiousness, but surprisingly the reverse was not true. Findings held across sex, SES, and ethnicity.

Lucy Zheng¹, Richard Robins¹, Kali Trzesniewski¹

¹UC Davis

I Am What I Do and I Do What I Am?: Correlated Change in State and Trait Personality

Research on personality change has mainly relied on self-reported “trait” measures that assume people have self-knowledge. Doubts of the validity of this assumption have led to a push for more “state” level measures of personality (e.g. ESM). Using seven waves of trait and three waves of state ratings of personality, we assess whether trait measures capture change in personality similarly to ESM measures.

Emorie Beck¹, Joshua Jackson¹

¹Washington Univ. in St. Louis

[94] A Pre-Registered Depletion Replication Project: The Paradigmatic Replication Approach

Room: (HR) Regency VII, **Time:** 2:15 PM - 3:30 PM

Chair: Kathleen Vohs, Univ. of Minnesota

We conducted a large-scale pre-registered replication study to test the robustness of the ego depletion effect. In doing so we created a new model, the paradigmatic replication. More than 40 labs from around the world contributed data, and frequentist (meta-analytic) and Bayesian models tested the hypotheses. Talks will cover methods, results, and implications for depletion theory and the field.

ABSTRACTS

The Depletion Replication Project: Overview and Differences from Existing Approaches

I will discuss rationales for the depletion replication project and a new form of replication that we developed, the paradigmatic replication. Features include crowdsourcing with depletion experts, evaluations of procedures by participating labs, video chats with lab members before data

¹Univ. of Minnesota

Replicating Ego Depletion: Details about the Labs, Methods, and Predictions

This talk features methods of the multi-laboratory test of depletion. With help from experts, we selected two paradigms featuring different manipulations of depletion and different dependent measures. We describe how labs were recruited and how communications flowed between labs and the project team during the 18-month period. We also present pre-registered confirmatory and exploratory hypotheses.

Brandon Schmeichel¹, **Anna Finley**¹

¹Texas A&M Univ.

Bayesian Analysis of Depletion Replication Results

We discuss Bayesian approaches, tested on the depletion replication. This approach is based on analyzing (1) each study separately using a preregistered-informed prior effect size in Bayesian t-tests; (2) the set of studies using a Bayesian model-averaged meta-analysis. We detail depletion replication results from meta-analytic and Bayesian approaches and highlight advantages of Bayesian methods.

EJ Wagenmakers¹, **Quentin Gronau**¹

¹Univ. of Amsterdam

Implications of the Depletion Replication Study for Meta-Science and Behavioral Research

I will discuss implications of the depletion replication project's features for conducting behavioral science generally. While direct replications remain important, in the long run the understanding of psychological constructs is best advanced by sampling from a range (ideally a representative range) of multiple independent and dependent variables.

David Funder¹

¹UC Riverside

[95] Status and Stigma: Multi-Method Perspectives on Race and Gender

Room: (MM) Atrium A, **Time:** 2:15 PM - 3:30 PM

Chair: Amelia Stillwell, *Stanford Univ.*

Co-Chair: Brian Lowery, *Stanford Univ.*

This symposium showcases multiple empirical methods for conducting intersectional research on group hierarchies. We present experimental, archival, and field data demonstrating that race and gender operate together to influence people's experience of stigma, status, and discrimination.

ABSTRACTS

Presumptions of the Prejudiced Mindset: Why Social Identity Cues Transfer Across Race and Gender

Most stigma researchers assume a direct correspondence between the cues that signal threat or safety and the target (i.e., sexism threatens women, racism threatens racial minorities). In a series of studies, this research reveals that the boundaries of stigma are far less rigid because people believe that prejudiced attitudes have monolithic qualities.

Diana Sanchez¹, **Kimberly Chaney**¹, **Jessica Remedios**², **Sara Manuel**¹, **Leigh Wilton**³

Whose Status Matters? Women's Sexual Behavior as a Status Cue for In-Group Men

Historical records suggest American anti-miscegenation laws were selectively enforced to separate White women and non-White men. We present archival and experimental evidence that White men experience status threat when they believe White women are in romantic relationships with Black men. Understanding this threat sheds light on the role of gender and sexuality in maintaining status hierarchies.

Amelia Stillwell¹, **Brian Lowery**¹

¹Stanford Univ.

Subtle Bias in Driver Yielding Behavior at Crosswalks

Controlled field experiments tested the hypothesis that drivers' yielding behavior at crosswalks is affected by pedestrians' race (Black/White) and gender (male/female). Results indicated that Black pedestrians were less likely to have a car stop, were passed by more cars, experienced longer wait times, and had cars stop closer. Further, these patterns were directed most strongly at Black males.

Detecting Discrimination Against Intersectional Individuals

How does perceivers' ability to detect discrimination against intersectional individuals differ relative to prototypical targets? In racism and sexism hiring discrimination studies, perceivers had a harder time detecting discrimination against the most prototypical targets and more easily detected discrimination against intersectional targets (black women).

[96] #Outrage! Understanding the Spread of Moral Ideas in Online Interactions

Room: (MM) Atrium B, **Time:** 2:15 PM - 3:30 PM

Chair: Amit Goldenberg, *Stanford Univ.*

Online networks play a central role in the spread of moral ideas and actions. Our symposium explores unique processes that contribute to this spread, focusing on two main factors, use of language and emotions. We use advanced methodologies to explore a variety of large, online datasets in a variety of political contexts including Twitter, political forums, and YouTube videos.

ABSTRACTS

Moral Contagion: Echo-Chambers, Source Effects and Behavioral Consequences

We find that moral-emotion increases diffusion of moral ideas in online networks ('moral contagion'). We tested moderators and consequences: moral contagion was stronger within ingroups and Republicans showed stronger moral contagion effects than Democrats. We also found that followers of Donald Trump used more moral-emotional language in political discourse when he used moral-emotional language.

The Half-Life of Viral Altruism

Societal altruism is changing. Online social media is providing new ways of inspiring collective action on critical societal challenges. What makes some social causes go viral while others never take off? Here we evaluate the ALS Ice Bucket Challenge as a prime example of social contagion effects and find that despite its virality the half-life of such online altruism is extremely brief.

Sander van der Linden¹

¹Univ. of Cambridge

Emotional Escalation in Twitter Replies as a Vehicle for Social Movements

We explored the occurrence of emotional escalation in online social movements, in which an expression of a certain emotion elicits even stronger emotional replies. Analysis of three large datasets from Twitter suggests that replies are more emotional than the tweets they reply to and that such behavior is rewarded. Two online studies further explore potential mechanisms for such escalation.

Affective Intelligence in Online Political Discussion Forums

We study the relationship between political behavior and affective states through a Dimensional reformulation of Affective Intelligence Theory (DAIT). Using large data in from online discussion forums, we find that discussions characterized by low affective potency and extreme valence are more polarized and less cognitively complex than discussions with high potency and/or less extreme valence.

ABSTRACTS

Tall, Dark, and Threatening: Race and the Cost of Height

Height seems beneficial for men in terms of salaries and success; however, past research on height examines only White men. For Black men, height may be costly rather than beneficial, amplifying pre-existing stereotypes of threat. We use New York Police Department stop-and-frisk data, a representative surveys, and an experiment to demonstrate the cost of height for Black men.

