We Build Meaningful Experiences on a Global Scale

Giving people the power to build community requires constant innovation. At Facebook, research permeates everything we do. We believe the most interesting research questions are derived from understanding how people interact in the world around us.

**A hands-on approach**

Our world-class teams of researchers take a hands-on approach to understand, design, and build smarter, unique, and more meaningful experiences on a global scale.

**Immediate impact**

UX researchers at Facebook directly contribute new ideas to products that impact the experience of billions of people around the world.

Get involved with research at Facebook

**Academic programs**
Visit the Facebook booth to learn about faculty sabbaticals, graduate fellowships, conference sponsorships, research award opportunities, and more.

Visit [research.fb.com](http://research.fb.com) for more information and follow our Facebook page [@academics](https://facebook.com/academics) for updates.

**Careers - we’re hiring!**
We are looking for great people to join our team. Talk to us about internships, full-time positions, and postdoc opportunities. Visit [facebook.com/careers](http://facebook.com/careers) to learn more.

CONVENTION CODE OF CONDUCT

Purpose
As a professional organization, SPSP is committed to diversity, equity, professional exchange of ideas, and respectful treatment of all members, volunteers, and employees. Attendees at all SPSP events, activities, and programs seek to learn, network, and enjoy themselves, free from discrimination or harassment. In order to provide all participants with the opportunity to benefit from SPSP events, SPSP is committed to providing a friendly, safe, and discrimination and harassment-free environment for all attendees, including but not limited to discrimination or harassment on the basis of gender, gender identity, gender expression, race, ethnicity, national origin, religion, citizenship status, age, sexual orientation, disability, physical appearance, body size, socioeconomic status, criminal record, veteran status, or their intersection.

Therefore, this Code of Conduct sets forth expectations for the professional conduct of participants in SPSP events or activities such as meetings, journal review and editorship, online venues, and educational programs. “Participant” refers to anyone present at SPSP events or activities regardless of membership status, including speakers, vendors, venue staff, media representatives, exhibitors, sponsors, volunteers, and all other attendees. “Events or activities” include any aspect of the annual convention (e.g., during programming, at scheduled social events, while out to dinner or at a bar), pre-conferences, SISPP, and other forums and trainings.

Policies alone cannot eliminate problematic conduct. Accordingly, this Code of Conduct includes an expectation that all participants proactively seek to establish a culture of respect in which everyone feels welcomed and valued in the Society. To accomplish this, participants are asked to speak up and take action when these values are not adhered to, and recognize that power differences and hierarchies inherent to academia may inhibit many parties (including students and junior colleagues) from feeling free to object to or report problematic behavior. The behavior of members outside of SPSP events and venues also reflects on the Society and influences its climate. Members are expected to embody the values and to adhere to the guidelines articulated in this Code of Conduct in all professional settings. For these reasons, professional misconduct outside of SPSP events may warrant sanction if they violate SPSP’s Code of Conduct.

In addition to general misconduct, the SPSP Code of Conduct specifically addresses sexual harassment, which is defined by the Equal Employment Opportunity Commission (EEOC) of the United States as including “unwelcome sexual advances, requests for sexual favors, and other verbal or physical harassment of a sexual nature.” Note that such harassment “does not have to be of a sexual nature, however, and can include offensive remarks about a person’s sex.” Behavior can be classified as harassment when it “is so frequent or severe that it creates a hostile or offensive work environment.” Sexual harassment is perpetrated and experienced across genders and professional roles.

Expected Behavior
This Code of Conduct affirms the positive and constructive behaviors to which SPSP aspires as a professional and scientific society. Such expected behavior includes, but is not limited to:

- Professional and constructive communication, in-person and on-line: courtesy and civility in handling dissent or disagreement; respect when providing feedback; and openness to alternate points of view.
- Responsible and respectful sharing of information about the organization or any attendees via social media and public communication channels.
- Being proactive to help mitigate or avoid harassment or harm to other convention participants, including but not limited to alerting convention or security personnel if they witness a situation in which someone may be in imminent danger.

Prohibited Behavior
SPSP does not tolerate discrimination or harassment of members or participants in any form. Prohibited behaviors include, but are not limited to:

- Intimidating, harassing, lewd, demeaning, bullying, or threatening speech or actions.
- Persistent and unwelcome solicitation of emotional or physical intimacy, including but not limited to that which is accompanied by real or implied threat of professional harm.
- Physical assault, including unwelcome touch or groping.
- Any real or implied threat of physical harm.
- Retaliation against an individual for reporting harassment or prohibited conduct or for participating in an investigation of a claim of harassment or discrimination.
- Bringing alcohol into SPSP-sponsored events or consumption of alcohol by those not of legal age. Please note that because excessive alcohol leads to impaired decision-making, SPSP strongly discourages excessive drinking at any point during the convention.

Reporting Prohibited Behavior
SPSP encourages reporting of all perceived incidents of harassment, discrimination, or retaliation taking place at or in conjunction with an SPSP program or activity, regardless of the offender’s identity or position in the Society. Individuals who believe they have been the victim of such conduct (or have observed such conduct) are urged to contact the Executive Director or any member of the Executive Committee, or to seek confidential counsel from an ombudsperson, if available, at the annual convention. The contact information for these individuals will be available on the SPSP website, the convention website, and on the SPSP convention app. In the event that an individual feels that their physical safety is in jeopardy, SPSP encourages the individual to contact the appropriate law enforcement agency to make a report. SPSP strongly respects an individual’s interest in confidentiality and will handle all reports with sensitivity, with information related to a report only disclosed on a need to know basis for the purposes of investigation. SPSP will also work to assist and facilitate a complainant in exercising their right to report a potential violation of the Code of Conduct to the home institution or employer of the individual in question.

Consequences for Prohibited Behavior
Violation of this Code of Conduct is considered by SPSP to be a serious form of professional misconduct. The consequences for violations will be determined by factors including the immediacy of the threat to attendees, the severity and frequency of the violation, whether the individual has been found to have past violations, and the status of the individual (with those in position of authority and leadership held to the highest standards of behavior). Agreement to this Code of Conduct constitutes acknowledgement that 1) the possible disciplinary actions for its violation include but are not limited to a verbal warning, removal from an event without refund, restriction on attending future events, removal from membership, and forfeiture of previous awards or honors, and 2) SPSP reserves the right, in consultation with the complainant, to notify a home institution or employer of a finding of misconduct in violation of this Code of Conduct.

Ombuds service
An Ombuds is a person trained in conflict resolution who is independent of SPSP and has no other role in the Society. Organizations have found that people are often more willing to report concerns when an Ombuds is available, and SPSP is committed to improving reporting options for convention attendees. Ombuds service will be available during the convention to address any concern relating to fairness, equity, or respect. If you would like to consult with the Ombuds during the convention, please email: ombuds@proactive-resolutions.com and indicate whether you would prefer to have a telephone conversation or communicate through this dedicated and confidential email address.
Dear Friends,

It is my absolute pleasure, as the Mayor of the City of New Orleans, to welcome you to the 2020 Society for Personality and Social Psychology's Annual Convention. The City is honored to host your event.

Please embrace this opportunity to listen, ask questions, and network with your peers. I admire this organization’s premier event, which brings together attendees spanning from academia, non-profit, government and private sectors of social and personality psychology. On behalf of the City of New Orleans, I’m honored to extend this special welcome to you all.

During your visit, I invite you to explore our city and enjoy the unique experiences she has to offer. New Orleans overflows with culture, and I encourage each of you to treat yourself to our famous cuisine, dance to our local music and visit our exceptional museums. The energy of our city is unmatched and the culture unparalleled.

Whether you are visiting New Orleans or you call it home, we hope you enjoy every minute of this incredible experience.

Sincerely,

LaToya Cantrell
Mayor

I am so excited to welcome you to SPSP 2020 in New Orleans! This year’s conference promises to be the best yet. We are in a great location, have a great set of science and professional development sessions planned, and have a wide variety of other academic and social events on the schedule.

Our more than 3800 attendees can choose between 35 excellent preconferences on Thursday, 4 deep dive workshops, 97 science symposia sessions, and 19 professional development symposia sessions. There is something for any personality or social psychologist on the schedule, whether it be methods and statistics training, learning about the most cutting-edge research in their area, or expanding their professional horizons by hearing about the job market, funding options, or a wide variety of other topics.

There are also a wide variety of receptions and networking events planned. Join us for “Geaux Local” on Thursday from 7:30-10:00pm at Generations Hall. This promises to be a night to remember, with local music and food and 3 rooms of entertainment. Plus, this will be a great opportunity to network with fellow SPSP attendees! Throughout the rest of the conference, you can choose from events like the Awards Ceremony and Reception, the Non-Academic Employee Social Hour, the LGBT & Ally Networking Reception, the International Reception, the Diversity and Climate Reception, and the Closing Reception.

We are particularly excited to provide financial support to help people attend SPSP. This year we funded 20 family care grants, 180 travel awards, and 120 diversity awards. The family care grants are in their second year, and they offer money to support SPSP convention attendees who have family care responsibilities that may deter them from attending. These grants represent one of our efforts to make the conference family friendly. We also have private nursing space for nursing parents in the mother’s room in the Hyatt Regency on the 4th floor near the Reliance room from 7 AM to 6 PM Thursday, and 7:30 AM - 5:30 PM Friday and Saturday. Refrigeration, microwaving and a sink are available there. To gain access, please pick up the passcode from the Registration/Information desk.

Last but not least, try to find time to check out New Orleans. There are amazing restaurants, cafés, bars, and cultural events just a short walk or cab ride away!

With so much happening in a single weekend, you can’t possibly be everywhere. Follow us (@SPSPNews) and stay tuned to the conversations on Twitter and Facebook using our official convention hashtag, #SPSP2020.

Dear colleagues,

Welcome to New Orleans! All of us at SPSP hope you enjoy an intellectually stimulating, exciting, and fun few days ahead.

In the pages that precede this letter, you will find all of the people who have worked so hard to put this conference together, as well as all of the people who work so hard to keep SPSP running. They are your friends and colleagues, and are also present at the conference to partake in our yearly opportunity to exchange ideas as a community. I encourage you to find them and say hello.

In addition, the staff of our organization do truly exceptional work in everything from day-to-day operations to managing our short and long term goals; make sure you also say hello.

We hope for SPSP to be an inclusive organization. In this spirit, we have decided to forego a private reception offered by the President in favor of a Presidential Reception that is open to everyone. It will be held on Wednesday, February 26 at 6:00 PM – 7:00 PM. I would like to personally invite you to join your fellow attendees at this reception.

I also encourage you to attend the Presidential Symposium, which this year features four cutting-edge scholars who will discuss the topic of bias in the age of Artificial Intelligence and Big Data. You’ll find more information about this symposium on page 15; it is the one symposium of the conference that is not co-scheduled with any other event so that everyone who wants to come can do so. I hope you find the topic timely and stimulating.

We have worked hard to make the conference offerings easy to navigate, and hope that you will discover a path through the next few days that challenges, stimulates, and encourages ideas, with a dose of New Orleans magic along the way. Laissez les bon temps rouler!

Rodolfo Mendoza-Denton
2020 President, SPSP
**General Information**

**Alcohol Policy**
A number of social activities have been planned where alcoholic beverages will be offered. SPSP encourages the responsible consumption of alcohol. Alcohol will not be served to anyone under the age of 21. Please be prepared to show photo identification. All bars will be cash bars. If you chose food & drink vouchers with your registration, they can be used at any bar at any social function during the convention. Alcoholic beverages are allowed only in specific areas and must not be taken out of those immediate areas.

**Audiovisual Services, factor 110**
LCD projectors (e.g., for PowerPoint presentations) with HDMI connections will be provided in all session rooms. Computers will NOT be provided. Presenters must bring their own computers (and HDMI adapter, if needed) and set them up before the start of the session in which they are presenting. Presenters are strongly encouraged to arrive in their scheduled session room 15 minutes before their start time for setup.

**Baggage Check**
If you need to check out of your room prior to your departure from the convention, please secure your baggage with the bell desk in the lobby of your hotel. Due to space and security concerns, SPSP cannot hold luggage.

**Business Center**
The Hyatt Regency New Orleans has a self-service business center located on the Empire Ballroom level (Level 2, near lobby elevators). Services include copying, printing, packing, and shipping. The Hyatt House also has a business center, please inquire at your front desk for more details.

**Child Care**
Formal childcare services are not provided at the convention by SPSP.

**Exhibits and Poster Sessions**
All exhibits and convention poster sessions will be located in the Elite Hall at the Hyatt Regency New Orleans.

**First Aid**
Emergency medical technicians will be available in Strand 3 (Level 2, near atrium elevators) to assist with any minor medical emergencies that arise.

**Food Service**
Complimentary food and beverages will be available during the following times to all registered attendees.

**HIGHLIGHTS**

- **Awards Ceremony & Reception**
  - **Location:** Empire Ballroom A
  - **Time:** 6:00 pm – 7:00 pm

- **Friday and Saturday, February 28-29**
  - **Location:** Elite Hall
  - **Coffee Available:**
    - **Time:** 7:30 AM – 11:00 AM
    - **Time:** 3:30 PM – 3:45 PM

- **Boxed Lunch**
  - **Time:** 12:15 PM – 1:15 PM

- **Lost and Found**
  - For lost items, please visit the meetings team at Registration in the Elite Foyer of the Hyatt Regency.

- **Mobile App**
  - SPSP has a mobile app available on iOS and Android operating platforms for the 2020 Annual Convention. The easy-to-use app allows you to view the program, connect with other attendees and build your own convention schedule. Visit your app store within your device and search for “SPSP” to find us. Be sure to join the conversation on social media by following us on Twitter @SPSPNews and by using the official convention hashtag, #SPSP2020.

- **WiFi:** SPSPWIFI Password: SPSP2020

- **WIFI:** SPSPWIFI Password: SPSP2020
Nursing Mothers Room
A nursing mothers room will be available on the 4th floor with private personal space for nursing mothers to utilize. For access, pick up the passcode at the SPSP Registration Desk.

Thursday, February 27 7:00 AM – 6:00 PM
Friday, February 28 7:30 AM – 5:30 PM
Saturday, February 29 7:30 AM – 5:30 PM

Ombuds Service
Ombuds services will be provided throughout the conference to provide a fair, equitable, respectful, and harassment-free environment for all. To contact our ombuds service during the convention email ombuds@proactive-resolutions.com. More info can be found online at http://meeting.spsp.org/general-info/ombuds-services.

Parking

Photography & Video Recording
SPSP asks that you do not photograph, audio or video record speakers, presentations or posters without the permission of the authors/speakers.

Poster Check
SPSP will have a Poster Check available in the Elite Hall.

Thursday, February 27 7:00 AM – 6:00 PM
Friday, February 28 7:30 AM – 5:30 PM
Saturday, February 29 7:30 AM – 5:30 PM

Poster Sessions
Presenting authors should be present for the full hour during their assigned poster session. Other authors on the poster can also be available for the duration of the session to answer questions. All poster sessions are in the Elite Hall.

Please see the Poster Schedule on pages 16-17 Presenters will have 15 minutes between sessions for set-up and take down time.

Registration & Badge Pick-Up
MSY Airport, Customer Service Center between Doors 2 & 3 near Baggage Claim
*The airport will only have Badge Pick-Up. No registration or store services will be available at the airport.

*Wednesday, February 26 11:00 AM – 8:00 PM

Hyatt Regency New Orleans, Elite Hall
Convention Registration and Badge Pick-Up will be open during the following hours:

Thursday, February 27 7:00 AM – 6:00 PM
Friday, February 28 7:30 AM – 5:30 PM
Saturday, February 29 7:30 AM – 5:30 PM

Social Events
The Opening Reception will be held in the Elite Hall from 4:30 PM – 6:00 PM on Thursday, February 27.

The Awards Ceremony and Reception will be held Thursday, February 27 at 6:00 PM in Empire Ballroom A.

SPSP will host the Geaux Local: Kickoff Party at Generations Hall (separate tickets required) from 7:30 – 10:00 PM on Thursday, February 27.

The Diversity and Climate Committee is hosting a Diversity Reception in Celestin E on Friday, February 28, from 6:30 PM – 7:30 PM to honor the Diversity Fund Award Winners. More information can be found on page 19 from Diversity Highlights. Sponsored by Facebook.

The Non-Academic Employee Social Hour will be held on Friday, February 28, from 5:15 PM – 6:15 PM in Strand 11B and offers attendees the chance to network with others from industry.

The LGBT & Ally Networking Reception, sponsored by Facebook, will be on Friday, February 28, from 5:15 PM – 6:15 PM in Imperial 5. This reception allows members of the LGBT community to meet and network.

The International Reception will be held Friday, February 28 from 5:15 PM – 6:15 PM in Strand 12. This is a chance for those in the US and abroad to meet with others doing international research.

The final poster session (Poster Session M) of the day on Saturday from 5:00 PM – 6:30 PM in the Elite Hall will have a cash bar included with light Hors d’oeuvres.

Special Needs
Attendees with special needs should contact the SPSP meetings staff prior to the convention at meetings@spsp.org, or onsite by visiting Registration Desk for any assistance. For specific information regarding ADA compliance and accessibility, please contact the Hyatt Regency directly at 504-561-1234, or for hotel information please contact Visit New Orleans at 800-672-6124.

SPSP Store
The SPSP store will be located in Elite Hall. You can pick up your printed program (with ticket), your convention t-shirt (with ticket) or purchase Geaux Local: Kickoff Party tickets or other SPSP items. The store hours are:

Thursday, February 27 7:00 AM – 6:00 PM
Friday, February 28 7:30 AM – 5:30 PM
Saturday, February 29 7:30 AM – 5:30 PM

Transportation
Airport:
The New Orleans International Airport is (15 miles) from the Hyatt Regency New Orleans.

**Please see pages 43 - 79 for Programming Session locations.**
The Society for Personality and Social Psychology is pleased to announce Phoebe Ellsworth as the 2020 Annual Convention Legacy honoree. This program is designed to honor legacy figures in social and personality psychology.

Phoebe C. Ellsworth is the Frank Murphy Distinguished University Professor of Psychology and Law (Emerita) at the University of Michigan. She received her B. A. from Radcliffe and her PhD from Stanford, and taught at Yale and Stanford before joining the faculty at Michigan.

Professor Ellsworth is known for her research on two different topics. First, she studies the relation between cognition and emotion, and is an originator of the appraisal theory of emotions. According to appraisal theory, emotions correspond to combinations of the organism’s appraisals of its environment along dimensions significant for its well-being: novelty, valence, certainty, goal conduciveness, agency, and controllability. Second, she has been an important contributor to the field of psychology and law, and has studied jury decision-making, changing attitudes towards the death penalty, and the use of social science research in legal decision-making.

She is a fellow of the American Academy of Arts and Sciences and has received awards both for her contributions as a scientist (SPSP Career Contribution Award, APS James McKeen Cattell Award, SESP Distinguished Scientist Award, Cornell University Lifetime Achievement Award in Law, Psychology, and Human Development) and for her contributions as a graduate student mentor (APA Fowler Award, SPSP Nalini Ambady Award, APS Mentor Award).

LEGACY EVENTS

Legacy Lunch (by invitation only)
Directly following the symposium, Phoebe Ellsworth will host a lunch for her academic legacies, major contributors to the research area, and other invited guests.

Legacy Posters
Posters accepted for the SPSP convention that can trace back to the Legacy (through a self-nomination process) will have the option to pick up a Legacy Badge onsite at the convention. Displaying this badge on their poster will signify all the work the legacy honoree continues to touch.

Legacy Award Symposium: Phoebe Ellsworth
Saturday, February 29, 11:00 AM – 12:15 PM, Strand 13
In the tradition of Kurt Lewin, this symposium examines the contribution of theory to understanding real-world problems (drawing on Phoebe Ellsworth’s work on emotion) and the contribution of applied research to basic theory (drawing on her work in law).

The Practical Theorist and the Theoretical Practitioner
Phoebe Ellsworth, Univ. of Michigan

The Science of Emotion and its Relevance to More Humane Institutions
Dacher Keltner, UC Berkeley

The Phoebe Principle: Spend Time on Things That Matter
Samuel Sommers, Tufts Univ.
INVITED SESSIONS

Presidential Plenary
Bias in the Age of AI and Big Data
Friday, 9:30 am, Empire A&B

This symposium brings together two leading scholars in the science of bias in conversation with two groundbreaking scholars in Data Science to consider bias in the age of Big Data. How do algorithms and AI come to mirror people’s biases? How might such reflected biases affect individuals and communities? What role can we, as psychologists, play in this Data Revolution? As society grapples with how to collect, analyze, and synthesize data of unprecedented proportions, social and personality psychologists can play a unique role in this new era, given our expertise not only with data but with the humans that this data often represents.

Invited Session
What Do We Know and What Should We Be Teaching Others About Our Field?
Friday, 2:15 pm, Empire A

What can we confidently consider to be the knowledge or wisdom of our field? And what should we be teaching others about our discipline? In this session, four leaders in social and personality psychology share their perspectives on recognizing trustworthy findings, advancing theory in the face of incompatible results, teaching our discipline in the classroom, and responsibly disseminating psychological science to the public.

Invited Session
Sharing Psychology: The View From Other Disciplines
Saturday, 2:15 pm, Empire A

Drusilla Brown, economist, will share her experiences collaborating with psychologists to address conditions for factory workers around the world. Lisa Kavanaugh, public defender, together with Fred Clay, who was exonerated after 38 years in prison, will describe working with psychologists as expert witnesses. The speakers share their thoughts on what psychologists do well and what we could do better.

#SPSP2020 / 17
STUDENT HIGHLIGHTS

Professional Development Sessions
Many professional development sessions this year are focused on training or careers both inside and outside of academia. These sessions, while not specifically designed for student attendees, can offer valuable insight for students. Be sure to check out the professional development sessions scattered throughout the program and easily visible in the Program Grids for each day. For Friday’s schedule, please see pages 44–45. For Saturday’s schedule, please see pages 84–85.

Student Mentoring Luncheons
Friday, February 28 and Saturday, February 29, 12:30 PM – 1:45 PM Empire B

The mentoring lunch offers graduate students an informal opportunity to discuss their research interests and career development with an established professional in the field. Pre-registration is necessary for this event.

GASP Mentoring Lunch
Friday, February 28, 12:30 PM – 1:45 PM, Strand 12

Co-sponsored by the GLBT Alliance in Social and Personality Psychology (GASP) and the SPSP Diversity and Climate Committee, this event features volunteer faculty mentors hosting small group discussions of research and professional issues, including LGBT issues in the academic job market, positioning LGBT research for publication, obtaining funding for research on sexual-minority populations, and other diversity and professional development topics. Pre-registration is necessary for this event.

Geaux Local at Generations Hall
Thursday, February 27, 7:30 PM – 10:00 PM

Take some time out of your busy conference schedule to relax, socialize, and network with your peers at Geaux Local, the Kickoff Party at Generations Hall on Thursday night. An amazing local menu and a cash bar will be available. An event ticket includes one alcoholic drink, unlimited soft drinks and juices, plenty of New Orleans food, and access to all bands and performers. Convention food and drink vouchers can also be used at cash bars.

This is a ticketed event. Tickets can be purchased in advance online, at the SPSP Store onsite, or at the door (while tickets last).

Poster Check
Thursday, February 27, 7:30 AM – 6:30 PM, Elite Hall
Friday, February 28, 7:30 AM – 5:00 PM, Elite Hall
Saturday, February 29, 7:30 AM – 8:30 PM, Elite Hall

Tired of carrying your poster? Visit Poster Check in the Elite Hall. We’ll hold onto it for you until you need it. Simply drop off your poster upon your arrival for the day, pick it up at the time of your poster session, and return it until you leave for the day.

Student Poster Award Finalists and Wall of Fame
Thursday, February 27, 4:30 PM – 6:00 PM, Elite Hall

Poster Session A, on Thursday evening, will be the scene of intense excitement as the finalists in the Student Poster Award Competition strive to impress secret judges with their innovative research. Come watch them in action. Don’t worry if you miss this event – you can view the winning posters all convention long on the Wall of Fame in the exhibit hall for the remainder of the convention. Stop by to admire the award-winning research and to pick up tips for enhancing your own poster for next year’s convention.

