

2023 Single Presenter Submission Guide: Poster, Research Spotlight, Roundtable Unconference, Data Blitz, and Single Paper

Convention Experience

The SPSP Annual Convention format is still in development. More information will be provided at a later date regarding in-person and virtual presentation options.

Presentation Types

There are four presentation types available as a single presenter submission. You must select which single presenter presentation types you wish to be considered. Exceptional submissions will be given the opportunity to participate in a Data Blitz or in a symposium session of single-paper submissions organized by the Science Program Review Co-Chairs.

Posters: Posters are the largest form of programming and are presented in person at the SPSP Annual Convention. Posters are grouped in sessions based on their keywords. All poster presenters will be required to submit a PDF of their poster electronically and an optional 5-minute video/audio recording. (in-person)

Research Spotlight: These are recorded 2-minute on-demand video presentations. This will be offered for those that cannot attend in person but wish to share their research with attendees through the convention app before, during, and after the SPSP Annual Convention. (on-demand)

Data Blitz: Data Blitz presentations are 5-minute rapid fire presentations grouped into sessions of 10 presentations (in-person/on-demand options). Presenters have limited time to give attendees the very best of their research. Data blitz sessions will be grouped according to the following:

- **Student/Early Career Data Blitz:** for those enrolled in a graduate program OR who earned their PhD on or after January 1, 2017 **(2 sessions of 10 presentations each)**
- **Teacher/Scholar Data Blitz:** for teachers/scholars who teach and work exclusively with undergraduate students **(1 session of 10 presentations)**

Single Paper: Single paper submissions allow submitters to submit their science for consideration as a single paper i.e. without putting together a full symposium (in-person/on-demand options). These submissions will be reviewed and then grouped into 60-minute symposia with three other single papers of similar topics. **(~8 sessions of 4 presentations each)** Eligibility: must be enrolled in a graduate program or have a doctorate degree.

Information Needed for Submissions

Use this form to gather all of the necessary information for submitting a Single Presenter Submission for consideration for the 2023 SPSP Annual Convention. We recommend collecting the below information before the submission portal opens to avoid delays in completing your submission. Submissions will be accepted from **June 22, 2022–July 20, 2022**.

Additional Information (*not used as part of the peer review process*)

I understand that first/presenting authors may only submit for one single presenter submission per the SPSP Policies. Should any first/presenting author be found noncompliant with this policy, all associated submissions will be disqualified.

Presentation Format Selection:

The convention will have virtual on-demand sessions and in-person sessions. Indicate what type of programming type you are applying for:

- I am applying to present in-person
 I am applying to present on-demand

I understand that if this submission is accepted, it must be pre-recorded in advance of the in-person program. It will be made available for on-demand viewing. If this is not possible due to proprietary information or content that cannot be made accessible on-demand or other extenuating circumstances, please alert meetings@spsp.org for an exemption on this requirement.

[SPSP's Constellation Program](#) honors a luminary figure in social and/or personality psychology (previously the Legacy Award, this has been renamed the Constellation Program). **Check the box to indicate your presentation should include a "Constellation" tag.** This year, SPSP honors Mahzarin R. Banaji as the 2023 Constellation Program Honoree for her many contributions to our field. One of the unique features of the Constellation Program is that it allows presenters to self-identify their work as being part of the honoree's legacy. Common reasons to identify work as part of the Constellation Program include being connected to the honoree as a former student/postdoc/student of a student/etc., or relying on concepts, theories, and findings strongly associated with the honoree. We are asking submitters to identify this during the submission process so the digital program can include the "Constellation" tag alongside other keywords in order to enhance recognition of the honoree across all presentation types.

If accepted, will you require accommodations for a disability to present? Examples of accommodations include, and are not limited to, type of microphone, ramp for stage access, rehearsal time, etc. (You will be contacted for more information after acceptance notifications.) Your response will only be visible to SPSP staff.