Transgressors’ Willingness to Apologize: The Effects of Social Power and Perspective Taking

One effective way to reconcile relationships is to offer an apology. However, apologies pose risks that transgressors try to avoid. Using power approach theory, we tested the effect of social power on willingness to apologize. Results suggest high power transgressors apologize less than low power transgressors (Studies 1-3); however, taking the victims’ perspectives reversed this effect (Study 4).

Socrates, Sophists, and Political Dialogue: How Explaining Political Issues Impacts Reasoning Processes

Present studies investigate how explaining political issues (e.g., healthcare, gun control) during the 2012 and 2016 U.S. presidential elections impacts reasoning process. Results suggest that explanatory roles can promote more inclusive /Socratic styles of reasoning, over didactic/Sophist forms of reasoning, highlighting the role of generative motivations and self-investment in this process.

¹Univ. of Waterloo

Physical Attractiveness and Belief in a Just World: The Mediating Effects of Life Satisfaction

Previous research indicates that individuals privileged by society tend to be stronger endorsers of the just world hypothesis. This study examined the effect of perceived physical attractiveness on this belief. Our findings suggest a relationship between physical attractiveness and belief in a just world; however, we found this relationship to be mediated by life satisfaction.

R. Shane Westfall¹, Murray Millar¹, Aileen Lovitt¹

¹Univ. of Nevada, Las Vegas

Comparing Two Models of Dyadic Change: Correlated Growth vs. Common Fate

The present study compared two growth models, Correlated Growth and Common Fate in modeling changed in relationship and life satisfaction. Common Fate Growth fit the data better for relationship satisfaction, whereas Correlated Growth fit the data better for life satisfaction. This suggests that relationship satisfaction changes at the dyad level, life satisfaction at the individual level.

The Freedom Trap: A Sociocultural Emphasis on Independence Explains the Gender Gap in Science Engagement in 55 Countries

Three studies (archival data, agent-based simulation, and behavioral experiment) examined the idea that a sociocultural emphasis on independence is positively related to the gender gap in STEM. With the freedom to quit STEM, as opposed to the requirement to continue common in interdependent contexts, independent contexts may have the unintended consequence of exacerbating disparity.

Making Boundaries Great Again: Essentialism and Support for Boundary-Enhancing Initiatives

We demonstrate that psychological essentialism entails an increase in support for boundary-enhancing legislation, policy, and social services, and that it does so under conditions that disadvantage social groups (e.g., support for Donald Trump’s boundary-enhancing policies) as well as conditions that benefit disadvantaged social groups (e.g., support for LGBTQ counseling services).

Vaccine Hesitancy: Are Expectations of Group Approval or Rejection Associated with Parents’ Beliefs Over and Above the Effect of Norms?

We examined whether expectations of group approval or rejection (EGARs) were associated with vaccine hesitancy after accounting for injunctive and descriptive norms using a residualized regression approach. Vaccine-positive EGARs explained variance in the hesitancy of expecting parents over and above norms in three of six the groups studied (friends, family, and

medical professionals).

¹Univ. of Guelph

Targets’ Waist-to-Hip Ratio Predicts Sexual Perception and Responses to Reports of Sexual Assault

We investigated how waist-to-hip ratio (WHR) influences judgments about targets’ sexual behavior and rape victim blaming. Although low WHR women are seen as more sexually unrestricted (Studies 1a and 1b), they are also seen as more likely to be victimized (Studies 2a and 2b) and less likely to be victim-blamed (Study 3). Thus, targets’ bodily cues play a key role in reactions to sexual assault.

¹Miami Univ.

The Financial Consequences of Kindness: When and Why Agreeableness Leads to Negative Financial Outcomes

We report evidence from five studies (N=340,557) showing that the personality trait of agreeableness is linked to adverse financial outcomes (e.g. lower savings or higher debt), especially among low-income individuals. This relationship is mediated by agreeable individuals placing less value on the importance of money, but not by agreeable individuals pursuing more cooperative negotiating styles.

Sandra Matz¹, Joe Gladstone²

¹Univ. of Cambridge, ²UCL

Can Race Be Replaced?: Ecology and Race Stereotyping

Why do we stereotype and categorize others by their race? We propose here a novel answer: because perceivers use race to infer the kinds of environments/ecologies that groups live in. In three studies, we demonstrate that race stereotyping and categorization can be reduced and even replaced when perceivers are given information about another person’s home environment.

[98] From Local to Global Psychology: Climate, Creativity, and Culture

Room: (MM) A706, **Time:** 2:15 PM - 3:30 PM

Chair: Paul A. M. van Lange, *VU Amsterdam*

Co-Chair: Michele Gelfand, *Univ. of Maryland*

One major lesson from psychology is that cultures differ considerably in various basic psychological variables. The present symposium focuses on global psychology by asking how psychological traits and cultural variables such as self-regulation, innovation, and aggression are shaped by environmental differences, such as climate, wealth, income inequality, disease, and ecological threat.

ABSTRACTS

Regional Ambient Temperature Predicts Human Personality

Since humans constantly experience and react to ambient temperature, we theorize that temperature shapes personality. Two large-scale studies on 59 Chinese cities (N = 5,587) and 12,499 U.S. zip codes (N = 1,660,638) revealed that individuals who grew up in milder temperatures scored higher on personality factors associated with socialization/stability and personal growth/plasticity.

Jackson Lu¹

¹Columbia Univ.

CLASH Model: Why Climate Reinforces a Culture of Planning

A new model of Climate, Aggression, and Self-Control in Humans, CLASH, suggests that average temperature and seasonal variation play a key role in shaping a culture of planning: time orientation and self-control. We found support for CLASH in that soccer coaches were more often hired and fired in locations with (a) higher average temperature, and (b) smaller seasonal variation in temperature.

Disease Threat and Cultural Differences: New Directions

Research suggests that disease threat influences cross-cultural differences, but this conclusion has been limited by a reliance on countries as units of analysis. This talk presents new results from small-scale societies, and results that integrate climatic and economic perspectives. These data provide convergent evidence for the role of disease threat in cultural variation.

Damian Murray¹, Nicholas Kerry¹

¹Tulane Univ.

Fractal Patterns of Tightness-Looseness

The strength of social norms, or tightness-looseness (TL), is a key element of cultural systems. Drawing on field, experimental, computational and neuroscience methods, I describe emerging evidence that shows that TL exhibits a “fractal” pattern across levels of analysis. Data at the national, state, organizational, and class levels show similar predictors and trade-offs of TL for human groups.

[100] The Effect of Smartphones on Emotions, Mental Health, and Well-Being

Room: (HR) Centennial I & II, **Time:** 3:45 PM - 5:00 PM

Chair: Jean Twenge, *San Diego State Univ.*

Smartphones were adopted faster than any other technology. Four talks explore how smartphones and social media impact mental health and psychological well-being, including their influence on face-to-face interactions, adolescent populations, social support, and emotions.

ABSTRACTS

Does Interacting with Online Social Networks Enhance or Undermine Well-Being?