Student Awards Ceremony
Friday, February 28, 8:30 AM – 9:15 AM, Celestin C

Come see the winners of the Heritage Dissertation Awards, Jenessa Shapiro Graduate Research Awards, Student Publication Awards, Graduate and Undergraduate Student Poster Awards, and Outstanding Research Awards.

Thank you to all of the #SPSP2020 Sponsors:
DIVERSITY HIGHLIGHTS

Diversity Undergraduate Mentoring Breakfast
Sponsored by Facebook
Friday, February 28, 8:00 AM – 9:15 AM, Strand 12
The Undergraduate Mentoring Breakfast, hosted by the Diversity and Climate Committee, celebrates this year’s winners of the Diversity Undergraduate Registration Awards. Undergraduate award winners will be paired with past Diversity Graduate Travel Award winners to share tips and advice related to research, applying to graduate school, networking, and professional development. Continental breakfast will be provided for all participants.
*This session is by invitation only.*

Graduate Diversity Award Winners and Admired Scholars Meet-Up
Friday, February 28, 6:00 – 6:30 PM, Celestin D
This event is exclusively for this year’s Graduate Diversity Award winners and their selected admired scholars. The meet up provides an opportunity for the grad winners and admired scholars to meet each other prior to the Diversity Reception.

Diversity Reception
Sponsored by Facebook
Friday, February 28, 6:30 PM – 7:30 PM, Celestin E
Join the Diversity and Climate Committee for a reception to honor the Diversity Graduate Travel and Undergraduate Registration Award winners. All are welcome to attend for drinks and a light reception to celebrate diversity within SPSP.

GASP Mentoring Lunch
Friday, February 28, 12:30 PM – 1:45 PM, Strand 12
Co-sponsored by the GLBT Alliance in Social and Personality Psychology (GASP) and the SPSP Diversity and Climate Committee, this event features volunteer faculty mentors hosting small group discussions of research and professional issues, including LGBT issues in the academic job market, positioning LGBT research for publication, obtaining funding for research on sexual-minority populations, and other diversity and professional development topics. Pre-registration is necessary for this event.

Diversity Symposium
The Diversity and Climate Committee highlights a symposium each year at the SPSP Annual Convention that is closely related to issues of diversity. This year’s Diversity Symposium is:
Nuancing Stereotypes and Perceptions: An Intersectional Approach
Saturday, February 29, 8:00 – 9:15 AM, Empire D

Professional Development Sessions
Many professional development sessions this year are focused on training or careers both inside and outside of academia. The following may be of specific note:

Networking as POC in Academia: Using Social Media to Thrive
Friday, February 28, 2:15 – 3:30 PM, Celestin B
In 2019, the SPSP Diversity and Climate Survey reported that people of color (POC) had fewer opportunities to engage in professional development and networking and were more likely to report that their identity was devalued compared to White members of SPSP. This session aims to provide a space to address these issues and discuss how POC can use social media to mitigate these challenges.

Diversity Posters
Posters whose authors have selected the keyword or topic area of diversity to identify their work will be displayed on Thursday, February 27 from 4:30 PM – 6:00 PM (Poster Session A) and Saturday, February 29 from 3:30 PM – 4:30 PM (Poster Session L), in the Elite Hall.

Diversity Fund Travel Awards
SPSP is committed to increasing diversity within the field of personality and social psychology. As part of this initiative, each year the Diversity and Climate Committee selects exemplary students from the many undergraduate and graduate applicants to receive the Diversity Undergraduate Registration Award and the Diversity Graduate Travel Award. Students are eligible if they identify as a member of an underrepresented group in social/personality psychology. Each year the travel award winners include both international and domestic students. For the 2019 awards cycle SPSP was able to provide travel assistance to over 100 students - 60 winners of the Diversity Graduate Travel Award and 48 winners of the Diversity Undergraduate Registration Award. Diversity Graduate winners are listed on pages 27 and 28. Undergraduate winners are listed on page 34. Join us to honor the winners at the Diversity Reception on Friday evening.

First-time Attendees and President’s Welcome Reception
Wednesday, February 26, 5:30 PM – 7:00 PM, Empire A
Start the evening and SPSP2020 by meeting and socializing with other first-time conference attendees and finish with the President’s Welcome Reception to kick off the conference. There will be a cash bar and light hors d’oeuvres.

Opening Reception
Thursday, February 27, 4:30 PM – 6:00 PM, Elite Hall
Kick off the 2020 Annual Convention with the Opening Reception. Meet up with friends and colleagues for some food and a drink. Browse the posters in #SPSP2020’s first poster session.

Awards Ceremony & Reception
Ceremony Sponsored by SAGE Publishing
Thursday, February 27, 6:00 PM – 7:00 PM, Empire A
Join us in honoring the 2020 SPSP Award recipients. Selected by a panel of peers, winners are recognized for their contributions across eight categories. Celebrate with a reception immediately following the ceremony.

Geaux Local: Kickoff Party
Thursday, February 27, 7:30 PM – 10:00 PM
Generations Hall (310 Andrew Higgins Blvd)
Join us for a night of New Orleans flavor: good music and local performances, an amazing menu (includes jambalaya, crawfish, fried green tomatoes, bouillabaisse and much more!), and cocktails made just for SPSP. Three rooms of entertainment (including a brass band, a classic rhythm and blues band, and several fun entertainers) and networking will make this a truly special event as we “Geaux Local” for a night of fun. This is a ticketed event that we do expect to sell out. Tickets include one alcoholic drink, unlimited soft drinks and juices, lots of local food, and access to all performers. This is a ticketed event. Tickets can be purchased in advance online, in the Elite Foyer onsite, or at the door (while tickets last).

Non-Academic Employee Social Hour
Friday, February 28, 5:15 PM – 6:15 PM, Strand 11B
Connect with those employed outside of academia at the Non-Academic Employee Social Hour. Stop by and chat with industry professionals about opportunities outside of academia. There will be a cash bar and light hors d’oeuvres.

Early Career Mentoring Social Hour
Friday, February 28, 5:15 PM – 6:15 PM, Empire B
What do you get when you combine a little information, a lot of experience and a dash of fun? Early Career Social Hour! Come connect with fellow early career members and talk with mentors during a happy hour session at the SPSP convention. *Pre-registration for this event is required.*

LGBT & Ally Networking Reception
Sponsored by Facebook
Friday, February 28, 5:15 PM – 6:15 PM, Imperial 5
Are you a member or an ally of the LGBT community? Come to the LGBT & Ally Networking Reception to network with other attendees and discuss challenges, successes, and research surrounding topics of sexual orientation, gender, and identity in the field of social personality psychology. Light hors d’oeuvres will be provided and a cash bar will also be available. Meet new friends, catch up with old ones, or find a colleague to collaborate with.

SPPS Editorial Board Happy Hour
Friday, February 28, 5:15 PM – 6:15 PM, Bolden 2
In appreciation of the valuable service they provide to the journal, SPPS would like to invite the editors and editorial board members to enjoy some refreshments on us.

Summer Institute for Social and Personality Psychology (SISPP) Reunion (Invitation Only)
Friday, February 28, 5:15 PM – 6:15 PM, Bolden 5
Were you an attendee, instructor, or organizer of a past SISPP? Stop by the reception to say hello to old friends in your cohort and share stories about your summer with other cohorts.

International Reception
Friday, February 28, 5:15 PM – 6:15 PM, Strand 12
Whether you are currently engaged in international research or wanting to meet your peers who are, this reception will give you the chance to network and connect with those who are doing work around the globe. Whether you are based in the US or abroad, join us for this networking event featuring a cash bar and light hors d’oeuvres.

Graduate Diversity Award Winners & Admired Scholars Meet-Up
Friday, February 28, 6:00 PM – 6:30 PM, Celestin D
This event is exclusively for this year’s graduate diversity award winners and their invited admired scholars. This time will be spent to allow time for the grad winners and admired scholars to meet each other prior to the Diversity and Climate Committee Reception.

Diversity Reception
Sponsored by Facebook
Friday, February 28, 6:30 PM – 7:30 PM, Celestin E
Join the Diversity and Climate Committee for a reception to honor the Diversity Fund Graduate Travel and Undergraduate Registration Award winners. All are welcome to attend for drinks and a light reception to celebrate diversity within SPSP.

Closing Reception
Saturday, February 29, 5:00 PM – 6:30 PM, Elite Hall
The final poster session of the day on Saturday will have light hors d’oeuvres and a cash bar included to allow attendees to meet, network and mingle one last time before heading home.

#SPSP2020
PRIMARY AWARDS

BLOCK AWARD FOR PERSONALITY RESEARCH
Brent W. Roberts, Professor of Psychology and Director of the Center for Social and Behavioral Science at the University of Illinois at Urbana-Champaign, and Distinguished Guest Professor, Hector Institute, University of Tübingen. He studies personality development and assessment with a focus on how and why people change over time.

CAMPBELL AWARD FOR SOCIAL PSYCHOLOGY RESEARCH
Thomas Gilovich is the Irene Blecker Rosenfeld Professor of Psychology at Cornell University. He received his B.A. from the University of California at Santa Barbara and his PhD from Stanford University. He specializes in the study of everyday judgment and reasoning, happiness and psychological well-being, and self and social inference.

CAREER CONTRIBUTION AWARD
Patricia G. Devine is Kenneth and Mamie Clark Professor of Psychology at the University of Wisconsin – Madison. Her early pioneering work forms the foundation of the field’s contemporary understanding of how people who consciously renounce prejudice have unintentional biases that lead them to be unwittingly complicit in the perpetuation of ongoing intergroup disparities. Her most recent work has focused on developing an intervention to break the habit of unintentional bias and promote inclusion.

DISTINGUISHED SCHOLAR AWARD
Shalom H. Schwartz is Professor Emeritus of Psychology—the Hebrew University of Jerusalem, past president of the International Association for Cross-Cultural Psychology and recipient of the Israel Prize in Psychology and an American Sociological Association distinguished Career Award. His value theories have been applied in research in over 80 countries.

METHODOLOGICAL INNOVATOR AWARD
Niall Bolger is a Professor and former Chair in the Department of Psychology at Columbia University. He investigates social support processes in intimate couples using laboratory experiments and intensive longitudinal studies of experiences, emotions, and physiology in daily life. He has parallel interests in statistical modeling of time-intensive data collected in laboratory experiments and in daily life.

JANESSA SHAPIRO AWARD FOR CONTRIBUTIONS TO DIVERSITY AND INCLUSION
Yolanda Flores Niemann is a Professor of Psychology at the University of North Texas. Her research focuses on the effects and social ecological contexts of stereotypes and tokenism. She has published multiple books and journal article publications, and a film – Microaggressions in the Classroom. She has been Principal Investigator of over 40 million dollars in federal grants, and served as an administrator for 15 years. She lectures nationally on microaggressions and inequities in the workplace.

AMBADY AWARD FOR MENTORING EXCELLENCE
Constantine Sedikides’s research is on self and identity, and their interplay with emotion and motivation. Before joining University of Southampton, Constantine taught at University of Wisconsin-Madison and University of North Carolina at Chapel Hill. He holds a BA from Aristotle University of Thessaloniki and a PhD from The Ohio State University.

DIENER AWARD IN SOCIAL PSYCHOLOGY
John T. Jost is Professor of Psychology and Politics at NYU. His research addresses stereotyping, prejudice, social justice, political ideology, social media, and system justification theory; it has been funded by NSF and received international media attention. He has published over 200 articles and four books and received many scientific awards, including an honorary doctorate from the University of Buenos Aires.

DIENER AWARD IN PERSONALITY PSYCHOLOGY
Verónica Benet-Martínez is a Professor of Psychology at Pompeu Fabra University (Barcelona). She is an internationally renowned leader in the study of culture and social-personality processes, particularly those pertaining to the role of individual differences in acculturation and intercultural/multicultural experiences. Her work has been recognized by SPSSI (Otto Klineberg Intercultural and International Relations Award) and APA (Ursula Gielen Global Psychology award).
PRIMARY AWARDS

APPLICATION OF PERSONALITY AND SOCIAL PSYCHOLOGY AWARD

**Roxane Cohen Silver** is Professor in the Department of Psychological Science at the University of California, Irvine, where she has been involved in research, administration, and teaching for over 30 years. Silver studies acute and long-term psychological and physical reactions to adversity, including responses to collective traumas such as terror attacks and natural disasters across the world. Silver received her Ph.D. in social psychology from Northwestern University.

UNDERGRADUATE TEACHING AND MENTORING AWARD

**Christopher Leone** is personality-social psychologist at the University of North Florida. He has mentored dozens of Honors Thesis students and countless other undergraduates inside and outside the lab. He has shared his expertise with fellow mentors and undergraduates at other campuses in presentations, workshops, and panel discussions at various conferences.

CIALDINI PRIZE

**Hengchen Dai** is an Assistant Professor of Management and Organizations as well as a faculty member in the Behavioral Decision Making area at Anderson School of Management at UCLA. Her research examines how to motivate people to behave in line with their long-term best-interests both inside and outside of the workplace.

**Berkeley Dietvorst** is an assistant professor of marketing at the University of Chicago’s Booth School of Business. He received his PhD from the Wharton School, University of Pennsylvania. His research focuses on understanding how consumers and managers make judgments and decisions, and how to improve decision-making.

Katherine L. Milkman is a professor of Operations, Information and Decisions at the Wharton School at the University of Pennsylvania and the President of the Society for Judgment and Decision Making. She co-directs the Penn-Wharton Behavior Change for Good Initiative, and her research focuses on better understanding self-control failures and improving choices.

Maurice E. Schweitzer is the Cecilia Yen Koo Professor at the Wharton School. His research interests include emotions, deception, and trust, and he co-authored, “Friend & Foe: When to Compete, When to Cooperate, and How to Succeed at Both.”

WEGNER THEORETICAL INNOVATION PRIZE (A)

**Greg Walton** is the Michael Forman University Fellow and associate professor of psychology at Stanford University. His research addresses psychological processes that contribute to major social problem, especially processes that undermine belonging and contribute to inequality in education, and psychologically “wise” interventions that address these processes and help people flourish.

**Tim Wilson** is the Sherrell J. Aston Professor of Psychology at the University of Virginia. He has explored several aspects of self-knowledge, including the accuracy, utility, and function of the narratives people tell about themselves and how to change those narratives.

WEGNER THEORETICAL INNOVATION PRIZE (B)

**Oliver Sng** is an assistant professor of psychological science at the University of California Irvine. He is a social psychologist who draws upon ideas from evolutionary and cultural psychology, and animal behavioral ecology, in exploring the origins of cultural diversity and social stereotypes.

**Michael Varnum** is an associate professor in the Department of Psychology at Arizona State University. His primary lines of research lie at the intersection of evolutionary psychology, behavioral ecology, and cultural psychology. He uses insights from these perspectives to understand the causes of cultural variations (and universals) and cultural change.
PRIMARY AWARDS

WEGNER (B) PRIZE

Steven Neuberg is Foundation Professor and Chair of the Arizona State University Department of Psychology. Interested in understanding how people identify and manage the opportunities and threats afforded by others, he often takes an integrated ecological-evolutionary approach in his research on stereotyping/prejudice, motivated social cognition, culture, and religion and conflict.

Douglas T. Kenrick is president’s professor at Arizona State University. His research incorporates ideas from evolutionary biology. He wrote Sex, Murder, and the Meaning of Life, and The Rational Animal. His text Social Psychology: Goals in Interaction (with Neuberg, Cialdini & Lundberg-Kenrick) is now in its 7th edition.

BOOK PRIZE

William von Hippel is an evolutionary social psychologist at the University of Queensland. His research activities are primarily in the cognitive, motivational, and social factors that facilitate social success, but he admits to having wide-ranging (i.e., scattered) interests. The Social Leap is an outgrowth and reflection of his inability to focus.

EXCELLENCE IN SCIENCE JOURNALISM

Maria Konnikova is a New York Times bestselling author, journalist, and professional poker player for PokerStars Team Pro. She is a contributing writer for The New Yorker and hosts the podcast “The Grift” from Panoply Media. Maria’s writing has been featured in Best American Science and Nature Writing and has been translated into over twenty languages. Her podcasting work earned her a National Magazine Award nomination in 2019. She graduated from Harvard University and received her PhD in psychology from Columbia University.

SERVICE TO SPSP AWARD (B)

Julie Garcia received her Ph.D. in Social Psychology from the University of Michigan and is currently a Professor in the Psychology and Child Development Department, and Interim Associate Vice President for Diversity and Inclusion at California State University, San Luis Obispo. Her research explores managing multiple social identities, multicultural identity, and underrepresentation in STEM. She has been a member of SPSP’s Diversity and Climate Committee since 2015.

SERVICE TO SPSP AWARD (B)

Diana T. Sanchez is a Full Professor in the Department of Psychology at Rutgers University. Her research explores the complexities associated with close relationships, identity, and stigma. Within these themes, she is most widely known for her work on multiple identities, gender dynamics in close-relationships, and stigma coping and transfer.

SERVICE TO SPSP AWARD (C)

Sam Sommers is Professor and Chair of Psychology at Tufts University and an SPSP Fellow. His service to SPSP includes past membership on the Diversity and Climate Committee, a term as Board Member-at-Large, and co-chair of the Task Force on Sexual Harassment

SERVICE TO SPSP AWARD (C)

Oz Ayduk received her Ph.D. from Columbia University (1999) and has been a faculty member at the University of California, Berkeley, Department of Psychology since 2002. Dr. Ayduk’s research aims to understand vulnerability and resilience to stress using both personality and social psychological paradigms. Her broader aim is to leverage basic science findings from her lab to develop scalable interventions.

SERVICE TO THE FIELD AWARD (A)

Kellina Craig-Henderson is a former Professor of Psychology currently serving as the Deputy Assistant Director for the Social, Behavioral and Economic Sciences Directorate of the National Science Foundation. She previously served as the Program director of the Social Psychology program before serving as Director for NSF’s Tokyo Office.

WiFi: SPSPWIFI Password: SPSP2020
PRIMARY AWARDS

SERVICE TO THE FIELD AWARD (B)

Paula R. Pietromonaco studies close relationship processes, emotion, and health, including how partners’ shape each other’s health-related physiological responses, and how individual differences (e.g., attachment, childhood adversity) and situational variables (e.g., power, culture) modulate relationship dynamics. She is Editor of Emotion, and Professor Emerita, Psychological and Brain Sciences, University of Massachusetts, Amherst.

SAGE YOUNG SCHOLAR AWARD

Lara Aknin is an associate professor of social psychology at Simon Fraser University and an associate co-editor of the World Happiness Report. She completed her PhD at the University of British Columbia. Her research investigates the causes, consequences, and relationships between human prosociality and well-being.

Joey Cheng is an assistant professor of psychology at York University. She is interested in the dynamics of competition and cooperation, particularly the psychological and biological mechanisms that operate when we compete with one another, and how we manage to successfully coordinate and orchestrate collective actions.

William Chopik is a social/personality psychologist interested in how relationships—and the people in them—change over time and across situations. His work examines phenomena as broad as how relationships and social institutions shape development and as focused as the mechanisms that underlie the link between close relationships and health.

SAGE YOUNG SCHOLAR AWARD

Amy Muise is an Assistant Professor of Psychology and York Research Chair in Relationships and Sexuality at York University. Her research applies theories from social psychology and relationship science to understand how couples can maintain satisfying sexual and romantic relationships over time and navigate conflicts of interest with greater success.

Ed O’Brien is an Associate Professor of Behavioral Science at the University of Chicago Booth School of Business. His research examines the judgment processes underlying how people perceive and experience

Aneeta Rattan is an Associate Professor of Organisational Behaviour at London Business School. She studies how lay theories, or mindsets, shape intergroup dynamics. Her work explores the confronting of overt bias, and identifies mindsets (fixed-growth, universal-nonuniversal) that promote belonging, commitment, and achievement among underrepresented groups (race, gender, LGBTQ+).

Louis Tay is an Associate Professor in Psychology at Purdue University. His research focuses on measuring, predicting, and improving well-being at individual, organizational, and societal levels. He loves research methods, including measurement, temporal modeling, and data science. He founded an experience sampling platform (www.expimetrics.com) that serves hundreds of researchers.

Sander van der Linden is Assistant Professor of Social Psychology at the University of Cambridge following prior positions at Princeton and Yale. His research explores the power of social norms, influence, and persuasion in human judgment and decision-making. He was named Editor-in-Chief of the Journal of Environmental Psychology in 2019.

ABSTRACTS

Posters A-001 to A-041 are Student Poster Award Finalists

[A-001] Aggression/Anti-Social Behavior
You’re Not Playing Fair: State Anger and Social Distress Mediate the Relationship between Unfairness Appraisal and Aggression in the Context of Social Exclusion
Evetter Defelte1, Alex Spooner1, Ronald Flores1, Jeremy Feigel2, Wamiq Pederesen2, Ryan Cabrera3, Fernando Licea3, Gabriela Lizarraza4, Joshua Lozano5, Nancy Martinez6, Nicki Mounivong7, Lindsey Richard7, Jose Ybarra-Denton8
1California State Univ., Long Beach

[A-002] Aggression/Anti-Social Behavior
Ruminating after Rejection: Social Exclusion Moderates the Effect of Trait Angry Rumination on Social Distress
Valerie Vessels1, Fernando Licea1, Ronald Flores1, Jeremy Feigel2, Evetter Defelte1, William Pederesen2, Ryan Cabrera3, Gabriela Lizarraza4, Joshua Lozano5, Nancy Martinez6, Nicki Mounivong7, Lindsey Richard7, Alex Spooner7, Jose Ybarra-Denton8
1California State Univ., Long Beach, 2Univ. of Nebraska-Lincoln

[A-003] Close Relationships
Virtual Love: The Benefits of Romantic Anthropomorphism on Psychological Well-being
Mayu Koike1, Steve Loughnan1, Sarah Stanton2
1Univ. of Edinburgh

[A-004] Close Relationships
Mrs. His Name, Mrs. My Name, or Mr. and Mrs. Our Name?: The Associations between Marital Name Choice and Interpersonal Identity and Relationship Quality
Thao Pham3, Jamie Nordling2
1UC Irvine, 2Augustana College

[A-005] Culture
What’s Your Migration Story? Commonalities and Differences between Cross-national and Internal Migrants of Chinese Origin
Dan Tao1, Siija Li2, Xiaoping Ren3, Andrew Ryder4
1Concordia Univ., 2China Academy of Sciences

[A-006] Gender
Costs of the Desire to Avoid Gender Incongruent Choices and Experiences (vs. Maintain Congruency)
Yel Rim Su1, Evan Abedalb3, Michael Norton1
1Boston Univ., 2Harvard Univ.

[A-007] Groups/Intergroup Processes
Racialized Representations: The Differential Acceptability of Redface and Blackface
Julisa Lopez1, Ariane E. Eason2, Stephanie A. Fryberg3
1Univ. of Washington, 2UC Berkeley, 3Univ. of Michigan

[A-008] Individual Differences
If You Fail, I’ll Fail: Effects of Self-regulatory Focus and Other’s Performance upon Self Appraisal
Kane Ogasawara1, Jiro Takai1, Atsuko Nakagawa2
1Nagoya Univ., 2Nagoya City Univ.

[A-009] Intergroup Relations
The Impact of Disease Associations on Prejudicial Attitudes
Julia Spielman1, Chadly Stern1
1Univ. of Illinois at Urbana-Champaign

Psychological Impact of Decision-making Algorithms on Employees’ Affective Commitment to Their Employers in the Workplace
Chunchen Xu1, Arthur Jago2, Francis Flynn3
1Stanford Univ., 2Univ. of Washington

Of Truthfulness and Falseness: How Non-diagnostic Photos Influence the Perceived Truth of Comparative Claims
Lynn Zhang1, Eryan Newman2, Norbert Schwarz3
1Univ. of Southern California, 2Australian National Univ.

Random Suggestions License
Self-interested Behavior
Maria Douvena1, Mariela Jaffe2, Rainer Greifeneder4
1Univ. of Basel

[A-013] Language
Love Hurts: The Long-term Impacts of Failed Relationships
Sarah Seraj1, James Pennebaker1
1Univ. of Texas at Austin

[A-014] Morality
Moral Foundations Conflict Task: Measuring Intuitive Conflict between Moral Foundations
Amrita Ahluwalia1, Calum Marr3, Zara Kunders3, Adam Moore1
1Univ of Edinburgh

[A-015] Morality
The Evaluation of Accidental and Intentional Harm by In-group vs. Out-group Members
Brandon Woo1, Jason Mitchell2
1Harvard Univ.

[A-016] Motivation/Goals
Express Yourself: The Use of Facebook and Instagram in Personal Goal Pursuit
Anne Holding1, Nora Hope2, Emily Moore1, Amanda Moore3, Richard Koestner2
1McGill Univ., 2Simon Fraser Univ.

[A-017] Motivation/Goals
Leadership, Metamotivation, and Beliefs About How to Manage the Motivation of Others
Erik Jansen1, Abigail Scholer1, David Miele2
1Univ. of Waterloo, 2Boston College

[A-018] Social Cognition and Mental Health as Predictors of Adolescents’ Mindfulness Practice
Marguerite Beatle1, Hanna Konttinen1, Sallai-Maarit Volanen2,3, Keegan Knittle1, Nelli Hankonen1
1Univ. of Helsinki, 23Folkhälsan Research Center

[A-019] Norms and Social Influence
Explaining Why “Misery Loves Miserable Company”: Shared Reality Dampens Psychological and Physiological Stress
Megan Golden1, Federica Pinelli2, Niall Bolger1, Tory Higgins1
1Univ. of Auckland, 2Harvard Business School, 3Univ. of Texas at Austin

[A-020] Organizational Behavior
The Impersonal Touch: Improving Feedback-giving with Psychological Distance
Hayley Blunden1, Paul Green, Jr.2, Francesca Gino1
1Harvard Business School, 2Univ. of Texas at Austin

[A-021] Person Perception/Impression Formation
You Are What You Weigh: Perceiving Weight Change from Nonverbal Facial Cues
Laura Tian1, Elizaveta Klekova1, Nicholas Rule1
1Univ. of Toronto

[A-022] Personality Processes/ Traits
Optimism and Depressive Symptoms Following a Diabetes Diagnosis: Results from the Health and Retirement Study
Elisabeth Xie1, Rachel Burns1
1Harvard Univ.

[A-023] Politics
Is the Political Slant of Psychology Research Related to Scientific Replicability?
Diego Reiner1, Julian Wills1, William Brady2,3, Peter Mende-Siedlecki1,4, Jarret Crawford3, Jay Van Bavel1
1New York Univ., 2Rice Univ., 3Univ. of Dataware, 4The College of New Jersey

[A-024] Politics
Political Neutrality Aversion: When and Why “Staying out of it” Backfires
Ike Silver1, Alex Shaw2
1The Wharton School, Univ. of Penn., 2Univ. of Chicago

[A-025] Politics
The Effect of Political Control on Moralization by Political Elites
Size Yuh Nina Wang1, Voei Inbar2
1Univ. of Toronto

[A-026] Prosocial Behavior
Virtual Reality Improves Affective but Not Cognitive Empathy: A Pre-registered Meta-analysis
Alison Jane Martingano1, Fernanda Herrera2, Sara Lealva3
1The New School for Social Research, 2Stanford Univ., 3Indiana Univ., Purdue Univ. Indianapolis

[A-027] Prosocial Behavior
Common Knowledge Increases Cooperation in the Threshold Public Goods Game
Paul Deutchman1, Dorsa Ami1, Matthew Jordan2, Katherine McAuliffe3
1Boston College, 2 Yale Univ.

[A-028] Religion/Spirituality
Why Do Well-being Benefits of Socioeconomic Status Vary across Countries? A Competitive Test of Societal Wealth and Societal Religiosity
Liana Berkessel1, Jochen E Gebauer1,2, Mohsen Jordan1, Wiebke Bleidorn3, Peter J Rentfrow6, Sam Gosling7, Jeff Potter8
1Univ. of Mannheim, 2Univ. of Copenhagen, 3Rutgers Univ., 4UC Davis, 5Univ. of Cambridge, 6Univ. of Aarhus, 7Univ. Melbourne, 8Not in.

[A-029] Self-identity
Concealable Beliefs Attenuate the costs of Bearing Stigma
Joel Le Forestier1, Alison Chasteen1, Elizabeth Page-Gould1, Calvin Lair1
1Univ of Toronto, 2Washington Univ in St. Louis

[A-030] Self-identity
Examining the Role of Disclosure and Response Directness in Shaping the Possibility of Disclosure Experiences for Those with Concealable Stigmatized Identities
Rebecca Cipollina1, Diana Sanchez1, Ashley Egert1
1Rutgers Univ.

[A-031] Self-Regulation
Boredom and Self-control Failure: The Lingered Effects of Uncertainty
Emily Britton1, Ian McGregor2
1Univ of Waterloo

[A-032] Aggression/Anti-Social Behavior
Revenge Isn’t Always So Sweet: Priming Moderates the Relationship between Revenge Picturing and State Hostility
Isabella DiLauro1, Dacey Bashaw1, Sydney Carpentier1,2
1Univ. of Florida, 2Univ. of Texas at Austin

[A-033] Culture
On Size Does Not Fit All: A Qualitative Analysis of Implicit Social Support in the U.S., Taiwan, and Mexico
Alicia Castro1, William Pedersen1, Lorelei Acuna2
1Univ. of Pennsylvania, 2Univ. of California, San Diego

[A-034] Emotion
Differential Effects of Knowledge Duration on Pain and Negative Feelings
Tatiana Velichkovski1, Jonathan Martindale1, Tyronne J. Sgambati1, Phoebe Ellsworth1, Darwin A. Guerra1
1Univ of Michigan

[A-035] Individual Differences
Experiencing Flow in Dance: The Role of Perfectionism and Expertise
Hidayat Arslan1
1Koc Univ.

[A-036] Lifespan Development
How Is Genetic Essentialism Associated with Educational Decisions Relative to One’s Learning Style?
Nai Kiu Leung1, Benjamin Y. Cheung1, Steven Heine2
1Univ of British Columbia
[A-037] Mental Health/Well-Being
Virtual Interconnection, Social Disconnection: The Impact of Phones on Enjoyment in Social and Non-social Environments (Pilot Study)
Aaron Zhuo1, Ryan Dwyer2, Elizabeth Dunn2
1Univ. of British Columbia, 2Univ. of British Columbia Vancouver

[A-038] Person Perception/Impression Formation
The Problem Gamblers: Does the Race of Risk-Takers Influence Perceived Recklessness?
Bernardo Duarte1, James Wages1, Sylvia Perry2
1Univ. of Iowa, 2Northwestern Univ.

[A-039] Personality Processes/Traits
Extraversion Predicts Implicit Reward Learning
Muchen Xi1, Tyler Sassenberg1, Daiqing Zhao2, Scott Blain3, Colin DeYoung4
1Univ. of Minnesota, 2Boston Univ.

[A-040] Self-Regulation
Because You Had a Bad Day: The Role of Negative Affect and Justification in Self-Control Failure
Ally Heiland1, Jennifer Veilleux2
1Univ. of Arkansas

[A-041] Stereotyping/Prejudice
Mitigating Implicit Racial Bias among Criminal Court Jurors: Intervention through Instruction
Hannah Bolotin1, Steven Stember2
1Boston College, 2Weill Cornell

[A-042] Close Relationships
Make-up Sex, Psychological Distress Symptoms, and Relationship Satisfaction
Alexandro Carrillo1, Khanh Vo1, Karen Prager1, Sining Wu1
1Univ. of Texas at Dallas

[A-043] Close Relationships
Is Your Eye Roaming?: Examining Trust as a Buffer against Alternative Threat
Alexandra Black1, Brendan Scull1, Erica Slotter1, Patrick Markey1
1Villanova Univ.

[A-044] Close Relationships
R-E-S-P-E-C-T, Find Out What It Means to Me: Intermartial Warmth and Dominance during Romantic Conflict Predict Feelings of Respect from and for One’s Partner
Alexis Strauss1, Brendan Scull1, Erica Slotter1, Patrick Markey1
1Villanova Univ.

[A-045] Close Relationships
Intimacy processes among Fledgling Couples in a Non-WIEBD Sample
Betul Ugurcan1, Anthony Ong1, Gul Guynaydin2, Emre Selcuk1
1Univ. of Rochester

[A-046] Close Relationships
Partner Complementarity as a Predictor of Forgiveness Following Conflict
Caitlin Cassidy1, Brendan Scull1, Erica Slotter1, Patrick Markey1
1Villanova Univ.

[A-047] Close Relationships
Communication is Key: Communication Privacy Management in Romantic Relationships
Chandler Sahp1, Rebecca Harmata1, Miguel Villodas1, Jacqueline Schnapp1, Allison Vaughn1
1San Diego State Univ.

[A-048] Close Relationships
Integrated or Not?: Cognitive Organization of Sexual Representations for a Better Understanding of Sexual Adjustment
Christine Therriault1, Frederic L. Philippe1
1Univ. du Québec à Montréal

[A-049] Close Relationships
Support from a Close Loved One Alleviates the Negative Effects of Controlling Supervision on Experience at Work
E. Gaile Hopton1, Natalie Long Hel Ho1, Emma-Louise Rowe1, Céline Blanchard1
1Univ. of Ottawa

[A-050] Close Relationships
Stigma toward Consensually Non-monogamous Relationships: Thematic Analysis
Elizabeth Mahara1, Allison Derovanesian1, Abigail Masterson2, Gregory Webster3
1Univ. of Florida, 2Univ. of North Florida

[A-051] Close Relationships
Ideal or No Ideal?: Exploring the Effects of Online Interaction and Idealization on Relationship Development
Emma McGorry1, Eli Finkel1
1Northwestern Univ.

[A-052] Close Relationships
Do Charismatic People Have More Satisfying Sexual and Romantic Relationships?
Eric Tu1, Stephanie Raposo1, Amy Muise3
1Univ. of Toronto

[A-053] Close Relationships
How Attachment Style Affect Dating App Usage
Jennifer Ryan1, M. Joy McClure1
1AdaptThis Univ.

[A-054] Close Relationships
Insight Into Long-term Change of Ideal Partner Preferences
Julie Driebe1, Lars Penke1, Tanja M. Gerlach1
1Univ. of Goettingen

[A-055] Close Relationships
Social Anxiety, Gender, and Emotion Regulation in Romantic Relationships
Kaitlyn Schodt1
1Univ. of New Mexico

[A-056] Close Relationships
Romantic Partner Dissimilarity and Relationship Quality: Not All Who Disagree Are Negatively Impacted
Kathleen Huber1, Laura V. Machia1
1Syracuse Univ.

[A-057] Close Relationships
Establishing a Comprehensive Measure for Pornography Consumption
Katie Adams1, Onyia Gilpin1, Aterrorpet-Weyman2
1Univ. of Kansas, 2Univ. of New Hampshire

[A-058] Close Relationships
The Effect of Perceived Social Support on Adjustment to College: Attachment Anxiety as a Moderator
Kendra Berthiaume1, Emma Meyer1, Jennifer Tomlinson1
1Cornell Univ.

[A-059] Close Relationships
Perceived Gratitude Promotes Prosocial Motivation among Avoidantly Attached Individuals
Kristina Schrage1, Bonnie Le2, Jennifer Stellar3, Emily Impett1
1Univ. of Toronto, 2Univ. of Rochester, 3Univ. of Toronto Mississauga

[A-060] Close Relationships
Seeing is Believing: Perceptions of Parent RSAE Predict Own RSAE
Louis Witkower1, Sana Haddad1, Melissa Williams Ibora1
1Univ. of Kansas

[A-061] Close Relationships
Approaching Rewards and Avoiding Threats at Speed-dating
M. Joy McClure1, Federica Pinelli2, Maya Rossignac-Threats at Speed-dating
1Univ. of Rochester, 2Univ. of Toronto Mississauga

[A-062] Close Relationships
Daughters and Their Mothers are Differentially Impacted by Men’s Attractiveness and Personality Traits
Madeleine Fugere1, Jessica Henowitt2, Melissa Henowitt1, Alita Cousins1
1Univ. of Florida, 2McGill Univ

[A-063] Close Relationships
Forever Alone: Fear of Being Single Alters Perceptions of Intimacy with Age
Margaret Jaeger1, Jamie Eller1, Chloe Huelsnitz1, Jeffrey Simpson1
1Univ. of Minnesota

[A-064] Close Relationships
Gratitude Promotes Autonomous Motivation to Make Partner Requested Changes
Natalie Sisson1, Yobin Park1, Emily Impett1
1Univ. of Toronto, 2Univ. of Toronto Mississauga

[A-065] Close Relationships
Do the Benefits of Physical Activity Extend Beyond the Individual? Exploring the Association between Physical Activity and Positive Relationship Processes
Paige Harris1, Delancy Wu1, Maire Ford2, Nancy Collins1
1UC Santa Barbara, 2Loyola Marymount Univ.

[A-066] Close Relationships
Infidelity Decisions in Tempting Imagined Scenarios
Parnia Haj-Mohamadi1, Monica Biernat1
1Univ. of Kansas

[A-067] Close Relationships
The Unique Effect of Betrayal on Post-traumatic Outcomes
Rebecca Howard1, Courtney Ahrens1, Jennifer Gomez2
1California State Univ., Long Beach, 2Wayne State Univ.

[A-068] Close Relationships
The Implications of Construal Level and Attachment Style in Romantic Relationships
Rose Bern1, Marika Yip-McInnisc1, Patrick Shrou11
1New York Univ., 2Columbia Univ.

[A-069] Close Relationships
Couples Who Drink Together: The Mediating Role of Experiences of Drinking with Your Partner on Alcohol Expectancies
Sana Haddad1, L. David Wittkowski1, Jaye L. Derrick1
1Univ. of Houston

[A-070] Close Relationships
Are Narcissists Worse at Providing Support?: Exploring the Relationship between Narcissism and Capitalization in Romantic Relationships
Sean Gaughran1, M. Joy McClure1
1AdaptThis Univ.

[A-071] Close Relationships
How Being Worse Than You is Worse for Us: The Effect of Social Comparisons on Several Friendship Dimensions
Sonia Vintan1, Simone Mastralla1, Claire Midgley1, Penelope Lockwood1
1Univ. of Toronto

[A-072] Close Relationships
Considering Other Fish in the Sea: Romantic Alternatives Predict Disengagement
Timothy Vaillson1, Gabriele Oettingen1, Peter Gollwitzer1
1New York Univ.

[A-073] Disability
Life Satisfaction among Adults with Diverse Rare Diseases: The Role of Stress and Social Support
Brooke Bryson1, Kathleen Bogart1
1Oregon State Univ.

[A-074] Disability
Effect of Congenital and Acquired Onset of Facial Paralysis on Socioemotional Functioning
Kathleen Bogart1
1Oregon State Univ.

[A-075] Diversity
Disgust Sensitivity and Diversity Beliefs in Groups
Afra Koulaei1, Bjørn Ove Grønseth1
1Univ. of South-Eastern Norway

[A-076] Diversity
Nostalgia Promotes a Sense of Campus Belonging among First-generation College Students
Andrew Abeyta1, Leah Minuchin’s, Elizabeth Blake2
1Rutgers Univ. - Camden

[A-077] Diversity
Unpacking Diversity: Aspects of Context Diversity Differentially Relate to Four Implicit Associations
Angela Somo1, Melody Sadler1, Thierry Devos1
1San Diego State Univ.
[A-078] Diversity
Am I Next? Mega-threats, Identity Labor, and the Buffering Effect of Close Work Relationships
Angelica Leitch1, Shimul Mehriani2
1Univ. of North Carolina at Chapel Hill

[A-079] Diversity
Exploring Social Representations in STEM and Non-STEM Classrooms
Anne Keller1, Aki Eisenman-Shoda2, Hannah Ramil3, Laura Brady4
1Lake Forest College, 2Univ. of Michigan

[A-080] Diversity
Social Power and Rates of Birth by Unnecessary C-section in the United States
Brett Pelham1
1Montgomery College

[A-081] Diversity
The Longer Shortlist Effect: Cognitive Persistence Increases the Gender Diversity of Candidate Shortlists
Brian Lucas1, Zachariah Berry1, Laura Girge1, Dolly Chugh2
1Cornell Univ., 2New York Univ.

[A-082] Diversity
Do College Students’ Belonging Depend on When You Ask? – A Test in Colombia
Camilo Guzman1, Juan Ospina2, Shannon Brady3
1EAFIT Univ., 2Otso State Univ., 3Wake Forest Univ.

[A-083] Diversity
Mitigating Backlash toward Inclusion Policies
Celina Romano1, Victoria Plaut2
1UC Berkeley

[A-084] Diversity
The Role of Race and Gender in Salary Negotiations
Cesar Contreras1, Abraham Bahlibi1, Negin Toosi1
1California State Univ, East Bay

[A-085] Diversity
Investigating the Perceptions and Effectiveness of an Ally Skill-building Workshop
Chelsea Wymer1, Alexandra I. Zein1, Larry Martinez2, Kelly Hamilton3
1Univ. of Tennessee at Chattanooga, 2Portland State Univ.

[A-086] Diversity
Differential Effects of STEM Intervention Styles
Colleen Cowgill1, Leah Halper2, Kimberly Rios1, Phoenix Crane3
1Otso Univ., 2Otso State Univ., 3Texas Tech Univ.

[A-087] Diversity
Increasing Pro-multicultural Attitudes through Social Connections and Referents
Daniel Nadolny1, Mary B. S. Feltham1
1Grievous Campus, Memorial Univ.

[A-088] Diversity
“No, Comment!”: How Perceptions of Diversity Can Be Shaped by Perceptual Frames
Eden Hennessey1, Anne Wilson1, Ivona Hideg1
1Western Laurier Univ.

[A-089] Diversity
Racial Matching: A Comparison of Message Perception among Racial Minorities
Erica Szkody1, Cliff McKinney1
1Mississippi State Univ

[A-090] Diversity
Diversity Fatigue in Academia: Conceptualizing Diversity
Katarina Hermanova1, Federica Pinelli1, Valerie Purdie Greenaway1
1Columbia Univ

[A-091] Diversity
Minority and Majority Group Perspectives on Cognitive Diversity
Katarina Hermanova1, Federica Pinelli1, Valerie Purdie Greenaway1
1Columbia Univ

[A-092] Diversity
The Impact of Valenced Uniqueness and Similarity Feelings on Diversity Support and Internal Motivation to Control Prejudice
Kevin Zabel1, Katynn Nelson2, Arianna Surprise1
1Univ. of Wisconsin - La Crosse, 2Western New England Univ.

[A-093] Diversity
Diversity Blind Spots: How Whites Overlook the Absence of Racial Minority Groups
Linda Nguyen1, Miguel Unzueta1, Serena Does1
1UC Berkeley

[A-094] Diversity
How The Presence of a Minority Leader Affects Perceptions of Organizational Diversity and Fairness
Lyangela Gutierrez1, Miguel Unzueta1
1UC Berkeley

[A-095] Diversity
African Americans’ Negative Reactions toward In-group Résumé Whiteners
M. Fazuan Karim1, Leslie Ashburn-Nardo1
1Indiana Univ, Purdue Univ. Indianapolis

[A-096] Diversity
Small Towns with Big Values: Rainbow Pride Safety Cues in Rural University Towns
Mary Kruk1, Lindsay E. Palmer4, Brinny M. Wardecker1, Jes L. Matsick2
1Penn State Univ.

[A-097] Diversity
Understanding Diversity Backlash: The Role of Zero-sum Beliefs
Taylor Ballinger1, Tao Jiang1, Jennifer Crocker1
1Otso State Univ.

[A-098] Diversity
What Can We Tell Children to Improve Their Attitudes toward Low-status Groups?
Vivian Liu1, Andrei Cimpian1
1New York Univ.

[A-099] Diversity
Open-mindedness Predicts Development of Racially Diverse Social Networks
Yefi Park1, Kate Turetsky2, Angela Duckworth1
1Univ. of Pennsylvania, 2Princeton Univ.

[A-100] Emotion
Affective, Motivational, and Relational Content in Women’s and Men’s Descriptions of Emotional Obligation and Perceived Outcomes of Emotional Expression
Anh Vu1, Natalia Van Doren1, Jose Soto2
1Juniata College, 2Pennsylvania State Univ.

[A-101] Emotion
Going with Your Gut: How Does Believing Emotions Are Helpful vs. Harmful Shape the Decision-making Process?
Arasteh Gatchpazian1, Brett Ford1
1Univ. of Toronto

[A-102] Emotion
The Neural Underpinnings of Individual Differences in Emotion Regulation
Arianna Robinson1, Jordan Wylie2, Justin Storbeck1,2
1Univ. of Pennsylvania, 2The Graduate Center, CUNY

[A-103] Emotion
The Influence of Anger, Reactance, and Procrastination on the Process of Writing Student Essays
Calen Horton1, Christine Kosche1, Carolyn Murray2
1UC Irvine

[A-104] Emotion
Development and Evaluation of the Guilt about Drinking Scale: Exploratory and Confirmatory Factor Analyses
Chelsie Young1, Jordanna Riggs1, Pelin Cunningham-Erdogdu1, Joanne Angosta1, Lindsey Rodriguez1, Clayton Neighbors1
1Rowan Univ., 2Univ. of Houston, 3Univ. of South Florida St. Petersburg

[A-105] Emotion
Who Are Empathic People? It Depends on Your Definition of Empathy
Fred Duong1, Judith Hall1, Rachel Schwartz2
1Northeastern Univ., 2VA Palo Alto Health Care System; Stanford Univ.

[A-106] Emotion
Impact of Incidental Emotion on Moral Judgments
Hannah Chimowitz1, Linda M Isbell1
1Univ. of Massachusetts Amherst

[A-107] Emotion
Facial Color Facilitates Emotion Recognition Accuracy
Hana Li1
1Univ. of Rochester

Emotions Matter: “Emotion Mindset” Predicts Emotional Intelligence Ability and Well-Being across Three Samples
James Floman1, Marc Brackett2, Annette Ponnock2, Christina Bradley1, Emma Seppala3
1Yale Center for Emotional Intelligence, 2Yale Center for Emotional Intelligence, Yale Sch. of Medicine

[A-109] Emotion
Collective Emotions and Social Interaction: Examining Emotion Convergence in Small Online Groups
Janet Pauketat1, Alin Coman1, Yoshinisa Kashima1, Vincent Yzerbyt2
1Princeton Univ., 2Univ. of Melbourne, 3UC Louvain

[A-110] Emotion
Experienced Meditators Are Less Biased by Primes in the AMP
Jared Cutler1, Austin Baker1, Mariah Miller1, Anna Cole1, Paul Pionski1, Robert Goodman1
1Northwestern Univ.

[A-111] Emotion
Bad Feminist? Development and Validation of a Feminist Shame and Guilt Scale
Jessica Keniston1, Tomi Ann Roberts3
1Colorado College

[A-112] Emotion
(Un)special Favors: Gratitude for Group-based Benefits
Jo-Anng Tsang1
1Bayler Univ.

[A-113] Emotion
Going through the (E)motions: Rethinking Affect Measurement
Julia Revord1, Sonja Lyubomirsky1, Kate Sweyney1
1UC Riverside

[A-114] Emotion
Lowering Expectations at the Moment of Truth: Children’s and Adults’ Beliefs about How the Timing of Expectations Influences Emotions
Karen Lara1, Hannah Kramer1, Kristin Lagattuta1
1UC Davis

[A-115] Emotion
I’m So Proud of You! The Communication of Pride between Parents and Children
Karimine Robbins1, Leah Dickens1
1Yale College

[A-116] Emotion
Emotional Variability in Parents across Caregiving Experiences
Katherine Nelson-Coffey1, Makenzie O’Neill2
1Univ. of the South, 2Arizona State Univ.

[A-117] Emotion
Impression Formation of the Mind: Emotional Variability Leads to Different Mind Perceptions
Katherine Sun1, Michael Slepian1
1Univ. of Pennsylvania, 2Princeton Univ.

[A-118] Emotion
Nonverbal (but Not Verbal) Emotional Expression Inspires Helping Behavior in a Friendship Initiation Context
Lucy Armentano1, Chance Adkins2, Margaret Clark1
1Rowan Univ.
[A-119] Emotion
Does Boredom increase Preference for Moving Stimuli?
Minsung Hong1, Peter Jirseok Kim1, Eunkook M. Shuh1
1Seoul National Univ.