This talk will discuss whether Facebook use enhances or undermines well-being. It will first review research demonstrating how Facebook use leads to declines in emotional well-being. It will then review work demonstrating the positive benefits of Facebook use for depressed individuals. It will conclude

by synthesizing these findings to illuminate the emotional pros and cons of Facebook usage.

Ethan Kross¹

¹Univ. of Michigan

The Effect of Smartphones on Face-to-Face Interaction

Proposing a complementarity-interference framework, we explore the effects of smartphones both on fundamental social behaviors and on the benefits of face-to-face interactions. We employ experimental methods to show that phones can lead people to smile less in social situations, and ESM to show that phone use is associated with feeling worse and less connected during face-to-face interactions.

The effect of new media screen activities on mental health and psychological well-being

In nationally representative samples of adolescents, time spent on new media screen activities was correlated with mental health issues and lowered well-being. Since 2011, teens spent more time on electronic devices and less time on non-screen activities, and mental health issues increased sharply while well-being declined. Smartphones may play a role in iGen's declining well-being.

Jean Twenge¹, Gabrielle Martin¹

¹Stanford Univ.

[101] Inferring Moral Character from Moral Judgments

Room: (HR) Centennial III, **Time:** 3:45 PM - 5:00 PM

Chair: Indrajeet Patil, *Harvard Univ.*

Co-Chair: Jim Everett, *Univ. of Oxford*

Many moral judgments center fundamentally around judgments of persons: when making moral judgments, people often seem to ask not "Is this action right or wrong?", but rather "Is this person good or bad?" In this symposium, we demonstrate how a person-centered approach has yielded new insights into the workings of human moral mind.

ABSTRACTS

Moral Character Evaluations: Situations Test Another's Moral-Cognitive Machinery

Social perceivers exhibit more pluralism in sizing up character than in describing actions' morality. We show that moral character evaluation is sensitive to non-moral cues that "test" character (e.g., time to make a decision). Those seen to have good character respond in ways that give confidence they can be trusted, even when such actions violate the perceiver's moral code.

The Perceived Moral Character of Soldiers

Within a larger project on perceptions of soldiers, in 2 studies (Ns = 29245) we investigated the effect of soldiers' moral judgment regarding their country's war effort, on evaluations of their character. Under some conditions, soldiers who rejected the war were seen as more principled and kind, while those who endorsed it were seen as more dedicated and competent.

Hanne Watkins¹, Geoff Goodwin¹

¹Univ. of Pennsylvania

Third-Party Compensation Signals Trustworthiness

Faced with norm violation involving perpetrator harming a victim, third-party actors are faced with two options: compensating the victim (third-party compensation or TPC) and/or punishing the perpetrator (third-party punishment or TPP). Our experiments provide convergent evidence that TPC is a better signal of trustworthiness to social partners than TPP.

Indrajeet Patil¹, Nathan Dhalwal², Fiery Cushman¹

¹Harvard Univ., ²Univ. of British Columbia

Inference of Trustworthiness from Intuitive Moral Judgments II: Impartiality and the Greater Good

In 2 pre-registered studies we show that people who make deontological judgments in moral dilemmas are preferred and perceived as better social partners. Even when making impartial prosocial decisions that maximise the well-being of the greatest number of people, consequentialists are still trusted less than deontologists.

Professional Development

[102] Journal Editors Discuss Policy

Room: (HR) Centennial IV, **Time:** 3:45 PM - 5:00 PM

Chair: Roger Giner-Sorolla, Univ. of Kent at Canterbury

Recently, journals have faced new challenges: replicability, openness, and statistical confidence. Five journal editors (JPSP, JESP, and PSPB) will share responses about the emergence of new guidelines and standards. A diversity of approaches has emerged, but is more coordination needed? We will discuss how changes should be implemented, especially considering outcomes for early-career scholars.

[103] Teacher/Scholar Data Blitz

Room: (HR) Regency V, **Time:** 3:45 PM - 5:00 PM

ABSTRACTS

The Mixed Outcomes of Implicit Bias Awareness: Metacognitions of Ownership for Implicit Racial Bias Can Reduce or Increase Overt Prejudice and Discrimination

Across two studies, we find that taking ownership of high implicit racial bias leads to the expression of more favorable attitudes toward Black people (Study 1), and larger donations to a Black nonprofit (Study 2), but only if people are high in motivations to control prejudice (MTCPP). Among those low in MTCPP, owning high implicit bias leads to increases, rather than decreases, in overt bias.

How Framing Information about Pro-Environmental Behaviors Affect Interpersonal Conversations toward Reducing One's Carbon Footprint

Can a single conversation change intentions on what individuals believe they can do to reduce their carbon footprint? After subjects read framed messages about carbon reduction they were instructed to discuss the topic with a peer. After talking with subjects who had read messages emphasizing the costs of inaction vs. benefits of taking action, peers were more likely to change their intentions.

Jhon Wlaschin¹, Jessica Berns¹, Brienna Wyatt¹, Morgan Bunde¹

Once Upon a Time: How Psychological Distance Affects What We Learn from Stories

In three experiments, we examined whether psychological distance affected what people learn from stories. Specifically, we tested whether people would draw more abstract conclusions from more distant stories, by using wisdom stories and parables and creating proximal versions of them. Results showed that people draw more abstract conclusions when the stories are described as distal than as proximal.

Ironic Effects of White Privilege Acknowledgement

Many communities have initiated exercises to increase White members' awareness of their privilege, but can this backfire? In two studies, White people checked their racial privilege, then made choices about real-life situations. Politically conservative participants (especially Millennials) showed reactance such that they endorsed more discriminatory decisions/

policies compared with a control.

Louisa Egan Brad¹, Tatiana Spisz¹, Chloe Tanega¹
¹Univ. of Portland

Avoiding Rejection or Seeking Harmony: Collectivists' Motivations to Engage in Social Tuning

The current research investigates in two experiments why collectivists engage in social tuning more automatically than individualists (Skorinko, et al., 2015). The results indicate that collectivists are more likely to engage in social tuning when motivated to avoid rejection than to seek harmony. However, individualists do not engage in social tuning to avoid, reject, or seek harmony.

Disentangling the Mechanisms Behind Attitude Change and Behavior Change

We hypothesized that reduction in self-control resources will make people more likely to change their attitude following a persuasive message. However, people will not be more likely to change their behavior in accordance with the newly-acquired attitude, because they would fall back to their habitual ways of conduct. Three experiments (N's= 98,104, 137) provided support for the hypothesis.

Contextual Cues of Belonging and Attitudes toward Help-Seeking among Minority Students

While attention to the national mental health crisis on college campuses has grown, evidence suggests that help-seeking stigma remains intractable, particularly for historically marginalized groups. An empirical study of young adults at a minority serving institution demonstrates that contextual and psychosocial factors (institutional identity and social belonging) predict help-seeking attitudes.

[104] Physiological Synchrony and Interpersonal Processes: How Shared Physiology Shapes Interactions

Room: (HR) Regency VI, **Time:** 3:45 PM - 5:00 PM

Chair: Chad Danyluck, *Univ. of Colorado*

This symposium showcases recent physiological synchrony (PS) research, demonstrating effects of generated PS on social functioning, how varied social contexts predict affiliation via PS, how PS underlies social reciprocity between parents and Autistic children, and how suppressing negative emotion can facilitate PS between parent and child, but compromise social behavior.