[A-120] Emotion
The Mediating Role of Emotional Regulation in the Relationship between Emotional Support and Academic Self-evaluation
Natacha Bosiliscat1, Gwenola Pierre1
1Univ. Grenoble-Alpes

[A-121] Emotion

#SPSP2020 / 45
[1] Socioeconomic Status, Relationship Quality, and Health and Well-being
Room: Empire C
Time: 8:00 AM – 9:15 AM
Chair: Heidi Kane, Univ. of Texas at Dallas
Co-Chair: Allison Farrell, Miami Univ.
How do socioeconomic status (SES) and relationship quality interact to predict health and well-being? We present our data from four studies across the lifespan addressing if high SES influences close relationship quality and how SES and relationship quality may serve as a protective factor against the negative health effects of low SES, and if people with low SES are particularly vulnerable to the negative effects of relationship distress on health.

ABSTRACTS

Couples’ Resilience Through a Natural Disaster: How Psychosocial and Financial Capital Protects the Mental Health of Newlyweds Affected by Hurricane Harvey

Hurricanes can devastate households, individuals, families, and communities. Studies note notable variability in how people fare in their aftermath. Our research longitudinally examined the psychosocial and financial resources prior to Hurricane Harvey buffers against PTSD, anxiety and depression in a sample of 231 low-income employed couples from Houston.

Lucy Shen1, Benjamin Karney1, Thomas Bradbury1
UCLA

Parental Involvement Moderates the Association between Financial Stress and Glucocorticoid Resistance among Youth with Asthma

Using a sample of youth with asthma, we test whether high parental involvement buffers low SES youth from glucocorticoid resistance (GR) to Th-2 cytokines and interleukin 10 (IL-10). We find support for a moderated mediation model, such that low SES youth experience more finance-related stress, which in turn predicts in stronger GR for Th-2 cytokines, but only when parental involvement is low.

Romantic Relationship Distress, Socioeconomic Status, Gender, and Inflammation: A Registered Report

Poor quality romantic relationships increase risk for health problems. Elevated systemic inflammation is one promising mechanism linking relationship processes, health, and well-being, particularly among low-SES individuals. Results from the MIDUS Study, we found significant indirect effects of socioeconomic status on inflammation across multiple large studies, and examine socioeconomic status (SES) and gender as potential moderators.

Heidi Kane1, Lisa Jaremka2, Naoyuki Sunami3, Olga Lebed4, Kathryn Austin
1Univ. of Texas at Dallas, 2Univ. of Delaware

Housework, Health, and Well-Being in Older Adults: The Role of Socioeconomic Status

Household chores can affect romantic couple’s well-being. In a sample of 2,607 married adults from the MIDUS Study, we found significant indirect effects of housework hours through perceived fairness on multiple indices of physical health and well-being, particularly among women. Results highlight the importance of SES on housework and relationship processes, health, and well-being.

Jacqueline Rodriguez1, Maria Alonso-Ferres2, Samuele Zilio2, Richard Slatcher3
Wayne State Univ., Univ. of Granada; 4Univ. of Georgia

Room: Empire D
Time: 8:00 AM – 9:15 AM
Chair: Tess Charlesworth, Harvard Univ.

Integrating recent advances in big data analysis with rigorous experimental and theoretical frameworks, we shed light on four fundamental questions of social attitudes and beliefs: Who is biased? What is the theoretical structure among biases? How do we communicate evidence of bias? When are biases strongest, and have they changed?

Implicit and Explicit Gender Stereotypes Reveal Long-term Change from 2007-2018

Social group stereotypes are often lamented as showing slow or non-existent change, especially for implicit stereotypes, which appear even when explicit stereotypes have largely disappeared.

New time series analyses of 1.5+ million tests of gender-career and -science stereotypes (collected 2007-2018) yield the first evidence of meaningful change towards neutrality in implicit stereotypes.

Tessa Charlesworth1, Mahzarin R. Banaji2
Harvard Univ.

Learning about Bias

People are threatened by information that challenges their egalitarian sense and so respond defensively to the science of implicit bias. In this talk, I present the results of eight experiments (N=3’000) testing three distinct strategies for reducing defensive reactions to implicit bias feedback and, consequently, increasing bias awareness and commitment to egalitarian values and goals.

Joseph Vitriol1
Harvard Univ.

Mapping Principle Types of Prejudice

There are no comprehensive maps of principle types of prejudice based on a theory-agnostic selection of groups. This work indicates three broad types of prejudice in American society: Biases against low status groups, biases against high status groups, and attitudes favoring traditional groups over progressive ones (or vice versa). The model integrates several lines of prejudice research.

Robin Bergh1, Mark Brandt1
Upstate Univ., Howard Univ., 1Yale Univ

Documenting Bias across Millions of People

Volunteer participants at the Project Implicit demonstration website complete implicit and explicit measures of bias on dozens of topics. Here we report results from over 7 million participants across eight years of data collection.

Nicole Lofaro1, Jennifer Howell2, Kate Ratliff2
1Univ. of Florida, 2VCU

Room: Strand 10
Time: 9:15 AM – 10:30 AM
Chair: Brandon Tran, Univ. of California, Riverside

These four talks consider modern social phenomena and explore how people’s motives and emotions relate to attitudes and reactivity toward guns, coping with uncertainty, and communication of political information.

Why Worry? Exploring the Benefits of Worry Reappraisal during Periods of Uncertainty

Despite its bad reputation, new evidence suggests that worry can be beneficial, as it focuses attention, motivates preparation and buffers against negative emotions. Two studies explore the malleability of individual’s appraisals of worry and suggest that thinking positively about worry may reduce anxiety during acute moments of uncertainty.

Brandon Tran1, Kate Sweeny1
1Univ. of California, Riverside

Do I Support Gun Control or Oppose Gun Ownership?: The Effects of Attitude Framing on Sharing Behavior

We find that individuals are more likely to share support-framed attitudes (e.g., I support gun control) than oppose-framed attitudes (e.g., I oppose gun ownership). This effect is driven by two interaction goals: value expressiveness and impression management and is thus attenuated when individuals do not want to be liked by the target of their sharing.

Rhia Catapano1, Zakary Tormala1
1Stanford Univ.

Ideological Differences in Sharing of Political Information: Conservatives Conform, Liberals Confront

Across three experiments, we find that liberals and conservatives are more biased in the political information that they are willing to share with close others. Whereas conservatives are more inclined to tell like-minded others what they want to hear, liberals are more inclined to withhold information that would gratify their political rivals.

Pierce Ekstrom1, Calvin Lai1
1Washington Univ. in St. Louis

Room: Strand 13
Time: 10:45 AM – 12:00 PM
Chair: Jeni Burnette, North Carolina State Univ.
Co-Chair: Crystal Hoyt, Univ. of Richmond

Growth mindsets are applied to a number of pressing domains. For example, in an intervention, we examine how the mindset beliefs of powerful people in a setting (e.g., faculty in classrooms, managers in organizations) creates different cultures in those settings. Students and employees report more negative classroom/workplace culture when their professors/employers have fixed (vs. growth) mindset beliefs about ability.

Elizabeth Canning1, Mary Murphy2
1Indiana Univ.

Mindset Interventions: A Call for Improving Implementation Fidelity

Aggregating intervention effects with little regard to implementation fidelity can lead to erroneous conclusions. To highlight the importance of fidelity, we focus on the implementation of growth mindset interventions and present a meta-analysis of intervention effects. We conclude with implications for discerning efficacy, understanding replication efforts, and promoting open reporting.

Jeni Burnette1, Crystal Hoyt1, Laura Knouse2, Jeff Pollack3
1North Carolina State Univ., 2Univ. of Richmond

Room: Celestin F
Time: 9:00 AM – 10:15 AM
Chair: Frank Kachanoff, Northwestern Univ.
Co-Chair: Alison Skinner, Univ. of Georgia

Academics are incentivized to maximize the high-impact publications they/they/students produce. We present four talks from the perspective of early and advanced career scholars that describe how tensions can arise between maximizing one’s publication impact, and producing/communicating research with impactful applications in the real world. We then describe strategies to reduce this tension.

Craig Anderson, Iowa State University, Amanda Diekmann, Indiana Univ, Scott Neufeld, Simon Fraser Univ., Frank Kachanoff, Northwestern Univ.

This symposium provides a window into this new era of cutting-edge research, providing evidence of both the benefits and costs of growth mindsets and exploring how to best implement interventions. Throughout, we address issues related to open science, replicability and statistical power.

ABSTRACTS

Double-Edged Sword Effects of Growth Mindsets

We present the double-edged sword model outlining how growth mindsets can indirectly have both beneficial and adverse consequences in stigmas-relevant domains. Growth mindsets have negative implications via blameworthy and positive effects via efficacy and decreased essentialism. Focusing on outcomes including prejudice and health, we present empirical evidence for the model across contexts.

Crystal Hoyt1, Jeni Burnette1
1Univ. of Richmond, North Carolina State Univ.

The Growth Mindset & Prejudice Confrontation: Benefits and Limitations

I integrate published and new work (N = 3353) illustrating that the growth mindset has both benefits and limitations for stigmatized individuals in the context of prejudice confrontation. These findings advance the theoretical understandings of mindsets by showcasing contextual factors that underlie longstanding patterns in the literature, which differ in the context of prejudice confrontation.

Aneeta Rattan1
1London Business School

The Social Consequences of Fixed Mindset Beliefs in the Classroom and the Workplace

Across two field studies and two experiments, we examine how the mindset beliefs of powerful people in a setting (e.g., faculty in classrooms, managers in organizations) creates different cultures in those settings. Students and employees report more negative classroom/workplace culture when their professors/employers have fixed (vs. growth) mindset beliefs about ability.

[7] Beyond Mere Associations: Computational and Learning Approaches to Implicit Evaluation

Room: Celestin H
Time: 8:00 AM - 9:15 AM
Chair: Benedek Kurdi, Cornell Univ.
Co-Chair: David Amodio, New York Univ.

Under dual-process theories, implicit evaluations are thought to emerge from simple associative learning. Here we challenge this view via a variety of learning approaches that reveal a rich set of input-output contributions to implicit evaluations, including causal inferences, plausibility of stimulus relations, mere instructions, and a combination of verbal information and reinforcement learning.

ABSTRACTS

Implicit Evaluations Reflect Causal Learning

Causal inferences are central to structuring cognition and action. In this project (N = 1,682), we provide evidence that causal inferences made from physical displays shape explicit (deliberate) but also implicit (automatic) cognition. Contrary to associative theories, the present studies suggest that implicit cognition can encode rich relational information beyond mere co-occurrence.

Benedek Kurdi, Adam Morris, Fiery Cushman
Cornell Univ., Howard Univ.

The Moderating Role of Diagnosticity in Evaluative Conditioning (EC) of Implicit and Explicit Evaluations

In 5 studies, diagnosticity (the relevance of input-output associations in 3 out of 5 studies) affects the result that diagnosticity can moderate implicit EC effects fits more with the predictions of propositional associative theories than dynamic models of EC.

On the Uncontrollability of Attitude Formation: Recent Evidence and Implications for Dual-Process Theories

We developed a multinomial processing tree model to separate uncontrollable from controllable processes in an evaluative conditioning paradigm. We obtained compelling evidence for uncontrollable processes, but this finding is extended to a paradigm that omissions. Thus, uncontrollable learning cannot be interpreted as methodological support for dual-process theories of attitude formation.

Mandy Hütter
Univ. of Tubingen

Institutional Learning of Prejudice Without Awareness: A Computational Reinforcement Learning Approach

How do explicit group stereotypes become internalized as implicit prejudice? We propose they influence subsequent reward-based instrumental learning about group stereotypes—a form of reinforcement learning that is nondeclarative and expressed in choice behavior. In three studies, stereotypes influenced reward learning, choice preferences, and trust decisions, despite participants' lack of awareness.

[8] Presidential Plenary: Bias in the Age of AI and Big Data

Room: Empire A&B
Time: 9:30 AM - 10:45 AM
Chair: Rodolfo Mendoza-Denton, UC Berkeley

This symposium brings together two leading scholars in the social sciences with two groundbreaking scholars in Data Science to consider bias in the age of Big Data. How do algorithms and AI contribute to mirror people’s biases? How might such reflected biases affect individuals and communities? What role can we, as psychologists, play in this Data Society? How can we work with how to collect, analyze, and synthesize data of unprecedented proportions, social and personal psychology of individuals and their role in this era, given our expertise not only with data but with the humans that such data often represents.

ABSTRACTS

The Mythology of Racial Progress

Our perceptions of, beliefs about, and solutions for, racial inequality in the United States are shaped, at least in part, by a mythology of racial progress. Central to this mythology is a dominant narrative that American society has achieved and continues to achieve steady, noticeable progress toward racial equality.

Jennifer A. Richeson
Yale University

Algorithms and Bias

Algorithms can be biased. But so can humans. I describe a framework that combines our understanding of both biases. The results are both cautionary and positive: naïvely implemented algorithms magnify human bias but careful ones dramatically reduce it.

Sendhil Mullainathan
Univ. of Chicago Booth School of Business

Fairness and Machine Learning: Limitations and Opportunities

This talk will give a bird’s eye view of Fairness and Machine Learning, an emerging interdisciplinary field grappling with some old and some new challenges around decision-making in sociotechnical systems. We will begin to systematize attempts at formalizing different fairness criteria, their limitations, and their promises.

Moritz Hardt
UC Berkeley

The Fourfold Path to Permitting AI: Fairness, Ethics, Accountability, and Transparency (FEAT)

Much of natural human behavior involves the values of fairness, ethics, accountability and transparency (FEAT), values enshrined in the statutes of the civilized world. Psychology has discovered and established many of the practical correlations of individual human behavior. An AI designer, human, can automatically and implicitly subvert FEAT. We argue that the stance of permissible AI algorithms is not only not seek to avoid a slavish mimicry of human behavior, but to transcend the behavior of enlightened humans. A computational FEAT needs invention.

Mahzarin Banaji, R. Bhaskar

[9] Is Left-Wing Authoritarianism Real?: Evidence on Both Sides of the Debate

Room: Empire C
Time: 10:00 AM - 12:15 PM
Chair: Lucian Conway, Univ. of Montana

Left-Wing Authoritarianism (LWA) has long been dismissed as a myth in Psychology. However, recent evidence has caused some researchers to re-evaluate its viability as a meaningful construct. Drawing on cutting-edge science, this group of invited speakers brings together both proponents and opponents of LWA to evaluate the current state of the construct.

ABSTRACTS

Authoritarianism and Rigidity across the Left-Right Political Spectrum

Three studies find evidence of authoritarianism and related traits in the left of the political spectrum. In conservatives and liberals, in Study 1 (n = 298), conservatives were more authoritarian than liberals using the standard RWA scale; liberal students were found to be authoritarian using a parallel LWA scale. Parallel results emerged using measures of dogmatism (Study 2; n = 475) and cognitive rigidity (Study 3; n = 1,324).

Shannon Hook\textsuperscript{c}
Syracuse Univ.

Left-Wing Authoritarians Do Not Want to Believe They Are Authoritarian (Even Though They Probably Are)

A Mturk sample (N = 4,855) reveals that, although high-left-wing authoritarianism is associated with positive relationships with perceptions of ecological stress in line with theories of authoritarianism, they nonetheless deny the term “authoritarian.” This under-identification largely occurs because high-LWA persons believe their own group is opposed to authoritarianism.

Lucian Conway\textsuperscript{c}
Univ. of Montana

Spotting the LWA Monster, or Smiling for the Surgeon’s Photograph? A Critique of Conway and colleagues’ (2018) Research on Left-Wing Authoritarianism

Conway and colleagues (2018) claimed that authoritarianism exists equally on the left and right based on results from a new LWA scale. We provide conceptual and methodological criticisms that challenge their interpretation of the data, examine the scale’s content validity, and factor analyze the LWA scale in four samples. We maintain that Loch Ness Monster (LWA) sightings are indeed illusory.

Benjamin Saunders, Vivienne Badaan, Mark Hoffman, Sean Hughes, Pieter Van Dessel

Long Island Univ., New York Univ.

Left-Wing Authoritarianism: Problems of Convergent and Discriminant Validity

In US Mturk (N = 514) and NYU (N = 373) samples, we examined Conway and colleagues’ measure of Left-Wing Authoritarianism in existing datasets. We find that although Conway’s measure is endorsed by liberals, there is little evidence that it is related to authoritarianism or to reflecting attitudes, dogmatism, intolerance of ambiguity.

Mark Hoffarth, Vivienne Badaan, Benjamin Saunders, John Jost
New York Univ., Long Island Univ.

How do people show and read emotions? We first explore the links between accurately expressing one’s personality and one’s emotions. Next, we explore how beliefs about emotion expression carry negative social consequences. Then, we explore the influence of goals in judging other’s emotions. Finally, we explore how empathy influences accurate emotion perception and conflict resolution.

ABSTRACTS

If I Show My True Personality, Will I Show My True Emotions? Accuracy and Positivity in Expressing One’s Personality and Emotions

Do those who show their true personality also show their true emotions? Across two first impressions studies, expressing one’s true personality did not predict expressing one’s true emotions, but expressing a positive personality predicted expressing positive emotions. Thus, people may express their emotions and personality with differing levels of truth but similar levels of positivity.

Marie-Catherine Mignault, Lauren Human, Sophia Therièy
 McGill Univ.

Should Emotions be Controlled? Emotion Control Beliefs are Associated with Negative Emotional Outcomes

The belief that emotions should be controlled may translate not only into how people respond to their own emotions, but also how they respond to others’ emotions. In this talk, we describe evidence that their true emotions? Across two first impressions studies, emotion control beliefs were associated with more negative responses to a friend and romantic partner’s emotions, and worse relationship outcomes across both domains and over time.

Helena Rose Karniłowicz, Felicia Zerwas, Brett Ford, Iris Mauss
UC Berkeley, Univ. of Toronto

Social Goals Shape the Perception of Emotional Faces

People judge faces in context—such as body postures and scenes—but individuals’ goals shape their judgments. Here, we used eye-tracking to test whether individuals’ goals for detecting different emotions influence how they perceive ambiguous faces. We find that individuals’ goals direct their gaze and

ABSTRACTS

[13] Collectivism Isn’t What You Think It Is
Room: Celestin A
Time: 11:00 AM - 12:15 PM
Chair: Thomas Talhelm, Univ. of Chicago, School of Business
Co-Chair: Shi Liu, Columbia Univ.

Accumulating evidence is finding that people’s intuitions about collectivism do not fit the facts. We find that collectivists are more common in China’s big cities, more vegetarian, and warier about contributing to the group. A new multi-country project finds that this new conceptualization—not intuitive, idealized collectivism—reliably describes collectivism across the world.

ABSTRACTS

Ingroup Vigilance in Collectivistic Cultures
We find that people in collectivistic cultures are more vigilant against ingroup members, mindful of their bad intentions. Participants imagined what coworkers and classmates would do in competition. Collectivistic cultures exhibit more ingroup vigilance, both in between-country comparisons (China vs. the US) and within-country comparison (rice vs. wheat regions within China).

Shi Liu1, Michael Morris2, Thomas Talhelm1, Qian Yang1
1Columbia Univ., 2Univ. of Chicago, 3Zhejiang Univ.

Chinese Students Who Move to Modernized Cities Become More Holistic, Not Less
The idea that economic growth makes cultures more individualistic is well-established. Yet what happens when Chinese youth from poor, rural counties move to wealthy, modern cities like Shanghai? Contrary to modernization theory, students who moved to big cities (N = 1,462) actually thought more holistically over time, compared to their history of rice farming predicted thought style change.

1Shanghai International Studies Univ., 2Zhejiang Univ.

Low Relational Mobility, Fear of Sticking Out, and Embarrassment about Markable Contributions in the East Asian Ecological Context
Paradoxically, interdependence may prevent exceptional contributions to the group. In societies with low relational mobility exists more embarrassment, causing people to shy away. We review findings that people in low-mobility societies have (1) stronger normative expectations that “too-successful” people would face punishment and (2) greater embarrassment and unhappiness following public praise.

Masaki Yuki1, Yoigo Maeda1, Fengshi Zhang1, Wen-Giao Li1
1Hokkaido Univ., 2Zhejiang Univ. of Technology

It Is Possible to Reliably Measure Self-Report Collectivism across Cultures
Early on, cultural psychologists discovered self-report scales of collectivism “didn’t work.” For example, the US is more collectivistic than Japan. The explanation blamed self-report methodology. We present evidence that modern methods like (2,347) that the old scales failed because they measured an idealized version of collectivism and that a new self-report scale can reliably measure collectivism.

Thomas Talhelm1, William Chopik2, Alvaro San Martin1, Aidan Samkin2
1Univ. of Chicago, School of Business, 2Michigan State Univ., 3Univ. of Navarra, 4Purdue State Univ.

Effects of Recipients’ Negative Emotional Expressions on Donors’ Preference for Survival Helping and Developmental Helping
Five studies demonstrate the opposing effects of recipients’ negative facial expressions on donors’ need perceptions concerning on helping domains. Our research contributes to the charitable giving literature by distinguishing between survival help and developmental help constructs and the moderate the relationship between level variables and legal restrictions (for democracies but not autocracies).

Linus Chan1

The Effects of Retirement on Psychological Well-being: Crisis or Opportunity? Retirement is typically portrayed as a life period when people feel aimless and lost. This study shows that, in the context of retirement, Social Security eligibility in the U.S., retirement has a positive impact on sense of purpose in life, as well as happiness and life satisfaction. These findings indicate that for many people, retirement may be an opportunity to lead a meaningful life.

Ayse Yemisci1
1Harvard Kennedy School, Warwark Univ

Automatic Emotion and Appraisal Detection through Voice
We describe the development of voice-based emotion and appraisal detection algorithms that are capable of short-term self-report measures. The emotion detector predicts the probabilities of each of six emotions from vocal parameters (i.e., frequency, intensity, jitter, etc.) extracted from brief speech samples. The appraisal detector predicts appraisals from the emotion probabilities.

Weiqiang Qian1
1Vanderbilt Univ

Executive Control: When and for Whom Implicit Partner Evaluations Predict Conflict in Close Relationships
Our work reveals that, when people’s opportunity to engage in cognitive effort is limited (i.e., low trait or state executive control), their implicit partner evaluations predict their decision to forgive their partner’s offense. Such findings suggest that under specific yet common conditions, implicit partner evaluations can automatically affect decisions that are critical to relationship success.

FRIDAY/11:00 AM - 12:15PM

SATURDAY/11:00AM - 12:15PM

THURSDAY/11:00 AM - 12:15 PM
How Do People Regulate Their Responsiveness When Faced with Rival Threat?

Do people actually enhance their love and care for their partner in rival situations, as they say they do? Two experiments suggest they do not: People were less responsive when their partner reciprocated or responded ambiguously to a rival’s advances than in a no-rival social control condition (for a condition in which the partner rebuffed the rival). State jealousy and gratitude mediated these effects. Rebecca Walsh1, Amanda Forest1, Caitlin Viele Hagerty2

Affiliation on the Brain: Neural Correlates of Prosociality and Social Cognition

To form relationships, one must process social information and reward systems. These abilities are key to affiliation and associated with the default network and opioids. We used tasks, MRS, and neuromodulation to include these abilities. Implications of this model for the social brain are presented. Scott Blain1, Yanna Weisberg2, Timothy Allen3, Aisha Udochi1, Leroy Medrano4, Colin DeYoung1

Competing and Cooperation: Restricted Motivating Strategies ated with Prosocial Preferences and Parsimony

Why are some people more prosocial than others? In one exploratory study (N=144) and two confirmatory studies (Ns = 1,207, 1,483) we investigate what predicts prosociality. Across all three studies, SSI and risk-taking are the best predictors across four prosociality measures. We propose that prosocial personality reflects extended motivation strategies. Amanda Rotella1, Pat Barclay1

Linguistic Correlates of Relationship Closeness

The Relationship Closeness Induction Task (RCIT) facilitates closeness by prompting dyads to share intimate personal information. We found that the RCIT is most effective at inducing closeness when people engage in greater linguistic style matching and use affiliative language. This suggests that closeness is partly the result of coordination between dyads.

Daniel Forster1, Michael McCullough2

[15] Exclusion’s Undersolded Roles: Excluders, Those They Include, and Conning Others

Room: Celestin C

Time: 11:00 AM - 12:15 PM

Chair: Clayton Critcher, UC Berkeley
Co-Chair: Vivian Zayas, Cornell Univ.

Most obviously, social exclusion affects those excluded. But four talks nest exclusions within the broader social dynamics of exclusion research. Those receiving unexpected solicitations from exclusors, those looking to capitalize on those weakened by exclusion, and excluders themselves, all face overlooked challenges and opportunities. Solutions to limit exclusion’s destructive scope are explored.

ABSTRACTS

Want to Soften the Blow When You Socially Reject Someone? You Might Be Your Own Worst Enemy

Social rejectors cannot count on their social acumen to help soften the blow. They may experience blunted memory for the recipient of their rejection, they erroneously believe apologies help soften the blow, and they may invest impatience and have impaired empathy. Additionally, female social rejectors control for empathy backlash. Jennifer Beer1, Gili Freedman2

1Univ. of Texas at Austin, *St. Mary’s College of Maryland

Overcoming Inaction: How Those Caught in the Middle of Social Exclusion Should Respond

Individuals simply included by excluders are often misperceived as being excluders themselves (Critcher & Zayas, 2014). How can the included correct such misperceptions? Counterproductively, the included are at increased risk of not speaking up, thereby leaving the misperceptions unchecked. But five studies examine three strategies that vary in how effective they are in correcting such misperceptions.

Stephen Baum1, Clayton Critcher1

[16] Video Sharing Can Make Social Psychology More Robust and Reproducible

Room: Celestin D

Time: 11:00 AM - 12:15 PM

Chair: Patrick Shroff, New York Univ.

Video recordings capture information about behavior unmatched by other methods. This professional development session will introduce the Dataviva.org video data library and related tools make it easy for social psychologists to collect, annotate, store, and securely share study data. Data sharing and documentation can make social psychology more efficient, robust and reproducible.

ABSTRACTS

Why Implicit Bias Matters: Policing, Outgroup Favoritism, and Bias Education

Room: Celestin E

Time: 11:00 AM - 12:15 PM

Chair: Inobong Essien, FernUniversität Hagen Co-Chair: Marleen Steiter, Univ. Hamburg

This session shows how intergroup bias is related to meaningful societal outcomes across multiple social identities and levels of analysis. Four talks shed light on the meaning of outgroup favoritism, the effects of societal stigma on groups’ self-evaluations, the role of regional bias in police traffic stops, and ways to educate people about their biases.

Ostracism Propels Interest in Extreme Groups

Most obviously, social exclusion affects those looking to capitalize on those weakened by exclusion. But four talks nest exclusions within the broader social dynamics of exclusion research. Those receiving unexpected solicitations from exclusors, those looking to capitalize on those weakened by exclusion, and excluders themselves, all face overlooked challenges and opportunities. Solutions to limit exclusion’s destructive scope are explored.

ABSTRACTS

The Positive-Negative Asymmetry Effect of Outgroup Evaluations

Based on process modeling across three intergroup domains (N>65,000), this research revealed that lower-status groups’ implicit outgroup evaluations consistently reflected greater contribution of positive outgroup than negative ingroup evaluations. In contrast, the outgroup biases of higher-status group members reflected a more varied pattern of negative ingroup and positive outgroup evaluations.

 Jimmy Catanchi1, Kathleen Schmidt2, Jeffrey W. Sherman3

[18] Watch Yourself: The Social Implications of Self-Regulation

Room: Celestin G

Time: 11:00 AM - 12:15 PM

Chair: Michael Rosenblum, UC Berkeley

What are the social consequences of self-regulation? Four talks explore the social and interpersonal implications of self-regulatory processes by examining how perceptions of high self-control, ambition, self-reliance, and feigned happiness influence interpersonal evaluations. Further, the talks consider the implications of these self-regulatory processes for self-presentation, status conferrals, and social justice.

abitute Sharing Affects How We Judge Others

ABSTRACTS

Fibbing About Your Feelings: How Feigning Happiness in the Face of Personal Hardship Affects Trust

Across six experiments, we explore the trust implications of feigning happiness in the workplace. We find that individuals who feign happiness in professional contexts are more likely to get hired and are trusted more by others, despite also being perceived as more dishonest, and that this increase in trust is driven by increased perceptions of competence. Kristina Wald1, Emma Levine1

1Univ. of Chicago, School of Business

Interpersonal Consequences of Conveying Goal Ambition

We explore how setting ambitious goals may come with interpersonal costs based on negative personality attributes. While ambition signals high ability, high levels also signal a lack of warmth and lower willingness to help others. Across nine studies, we find that goal ambition influences trait perceptions and a consistent pattern where moderate goals lead to the highest interpersonal evaluations.

Sara Wingrove1, Gráinne Fitzsimons1

1LabTalk

Thinking about Tomorrow: A Motivated Temporal Asymmetry in How People Construe the Role of Situations in Shaping Success

Eight studies demonstrate that people low in social justice orientation deny the role of situations in shaping their past – but not future – successes and that this temporal asymmetry applies to stem from wanting and need for control future success. Thinking about the future may serve as a “veil of ignorance” that helps reduce partisan divides over how to address economic inequality.

Daniel Rovenpor1

1Univ. of East Anglia

Restraint Begets Status: How Displays of Self-control Impact Status Acquisitions

Being seen as in control of oneself leads to a host of favorable outcomes. But lab experiments and two field studies (N = 2,282) found that individuals who behaviorally express high (vs. low) self-control are conferred more status. Moreover, trainable nonverbal displays of self-control predict real-world outcomes, such as higher teacher ratings and capital investment.

Room: Empire A
Time: 12:45 PM - 2:00 PM
Chair: Christine Reyna, DePaul Univ.
Co-Chair: Michael Zarate, Univ. of Texas at El Paso

This symposium explores the psychology underlying toxic forms of White identity that promote racial pride and entitlement, and foment fear of status loss and disenfranchisement. Beliefs like racial entitlement, group superiority, racial BRIGHT status, status loss and system threat in turn predict support for xenophobic ideologies like White nationalism, extremist policies, and political violence.

ABSTRACTS
The Good Ol' Days: White Identity, Group-Based Nostalgia and the Perpetuation of Racial Extremism
Creating narratives about a group's idyllic past (nostalgia), or someone like Samwell Tarly, who deserves more moral praise: someone like Jon Snow, who always does the right thing without struggle.
Christina Starman1
Tak Univ.

Only 'Bad Guys' Rape: Worldviews Predicting a Preference for 'Bad Apples' Model of Sexual Assault Perpetration
On Game of Thrones, committing sexual assault separates villains from complex characters. This view of sexual assault—that it is done only by villains—generalizes beyond the show. We present two studies indicating that support for a 'bad apples' model of sexual assault perpetration is correlated with worldview orientations that are just and good status quo, and a preference for simple stories.
Ganstanthan1, Betsy Levy Paluck2
1Brooklyn College, 2CUNY, 3Princeton Univ.

Not Just Kingslayers: The Two-Dimensional Model of Utilitarian Thinking
Game of Thrones is complete with complex moral dilemmas. In this talk I use these different dilemmas to explain the two-dimensional model of utilitarian thinking showing that why and why people impartially maximize for the greater good we need to consider the independent dimensions of harm and impartial beneficence.
Jim Everett1
1Univ. of Kent

Personality Perception in Game of Thrones: Consensus and Projection in a Morally Complex World
This study examines personality trait consensus and projection among fans of the popular TV show Game of Thrones and its fictional characters for Big Five and Dark Tetrad personality traits (sadism, narcissism, psychopathy, manipulation). Because Game of Thrones' characters make diverse moral choices, this study aims to provide insights into how people perceive others' morally relevant traits.
Gregory Webster1, Imani N. Turner1

[24] It's Not What You Think: How Implicit Evaluations Shape Relationships
Room: Strand 10
Time: 12:45 PM - 2:00 PM
Chair: Eszi Sakman, Cornell Univ.
Co-Chair: James McNulty, Florida State Univ.

Implicit partner evaluations (IPEs)—the spontaneous evaluations that are triggered by thoughts of one’s partner that may or may not be consciously felt—have been shown to predict relationship satisfaction and even break-up. Yet critical questions remain about exactly how IPEs exert their influence. Four talks identify how, when, and why implicit partner evaluations affect relationship experiences.

ABSTRACTS
Do People Realize How Their Partners Make Them Feel? Motivation and Opportunity Factors Determine Link between Implicitly Assessed Partner Attitudes and Relationship Satisfaction
Six studies assessed automatic partner attitudes implicitly and relationship satisfaction explicitly. Studies 1-3 suggest people do not typically use their automatic partner attitudes when evaluating their relationships. Studies 4-6, however, suggest people do use these attitudes when otherwise motivated or taxed by stress, offering insight into the sink between implicit and explicit evaluations.
McNulty1, Lindsey Hicks1, Ruddy Faure1, Andrea Melzer1, Francesca Rigetti1, Wilhelm Hofmann2
1Florida State Univ., 2Vrije Universiteit Amsterdam, 3Univ. of Cologne

The Dark Side of Relational Selves: Implicit Partner Negative Evaluations Forecast Enacting Destructive Behaviors
Relationships can bring one’s best. But what brings out one’s worst? In a 3-month longitudinal study that included a 14-day daily diary, implicit partner negativity uniquely predicted future frequency of enacting destructive behaviors, above and beyond implicit partner positivity and explicit reports. Work highlights the value of assessing partner negative evaluations separately from positive.
Sakman1, Vivian Zayas1
1Cornell Univ.

We’ll Do Better Tomorrow: Implicit Partner Attitudes Predict Increases in Positive Daily Relationship Behaviors Following Low-satisfaction Days
Why do those with positive implicit partner evaluations (IPE) maintain more satisfying relationships? In a daily diary study, we show that positive IPEs predict greater daily satisfaction and higher frequency
[26] “I Might Be Wrong”: Emerging Perspectives on Humility

Room: Celestine A
Time: 12:45 PM - 2:00 PM
Chair: Lisa Legault, Clarkson Univ.

Although research on humility is gaining momentum, its position in personality and social psychology has only begun to be explored. This paper explores the concept of humility – its multidimensionality, its stability over time, its situational antecedents, and its role in motivation, growth, emotion, prejudice, and leadership.

ABSTRACTS

Intellectual Humility and College Students’ Values, Motives, Learning, and Identity

Intellectual humility (IH) is the belief that one could be wrong accompanied by a willingness to consider, even seek out, new information or alternative perspectives. Using longitudinal data from students at three universities we examine stability and change in IH, the relations between IH and values, motives, and perspectives on learning, and the relation between IH and identity-related cognition.

Rick Hoyte1
Duke Univ.

The Story of Humility: ‘Tis a Tale of Two Facets

In contrast to longstanding psychological views, recent studies suggest that humility is not a unitary positive emotional experience; instead, it is comprised of two distinct facets. These facets – labeled appreciative and self-abasing humility – are associated with divergent subjective feelings, thoughts about the self, and personality tendencies, and are elicited by distinct antecedent events.

Jessica Tracy1, Aaron Weidman1, Joey Cheng2
Univ. of British Columbia, 1York Univ.

Inducing Humility through Negative Identity Introspection: Effects on Implicit Bias

One aspect of humility entails the capacity to be open to one’s mistakes and misgivings. Results from four experiments converge to show that reflecting on a personal flaw versus a personal strength increases humility and reduces implicit bias, even after controlling for changes in mood and state self-esteem.

Lisa Legault1, Kayla Jurchak1

The Relational and Financial Benefits of a Humble Leader

Humility helps attenuate relational “wear-and-tear” where conflict is likely or there is a power differential, such as with leaders. A series of experiments on perceptions of leaders revealed that leaders who are seen as humble and competent elicit more donation intentions because leaders are viewed as more trustworthy, and humility can compensate for the negative effects of lower competence.

Daryl Van Tongeren1, Kelly Teahan1
Hope College

[27] New Developments in Intergroup Harmony and Social Change

Room: Celestine C
Time: 12:45 PM - 2:00 PM
Chair: Nils Reimer, Univ. of Oxford

Research from four continents (N = 24,046) critically examines whether fostering intergroup harmony decreases support for disadvantaged group and whether it increases political solidarity between advantaged and disadvantaged groups. Studies include a preregistered meta-analysis, robust experimental and longitudinal methods, and representative samples from the West Bank and N2.

ABSTRACTS

Meta-analysis of the ‘Ironic’ Effects of Intergroup Contact

We present results from a preregistered meta-analysis of 104 published and numerous unpublished studies testing whether contact with advantaged-group members reduces perceived inequality, support for redistributive policies, and engagement in collective action among disadvantaged-group members. We discuss practical and theoretical implications for intergroup contact and social change.

Nils Reimer1, Nikhil Kumar Sengupta1
Univ. of Oxford, 1Univ. of Kent

“Talking to a (Segregation) Wall”: Segregation, Intergroup Contact, and Attitude toward Normalization of Palestinian-Israeli Relations among Palestinians from the Occupied Territories

In the context of military occupation of the West Bank including East Jerusalem, we investigated how Palestinians’ positive and negative contact experiences with Jews or Israelis mediate their endorsement of normalization of relations with Israelis. We found that negative experiences at checkpoints work as “reminders” of inequality and segregation and reduce the sedative effect of positive experiences.

Nils Reimer1, Mai Albourz1, Zacharia Bady1, Guy Elderbroth2, Sandrina Penic1, Randa Nasser1, Eva Green3
Univ. of Oxford, 1Univ. of Laosanne, 1Univ. of Laosanne

When Connectedness Leads to Coalition: Racial Intranimorarity Collective Action Tendencies

Does intranimorarity closeness influence cross-group allyship? Study 1 showed that warmth towards Black people was related to support for Black Lives Matter for Asian and Latinx participants. Study 2 primed closeness with one’s own racial group, minorities, humanity, or a control. When primed with closeness with one’s own racial group, participants reported more support for intranimorarity solidarity.

Jaboa Lake1, Kimberly Barsaman Kahn1
Portland State Univ.

Can Intergroup Contact Promote Social Equality?

We present the first large-scale longitudinal test of whether contact increases solidarity expressed by dominant groups toward subordinate groups. Seven waves of nationally representative data showed that the relationship between contact and solidarity is characterized by better intra-group stability but not within-person change. Thus, no evidence for a causal effect of contact on solidarity emerged.

Univ. of Kent, 1Univ. of Oxford, 1Univ. of Auckland, 1Univ. of Queensland

[28] Big Data Text Analysis Application in Social and Personality Psychology

Room: Celestine E
Time: 12:45 PM - 2:00 PM
Chair: Marya N. Buja, Louisiana at Lafayette

Co-Chair: Kevin Lanning, Florida Atlantic Univ.

This symposium applies new methods in big-data text analysis (e.g. machine learning, feature extraction, sentiment analysis) to identifying social/ personality psychological concepts (e.g. personality traits and levels of development, emotion, gender stereotypes, well-being) from large corpora (e.g. presidential speeches, children’s essays, tweets, three decades of news articles, national datasets).

ABSTRACTS

Ego Development in Natural Language: A Computational Approach

Personality is more than traits. I explore the construct of maturity (ego development) using natural language analysis of multiple samples including presidential speeches. Analyses at the level of President, speech, and phrase infuse our understanding of presidents and their leadership styles, and refine and situate the construct of ego development in political, moral, and personality psychology.

Kevin Lanning1
Florida Atlantic Univ.

The Role of Emotions in Learning: Automated Text Analysis and Mixed Modeling of a National Sample of the Learning Mindset

This study employs sentence-level sentiment analysis to understand the association between emotions expressed in an open-ended question of a national sample of the learning mindset (N = 22,700) and the intervention effect. Large-scale text corpora (e.g., lyrics, slang), context consideration (e.g., valence shifts), and applications of text findings to statistical modeling will be discussed.

Manyu Li1
Univ. of Louisiana at Lafayette

Feature Extraction in Text Analysis: A Psychologically Informed Approach

Traditionally, the fields which advance the tools of automated text-analysis are often concerned with prediction rather than explanation. Psychology, however, is devoted to understanding what features foster prediction. Here we argue for leveraging psychological theoretical frameworks to enable a cognizant feature extraction and for combining methods from the text-analysis toolbox to do so.

Almog Simchovitch1, Michael Gilead1
Ben-Gurion Univ. of the Negev

Using Text Analysis to Understand Perceptions: A Look at Gender Stereotypes Using Pronouns

The study demonstrates the use of a contextualized text analysis method in the domain of gender stereotypes. By analyzing the words used in the immediate context of gendered pronouns, a real-world view of people’s gender stereotypes can be constructed. The applications of this method are potential useful in a wide area of psychological domains.

Kayla Jordan1
Univ. of Texas at Austin

[29] Social Psychological Processes in Police Interrogations and Confessions

Room: Celestine F
Time: 12:45 PM - 2:00 PM
Chair: Fabiana Alceste, Butler Univ.

Co-Chair: Patricia Sanchez, The Graduate Center and John Jay College of Criminal Justice

Police and judges view interrogations as less restricting than laypeople. Legal interrogation tactics make people infer leniency in exchange for a confession, which may increase false confessions. This study compared lay and legal participants on judgments of custody. Though the U.S. Supreme Court asserts that custody is objectional, and police overestimated how free the suspect was and how free they thought he would feel, compared to laypeople.

Fabiana Alceste1, Saul Kaszin2
1Butler Univ., 2John Jay College

The Mechanisms of Minimization: How Interrogation Tactics Suggest Lenient Sentencing through Pragmatic Implication

Minimization is a cohort of interrogation tactics aimed at reducing suspects’ responsibility for a crime. But minimization may pragmatically imply a more lenient sentence in exchange for a confession. In six experiments, we demonstrate that when interrogators use minimization, the tactic influences expectations of sentencing through pragmatic implied promises of leniency or by making the crime appear less severe.

Timothy Lake1, Fabiana Alceste1
1Univ. of Gottingen, 2Butler Univ.

Facts Only the Perpetrator Could Have Known? A Study of Contamination in Mock Crime Interrogations

During interrogations, investigators divulge information of enacted and perceived positive behaviors. Further, after a low satisfaction day, those with positive IPE do better the next day” by enacting and perceiving more positive behavior.

Jason Anderson1, Shelly Gable2
Cornell Univ., 1UC Santa Barbara

Do Implicit Partner Evaluations Rapidly Update, or Gradually Adjust, in Response to Relational Experiences?

Implicit partner evaluations (IPE) offer an important signal of relationship health, beyond explicit evaluations (EPE). It has been proposed that this is because IPE (vs EPE) more sensitively track everyday dyadic experiences. In a conflict discussion and 14-day trial (total N=608), we find that IPE do not appear to shift quickly, but rather gradually, through feedback and advocacy. An update model best predicts what happens.

Grace Larson1, Ruddy Faure1, Francesca Righetti1, Wolfgang Hofmann1
Dickinson College, 1Vrije Universiteit Amsterdam, 1Ruhr Universitaet Bochum
about a crime to a suspect, making even innocent suspects’ confessions seem reliable. In Study 1, mock investigators divulged misinformation about an innocent crime to both innocent and guilty suspects. In Study 2, MTurkers showed awareness of contamination—they rated innocent suspects less guilty when they listened to the interrogation and the confession.

Kristyn Jones1, Fabiana Alceste2, Saul Kassin1
1John Jay College and the Graduate Center, CUNY, 2Butler Univ.

“Not That Good Enough, Tell Me Again”: The Effect of Mere Rehearsal on Lay Judgments of Confession Evidence
False confessions are present in over a quarter of wrongful convictions resolved by DNA testing and they often include accurate, nonprovocative details. Two studies tested whether repeating a story with a suspect in interrogations affects guilt judgments. Results show that rehearsal increases guilt ratings regardless of actual guilt of the suspect.

Patricia Sanchez1, Fabiana Alceste1, Madeleine Dalskev1, Saul Kassin1
1The Graduate Center & John Jay College, CUNY, 2Butler Univ., 3Maastricht Univ., 4John Jay College

[30] Implicit Judgments with Insidious Impacts: Systemic Bias in Institutional Settings
Room: Celestine G
Time: 12:45 PM - 2:00 PM
Chair: Terrence Pope, Univ. of Washington
Systemic bias takes many forms. This symposium presents four unexamined aspects of implicit judgments both in organizations and across the institutional domains of labor and criminal justice; with a focus on the dark side of leadership and regulatory influence. These talks push forward the current understanding of attributions and stereotyping.

ABSTRACTS
Attributing Passion to Workers Legitimizes Poor Worker Treatment
Although passion may seem like a positive attribute to have in others, we find that it also legitimates poor worker treatment. We also explore the mediating mechanisms and reverse direction of this legitimization process and find that the process is most pronounced for participants high in belief in a just world.

Jae Yun Kim1, Troy Campbell2, Steven Shepherd3, Aaron Kay1
1Duke Univ., 2Univ. of Oregon, 3Georgia State Univ.

Instrumentality Undermines Women’s and Minorities’ Psychological Sense of Belonging and Attraction to Organizations
Organizations often frame diversity as good for business—an instrumental rhetoric. We show that contextual and interpersonal instrumental stimuli decrease stigmatized groups’ sense of belonging (SOB) and attraction to organizations in turn. We also find that instrumental threats SOB via greater feelings of threat and negative views of the firm. Instrumentality may thus thwart organizations’ diversity efforts.

Orlane Georgeac1, Aneeta Rattan1
1The Graduate Center & John Jay College, CUNY, 2Butler Univ., 3Butler Univ., 4John Jay College

Not So Black and White: Differential Discrimination in the Labor Market
This work examines whether racial minorities face unique forms of discrimination in the labor market. Black and White applicants were more likely than Asian, Arab, and Latinx applicants to be seen as qualified for a stereotypically “American” job. While Asian, White, and Arab applicants were rated more qualified for a stereotypically high-status job. Stereotypically qualified perceptions of qualification.

Terrence Pope1, Linda Zou1, Laura Banham2, Sapna Cheryan1
1London Business School, 2Univ. of Washington

The Role of True Self Attributions in Punitive Judgments
Previous research suggests that people generally intuit that true selves are morally good. Across four studies, we add a caveat to this broad finding by revealing that people are not reluctant to attribute criminal actions to a true self and that attributing criminal actions to a true self leads to greater support for retributive punishments.

Joseph Maffly-Kipp1, Grace Rivera1, Matthew Friedman1, Matthew Vess1, Rebecca Schlegel2

Invited Session

[32] What Do We Know and What Should We Be Teaching Others About Our Field?
Room: Empire A
Time: 2:15 PM - 3:30 PM
Chair: E.J. Masicampo, Wake Forest Univ.
What can we confidently consider to be the knowledge or wisdom of our field? How can we make sense of competing theories, incompatible results, and failed replications in a way that advances theory? And considering the state of our knowledge, what should we be teaching others about our discipline, both in the classroom and beyond? In this session, four leaders in social and personality psychology will share and discuss their perspectives on these issues. Joe Simmons will discuss developing skills in scientists to help them recognize credible versus incredible findings. Susan Fiske will speak to the advancement of theory in the face of incompatible theories and results. Beth Morling will discuss approaches to teaching our discipline in the classroom. Simine Vazire will present on the responsible dissemination of psychological science to the public. Together, these presenters will help us to reflect on a way forward in our research, teaching, and outreach as the field continues to move toward more open and rigorous science.

ABSTRACTS

What Do True Findings Look Like?
The public cannot know what is true vs. false about human psychology if our journals do not distinguish between what is true vs. false about human psychology. Editors and reviewers are the gatekeepers of our journals, but many of them were not trained to assess whether statistical results are credible. We need to teach all of our scientists to
### [33] Personal and Relational Benefits of Responsiveness in Romantic Relationships

**Room:** Empire C  
**Time:** 2:15 PM - 3:30 PM  
**Chair:** Sherman (Shiu Man) Kwok, Univ. of Waterloo  
**Co-Chair:** Jonatine Wood, Univ. of Waterloo

This symposium presents novel research on the personal and relational benefits of romantic partners’ responsiveness to each other’s needs. In particular, we address the role of responsiveness when experiencing affection and gratitude, and how responsiveness promotes not only highly satisfying relationships, but also a host of surprising personal benefits.