ABSTRACTS

Persuasive Skill Overrides Status in Predicting Physiological Linkage and Perceptions of Leadership within Groups

We used an experimental method to separate the roles of social status and persuasive skill to understand who captures social attention during group decision-making. Group members were physiologically linked to people who were successful persuaders (but not unsuccessful persuaders) and thought successful persuaders had more leadership skill than unsuccessful persuaders, regardless of their status.

Katherine Thorson¹, Oana Dumitru¹, Wendy Berry Mendes², Tessa West¹

¹New York Univ., ²UC San Francisco

The Effects of Social Context on Physiological Synchrony

Strangers in same-sex, same ethnicity dyads had their autonomic activity recorded while getting to know each other or not during a cooperative or competitive task. Physiological covariation – shared physiology between partners – occurred across contexts but whether it occurred due to increased or decreased autonomic activity, and whether it predicted a desire to affiliate, differed by context.

Chad Danyluck¹, Elizabeth Page-Gould²

¹Univ. of Colorado, ²Univ. of Toronto

Quantitative Assessment of Socio-affective Dynamics in Autistic Children Using Interpersonal Physiology

Autism Spectrum Disorder (ASD) is estimated to affect 1 in 68 individuals in the US and is characterized in part by impairments in social reciprocity. We collected physiology data from 30 children with and without ASD during social interaction with an adult. Significant correlations were found between adult-child physiological interdependence and standard measures of social functioning.

Gender and Emotion Suppression Moderate Parent-Child Physiological Influence during Interaction

Emotion suppression was manipulated in acutely stressed parents during interaction with their children. Mother-to-child physiological influence and child-to-father physiological influence were stronger in the suppression than control condition. Positive interaction behaviors were compromised in the suppression condition, especially for fathers. Masking emotion undercuts interaction quality.

[105] Diverse Exposure & Diverse Contexts: Impacts on Intergroup Relations

Room: (HR) Regency VII, **Time:** 3:45 PM - 5:00 PM

Chair: Chanel Meyers, *Univ. of Hawaii*

Diversity leads to both benefits and consequences across different contexts. Here, we examine the outcomes that stem from different types of diversity exposure (gender, race/ethnicity, and religion) across a few distinct contexts (the workplace, society, and lab manipulations). Results highlight the malleability that these types of exposure can have on social attitudes and intergroup relations.

ABSTRACTS

Evaluating Gender Diverse Companies

Four studies explored whether advertising gender diversity improves perceivers' beliefs about an organization. When a company noted it was gender diverse, White men expected a company to have a more broadminded and tolerant climate—and to be more prestigious and have more capable employees. This research suggests that advertising diversity may boost a company's reputation.

Cortney Janicki², Kristin Pauker³, Edward Chang⁴

¹Univ. of Hawaii, ²Hawaii Pacific Univ., ³Univ. of Hawaii at Manoa, ⁴Univ. of Michigan

Context Matters: Biracial Exposure Reduces Colorblindness

Across five studies, we show that compared to exposure to Whites, Blacks, or racially diverse groups, exposure to biracials significantly reduces colorblindness among Whites. This shift is driven by social tuning, based on expectations that biracials are less colorblind than monoracials. Thus, the increasing multiracial context may have the potential to positively shift racial attitudes.

Speed and Type of Change in Religious Diversity in Modern Societies and Its Impact on Perceived Threat

We examined longitudinally the effect of changes in religious diversity on perceptions of threat. We investigated these changes with representative samples from 30 countries and 12 years of data. We found both positive and negative effects depending on the speed of change and timespan of our analyses (short- vs. long-term). We discuss the significance of longitudinal models in diversity research.

[106] Long-Term Change in Social Group Attitudes and Stereotypes

Room: (MM) Atrium A, **Time:** 3:45 PM - 5:00 PM

Chair: Antonya Gonzalez, *Univ. of British Columbia*

Co-Chair: Tessa Charlesworth, *Harvard Univ.*

Many studies show that intergroup attitudes and stereotypes temporarily change to meet situational demands, yet less is known about whether such short-term malleability corresponds to long-term change. This symposium advances current research by using interventions and big data to examine the unique patterns of long-term attitude and stereotype change at individual and cultural levels.

ABSTRACTS

A Comparative Investigation of the Processes Underlying Interventions to Reduce Implicit Bias

We ran six studies with over 21,000 participants to understand the mental processes underlying implicit bias change. Participants took 1 of 18 interventions or a baseline control condition followed by a race Implicit Association Test. We found that some interventions changed mental associations, some changed cognitive control over those associations, some changed both, and some changed neither.

Calvin Lai¹, Jimmy Calanchini², Christoph Klauer²

¹Washington Univ. in Saint Louis, ²Albert-Ludwigs-Universität Freiburg

Developmental Differences in Implicit Racial Bias Change

We conducted two studies to examine implicit racial attitude change in childhood after a 2-minute and 1-hour delay. Results indicated that increased racial salience only improved bias reduction in younger children following the brief delay. In contrast, racial biases in older children were reduced after both time delays, suggesting that this age range might be optimal for long-term bias change.

Antonya Gonzalez¹, Jennifer Steele², Andrew Scott Baron¹

¹Univ. of British Columbia, ²York Univ.

Patterns of Change in Implicit and Explicit Attitudes

The first comparative analysis of long-term cultural change, across six attitudes (race, skin-tone, age, sexuality, disability, and weight), over 12 years is reported. While most explicit attitudes moved toward neutrality, implicit attitudes showed all possible patterns: remaining stable (disability), moving toward neutrality (e.g., race, sexuality), and moving away from neutrality (weight).

[107] Understanding Emotions and Well-Being: Contributions from Real-Time Measurement

Room: (MM) Atrium B, Time: 3:45 PM - 5:00 PM

Chair: David Newman, USC Dornsife

Is mindfulness manifested in daily life the way people predict? How do daily/momentary states of nostalgia relate to well-being? How does the desire to punish a perpetrator affect momentary well-being? Do affective preferences recorded in real time differ across the lifespan? Four presentations draw on a variety of ecological momentary assessment techniques to address these questions.

ABSTRACTS

Mindfulness in Daily Life: A Naturalistic Observation Study

Despite the rise of mindfulness as a scientific construct, little is known about how it manifests behaviorally in daily life. This study investigated real-world manifestations of mindfulness in an observational study. Mindfulness was related to a perceptual focus in conversation, but emerged as not reliably related to emotional positivity, quality social interactions, or a prosocial orientation.

Matthias Mehl¹, Deanna Kaplan¹, Anne Milek¹, Allison Tackman¹, Charles Raison²

¹Univ. of Arizona, ²Univ. of Wisconsin

An Examination of the Relationship Between Nostalgia and Well-Being in Daily Life

Experimental research on nostalgia, a mixed emotion, suggests that nostalgia primarily relates positively to well-being. To address ecological validity concerns, participants completed daily and momentary reports of nostalgia and well-being over the course of 1-2 weeks. Multilevel modeling analyses revealed that nostalgia was actually negatively related to well-being states.

David Newman¹, Matthew Sachs², Arthur Stone², Norbert Schwarz²

¹USC Dornsife, ²Univ. of Southern California

Moral Punishment in Everyday Life: Relationships with Moral Outrage, Moral Self-Worth, and Emotional Well-Being

We investigated antecedents and emotional consequences of the desire to punish in a large database on moral experiences in daily life. The desire to punish was positively related to emotions capturing moral outrage and negatively to affective well-being. However, this negative relationship with well-being was buffered by a positive link between the desire to punish and moral self-worth.

[108] Responses to Social Exclusion in Various Contexts

Room: (MM) A704, Time: 3:45 PM - 5:00 PM

Chair: Dongning Ren, Tilburg Univ.

Co-Chair: Michaela Pfundmair, LMU Munich

This symposium explores responses to social exclusion in various contexts. The first three talks each focus on exclusion that occurs in small groups, between groups, or in close relationships. The last talk directly compares ostracism from strangers vs. close others. Together, the talks highlight the importance of personal, relational, and cultural factors that shape responses to exclusion.

ABSTRACTS

Ironically Seeking Solitude After Ostracism

Ostracism induces both prosocial responses and antisocial responses. We examined a third response – solitude seeking. We hypothesized and found that ostracized individuals, especially introverts, may desire a phase of solitude to cope with the social pain. Ironically, solitude seeking, when

prolonged, does not shield individuals from the pain of ostracism, and may even instigate further ostracism.

Dongning Ren¹, Eric Wesselmann², Kipling Williams³

¹Tilburg Univ., ²Illinois State Univ., ³Purdue Univ.

Exclusion Predicts Negative Evaluations and Treatment of Single-Group Protestors: Implications for Basic and Applied Intergroup Relations Research

We hypothesized that perceptions of social exclusion by Single-Group Protestors (SGPs; e.g., Black Lives Matter, Feminist groups) would result in increased negative attitudes towards such group and reduced likelihood of support for them. In a series of several studies, we demonstrated this effect as well as relevant person-level and group level-moderators, as well as underlying mechanisms.

Michael Bernstein¹, Heather Claypool²

¹Penn State Univ. Abington, ²Miami Univ. of Ohio

Self-Esteem and Emotional Responses to Social Feedback – Parsing Anticipatory and Consummatory Emotion

Building on the distinction between consummatory and anticipatory motivation, three studies predicted and found that people with lower self-esteem (SE) experience heightened anticipatory but not consummatory negative affect in response to acceptance-rejection feedback from their romantic relationship partners. Implications for relationship functioning are discussed.

Anna Luerssen¹, Ozlem Ayduk²

¹Lehman College, City Univ. of New York, ²UC Berkeley

Economic Culture, Social Interdependence and Responses to Ostracism

In five studies in farming and herding communities, we show that the cultural and relational background of those who are involved in ostracism situations matter to understand cultural variation in ostracism responses. Compared to farmers, herders were more negatively affected by ostracism from strangers and their children estimated ostracism as more painful and punished ostracizers more harshly.

[109] The Stories of Our Lives: Best Practices in Narrative Methodologies

Room: (MM) A706, Time: 3:45 PM - 5:00 PM

Chair: Jen Guo, Northwestern Univ.

Narrative methodologies to assess life stories – integrated, autobiographical constructions of the past and imagined future – has captured the attention of researchers for decades. This symposium features different approaches towards the collection and analyses of narratives, elucidating “best practices” surrounding these methodologies at the intersection of personality and developmental research.

ABSTRACTS

Narrative Methods: A “How To” and New Directions for Narrative Identity Research

Narrative identity researchers have made significant strides in establishing basic principles for narrative methods. First, I review these principles, focusing on narrative prompts, coding constructs, and reliability. Second, I discuss data from the Identity Pathways Project that demonstrates the value of repeated narration for studying the process of identity development.

Jennifer Lilgendahl¹

¹Haverford College

Capturing the Stories of Our Lives: Examining the Collection of Life Narrative Data

Autobiographical narratives have historically been studied via face-to-face verbal interviews. However, recent technological advancements have allowed the possibility for telemetric (i.e., online) collection methods. The present research explores these two different approaches – in-person interviews vs. online prompts – to answer the question of whether these methods generate comparable results.

Jen Guo¹, Sara Weston¹, David Condon¹

¹Northwestern Univ.

Exploratory Factor Analysis in Narrative Research

Narrative identity research combines qualitative and quantitative methods to analyze how participants tell their life stories. But how do we get from qualitative to quantitative data in these analyses? This talk explores one recent study on adults' stories of their greatest challenges, which

derived narrative identity factors from transcript data using exploratory factor analysis.

Henry Cowan¹

¹Northwestern Univ.

Best Practices for Reproducibility in Mixed Methods Research

Do reproducibility concerns such as researcher degrees of freedom, generalizability, and incentive structures apply to mixed method researchers? Do strategies such as pre-registration, replication studies, and open science practices apply? This talk uses narrative research to explore the relevance and significance of reproducibility to researchers engaged in both quantitative and qualitative work.

Hollen Reischer¹, H. Raffles Cowan¹

¹Northwestern Univ.

[110] Illusions of Diagnosticity

Room: (MM) A707, **Time:** 3:45 PM - 5:00 PM

Chair: Janina Steinmetz, *Utrecht Univ.*

When forming impressions or drawing inferences about people and objects, individuals assign greater weight to information seen as diagnostic. But what makes information more or less diagnostic? We examine conditions under which choices are seen as more vs. less diagnostic of individual preferences, and we show novel and counter-intuitive factors that impact perceived diagnosticity more generally.

ABSTRACTS

Strength in Feelings: Gut Choice, the True Self, and Attitude Certainty

Does reliance on intuitive feelings in decision making impact how people think about their choices? In four studies, people are more certain of their attitudes toward chosen options after focusing on feelings (versus deliberation) through a mechanism by which people view chosen options as more reflective of their true self. In turn, those attitudes prove more resilient against negative feedback.

Sam Maglio¹, Taly Reich²

¹Univ. of Toronto Scarborough, ²Yale Univ.

How Self-Control Shapes the Meaning of Choice

People often infer preferences from choice, but we show that self-control weakens this choice-preference link. Activating the notion of self-control (i.e., through priming or choice in an unrelated domain) leads people to see choices as less diagnostic of their preferences. This occurs because self-control is associated with attenuated choice-preference correspondence.

Aner Sela¹, Jonah Berger², Joshua Kim¹

¹Univ. of Florida, ²Univ. of Pennsylvania

Not All Bad Apples Spoil the Bunch: Order Effects on the Evaluation of Groups

Seven studies show that a person's position in a random sequence influences how diagnostic they seem for their group. Across various performance contexts, if the first person in a group did well (vs. poorly), the rest of the group was predicted to perform better (vs. worse) than when another person gave the same performance. Thus, the first determined judgments of the entire group.

[112] Rethinking Implicit and Explicit Bias in Contemporary American Society

Room: (HR) Centennial I & II, **Time:** 5:15 PM - 6:30 PM

Chair: Ivuoma Onyeador, Yale Univ.

Co-Chair: Natalie Daumeyer, Yale Univ.

Explicit bias has become less acceptable in recent decades, yet societal discrimination persists. Implicit bias has been identified as a key factor in this contradiction. The talks in this symposium provide insight into the origins and consequences of implicit and explicit bias expression, suggesting the need to rethink how these two forms of bias may operate in contemporary American society.