**ABSTRACTS**

**The Role of Affectiveness in Responsive Expressions of Affection**
What kinds of affectionate behaviors promote intimacy, and who expresses affection to promote intimacy? Across four studies, we showed that (a) affectionate behaviors that are responsive to the partner’s needs are more effective in building intimacy than behaviors that are less responsive, and (b) people high in affectiveness express affection more responsibly than people lower in affectiveness. 

**Sherman (Shiu Man) Kwok**, Joanne V. Wood, John G. Holmes

**Highlighting a Benefactor’s Responsiveness to Needs Makes Benefactors Feel Good about Gratitude and the Relationship**
In a study of romantic couples’ live interactions (N=111 couples) and an experience sampling study (N=463 daily reports), we find that benefactors of kind actions feel the most positive when their partner (beneficiary) expresses that the benefactor’s actions have been responsive to their needs as opposed to when they highlight the costs that the beneficiary incurs when engaging in the actions.

**Emily Impett**, Yoojin Park, Mariko Visserman, Natalie Sisson, Bonnie Le, Jennifer Stellar

**Lightening the Load: Perceived Partner Responsiveness Fosters More Appreciable Appraisals of Relational Sacrifices**
Three studies, capitalizing on different methodological strengths (i.e., experience sampling study of romantic couples, an experimental procedure, and a survey of individual’s interactions with large numbers by relaying for their partner), all demonstrated the importance of partner responsiveness to sacrificers’ needs in lightening the load of even the most costly sacrifices.

**Mariko Visserman**, Amy Muise, Francesca Righetti, Rebecca M. Horn, Emily A. Impett

**Downstream Benefits of Perceived Partner Responsiveness**
Perceived partner responsiveness has been shown to benefit relationships, but what about benefits for individuals? In three studies, we show that when people perceive their partners as responsive, they are less self-aggrandizing, more open-minded, and more interested in the correctness of their beliefs, and more emotionally open to partners.

**Harry Reis**, Guy Tschakovsky, Yan Ruan, Karisa Y. Lee

**A Gratitude Intervention Increases How Much Time Couples Spend Together**
The current experiment harnesses the power of gratitude to change behavior in established relationships. One member of each of 126 couples was randomly assigned to make a plan to express gratitude to their partner more frequently (or not). Results from daily reports show that this brief intervention increased participants’ romantic activities together/day.

**Iris Lok**, Elizabeth Dunn

---

**[34] Unveiling Bias: Responding to Interpersonal, Institutional, and Systemic Discrimination**

**Room:** Empire D  
**Time:** 2:15 PM - 3:30 PM  
**Chair:** Riana Brown, New York Univ.

**Bias is rooted in structural and institutional factors, in addition to individual prejudices. Four talks explore how people react (both negatively and positively) to the presentation of different types of discrimination and ways to help recognize systemic bias.**

**Simone Vazire**

**When Race Trumps Political Ideology: Evaluations of Black and White Teachers Advocating for Structural Change**
Four studies tested the hypothesis that people’s political ideology and perceptions of Black and White teachers who advocated for increased personal responsibility versus structural reform. Across studies, individuals who held more conservative views evaluated personal responsibility (vs structural reform) applicants more favorably, regardless of teacher race. However, individuals who had been taught structural reform applicants, but only if they were White.

**Grace Rivera**, Phila S. Salter, Rebecca J. Schlegel

**Confronting Discrimination: What (Kind) and Why**
Do White Americans’ differing perceptions of structural and interpersonal racism guide their intentions to confront? In 3 studies, Whites rated scenarios involving biased policies and institutions as more motivating to confront than interpersonal scenarios (in which people expressed prejudice) due to perceptions that structural scenarios were more harmful and confronting would be more efficacious.

**Riana Brown**, Maureen A. Craig, Evan Apfelbaum

**Moving Backwards: Implications of Historical Racism on Combatting Racism**
Conventionally, understandings of racism fail to acknowledge the historical and systemic causes of racism (Salter, Adams, & Perez, 2018). In two studies, we examined the effect of recognizing racism as systemic and historically rooted on individuals’ intergroup orientations. Results suggest that one’s race and recognizing racism as systemic and historically rooted can increase action to combat it.

**Arielle Allen**

**Can Perspective-taking for a Discrimination Claimant Improve Recognition of Institutional Discrimination? Examining the Role of Evidence and Group Membership**
Institutional forms of discrimination can be difficult for people to recognize. Does the perspective of a victim increase people’s recognition of institutional discrimination? Perspective-taking increased men and women’s recognition of institutional sexism and Whiteness, but not institutional racism. Perspective-taking is a helpful strategy for recognizing institutional discrimination.

**Stefanie Simon**, Laurie T. O’Brien, Aaron J. Moss, Meagan Magalid

---

**[35] Harnessing Social Psychology to Improve Social Life**

**Room:** Strand 13  
**Time:** 2:15 PM - 3:30 PM  
**Chair:** Iris Lok, Univ. of British Columbia

Social psychologists have identified many shortcomings in human judgment and behavior, but relatively few have used these ideas to improve social life. We will demonstrate how researchers can harness social psychology to get people to connect with strangers, spend more time with their romantic partners, be more sociable in their everyday life, and engage in more prosocial behavior.

**ABSTRACTS**

**Using Explicit Social Signals to Increase Social Interactions between Strangers**
How can we get strangers to talk to each other? Having a brief conversation with a stranger can make us feel happier, but we routinely ignore these opportunities in our daily life. In this talk, we present evidence that enabling people to send explicit social signals about their willingness to make a new connection increases the amount of time people spend engaging in conversation.

**Sara Algole**, Yoo-Ping Chang, Paschal Sheeran

**A Brief Introduction to Build Empathy in Middle School**
Empathy tracks socioemotional adjustment during early adolescence. Here we test whether motivation-based empathy interventions promote positive outcomes at this age. 946 7th graders were assigned to one of two intervention or control condition. Results suggest that changing beliefs about empathy’s normatively increased motivation to be empathic, which affected peer-reports as well as self-reported behavior.

**Erika Weiss**, Desmonds Ong, Patricia Chen, Jamil Zaki

---

**[36] On Death and Dying to Know: How Replicable is Terror Management Theory?**

**Room:** Strand 13  
**Time:** 2:15 PM - 3:30 PM  
**Chair:** Rachele Benjamin, Univ. of British Columbia

What can the replication crisis teach us about Terror Management Theory (TMT)? This symposium compares three methods for evaluating the robustness of mortality salience effects: p-curve, direct replications, and bias-adjunct meta-analysis. We find mixed evidence for the key prediction of TMT and offer recommendations for improving the replication of this and other foundational theories.

**ABSTRACTS**

**Overcoming the Terror of the Replicability Crisis: P-Curving the Mortality Salience Hypothesis**
Terror Management Theory (TMT) predicts that when people are reminded of death, they affirm their cultural worldview. We used the p-curve to test if studies investigating this mortality salience hypothesis have evidential value. We included over 1500 published studies. We found evidence for mortality salience, but only when studies were analyzed with p-curve. Direct replications are not expected to succeed.

**Rachele Benjamin**, Bill Chen, Addisson Lai, Steven Heing

**A Gratitude Intervention Increases How Much Time Romantic partners spent together in everyday life.**

**Sara Algole**, Yoo-Ping Chang, Paschal Sheeran

ABSTRACTS

Social Status and Emotional Dynamics in Narcissism
This talk will present recent ESM data on the within-person associations between social status perceptions and emotional experiences in narcissists. By examining how agentic, antagonistic, and communal aspects of narcissism are related to status-emotion contingencies, we aim to gain a new perspective on the emotional processes underlying distinct manifestations of narcissism.

Combining Identity, Reputation, and Behavior to Model Personality Structure
How do people see themselves, how are they seen by others, and how do both perspectives converge with behavior recorded in daily life? Applying a CTMC-1 model to data from N=146 participants, we could show that different biases in self-reported traits, daily behaviors, and peer-reported occurred. Results indicated that each source of variation sheds a unique yet valid light on a person’s personality.

Kai Horstmann1, Matthias Ziegler2

Knowing Who Knows: Assessing Close Others’ Knowledge of Perceptual Accuracy
Close others can have insight into our personality and behaviors, but do they know if we understand the personality of others? Undergraduates met in small groups for brief dyadic interactions before providing personality ratings. We examine whether close others’ reports align with the accuracy and positivity of participants’ impressions and consider the role of traits in close others’ perceptions.

[43] Tackling the Complexities of Conversation: Exploring Factors that Build Connection
Room: Celestin H
Time: 2:15 PM - 3:30 PM
Chair: Gillian Sandstrom, Univ. of Essex

Despite the benefits, people often forego opportunities to interact with others, partly because those interactions aren’t always smooth. We report an intervention that encourages people to initiate interactions, and break down the complexities of connecting with others, by examining factors that promote mutual understanding: thanking and apologizing, empathy, synchrony.

Searching for Connection: Using a Scavenger Hunt to Study Social Interactions
Talking to strangers consistently goes better than expected, yet people remain apprehensive. We used a scavenger hunt app to induce participants (N=303) to talk to at least one stranger per day for a week. Compared to controls, people who repeatedly talked to strangers reported more positive attitudes about future interactions and enjoyed tangible benefits (e.g., potential new friends, knowledge).

Gillian Sandstrom1, Erica Boothby2, Gus Cooney3
1Univ of Essex, 2Fisk Univ, 3Univ. of Chicago

Thanking, Apologizing, Bragging, and Blaming: Responsibility Exchange Theory and the Currency of Communication
We propose a formal model, “responsibility exchange theory” (RET), that draws connections between thanking, apologizing, bragging, and blaming and explains the value (and cost) behind them: i.e., a trade-off between appearing competent vs. warm. RET produces many novel predictions and unifies disparate findings. We test predictions of the model with both hypothetical scenarios and live chat.

Shereen Chaudhry1, George Loewenstein2
1Univ of Chicago, School of Business, 2 Carnegie Mellon Univ.

Disentangling Empathy: Opposing Contributions of Different Facets of Empathy to Interpersonal Accuracy
What allows people to accurately understand the emotional experiences of others? Here, we show that different facets of empathy make opposing contributions: empathic concern is beneficial, whereas contagion is detrimental. In five studies, we show these patterns on four different measures of emotion recognition and identity intuitive/ration dual decision-making as a key mediator of the opposing relationships.

1Williams College

Gender, Extraversion, and Synchrony: An Unstructured Dyadic Conversation of Non-students
This study has two objectives: to reexamine the gender effect of synchrony by non-student samples and to explore the association of the Big Five personality traits with synchrony. The results showed that the gender effect of synchrony was replicated; female dyads indicated more synchrony than the male dyads. As for the Big Five traits, extraversion was significantly associated with synchrony.

concern. In this symposium, four cutting-edge talks will highlight the new psychological science of loyalty. Together, these talks underscore the complicated ways in which loyalty manifests in relationships, race, and politics, with the power to both bring people together and drive them apart.

**ABSTRACTS**

**Losing the Flame: Romantic Passion Beliefs and Relationship Commitment**

We introduce the construct of passion decay beliefs—a lay belief that romantic passion declines is irreversible—as an important antecedent to people’s fidelity. In a cross-sectional and longitudinal study, we link low passion to lower commitment and greater pursuit of romantic alternatives, and that these associations are generally stronger when adherence to decay beliefs is high rather than low.

Kathleen Carswell, Eli Finkel

*Univ. of Toronto, Northwestern Univ.*

**Social Class Differences in Desires for Loyalty**

Four studies examine whether preferences for loyalty, faithfulness, and devotion vary across social classes. We show that relative to their upper-class counterparts, lower-class individuals are significantly more likely to prefer loyalty in social interactions and are particularly reactive to instances when it is breached.

Paul PFIF, Yeese Nam, Jacqueline Chen

*UC Irvine, "Univ. of Utah.*

**Tribal Truths: Psychological Affinities Shape Factual Beliefs**

Tribal loyalty affects the political information we believe. Participants presented with fact-checked statements were biased to believe politically-friendly stories, even when politically-unfriendly information was available. Pro-tribe bias was stronger when individuals felt positive emotional attachment to their own political group.

Peter Ditto, Jacob Rode, Debra Lindsay

*UC Irvine, "UC San Diego.*

**Beyond Liking and Sharing: What Our Use of Technology Reveals about Intergroup Processes and Attitudes**

In 5 studies (N=2340), including a nationally representative sample, we show that people are less outraged when age, gender, or race discrimination is done by a white, male faculty. This effect is mediated by participants attributing less negative motivation to the algorithm. Our research suggests that not only a discriminatory outcome, but also an agent’s motivation, cause moral outrage.

Yochanan Bigman, Desman Wilson, Adam Wayne, Kori Doerr

*Univ. of North Carolina at Chapel Hill, Kellogg School of Management.*

**Professional Development**

Room: Strand 10
Time: 3:45 PM - 5:00 PM
Chair: Steven Henn, Univ. of British Columbia
Co-Chair: Xingyu Li, Stanford Univ.

Cross-cultural research requires collaboration with other researchers. How can one go about pursuing such collaborations? We will discuss their experiences in: a) two culture comparisons, b) many-culture comparisons; c) research with small-scale populations; d) the Psychological Science Accelerator. Anyone seeking to conduct cross-cultural research will find this panel useful.

**[48] Couples as Social Units: Examinations to Counter-Normative Couples**

Room: Strand 13
Time: 3:45 PM - 5:00 PM
Chair: Elizabeth Quinn, Northwestern Univ.
Co-Chair: Allison Skinner, Univ. of Georgia

This symposium examines attitudes toward counter-normative couples and relationships. In four talks, we discuss attitudes toward and perceptions of a variety of counter-norm couples and relationships (e.g., interracial and age-gap couples, female breadwinners, those with disabilities). Stereotypical beliefs underpinning these beliefs are discussed. Means of reducing biases will be discussed.

**ABSTRACTS**

**Perceptions of Mismatched Couples as Transactional**

The current research explored perceptions of physically dissimilar (mismatched) couples, examining whether they are perceived to be based on something other than love (e.g., monetary, social, sexual, or psychological gains). We find preliminary support for our hypothesis that mismatched couples are perceived as being more based on “something other than emotional love” than to matched couples.

Elizabeth Quinn, Allison Skinner

*Northwestern Univ., Univ. of Georgia.*

**Stereotypes Associating Interracial Couples with Sex Underlie Disagreement**

Previous research indicates that in U.S. samples Black-White interracial couples elicit a disagreement response. The current research examines one possible explanation for this disagreement response—stereotypes that interracial couples are hypersexual. Across three studies the 2017 Charlottesville events are associated with sex, and that thinking of couples as hypersexual produces a disagreement response.

**[50] Competition and Cooperation: Novel Methods, New Discoveries**

Room: Celestin B
Time: 3:45 PM - 5:00 PM
Chair: David Levari, Business School Co-Chair: Szu-chi Huang, Stanford Univ.

Cooperation and competition often go hand-in-hand: people need both to succeed, but also want to outperform their teammates. Four talks will use novel methods to study this link, revealing how and why personal and social factors scaffold cooperation, how they influence ideological opponents that they’re on the same side, and how leader dominance and prestige affects followers.

**ABSTRACTS**

The Takeover Toll: When Taking Over for Teammates Hurts Task Performance

When a teammate performs a difficult task, how do you decide whether to take over for them? Will you do a better job? We show that taking over often hurts team performance, despite predictions to the contrary. Why? People focus on skill differences, but neglect costs of learning and switching. Taking over can hurt team performance in ways that are hard to anticipate and overcome.

David Levart1, Adam Mastroianni2, Jacob Verrey2, Daniel Gilbert3
1Harvard Business School, 2University of Chicago, 3University of California, Berkeley

Being Better or Being “Good”: Conflicting Self-evaluation Motivations When Sabotaging Close Others

We propose that people frequently experience conflict between two motivations: the motivation to outperform other team members (by sabotaging their friends) and the motivation to be a “good” person. We show that when threatened, people exploit convenient moral rationalizations to support sabotage their friends’ performance. Additionally, when threatened in one domain, people can sabotage others in other domains.

1Singapore Management Univ., 2Stanford University, 3Stanford University

The Ideological Turing Test: Measuring Perspective Taking Through Persuasive Faking

We test a novel perspective-taking paradigm: the Ideological Turing Test. First, participants are randomly assigned to write a statement for or against an issue. Second, another sample of participants reads each statement and attempts to determine the ideology of the person who wrote it. We present initial results from a sample of 1,600 Democrats and Republicans. The experiment can be modified for further uses.

1Harvard Univ., 2Graduate School of Management, University of California, Berkeley

How Leadership Strategy Affects Followers: Dominance as a Stick and a Carrot

Humans have two routes to status: dominance, control over others’ material resources; and prestige, voluntary deference for cultural expertise. In a series of online studies, we employ correlational, vignette, and experimental designs with real-effort tasks and online studies, we employ correlational, vignette, and experimental designs with real-effort tasks and online studies, we employ correlational, vignette, and experimental designs with real-effort tasks and online studies. People balance information acquisition and impression management. Across seven studies, people avoided asking sensitive questions, fearing others’ discomfort and damaging their impression. This aversion is both costly and misguided. Askers overestimate the interpersonal costs of asking. Responders formed similar impressions of askers who asked non-sensitive and sensitive questions.

Evan Hart1, Eric VanEpps2, Maurice Schwindt3

The Circular Log of Values

Every value has thousands of value terms. What makes them values? Can we reduce them to a manageable number? Values form the same circular structure across groups and cultures. Why? From what age? The value circle implies systematic associations of values with behavior, attitudes, personality, and biological functions that research supports.

**Invited Session**

The Streaking Star Effect in Sports, Games, Business, and Politics

Why do so many sports fans want stars like Roger Federer or Tiger Woods to keep winning, but comparably successful teams like the New England Patriots or Golden State Warriors to fall from their current heights? Evidence supporting this Streaking Star Effect will be presented, along with research findings that link the effect to the relative attributional clarity of individual versus group success and the corresponding experience of awe that follows from attributing a run of successful performance to a variable inside, versus outside the consumer marketplace and the marketplace of ideas about economic inequality will be explored.

Tom Gilovich1
1University of California, Berkeley

The Role of Trait Self-Control, Beliefs about the Utility of Emotions, and Emotion Regulation in Self-control Performance

People balance information acquisition and impression management. Across seven studies, people avoided asking sensitive questions, fearing others’ discomfort and damaging their impression. This aversion is both costly and misguided. Askers overestimate the interpersonal costs of asking. Responders formed similar impressions of askers who asked non-sensitive and sensitive questions.

The Moral Standing of Animals: Toward a Psychology of Speciesism

We empirically investigate the philosophical concept of “speciesism”—the assignment of different moral worth based on species-membership. Our findings show that speciesism is a measurable, stable construct with high interpersonal differences that goes along with a cluster of other negative prejudices and is predictable in real-world decision-making and behavior directed towards animals.

When Does Mutual Trust among Community Members Lower Their Happiness? Moderating Effect of Residential Mobility

Our previous work showed that trust towards community members (community trust) had a negative effect on happiness at community level. The current study revealed that such a negative effect is stronger where residential mobility is lower. This finding suggests that stability of memberships makes community trust function as social norm (mutual expectation for community) at the community level.

Effect of Colorblindness and Multiculturalism on STEM Performance of Students of Color

First-year undergraduates (POC n = 459, White n = 230) completed an online course using a 3 (course: math, chemistry, physics) x 3 (diversity condition: colorblind, multicultural, control) between subjects experimental design. Results showed that POC students performed best in the multicultural compared to colorblind condition, whereas White students performed similarly across diversity conditions.

The Softer Sex in Science: Gender Stereotypes and Labeling of “Soft” vs. “Hard” Science

Colloquially, people refer to “soft” vs. “hard” sciences. We propose that these labels are influenced by gender stereotyping. In three studies, people labeled a field as a “soft” science more often when they had been led to believe the field was dominated by women. This effect was stronger among people who perceived women as less competent at STEM and has consequences for a field’s public regard.

Alysson Light1, Alexis Schirling2
1Univ. of the Sciences, 2National Institutes of Health

Shared Reality Craving and Susceptibility to Social Influence

We examine social influence as the result of a motivated process in targets of such influence—a craving for shared reality. Across six studies, we outline the personality dynamics of shared reality cravers and explore how these dynamics make the uniquely susceptible to subtle credible misinformation, fake news, and conspiracy theories. We also examine the consequences of their creation of new shared realities.

Cumulative Stress among Low-income, Ethnically Diverse Couples

Although a number of studies demonstrate the adverse effects of various stressors (e.g., work) on couples’ relationship satisfaction, most do not explore stressors independently. Using a longitudinal study of 431 low-SES newlyweds couples, we demonstrate that stress from work, finances, and discrimination serve to combine in an exacerbation/exponential rather than additive fashion.

Meditating Away a Guilty Conscience: The Impact of Mindfulness on Guilt and Reparations

Mindfulness has been found to have a number of beneficial effects, yet we argue here that a state of mindfulness can interfere with affective processes necessary to motivate repair in guilt-inducing situations. In four experiments, we find that mindfulness reduces state guilt and weakens the normally strong forebear victim and repair condition, whereas White students performed similarly across diversity conditions.

Self-determination Theory and Ill-being in Romantic Relationships: Need Frustration Predicts Marital Quality 10 Years Later

Our results suggest that need frustration impacts couples long-term. Specifically, we found that need frustration predicts both marital risk and spousal disagreement over time. These findings build on prior research that has found need frustration to promote ill-being more generally and add to the limited body of work that has investigated its negative effects in romantic relationships.

Emily Harris, Queens Univ.

Does Sexual Desire Fluctuate More among Women Than Men?

There is a lay assumption that women's sexual desire varies substantially over time, whereas men's is stable. We empirically test this assumption by measuring men's and women's sexual desire across daily, weekly (Studies 1 and 2), monthly (Study 3), and year-long (Study 4). In Studies 1-3, we find no evidence for a gender difference in sexual desire variability.

Cheresh, Emily, Richard Rutland, Julie Berman, and Andrew S. Sharpe.

The Role of Vocal Confidence in Persuasion: A Self-validation Perspective

We investigated whether manipulating the vocal pitch a message recipient used to express thoughts would affect persuasion via perceptions of confidence in those thoughts. In line with the self-validation hypothesis, we found that thought direction had a greater impact on attitudes when thoughts were expressed using low vs. high pitch. This relationship was mediated by thought confidence.

Hoarding Happiness: Object Attachment Attenuates the Well-being Costs of Attachment Anxiety

Past research has found that attachment anxiety motivates individuals to form stronger attachments to their belongings. Is this compensatory attachment beneficial? The current study presents analysis at the dispositional and state level demonstrating that strong object attachments reduce and even eliminate the negative psychological effects of attachment anxiety.

Lucas Keefer, Zachary Rothschild.

Can Climate Change-related Art Make People Change Their Behavior?

This presentation summarizes the findings of four studies in the CLIMART project on the psychological impact of climate-change-related art on the audience’s intentions to act against climate change. The studies explore how emotional reactions to the artworks trigger cognitive responses which in turn affect intentions to act. The studies use a combination of qualitative and quantitative methods.

[54] So Now What? A Roadmap from Campus Invite to Contract

Room: Celestin G

Time: 3:45 PM - 5:00 PM

Chair: Allison Farrell, Miami Univ.

Many applicants for academic jobs feel unsure about what to expect going into the campus interview and negotiation stages. Three successful job hunters and one longtime search committee member will present on preparing for campus interviews, typical interview schedules, and contract negotiations, and answer audience questions about the stages of the job search.

Allison Farrell, Miami Univ. Matt Baldwin, Univ. of Florida. Erin Westgate, Univ. of Florida. Monica Biernat, Univ. of Kansas

Room: Celestin H

Time: 3:45 PM - 5:00 PM

Chair: Christian Klöckner, Norwegian Univ. of Science and Tech.

This symposium examines the wide range of consequences that can emerge from variations in mindset, attitudes, or personality including the engagement in misconduct, the health choices that we make, how we perceive doctors, and how we engage in climate change-related behaviors.

Emily Harris, Allison Farrell, and Willem Hofmann.

[56] The Implications of Borderline Personality Features for Jail Inmates’ Institutional Misconduct and Treatment Seeking

In a longitudinal study of 506 male and female jail inmates, features of Borderline Personality Disorder (BDP) assessed upon incarceration predicted presence/absence of jail misconduct but not frequency or chronicity of misconduct. Further, features of BDP predicted requests for treatment, particularly substance use programs and forensic services (but not support and psychosocialeducational groups).