ABSTRACTS

The Bias of Crowds: A New Theoretical Model of Implicit Bias

Why are implicit biases robust on average but unstable over time? Why are individual differences in implicit bias weak predictors of discrimination but state- and country-levels are strong predictors? The Bias of Crowds Model argues that implicit biases are the net effect of concept accessibility, which varies more situationally than dispositionally. If so, strategies to reduce bias should change.

Brian Keith Payne¹, Heidi Vuletich², Kristjen Lundberg³

¹Univ. of North Carolina, ²UNC Chapel Hill, ³Univ. of Richmond

Consequences of Framing Bias as Implicit versus Explicit

Two studies (N = 566) explored the effects of framing biases that lead to discrimination as implicit versus explicit. Results largely suggested that people hold the perpetrators of discrimination born of implicit, rather than explicit, bias less accountable, but are equally concerned about the bias and supportive of efforts to reform systems that give rise to it, regardless of the type.

Natalie Daumeyer¹, Jennifer Richeson¹

¹Yale Univ.

Presumed Unintentional: Ironic Effects of Implicit Bias Framing on Perceptions of Racial Discrimination

Awareness of implicit bias has increased over time. The present research argues that framing racial bias in terms of implicit bias may have unintended consequences. Specifically, Whites may perceive discrimination as less intentional when it is framed in terms of implicit bias, which should, in turn, reduce perceptions of harm to the victim, perpetrator blame, and the necessity for punishment.

Ivuoma Onyeador¹, Kyshia Henderson², Jenessa Shapiro²

¹Yale Univ., ²UCLA

A Psychological Profile of the Alt-Right

We surveyed 447 people identified with the 'alt-right.' Compared to 390 non alt-righters, alt-righters expressed extreme levels of overt intergroup bias. Further analyses suggest alt-righters divided into more populist and supremacist clusters. Extremism plays an important role in intergroup bias, and we argue that the contemporary focus on subtle bias is unlikely to lead to its understanding.

Patrick Forscher¹, Nour Kteily²

¹Univ. of Arkansas, ²Northwestern Univ.

[113] Exploring How Allyship Can Help (vs. Harm) Intergroup Relations

Room: (HR) Centennial III, **Time:** 5:15 PM - 6:30 PM

Chair: India Johnson, Elon Univ.

Co-Chair: Leslie Ashburn-Nardo, IUPUI

Advantaged groups' expressing allyship with disadvantaged groups may potentially promote healthy intergroup relations, but little research has examined unintended negative consequences of allyship. Across seven studies (N = 1997) and a variety of contexts, we explore how allyship can help (and sometimes harm) intergroup relations from the perspectives of both advantaged and disadvantaged groups.

ABSTRACTS

Detecting Inequality: Ally Perceptions of Social Progress

This work explores factors that predict LGBT allies' perceptions of the progress that has been made toward achieving LGBT equality in the US. Special attention is paid to factors that influence perceptions of progress, such as temporal framing and salient markers of social progress, and how perceptions relate to motivation for future change.

David Buck¹

¹Elon Univ.

A Paternalistic Duty? Predicting Men's Decisions to Confront Sexism on Behalf of Women

Across two correlational studies (Study 1 N = 148 undergraduate men, Study 2 N = 205 male MTurk workers), we found that when deciding to confront sexism, men were motivated by the perceived benefit but not the perceived cost of confronting. Men's espousal of a masculine protection ideology predicted greater confrontation on behalf of socially close but not socially distant women.

Jessica Good¹, **Corinne Moss-Racusin**², **Diane Sanchez**³

¹Davidson College, ²Skidmore College, ³Rutgers Univ.

Do Allies Help or Harm? The Role of Perceived Motive in Targets' Perceptions of an Ally Prejudice Intervention

Consistent with intergroup helping theory, African American participants reported greater psychological disempowerment when a White ally vs. a Black target confronted a prejudiced remark directed at them. This effect was mediated by perceived confronter motives. However, participants reported greater empowerment by confrontation vs. non-confrontation, highlighting the importance of intervention.

Charles Chu¹, **Leslie Ashburn-Nardo**²

¹Stanford Graduate School of Business, ²Indiana Univ. - Purdue Univ., Indianapolis

An Ally You Say: Allyship as an Identity-Safety Cue for Black Women

The present work found featuring a successful White woman scientist framed as an ally (Experiment 1) or identified as an ally for Black women by a Black female employee (Experiment 2), on a company's webpage, promoted Black women's anticipated trust and comfort at a fictitious science company. Additionally, stigma consciousness moderated these findings.

India Johnson¹, **Evava Pietri**²

¹Elon Univ., ²Indiana Univ. - Purdue Univ., Indianapolis

[114] The Good and Bad of Emotion Contagion for Individuals, Groups

Room: (HR) Centennial IV, **Time:** 5:15 PM - 6:30 PM

Chair: Chad Forbes, *Univ. of Delaware*

Co-Chair: Rachel Amey, *Univ. of Delaware*

Behavioral and physiological synchrony between individuals are crucial processes that aid group function. The effects of contextual factors like self-threats and group status on synchrony, and emotion contagion specifically, remain unexplored. The present symposium investigates the positive and negative outcomes of emotion contagion with respect to context, individuals and groups.

ABSTRACTS

Empathy for Pain Motivates Actions without Altruistic Effects

By applying functional MRI and response force measure to adults when viewing faces receiving painful or non-painful stimulations, we find greater response force but decreased empathic neural responses when watching painful than non-painful stimuli. The findings suggest that empathy for pain motivates actions without altruistic effects that reduce empathic neural responses.

Shihui Han¹, **Xiaochun Han**¹

¹Peking Univ.,⁶

Sharing Our Pain: Psychological Synchrony of Sadness

Studies suggest that both our feelings and our physiology can "synch up" in some social situations. We explored whether sadness in one person can change the feelings of another and whether those changes extend to physiology. Our results suggest that sadness is contagious and related to interoceptive awareness.

Erika Siegel¹, **Wendy Mendes**¹

¹UCSF

Stereotype Based Stressors in Group Contexts: The Role of Emotion Contagion

While continuous EEG activity was recorded, brain synchrony between a stereotype threatened actor and her non-threatened partner engendered emotion contagion to undermine partners' but not actors' performance. Findings suggest that this stereotype-based stress contagion may prompt

negative group outcomes in STEM via brain synchrony and not just for those directly under threat.

Rachel Amey¹, **Adam Magerman**¹, **Mengting Liu**¹, **Lisa Jaremka**¹, **Katherine Thorson**², **Tessa West**²

¹Univ. of Delaware, ²NYU

Outgroups and Emotional Countercontagion

We investigated the less well understood process of counter-contagion. Participants exposed to outgroup members' joy self-reported less intense positivity as a result, but this was not supported by real-time computer coding of their facial reactions. Instead there is a delay in their own facial display of happiness relative to participants exposed to in-group members' joy.