Sajida Yasmeen, June Tangey, Jeffrey Stuewig, Carlie Hacket, Laura Weimer.

Fat, Drunk, and Lazy: How Engaging in Creative Tasks Can Unhealthy Choices

We show in five studies that people who engage in a creative brainstorming task create unhealthy burgers for themselves but not for others as the burgers are higher in calorie content, participate in workout regimens that have low burn, consume cocktails that are higher in alcohol content, and they are more likely to choose candy than people who engage in control tasks because they want to self-indulge.

Jack Goncalo, Verena Krause, Lynne Vincent.

The Role of Vocal Confidence in Persuasion: A Self-validation Perspective

We investigated whether manipulating the vocal pitch a message recipient used to express thoughts would affect persuasion via perceptions of confidence in those thoughts. In line with the self-validation hypothesis, we found that thought direction had a greater impact on attitudes when thoughts were expressed using low vs. high pitch. This relationship was mediated by thought confidence.

[F-099] General Behavior
*> The Relationships of Personal Resources and Work Outcomes among Mongolian Employees: The Moderating Role of Self-Esteem*
> **Enkh Tseren**
**Abstract:** The objective of this study is to investigate the relationships of personal resources and work outcomes among Mongolian workers. The study examines the mediating role of self-esteem in the relationship between personal resources and work outcomes. Results indicate that self-esteem has a significant mediating role in the relationship between personal resources and work outcomes.

[56] The Psychology of Cultural Appropriation in Intergroup Contexts

Room: Empire C
Time: 8:00 AM - 9:15 AM
Chair: Ariel Mosley, Univ. of Kansas

Cultural appropriation refers to the making use or possession of the cultural elements of another group. This symposium explores how group members differentially construe cultural appropriation, and discusses solutions to bridge the conceptual gap. Findings extend the reach of social categorization, intercultural communication, and social identity perspectives to a new domain of intergroup dynamics.

ABSTRACTS

The New Identity Theft: Group-based Perceptions of Cultural Appropriation

Cultural appropriation—the taking of elements of another culture—has reemerged as a controversial societal issue. Several high-profile instances were highlighted in the media. This research examines how dominant and subordinate group members differentially construe cultural appropriation. Implications of perceiving cultural appropriation for identity and intergroup relations are discussed.

Ariel Mosley1, Monica Biernat1
Univ of Minnesota

Cultural Appropriation or Appreciation? The Role of Status and Cultural Awareness on Reactions to Cultural Appropriation

Numerous public controversies have raised questions about the acceptability of adopting the customs of other cultures (i.e., cultural appropriation). We examined whether African American participants showed effective reactions to appropriation of their cultural practices and how this was impacted by the status of and the cultural awareness of the appropriator.

[58] The Capacity for Power and Status to Shift Moral Perception

Room: Strand 10
Time: 9:30 AM - 10:45 AM
Chair: Jennifer Stellari, Univ. of Toronto
Co-Chair: Rachel Forbes, Univ. of Toronto

Social standing, including power and status, is a critical feature of social perception and heavily influences global impressions. We know very little about the extent of power and status on moral perception, an essential component of global impressions (Goodwin, Piazza, & Rozin, 2016). We discuss how a target’s and observer’s own power and status have the capacity to shift moral perception.

ABSTRACTS

The (Failed) Weaponization of Political Incivility

It seems that politicians “throw red meat to their base” by incivility in order to boost approval. In two studies, we manipulated the character displayed had moral and/or ethical values met. An additional correlational study showed that perceived social threat, both as a state or a trait, heightens moral disapproval.

Jeremy Frimer1
Univ of Winthrop

When the Mighty Fall: Harsher Responses to the Moral Transgressions of the Powerful

Past work suggests that holding power encourages unethical behavior. Here, we examine how others respond when those with power transgress. Across four studies, we found that high power transgressors elicited greater moral outrage in others, than low power transgressors. These effects were mediated by the perception of greater harm to the victim and the group’s norms by high power transgressors.

Rachel Forbes1, Jennifer Stellari1, Robb Willer2
1Univ of Toronto, 2Stanford Univ

Social Exclusion Leads to Harsher Moral Judgments

We found that experimentally induced social exclusion led to greater condemnation of moral transgressions, an effect mediated by participants’ rededicated sense of having fundamental social needs met. An additional correlational study showed that people high in social anxiety are also more judgmental. We conclude that perceived social threat, both as a state or a trait, heightens moral disapproval.

Simone Schnall1, Robert Henderson1
1Univ of Cambridge

Seething but Quiet: Social Power Differentially Affects Public vs. Private Expressions of Blame

Four experiments tested the impact of power on public and private blame, results showed that power uniquely intensified public expressions of blame whereas, private judgments were severe regardless of power. This third-party judgments (Studies 1 & 3) and first-person situations (Study 2), but when one’s hold on power was tenuous (Study 4), power defaulted to inhibiting public blame.

Andrew Monroe1, Lauren Ferber2
1Appalachian State Univ, 2Brown University

Beyond Partisanship: Using Americans’ Misperceptions of Immigration to Reduce Antagonism towards Hostile Immigrants

Across two studies we examined perceptions of undocumented migrants. In Study 1, we found that people overestimate the number of undocumented migrants who are gang members or are using children as props to gain entry into the U.S., which increases animosity towards migrants in general. In Study 2, we developed an intervention that reduces prejudice against undocumented migrants.

Samantha Moore-Berg, Boaz Hameiri, Emily Falk, Emile Bruneau
1Univ of Wisconsin, 2Univ of Maryland

The Rigidity of the Right, Reconsidered: A Meta-analytic Review of Ideological Symmetries and Asymmetries in Need for Certainty

Prior reviews of the Rigidity of the Right (RR) model have not considered key methodological and theoretical issues, including the multidimensionality of conservatism. We present six multilevel meta-analyses of relations between relatively “pure” measures of social, economic, and general conservatism and need for certainty variables (r=533). Results challenge the sufficiency of the RR model.

Thomas Costello1, Shauna Bowes1, Scott Lilienfeld1
1Emory Univ

[59] Party Animals? Political Prejudice, Intergroup Attitudes, Party Loyalty, and Ideological Symmetries and Asymmetries

Room: Strand 13
Time: 8:00 AM - 9:15 AM
Chair: Kathryn Howard, Univ of Illinois at Chicago

As animosity in contemporary politics continues to grow, the importance of understanding the biases, prejudices, and norms underpinning a great deal of political behavior grows with it. Four methodologically rigorous talks will describe these psychological processes, emphasizing the similarities and differences across the political left and right that may precipitate them.

ABSTRACTS

How Loyal is the Political Party Line? The Effect of Candidate Transgression Severity on Voter Choice

How severely must a political candidate morally transgress in order to lose votes from in-group members? We investigated whether people vote for in-group candidates when they transgress or if people abstain from voting for in-group candidates when transgression severity reaches a certain level. In summary, people tend to remain loyal to candidates, regardless of transgression severity.

Kathryn Howard1, Matt Motyl1, Daniel Cervone1
1Univ of Illinois at Chicago, 2New York Univ

Changes in Societal Prejudices Following Donald Trump’s Campaign and Presidency

In 12 studies, we examined the effect of Donald Trump’s political rise on Americans’ intergroup attitudes. We find that prejudice increased following Trump’s election and subsequent presidency but only among his supporters. We also find evidence of an increase in implicit bias among Trump supporters, and these changes in prejudice have been driven by shifting social norms.

Benjamin Ruish1, Melissa Ferguson
1Ohio State Univ

Using a series of images depicting fictionalized character displayed had moral and/or ethical values met. An additional correlational study showed that perceived social threat, both as a state or a trait, heightens moral disapproval.

[60] How To Build a Successful Academic Career with Interdisciplinary Research
Room: Celestine E
Time: 8:00 AM - 9:15 AM
Chair: Katherine Laccose, Rhode Island College
Co-Chair: Nicole Sintov, Ohio State
Want to learn how to overcome challenges of interdisciplinary research and use it to further your career? This interactive Q&A panel offers reflection, insights, and practical guidance on how to be successful in this endeavor. Topics include: building collaborations, navigating joint appointments, seeking funding, and maintaining a balance between productive research and tenured cases. Come with questions!

Wendy Wood, Univ. of Southern California, Cydney Dupree, Yale Univ., William Chopik, Michigan State Univ., Sandra Matz, Columbus Univ.

[61] Implications of Closeness for Neuroendocrine Processes: Experimental and Longitudinal Evidence
Room: Celestine F
Time: 8:00 AM - 9:15 AM
Chair: Kristi Chin, Univ. of Michigan
Co-Chair: Robin Ede, Univ. of Michigan
We present research on associations between hormones and closeness in a dyadic context using experimental and longitudinal designs. Together, the studies in this symposium provide consistent evidence for theoretically grounded links between hormones and relationship processes, moderation of these links by perceptions of closeness, and dyadic effects between hormones and markers of closeness.

ABSTRACTS
Endocrine Responses to Manipulations of Closeness in Initial Social Encounters
This research tested effects of closeness manipulations on hormone responses to interactions with potential mates. Two experiments demonstrate that opposite-sex interactions above minimum closeness thresholds trigger large increases in salivary cortisol. Larger cortisol increases predicted greater attraction to others, supporting cortisol as an endocrine signal of human romantic attraction.

James Roney1, Adar Eisenbruch2, Rachel Griffot2, UC Santa Barbara, Purchase College, “Opponent Technologies
Testosterone and Closeness: Moderation by Self-Construal Emerging evidence suggests testosterone (T) differentially affects behavior depending on how people construe the self in relation to others. I present evidence from 70 dyadic interactions suggesting T is positively associated with closeness in those with an interdependent self-construal, whereas T is negatively associated with closeness in those with an independent self-construal.

Keith Weker1
Univ. of Massachusetts Boston

Testosterone Changes During Intimate Parent-Child and Romantic Partner Interactions We assessed testosterone (T) changes following intimate parent-child and romantic partner interactions. We found that intimate parent-child interactions lead to T decreases, but intimate partner discussions lead to T increases. Yet, in both cases, markers of closeness were associated with T declines, consistent with the idea that lower T supports nurturant behavior.

Kristi Chin1, Robin Ede2, Zach Reese1, Ekjot Saini1, Patty Kuo1, Brenda Volling1
Univ of Michigan, Auburn Univ.

Variation in CD38, a Gene Linked to Oxytocin Secretion, Predicts Communal Behavior, Partner Perceptions, Felt Security and Adjustment in Romantic Relationships in Daily Life We used Event Contingent Recordings to test whether CD38, a gene implicated in oxytocin secretion and attachment, is associated with romantic relationship dynamics in daily life. As predicted, one SNP (rs379686) was associated with communal behavior, partner perceptions, affect, felt security and relationship adjustment, supporting the role of oxytocin in close relationship maintenance processes.

Psychologically Inclusive Design in Online Education
Visual and verbal cues can reinforce barriers to educational access for women in STEM disciplines in in-person as well as online learning environments. I will present evidence from three field experiments (N=300,000) studying the effects of changing salient visual/verbal cues of online course websites on female course enrollment.
René Kizilcec1, Andrew Saltarel1
Cornell Univ., Stanford Univ.

From weak and deficient to strong and resourceful: Reframing refugees’ identity boosts long-term academic engagement
We tested the effects of an intervention that reframed refugees’ stigmatized identity as resourceful. The intervention boosted refugees’ self-efficacy, likelihood to confront a challenging task (Study 1) and performance at an online-university (Study 2). Over one year, refugees logged in 23 % more often on the learning platform. This enhanced engagement predicted an increase in course completions.

Digital Media Use and Mental Health among Adolescents: Evidence from Seven Large Datasets
Is spending too much time with technology associated with compromised well-being? In seven large samples of adolescents in the U.S. and U.K., heavy users of digital media were 45% to 17% more likely to be unhappy or depressed, have low self-esteem or low-life satisfaction, have low general well-being, or have suicide risk factors compared to light users.
Jean Twenge1
San Diego State Univ.

[63] Let’s Talk About It: Unpacking Cross-race Conversations
Room: Empire C
Time: 9:30 AM - 10:45 AM
Chair: Kira Sanchez, Stanford Univ.

We know little about how members of different racial groups talk about racial differences and...
we highlight the frequency, perceived benefits and outcomes across group lines, and the effects.

**ABSTRACTS**

**Reconsidering Reappraisal: The Trade-offs of an Acclaimed Emotion-regulation Strategy**

Recent meta-analyses of emotion regulation emphasize that the longer-term outcomes of any strategy – including ‘gold standard’ strategies like reappraisal – depend on the context in which they are used. We present a unique framework to consider the benefits and costs of reappraisal. Illustrating this framework, we trade-offs of using reappraisal when managing emotions about politics.

Brett Ford1, Alison Troy2, Matthew Feinberg1

1University of Toronto, 2Franklin & Marshall College

An Experimental Manipulation of Reappraisal and Controllability: Effects on Emotions, Motivation, Behavior, and Physiology

Reappraisal has been associated with better well-being in the context of uncontrollable stress, but worse well-being in the context of controllable stress. We experimentally manipulated both reappraisal and the controllability of a laboratory stroop test to stress mechanistic explanations of reappraisal and diverse outcomes in controllable and uncontrollable situations.

Emily Willroth1, Brett Ford1, Iris Mauss2

1Northwestern Univ., 2Univ. of Toronto, UC Berkeley

Flexible Reappraisal in Daily Life: Correlational and Experimental Tests of the Strategy-Situation Fit Hypothesis

According to recent theory, healthy emotion regulation involves flexibly matching regulation efforts to contextual demands. In this talk, I report correlations of experimental and experimental models of the hypothesis that flexible (i.e., context-dependent) use of reappraisal is associated with greater well-being compared to using reappraisal in contextually inappropriate ways. Fewer possible mechanisms exist for experimental tests. Jordan Koval1, Jordan Hinton1, John Gleeson2, Tom Hollenstein1, Peter Kuppens4

1Univ. of Melbourne, 2Oxygene, The National Centre of Excellence in Youth Mental Health, 3Australian Catholic Univ., 4Queen’s Univ.

Understanding Psychological Flexibility: A Multi-Method Exploration of Pursuing Valued Goals Despite the Presence of Pain

Psychological flexibility reflects how we respond to unwanted thoughts, emotions, and sensations while pursuing valued life goals. This research provides an empirical examination of the role of psychological flexibility in well-being. The development and psychometric properties of the Psychological Flexibility Index (PFI) are described, which is a hybrid idiographic and nomothetic approach. Todd Kashdan1, David Dishabito2, Faith Goodman1, James Dooley1

1George Mason Univ.

[65] The Psychology and Physiology of Fat: A Functional Perspective

Room: Straun
Time: 9:30 AM - 10:45 AM
Chair: Nicki Charney, Oklahoma State Univ.
Co-Chair: Michael Barlev, Arizona State Univ.

We present new findings on the psychology and physiology of fat from an adaptive perspective. We explore questions such as how sex-specific stressors or socioeconomic status functionally calibrate eating behavior, and how fat location—beyond fat amount—influences mental health and well-being. We discuss new predictions suggested by our approach and promising interventions for overweight/obesity.

**ABSTRACTS**

Fat Location, Beyond Fat Amount, Predicts Mental Health and Well-being in Women

We show that, beyond fat amount, where fat is located (waist vs. hip/thigh) predicts women’s mental health and well-being. Women with overweight have higher self-reported affective well-being than fat is located higher in their hips/thighs; the reverse is found for waist fat. Other known correlates of weight, like perceived fat discrimination, similarly critically depend on fat location.

Michael Barlev1, Steven Neuberg1, Jaimie Krems2

1Arizona State Univ., 2Oklahoma State Univ.

An Integrative Framework for Examining Social Status, Eating Behavior, and Obesity

Utilizing a theoretical framework from biology can lead to a more complete understanding of the relationship between socioeconomic status and both eating behavior and obesity risk. This framework allows for an integration of the adaptive, developmental, comparative, and proximate factors that influence obesity risk and guide future research and intervention approaches.

Ann Caldwell1

1Univ. of Colorado, Anschutz Medical Campus

This presentation highlights recent research examining the impact of early life environments on energy regulation. Our research finds that growing up poor predicts eating in the absence of hunger in both animals and humans. We find that early life environments have a lasting impact on body awareness and biological signals of hunger and satiety that can be identified throughout these pathways.

Sarah Hill1, Randi Proffitt Leyva2, Jeff Gassen3, Summer Mengelkoch4

1Texas Christian Univ.

Exposure to a Sex-specific Stressor Mitigates Sex Differences in Stress-induced Eating

We demonstrate that males and females display differential physiological responses to achievement and social rejection stressors. Additionally, males and females engage in similar levels of stress-induced food consumption if the stressful experience leads to an adequate biological response.

Nikki Claus1, Jennifer Byrd-Craven2

1Oklahoma State Univ.
[68] Finding Solitude in the Modern World

Room: Celestin B
Time: 9:30 AM - 10:45 AM
Chair: Thy-vy Nguyen, Univ. of Durham

Being alone is not a bad thing, yet there is a lack of understanding of what it brings to our modern life. This symposium will present a comprehensive picture of how people understand and experience time alone, and will be of interest to audiences from developmental and social psychological disciplines, as well as those interested in the effects of social media on our alone experiences.

ABSTRACTS

What Predicts Satisfaction with Solitude?
Psychosocial adjustment, more than personality traits, influences satisfaction with solitude. A digital experience sampling study showed that identity development, autonomy, and positive relationships predicted increases whereas loneliness predicted decreases in satisfaction. Scales also moderated the effect of mood during solitude, with higher psychosocial functioning attenuating effects.

Virginia Thomas1, Brandon Balzer Carr2
Wilmington College, UC Santa Cruz

Subtypes of Solitude and Psychological Adjustment in Chinese Emerging Adulthood
There has been a long debate on whether individuals can gain benefits from solitude. This research synthesized the factors affecting solitude experience in previous studies and explored different subtypes of solitude states, in order to address the relation between solitude and psychological adjustment.

Tong Zhou1, Dan Li2, Junshong Liu3

Distinguishing Positive and Negative Aspects of Solitude in Tweets
Solitude can be experienced both positively and negatively. Is there evidence of this distinction in people’s everyday use of words like ‘solitude’ and ‘loneliness’? We extracted millions of tweets containing these words and compared their frequency. Results indicated that individuals who perceive the system as irresponsible to their demands tend to legitimize the actions of hackers via stronger perceived aggression against the system.

Maria Heering1, Dominic Abrams1, Giovanni A. Travaglini2
1Univ. of Kent, 2The Chinese Univ. of Hong Kong

The Role of Relational Concerns in Shaping Participation in Government and Rejection of Violence
Data from the Arab Barometer examine the role of relational concerns shaping trust in and behavior towards government. Analyses examine the role of relational concerns (including beliefs about fairness and reform), beyond instrumental concerns (attitudes about security and economics), predicting trust in government; political participation; and rejection of the self-proclaimed “Islamic State”.

Thomas O’Brien1

[71] Credit Cards, GRAVESTONES, and Obituaries: Does Social Media Add to or Take Away Our Solitude?

Many of social media is engaged in private, when the person is alone. The pressing question is whether the presence of social media would take away our opportunity to gain emotional benefits from solitude. Two experiments were conducted to address this question of whether social media adds to or takes away our solitude.

Thuy-vy Nguyen
Univ. of Durham

SCHEDULES & HIGHLIGHTS

THURSDAY

9:30 AM - 10:45 AM
Chair: Thy-vy Nguyen, Univ. of Durham

10:45 AM - 11:30 AM
Chair: Giovanni A. Travaglini, The Chinese Univ. of Hong Kong, Shenzhen

[70] Authorities and their Discontenpts: Legitimation across Actors and Contexts

Room: Celestin D
Time: 9:30 AM - 10:45 AM
Chair: Giovanni A. Travaglini, The Chinese Univ. of Hong Kong, Shenzhen
Co-Chair: Thomas O’Brien, Univ. of Illinois

This symposium presents emerging research on the development of legitimacy for both state authorities and subversive actors: national governments, police forces, terrorist groups, criminal organizations, and hackers. Results demonstrate the importance of both structural and individual-level factors in the development of legitimacy towards these organizations.

ABSTRACTS

Perceptions of Police Legitimacy: Understanding the Impact of Police Body-Worn Cameras from a Civilian’s Perspective
Across two studies we examined the use of police body cameras on views of police. In study 1 we investigated police body cameras and perceptions of legitimacy between Black and White Americans on Amazon Mechanical Turk. In study 2 we attempted to replicate our findings with more specific nature of groups and outcomes in high crime density areas in a metropolitan city where body cameras are used.

Jeremy Pagan1, Samuel R. Sommers1
1University of Illinois

Banditry in the Digital Age: Lower Efficacy Affects Individuals’ Legitimation of Hackers
We investigated what factors underlie individuals’ legitimation of illegal actors such as hackers. In two experiments, we manipulated external efficacy in the Univ. (study 1) and online (study 2) contexts. Results indicated that individuals who perceived the system as irresponsible to their demands tend to legitimize the actions of hackers via stronger perceived aggression against the system.

Maria Heering1, Dominic Abrams1, Giovanni A. Travaglini2

Room: Celestin F
Time: 9:30 AM - 10:45 AM
Chair: Erika Kirgios, The Wharton School, Univ. of Penn
Co-Chair: Joyce He, Univ. of Toronto

Four talks document how competition and status threat motivate strategic diversity-related perceptions and decisions. We find that competitive motives shape perceptions of diversity, organizational strategy, and the willingness of underrepresented individuals to endorse organizations, join diverse groups, or apply for promotions. We identify intended and unintended consequences of these developments.

ABSTRACTS

Saying One Thing and Doing Another: Individual Perceptions of Decoupled Diversity Claims
Organizations consistently make claims about diversity and inclusion, but they are not necessarily achieving these outcomes. We show that failing to make good on diversity claims leads to negative organizational perceptions and decisions, and that strategic behaviors can both decouple diversity from inclusion.

James Carter1, Mabel Abraham2, Vanessa Burbano2
1Columbia Business School, 2Columbia Univ

The Outnumbered Bias: Catalyzing Minority Presence in the Workplace
Do people overestimate the presence of minority group members within communities? We find that when people observe the noticeable presence of a majority group (e.g., a large crowd at a community event), they overestimate the overall presence of that majority group, believing that they constitute a majority of the community. This effect is stronger for minority groups high on symbolic threat.

The Legacy of the Dead: GRAVESTONES and Obituaries Reveal Cross-Cultural Variation in the Link between Religiosity and Longevity
Contrary to common perceptions, an analysis of 6,400 gravestones and 10,000 obituaries shows that religious people (i.e., deceased people with religious imagery on their gravesstone or in their obituary) only lived longer in religious cultural contexts. Our study answers a fundamental question on the nature of religiosity and showcases the vast scientific potential of studying the dead’s legacies.

1Univ. of Maastricht & Univ. of Copenhagen, 2Leiden Univ., 3Univ. of Cambridge

The TIME Collaboration: How Harry Potter, Darth Vader and Jon Snow Advance Psychological Science
Media collaborations are a powerful way to collect large-scale data. In this symposium, we showcase how IRB-approved studies that we ran together with TIME Magazine (N (Study 1) = 1,238,100; N (Study 2) = 92,887; N (Study 3) = 49,742), yielding verifiable big data at zero cost that can at once advance diverse research topics, e.g. personality development, leadership preferences and social media.

Friedrich Götz1, Peter J. Rentfrow2, Chris Wilson3
1Univ. of Cambridge, 2TIME Magazine

Automating Psychological Inference: Using AI to Advance Psychological Theory
In nearly every social interaction, people must make psychological inferences about others. AI can model multiple domains (e.g., predicting what a new person is like, how others will perceive someone, what an individual wants etc.) and demonstrate that computers can now do, often even better than people can, and illustrate how such developments can advance psychological theory.

[73] Merged Minds: Shared Reality and the Transformational Effects of Co-experience

Room: Celestine G
Time: 9:30 AM - 10:45 AM
Chair: Maya Rossignac-Milon, Columbia Univ.
Co-Chair: Margaret Clark, Yale Univ.