Kristin Smith-Crowe¹, **Jamie Potter**², **Sigal Barsade**²

Professional Development

[115] Facilitating Graduate School Application Success among Undergraduates at Teaching-Focused Institutions

Room: (HR) Regency V, **Time:** 5:15 PM - 6:30 PM

Chair: Bettina Spencer, *Saint Mary's College*

Co-Chair: Carrie Langner, *California Polytechnic State Univ.*

This panel provides techniques to facilitate undergraduate student research, emphasizing how such research experiences can enhance graduate school applications. This session will help faculty improve their undergraduate student research mentorship, as well as undergraduate students who would like to learn how to translate research experiences in graduate school applications.

Bettina Spencer¹, **Carrie Langner**², **Jennifer Beer**³, **Melissa Williams**⁴

¹Saint Mary's College, ²California Polytechnic State Univ., ³Univ. of Texas at Austin, ⁴Emory Univ.

[116] Inside-Out to Outside-In: Expanding the Scope of Self-Regulation Research

Room: (HR) Regency VI, **Time:** 5:15 PM - 6:30 PM

Chair: Ariana Orvell, *Univ. of Michigan*

Self-regulation is often thought of as an effortful process that people initiate on their own. Yet, emerging research suggests that several powerful ways of enhancing self-regulation are neither effortful nor self-initiated. This symposium examines four of such non-traditional routes to enhancing self-regulation: language, mindsets, interpersonal relationships, and our physical environment.

ABSTRACTS

How "You" Makes Meaning

This talk suggests that the ability to derive meaning from negative experiences is woven into the fabric of everyday language. It demonstrates that using the generic form of the word "you" to reflect on negative experiences allows people to normalize them and promotes psychological distance from the event. In this way, a simple linguistic mechanism serves a powerful meaning-making function.

Ariana Orvell¹, **Ethan Kross**¹, **Susan Gelman**¹

¹Univ. of Michigan,⁶

Rethinking Health Behavior Change: Nudging Mindset

Despite attention on the importance of healthy behaviors such as exercise and diet, the percentage of U.S. citizens who meet recommended guidelines is remarkably low. This presentation reveals how subtle changes in language can nudge people to view being healthy in a more positive light—as social, indulgent and fun—which, in turn, can motivate healthy behaviors and improve health and wellbeing.

Alia Crum¹, **Danielle Boles**¹, **Brad Turnwald**¹, **Octavia Zahrt**¹

¹Stanford Univ.

The Social Regulation of Emotion: Imagined Presence of Close Others Preemptively Down-Regulates Negative Emotion

Regulation of negative emotion is typically viewed as a solo endeavor, requiring effortful cognitive resources. Our studies show that simply viewing photographs of a close other spontaneously elicits positive affect, which in turn preemptively dampens the impact of recalling distressing memories. Findings identify a route by which emotions are regulated effortlessly via interpersonal cognitions.

Vivian Zayas¹, **Steve Strycharz**¹

¹Cornell Univ.

Environmental Factors Related to Self-Control

Broken windows theory assumes that social disorder cues cause people to reason that they can get away with breaking rules, but what if complex social reasoning is unnecessary? We constructed stimuli contrasted in terms of visual disorder, but absent of scene-level social disorder cues, and found

[117] Qualitative Research: How Industry Practices could Benefit Academics

Room: (HR) Regency VII, **Time:** 5:15 PM - 6:30 PM

Chair: Joshua Tabak, *Facebook*

Although trained in quantitative methods, many social psychologists who are working in industry conduct qualitative research on a regular basis. In this symposium, we will reflect on the value of qualitative approaches for both industry and academia. We will also share practical tips for how social psychologists can jump-start innovative research projects with qualitative methods.

¹Facebook, ²Microsoft, ³Northwestern Univ.

[118] #Fakenews: Antecedents and Consequences of Political Misconceptions

Room: (MM) Atrium A, **Time:** 5:15 PM - 6:30 PM

Chair: Andrea Pereira, *New York Univ.*

The recent upsurge of misconceptions, fake news, and other “alternative facts” during several major political events (e.g., Brexit, US Presidential Election) has had severe global consequences for democracy. This symposium explores the antecedents and consequences of political misconceptions through the lens of social identities and moral values.

ABSTRACTS

Liars, Damned Liars, and Zealots: The Effect of Moral Mandates on Transgressive Advocacy Acceptance

We explored people’s reactions to political targets who lie to serve noble causes. As predicted, stronger observer moral conviction for a cause predicted more positive evaluations of like-minded targets, and more negative evaluations of oppositional targets, regardless of target truthfulness. In sum, politicians may lie to bolster a cause without losing approval from morally convicted supporters.

Allison Mueller¹, Linda Skitka¹

¹Univ. of Illinois at Chicago

Belief in Political Misinformation as a Function of Personal Values and Political Identity

We examine how personal values and group identities might alter belief in political misinformation or the disbelief in inconvenient political facts. In two studies we found that both Democrats and Republicans were more willing to believe in (and to share on social media) real and fake news in which their political ingroup affirms their values, or their political outgroup transgresses their values.

Andrea Pereira¹, Jay Van Bavel¹

¹New York Univ.

Misconceptions, Misinformation, and the Logic of Identity-Protective Cognition

I present a synthesis of the empirical literature on misinformation about decision-relevant science. The incidence and impact of misinformation depend on identity protective cognition. Counteracting misinformation requires the protection of the science communication environment from toxic social meanings that fuse competing understandings of fact with diverse citizen’s cultural identities.

Dan Kahan¹

¹Yale Law School

Overclaiming Knowledge Predicts Anti-Establishment Voting

What predicts voting against mainstream politics? We examined how self-perceived and actual political knowledge predicts anti-establishment voting in the context of a Dutch referendum (Study 1), and the EU refugee crisis (Study 2). Results revealed that anti-establishment voting emerges from increased self-perceived knowledge, but decreased (Study 1) or equal (Study 2) actual knowledge.

¹VU Amsterdam

[119] Virtuous Violence: How Morality Drives Aggression and Conflict

Room: (MM) Atrium B, **Time:** 5:15 PM - 6:30 PM

Chair: Taze Rai, *MIT*

People think violence is the essence of immorality—it occurs when moral norms collapse. We argue the opposite—violence often requires moral sentiments. Drawing on lab experiments and real-world conflicts, we show

that moral violence is rooted in historical trauma, it is insensitive to material incentives, it requires humanization instead of dehumanization of victims, and it gives meaning to life.

ABSTRACTS

The Shadows of the Past: Effects of Historical Group Trauma on Current Intergroup Conflicts

Historical group trauma can leave deep marks in members of the groups affected even many years later. Two orientations that develop in the wake of such traumas are introduced: perpetual ingroup victimhood orientation, and fear of victimizing. Opposite effects of the orientations on conflict-related emotions, cognitive processes, and support for policies are presented and implications discussed.

Noa Schori-Eyal¹, Yechiel Klar², Sonia Roccas³, Andrew McNeill⁴

¹Univ. of Maryland, ²Interdisciplinary Center (IDC) Herzliya, ³Open Univ. of Israel, ⁴Northumbria Univ.

Spiritual Dimensions of Human Conflict

Scientists and governments treat political violence as if it were another way to reach instrumental goals - politics by other means. In this talk I present experiments carried out in the lab and in field sites showing that support for and willingness to participate in political violence is driven more by moral and spiritual concerns than by instrumental or material motivations.

Jeremy Ginges¹

¹The New School

Intergroup Conflict Self-Perpetuates via Meaning: Exposure to Intergroup Conflict Increases Meaning and Fuels a Desire for Further Conflict

Six studies with Americans, Israeli Jews, Belgians and French demonstrate that violent conflict provides people with a sense of meaning that they are hesitant to let go of, increasing support for conflict-perpetuating beliefs, ideologies, policies and behaviors. We discuss our findings in terms of meaning making and threat compensation, and their implications for conflict (de-)escalation.

Dehumanization Increases Instrumental Violence, but Not Moral Violence

Across five experiments, we show that dehumanizing victims increases instrumental violence, but not moral violence. Findings suggest that dehumanization enables instrumental violence by disengaging empathy toward victims. In contrast, dehumanization does not cause moral violence because morally motivated perpetrators aim to harm complete human beings who can deserve blame and experience suffering.

[120] Understanding Personality Development in Older Adulthood

Room: (MM) A704, **Time:** 5:15 PM - 6:30 PM

Chair: Ted Schwaba, *UC Davis*

Co-Chair: Wiebke Bleidorn, *UC Davis*

Despite an aging world population, research on the conditions of personality development in old age is scarce. In this symposium, four speakers present recent longitudinal research into the biological, social, and psychological factors that drive personality development in older adulthood. Through this, we advance the understanding of personality development in older adulthood.

ABSTRACTS

When I’m 65: Personality Development Across the Transition to Retirement

We examine personality change before, during, and after the transition to retirement in in a nationally representative sample of Dutch retirees that has contributed five waves of data (N = 690) and a matched comparison group of non-retirees (N = 571). We find that retirement is related to change in Big Five personality traits, with implications for theories of personality change in old age.

Ted Schwaba¹, Wiebke Bleidorn¹

¹UC Davis

Do Health Problems in Older Adulthood Change Your Personality?

Using a large longitudinal sample, we tested whether disease onset changes personality over an 8-year period. Results indicate that after accounting for background characteristics via propensity score weighting, personality traits mostly did not change in response to disease onset. These findings

¹Washington Univ. in St. Louis

Predictors of Personality Change: A Replication Study

We tested predictors of linear slopes in personality traits across 14 studies. We found decreases in neuroticism, extraversion, conscientiousness, and openness, and stability in agreeableness. Predictors were baseline health, marital/retirement status, and gender. Results show that studies had at least one predictor of change, but these predictors failed to consistently replicate across studies.

Personality Content and Clarity in Older Adulthood

This talk presents evidence that self-concept clarity predicts personality trait maturation in late life. Further, it provides longitudinal and experimental evidence that an active lifestyle promotes clarity in older adulthood. Finally, it encourages research on older adults who may be at risk for low clarity with examples drawn from literature regarding personality and autism spectrum disorder.

[121] Challenging Common Assumptions about Empathy with Novel Measures and Theories

Room: (MM) A706, **Time:** 5:15 PM - 6:30 PM

Chair: Mike McCullough, *Univ. of Miami*

Co-Chair: William McAuliffe, *Univ. of Miami*

Four talks show that (1) humans consider automatically only the personal costs of prosocial behavior; (2) empathy is the default response when humans choose to take the perspective of needy people, (3) the inverse relationship of empathy and the magnitude of observed suffering results from motivated choice, and (4) gender differences in empathy are not confounded with measurement noninvariance.

ABSTRACTS

A Fundamental Asymmetry in Representations of Selfish vs. Generous Actions Hinders Prosocial Behavior

We show that cognitive representations of selfish vs. generous choices are asymmetric: people automatically consider the costs of generosity (their own forgone gains) but not the costs of selfishness (others' forgone gains). We provide behavior and process evidence for this asymmetry, and reveal subtle "nudges" that increase generosity by putting a mental "break" on the tendency to neglect others.

Christopher Y. Olivola¹, **Jon Han**¹

¹Carnegie Mellon Univ.

Is Perspective Taking the Default Response to Human Suffering?

We find in a preregistered experiment that perspective-taking manipulations cause group differences in empathy because instructions to observe another's distress objectively reduce empathy; instructions to imagine a distressed person's thoughts and feelings do not increase empathy because humans spontaneously adopt the perspective of needy others. We confirm these findings in a meta-analysis.

Mike McCullough¹, **William McAuliffe**¹

¹Univ. of Miami

Caring is Costly: People Avoid the Efforts of Compassion

Empathy and compassion are often treated as effortless and easy. We review evidence that these are felt as effortful and avoided for that reason. Compassion is often described as less psychologically costly than empathy. We find that people choose to avoid compassion (in favor of empathy and objectivity), and that this preference associates with perceptions of compassion as cognitively costly.

Daryl Cameron¹, **Julian Scheffer**¹, **Michael Inzlicht**²

¹Penn State Univ., ²Univ. of Toronto

Cognitive Models Underlying Inconsistent Gender Differences in Self-Reported Empathy

Females score higher on trait self-report measures of empathy, but gender differences in self-reports of state empathy are smaller and less reliable. Why? In three experiments, we rule out the possibility that trait, but not state measures of empathy violate measurement invariance across genders. These findings suggest that gender differences in empathy are real, but context-specific.

[122] Brain, Brawn, Burden: Disentangling the Complexities of a Multicultural World

Room: (MM) A707, **Time:** 5:15 PM - 6:30 PM

Chairs: Frank Kachanoff, *McGill Univ.*; Alexandria West, *York Univ.*

ABSTRACTS

Shaken by Language: Antecedents, Consequences, and Remedies of Language-Based Status Threat

Having to speak in a nonnative language is a common experience that can lead to a fear of losing respect in the eyes of others, and yet research has given scant attention to this phenomenon. The current research addresses this gap by showing when, how, and why the experience of language-based status threat can impair performance and by demonstrating how it can be alleviated.

Cross-Cultural Examination of Brain Indicators of Persuasion

Medial prefrontal brain activity has been found to predict persuasion after viewing persuasive messages, but so far this research has only been done in Western populations. To investigate how universal this brain-as-predictor persuasion model is, we showed persuasive videos to Jordanian participants and found that medial prefrontal activity was still a reliable indicator of persuasion.

Determining Their Destiny: Are Low-Power Group Members More Willing to Accept Their Disadvantage When They are Free to Express Their Culture?

Are low-power group members more likely to tolerate their disadvantage when they are welcomed by high-power groups to openly express their culture? Four studies (N=1,421) reveal that low-power group members who are welcomed rather than restricted from expressing their culture are more likely to system justify, and are less likely to engage in collective action as a means for group empowerment.

Frank Kachanoff¹, **Nour Kteily**², **Thomas Khullar**¹, **Hyun Joon Park**³, **Donald Taylor**¹

¹McGill Univ., ²Northwestern Univ., ³Penn State Univ.

The Social Consequences of Switching between Cultures

Frame switching, changing oneself to fit each culture, is adaptive for biculturals, but it can be detrimental around people who equate inconsistency with inauthenticity. Mainstream North Americans rated a bicultural as less likeable, trustworthy, warm, and competent when he frame switched (vs. no switch vs. control) via lower authenticity. Affirming his authenticity mitigated the negative effects.