Though typically studied in isolation, humans often experience the world together. Four talks explore the transformative effects of sharing experiences—how sensations are accentuated, perceptions appear more real, and activities and objects feel more meaningful and satisfying. Further, they reveal the critical role of social closeness and shared reality in explaining when and why these effects occur.

**ABSTRACTS**

**Experiences Are Amplified When Shared with Familiar (But Not Unfamiliar) Partners**

Six studies show that silently co-experiencing a stimulus with a familiar (but not unadventurous) partner amplifies the study’s effects. Evidence is also presented differentiating co-experience from the mere presence of familiar partners.

Margaret Clark1, Erica J. Boothby2, Leah K. Smith3, John A. Bargh1
1*Northwestern Univ., 2Wharton Business School. *UC Davis

**More Real Together: Shared Reality Enhances Perceptions of Realness During Shared Experience**

Recent work has established that sharing experiences can make people feel more ‘real’. Yet, little is known about the mechanisms underlying this effect. Using both naturalistic and experimental paradigms, this talk examines the role of shared reality—having the same thoughts and feelings about the world—in enhancing perceptions of reality both in online chats and between romantic partners.

Maya Rossignac-Milon1, Erica J. Boothby1, Margaret S. Clark1, E. Tony Higgins1
1Columbia Univ., 2*Wharton Business School. *UC Davis

**Rituals and Nuptials: The Emotional and Relational Consequences of Relationship Rituals**

Across four studies, we find that couples with a shared ritual experience report more positive mental health outcomes. This talk examines the role of shared ritual in enhancing perceptions of realness both in online chats and between romantic partners.

Joshua D. Foster1, Kari Leibowitz2, Parker Goyer1, Hadley Rahrig1, Madeleine Roberts1
1Univ. of Georgia, 2Stanford Univ.

**Impact of Media Coverage on Individuals’ Response to a Medicine Switch**

Media reports of medication side effects can result in a social learning process and an increase in adverse drug reactions. Media coverage of side effects from a generic antidepressant was associated with an increase in side effect reports, with television having a greater impact than print coverage. This talk has implications for the communication of sensitive information in the media.

Kate MacKril1, Greg Gamble1, Debbie Bean1, Tim Cundy1, Keith Petrie1
1Univ. of Auckland, 2Auckland City Hospital

**Training Healthcare Providers to Leverage Psychosocial Forces in Clinical Practice**

This talk assesses the insights of an intervention to help healthcare practitioners leverage psychosocial forces in clinical practice. The Medicine Plus program teaches providers to utilize the social context to shape patient mindsets in an effort to improve treatment outcomes. Effects of the training on patient treatment outcomes, patient satisfaction, and utilization of psychosocial forces will be discussed.

Kari Leibowitz1, Parker Goyer1, Megan Mahoney1, Marcy Winget1, Cat Brown Johnson1, Jonathan Shaw1, Alia Crum1
1Stanford Univ.

**Poster Session H**

**Room:** Elite Hall

**Time:** 10:30 AM - 11:30 AM

**ABSTRACTS**

[75] Social Psychology Unleashed: Extracting Meaningful Patterns from Real-world Social Behavior
Room: Empire A
Time: 11:00 AM - 12:15 PM
Chair: Emma Templeton, Dartmouth College
Co-Chair: Thalia Wheatley, Dartmouth College
Most experimental studies manipulate one feature of interest and hold everything else constant. This symposium will highlight a complementary approach: capture unconstrained social behavior and use computational techniques to extract meaningful patterns. We will illustrate this approach through investigations in the domains of dyadic interactions, group communication, and social network analysis.

ABSTRACTS
Toward a Science of Interacting Minds
Scientists work together to develop and conduct experiments. Paradoxically, this team produces a field focused on testing individuals in isolation. A deep understanding of the human mind requires elucidating why and how we interact to think, create, and share information. I will provide an overview of new approaches that afford a rigorous, interdisciplinary science of collective thought.
Thalia Wheatley
1Dartmouth College

Predicting Connection between Friends and Strangers in Conversation
Why do we “click” with some people but not others? We recorded friends and strangers as they engaged in unstructured conversations. Using a data-driven feature extraction process, we determined which aspects of conversation best predict when two people report feeling connected to each other. We also explored how conversations between strangers differ from conversations between friends.
Emma Templeton1, Luke Chang1, Thalia Wheatley1
1Dartmouth College

Modeling Gender Composition and Interpersonal Dynamics in Digitally-Mediated Interactions
In the current research, we explore learners’ discourse by employing Group Communication Analysis (GCA), a computational linguistics methodology for quantifying the sociocognitive processes between learners in online interactions. The aim of this study is to use GCA to investigate the influence of gender and gender pairing on students’ interpersonal discourse processes in online environments.
Nia Dowell1, Yijun Lin1, Andrew Godfrey2
1UC Irvine, 2Univ. of Michigan

Using Behavior at a Cocktail Party to Predict Future Social Network Position
This longitudinal field study aimed to uncover observable behaviors that predict later social connectedness. We filmed a social gathering of 287 newly-arrived MBA students as they met each student and used them to predict the students’ social network positions several months later.
Adrienne Wood1, Christopher Welker1, Adam Kleinbaum1, Thalia Wheatley1

[76] Major Life Events and Change in Psychological Functioning
Room: Empire C
Time: 11:00 AM - 12:15 PM
Chair: Susanne Buecker, Ruhr Univ. Bochum
To what extent do major life events predict change in key domains of psychological functioning (i.e., well-being, personality, self-esteem, loneliness) across the lifespan? We present four studies considering different types of life events, applying diverse methods, and using large longitudinal
samples (N > 39,000) to provide new perspectives on the psychological power of major life events.

**ABSTRACTS**

**Well-Being in the Wake of a Natural Disaster**

We will examine the role of natural disaster adversity on well-being and well-being change in the wake of a major hurricane. Using two existing waves of longitudinal data (N = 691), regression, and latent change models. Regression analyses showed that hurricane exposure is predicted lower well-being, both immediately and 1-year post-hurricane, above and beyond demographics and personality.

Rodica Damian¹, Surizaday Serrano²
University of Houston

**Selection and Socialization Effects of Repeated Work Transitions and Self-Esteem and Life Satisfaction**

We examine whether self-esteem and life satisfaction predispose individuals to experience unemployment and job transitions and whether these events affect self-esteem and life satisfaction (socialization effects). We also examine work satisfaction and work characteristics as moderators of socialization effects. We use 10 waves of data from a longitudinal panel study (N=13,000).

Antje Reitze*, Wiebke Bledorn¹, Jaap J. A. Denissen¹
Tiburg Univ., *UC Davis

**A Propensity Score Matched Study of Changes in Loneliness Surrounding Major Life Events**

This study employs high-resolution longitudinal data (N = 13,945) to delineate the effect of various family- and work-related changes on loneliness across the adult life span. Results indicate that certain life events vary in their impact on loneliness levels. Additionally, the event-related trajectories of loneliness differed substantially among both events and individuals.

Susanne Buecker¹, Jaap J. A. Denissen¹, Maike Luhmann²
1Wurzburg Univ., *Buchan Univ.

**[77] Diversifying Intergroup Relations Research: Differences and Similarities across Marginalized Groups**

Room: Empire D
Time: 11:00 AM - 12:15 PM
Chair: Mindy Truong, Univ. of Southern California

Co-Chair: Sarah Townsend, Univ. of Southern California

What can we learn from the intergroup experiences of social groups not typically included in the intergroup relations literature (e.g., people from lower social class backgrounds, multiracial individuals, immigrants, religious minorities)? Using multiple methodologies, new research reveals experiences that are unique to specific marginalized groups and experiences that are common across them.

**ABSTRACTS**

**Crossing the Class Divide: Divergent Threat Responses When Anticipating Cross-Class Interactions**

Cross-race interactions are typically experienced as threatening by both interaction partners. Are cross-race interactions similarly threatening? Using cardiovascular and self-report measures, we show that people from higher social class backgrounds, but not people from lower social class backgrounds, exhibit greater threat when anticipating a cross-class versus same-class interaction.

Mindy Truong¹, Sarah Townsend², Stephanie Smalett¹
1Univ. of Southern California

**You Can’t Sit With Us: The Sources and Consequences of Multiracial Individuals’ Social Rejection Experiences**

Three studies extend to which multiracial people perceive rejection from different racial groups and the downstream consequences of these perceptions for psychological well-being. Our findings extend the social rejection literature, which has focused on the experiences of monoracial minorities to the detriment of understanding the unique perspectives of multiracial individuals.

Jasmine Norman¹, Marisa Franco², Jacqueline Chen¹
1Univ. of Utah, *Georgia State Univ.

**The Frequency, Quality, and Consequences of Cross-Class Interactions**

We examine the consequences, frequency, and quality of cross-class interactions. We find that cross-class interactions lead to greater belonging and consequently higher GPA’s for students from lower-class backgrounds. However, students engage in cross-class interactions less than the diversity in their environments allow and report these interactions as lower quality than same-class interactions.

Rebecca Carey¹, Nicole Stephens²
1Stanford Univ., *Kiology School of Mgt., Northwestern Univ.

**Everyday Identity Challenges: Psychological and Affective Corollaries of Non-Fit and Rejection**

We investigate everyday situations that make salient a conflict between a context and a marginalized identity. Capturing thousands of identity challenges experienced by more than 1,500 participants, we demonstrate that non-fit and rejection are distinct aspects of identity challenges that indirectly and independently predict numerous measures of well-being.

Drew Jacoby-Senghor¹, Michael Sieple¹
1UC Berkeley, *Columbia Univ.

**Advances in Moral Perception and Behavior**

Room: Strand 10
Time: 11:00 AM - 12:15 PM
Chair: Rajen Anderson, Cornell Univ.

This symposium is on the processes that motivate moral perception and behavior. Four talks using diverse methods (e.g., IMRI, eye-tracking, topographical maps) examine first- and third-party prosociality, somatosensory evaluations of moral violations, and the emotional reactions of moral agents.

Maike Luhmann¹, Susanne Buecker¹, Till Kaiser¹, Mira Beer mann¹
1Wurzburg Univ., 2Buchan Univ.

**When Less is Enough: The Relationship between Prosocial Effort and Moral Character Judgments**

The effort required to carry out a prosocial act can vary from low—handing a stranger the wallet she dropped—to extreme—spending days to find the owner of a lost wallet. As such, do third-parties evaluate moral character differently when the prosocial act requires more effort? Across four studies, we find a quadratic relationship between prosocial effort and moral character judgments.

Suraia Alldina¹, William Cunningham¹
1University of Toronto

**The Role of Miscellaneous Emotions in Judgments of Moral Character**

Across six studies, we examined the role of the emotions felt by moral agents in judgments of those agents. We found that observers use the relative calibration of the emotion felt by an agent (i.e. how strictly appropriate that level of emotion is) in judging that agent’s moral character, blameworthiness of their immoral acts, and predictions of that agent’s future moral behavior.

Rajan Anderson¹, Rachana Kamtekar¹, Shaun Nichols², David Pizarro¹

**Racial Support for Gun Rights Among Black Americans**

We examined potential mediators and moderators of the political divide on U.S. gun attitudes. Viewing guns as a threat to vs. a source of safety and endorsing the U.S. culture of violent competition and the right to bear arms moderated the link between self-control and support for gun control. However, whites were more likely to view guns as a threat to personal health.

Nicholas Buttrick¹, *Sara Medina-Dievillers¹
1Univ. of Virginia

**The Science of Emotion and its Relevance to More Humane Institutions**

In this talk we will delve into the latest science of human emotion, and how it enables us to make a difference for human institutions, including prisons, hospitals, corporations, schools, and beyond. The talk will draw on relevant research from a range of scientific disciplines, including psychology, neuroscience, and economics.

Dacher Keltner¹
1UC Berkeley

**The Phoebe Principle: Spend Time on Things That Matter**

The Phoebe Principle is a simple yet powerful concept that helps us prioritize our time and energy. It is based on the idea that we should spend our time on things that matter, rather than just things that are urgent or important. This talk will explore the evidence for the Phoebe Principle and how it can be applied in different contexts, including the workplace, academia, and personal life.

Rajen Anderson, Cornell Univ.

**New Directions in the Social Psychology of Firearms**

Room: Celestin A
Time: 11:00 AM - 12:15 PM
Chair: Nicholas Buttrick, Univ. of Virginia

How to understand the appeal of American gun culture and the potential for shaping public debate around firearms policy? This symposium brings together research from lab studies, large-scale surveys, and field studies with relevant actors, to examine the key role of feelings of threat and safety, across political and sociodemographic lines, in the construction of gun ownership, attitudes, and behaviors.

Samuel Sommers¹
1Tufts Univ.

**A True Friend with Six Hearts** - Using Firearms to Cope with Psychological Threat

The majority of American gun owners report owning a gun for protection, yet owning a gun significantly increases the likelihood that a household member will die violently. To understand this, we test if guns provide safety from psychological threat, by hooking participants to a breathalyzer machine as they alter their trust in the gun and comparing anxiety when they hold a control object, the hand of a friend, or a deactivated pistol.

Nicholas Buttrick¹, *Sara Medina-Dievillers¹
1Univ. of Virginia

**Explaining the Gun Divide in the United States**

We examined potential mediators and moderators of the political divide on U.S. gun attitudes. Viewing guns as a threat to vs. a source of safety and endorsing the U.S. culture of violent competition and the right to bear arms moderated the link between self-control and support for gun control. General threat perceptions did not. Race also moderated the link such that it was weaker among African American people.

Joy Losee¹, Gabriele Pogge¹, Liz Kerner¹, Nikolette Lipsey¹, James Shepperd²
1Univ. of Florida, 2North Carolina State Univ.

**Pitting Anti-Black Attitudes Against Gun-Rights Advocacy**

Dominant resistance to gun control centers on individual rights. However, when meta-analytic attitudes towards Black Americans override this resistance? Across two studies, we examine whether attending to the growing rate of Black gun owners who are legally permitted to carry concealed weapons would lead to increased resistance to gun control policies.

Invited Session

**[79] Legacy Award Symposium: Phoebe Ellsworth**

Room: Strand 13
Time: 11:00 AM - 12:15 PM
Chair: Robin Edelstein, Univ. of Michigan

In the tradition of Kurt Lewin, this symposium examines the contributions of women towards real-world problems (drawing on Phoebe Ellsworth’s work on emotion) and the contribution of applied research to basic theory (drawing on her work in law).

Phoebe Ellsworth¹
1University of Michigan
increases gun control support amongst White Americans most likely to advocate for gun rights.

Gerald Higginbotham¹, David Sears¹, Lauren Goldstein¹

UCLA

Framing Effects of Youth Gun Violence Prevention Strategies

Gun violence in urban neighborhoods is an urgent public health issue that disproportionately impacts the well-being of youth. We examine how framing gun violence as an issue of individual choice vs. societal circumstance shapes implicit beliefs about gun control and support for behavioral interventions and structural policy reform.

Cintia Hinojosa¹, Christopher Bryant¹

Univ. of Chicago, School of Business

[81] Partnering to Empower: Real-World Educational Experiences that Engage Youths’ Identities

Room: Celestin B

Time: 11:00 AM - 12:15 PM

Chair: Sarah Lyons-Padilla, Stanford SPARQ

Co-Chair: Maryam Hamedani, SPARQ | Stanford Univ.

How can educators effectively design psychologically-informed, culturally-tailored educational interventions that empower low-income youth of color while leveraging their identities? In this session, we showcase four unique research-practice partnerships that explore identity-relevant approaches to expanding students’ agency through school-based and extracurricular programs.

[82] Status & Power: Revisiting Old Questions, Revealing New Insights

Room: Celestin C

Time: 11:00 AM - 12:15 PM

Chair: Emily Reit, Stanford Univ

Co-Chair: Michael Schaerer, Singapore Management Univ.

This symposium revisits long-standing assumptions about core features of social hierarchy—status and power. How do status hierarchies improve team functioning? Is the relationship between power and disinhibition as straightforward as we assume? This session will feature talks at different levels of analysis (e.g., individual, dyadic, group) address these questions and offer new insights.

[83] Power Analysis: Insights and Techniques from the 2019 Working Group

Room: Celestin B

Time: 11:00 AM - 12:15 PM

Chair: Roger Giner-Sorolla, Univ. of Kent

Co-Chair: Andreas Kearon, Univ. of Cambridge

We present new research on the critical interplay between economic perception and reality. In four talks we discuss how a zero-sum mindset shapes perception and behaviors, how lower subjective SES instills zero-sum beliefs through perceived deprivation, how perceived deprivation increases support for redistribution, and how people reinterpret their purchasing to align with political attitudes.

[84] Capturing Stigma: Novel Approaches

Room: Celestin B

Time: 11:00 AM - 12:15 PM

Chair: Mora Reinka, Univ. of Connecticut

Co-Chair: Diane Quinn, Univ. of Connecticut

Stigma research has grown dramatically in the last several decades. This self-report to capture the experiences and emotions of being a target of prejudice and discrimination. Here we present research showcasing a variety of novel theoretical and methodological applications including virtual reality, webscraping, ecological momentary assessment, and intragroup stigma.
upwards rather than downwards social comparisons. 

Martino Ongis 1, Shai Davidi 2
1 The New School for Social Research, 2 Columbia Business School

Drivers of Equality: Personal Relative Deprivation, Not Subjective Status, Explains Support for Redistribution
What factors explain support for economic redistribution? In three studies (N = 964), we examined whether evaluating one’s circumstances compared to others (i.e., feeling deprived) better predicts support for redistribution than knowing one’s subjective status. Across studies, relative deprivation and political orientation, but not perceived status, consistently explained redistributive support.

Martin Day 1, Maggie McInnis 1, Michael D. Ryan 1
1 Memorial Univ. of Newfoundland

Boycotting, Boycoting, and Cheap Talk
When corporations take political positions, consumers often react by decreasing support or purchasing less. However, in spite of consumer reports changed, there is limited evidence that this affects firms’ financial performance. Examining this inconsistency, we find that even highly motivated consumers’ purchasing behavior remains at the status quo.

Michael Norton 1, Brayden G. King 2, Katherine A. DeCelles 3
1 Harvard Business School, 2 Northwestern Univ., 3 Univ. of Toronto

[86] Between East and West: Identity and Ideology in the Mideast
Room: Celestin H
Time: 11:00 AM - 12:15 PM
Chair: Angela Maitner, American Univ. of Sharjah

This symposium highlights working investigating how identity and ideology influence self-construal, retaliatory behavior, apology, and regret in an underrepresented region: the Middle East. Talks show that people in the region tend to express self-assertive interdependence, respond strongly to offenses while refusing to apologize for their own, but express regret when experiencing negative outcomes.

ABSTRACTS

Self-assertive Interdependence in Arab Culture
Arabs represent a major cultural group, yet one that is relatively neglected in cultural psychology. Across three studies, we find that Arab culture is characterized by a unique form of self-assertive interdependence. These findings contribute to current efforts by cultural psychologists to go beyond the prevailing East vs. West paradigm.

1 VSE Business School, 2 ESCP Business School, 3 Konan-Fagler Business School, UMC at Chapel Hill, Univ. of Michigan

Honor and Goal Pursuit: How Honor Can Interfere with One’s Own and Others’ Goal-directed Behaviors
We examined the role of honor concerns in individuals’ goal-directed behavior. Members of an honor (vs. non-honor) threat by sabotaging the goals of the source, b) to perform their subsequent goals following an honor (vs. non-honor) threat, and c) to display goal derailment following an honor (vs. non-honor) threat. Ayse Uskul 1, Susan E. Cross 2, S. Arzu Wasti 1, Phia S. Salt hn 1
1 Univ. of Kent, 2 Iowa State Univ., 3 Sabancı Univ., 4 Davidson College

Understanding the Inverse Relationship between Honor and Apology
Preserving status is key in honor cultures. This can make apologizing risky, and presents a paradox: while apologies are especially important in honor cultures, they are likely underused. Two studies from Turkey and the US show a negative relationship between honor and apology. Our findings also highlight the importance of reputational concerns and offense intentionality in this process.

Nava Calouri 1, Michele Gelfand 2, Yoon Young Sim 1
1 Univ. of Virginia, 2 Univ. of Maryland

“What Was Meant To Be” versus “What Might Have Been”: Cross-cultural Similarities and Differences in Counterfactual Thinking
Comparing Arab and white American participants, we find similarities in the process of upward counterfactual thinking in response to negative events with minor consequences, but differences in the process of upward counterfactual thinking in response to events with severe consequences.

[87] Validity of Psychological Measurement in the Age of New Methods
Room: Empire A
Time: 12:45 PM - 2:00 PM
Chair: Sandrine Muller, Columbia Univ.
Co-Chair: Kai Horstmann, Humboldt-Univ. zu Berlin
New methods such as smartphone sensing and experience sampling are revolutionizing psychological research. Yet, their validity remains an open question often overlooked, threatening the interpretability of research findings. Through short presentations followed by a Q&A, we will discuss the importance of assessing validity in the age of new methods, as well as challenges of such approaches and possible solutions.
Sam Gosling, Univ. of Texas at Austin, Joanne Chung, Tilburg Univ., Kai Horstmann, Humboldt-Univ. zu Berlin, Sandrine Muller, Columbia Univ.

Room: Empire C
Time: 12:45 PM - 2:00 PM
Chair: Bennett Callaghan, Yale Univ.
Economic inequality is a defining challenge of our times. In this symposium, four talks investigate the ways in which inequality is legitimated and reproduced because it clutches along intergroup lines. Across the talks, we examine how intergroup stereotypes and narratives justify inequality and, further, how intergroup inequality stymies cooperation and the adoption of equity-enhancing policies.

ABSTRACTS
Race-Status Associations Predict Whites’ Hiring Preferences
Race-status associations (RSAs) link Whites with high status and Blacks with low status. This work explored RSAs across domains. Occupational-based RS predicted conservatism, while Rank- and Trait-based RSs predicted liberalism. Further, Occupation-based RSs predicted rejection of Black—and acceptance of White—status-seekers. Individuals vary in RSAs—and some RSs may help maintain inequality.

The Misperception of Racial Economic Inequality
Drawing from a preregistered study of a nationally representative sample of adults, we offer evidence that Americans underestimate the racial wealth gap. Respondents thought that the Black-white wealth gap was smaller, by around 40 percentage points in 1963 and around 80 points in 2016, than its actual size. We discuss how psychological science can better understand and control these misperceptions.

Michael Kraus1, Ivuoma Onyeador1, Natalie Daumeyer1, Julian Rucker1, Jennifer Richeson1
1Yale Univ.

White Americans Oppose Equality When It Threatens Racial Group Status
Would, across three studies, that exposing White Americans to information about racial, relative to purely class-based, inequality increases current perceived group status and reduces support for equity-enhancing policy. This research suggests that high-status motivations to maintain racial hierarchies impede efforts to address inequality, racial or otherwise, when it upholds group status.

High Economic Inequality May Stymie the Potential of Globalization to Reduce Intergroup Prejudice
Globalization brings the promise of integration and integration among a diverse set of people worldwide. But, globalization necessitates the necessary conditions for prejudice-reducing intergroup contact. We found evidence that economic inequality moderated the globalization-intergroup prejudice association. Further, concerns regarding intergroup resource competition mediated this association.

[89] The Unintended (and Hierarchy-Enhancing) Consequences of Well-Intentioned Efforts toward Social Justice

Room: Empire D
Time: 12:45 PM - 2:00 PM
Chair: Erin Cooley, Colgate Univ.

Social justice advocates share a desire for systemic social change but are often divided by their focus on separate systems of oppression (e.g., gender, race, class, climate). Our research reveals how well-intentioned attempts to mitigate inequality may, at times, amplify social differences—especially when intersecting systems of oppression are ignored.

ABSTRACTS

Among Social Liberals, Learning about White Privilege Reduces Sympathy, Increases Blame, and Decreases External Attributions for White People Struggling with Poverty

In recent research, we have found that white privilege lessons increase perceptions of racism when police violence is enacted by white officers. We examine the consequences of white privilege lessons for social justice attitudes and intentions.

Can Positive Stereotypes Have Negative Outcomes?: The Effects of Positive Gender Stereotypes on Men's and Women's Political Preferences

Four lab studies demonstrated that positive gender stereotypes, despite their flatulence, can lead to performance decrements. Exposure to the stereotype about women's lack of competence and men's ability to lead to decreased performance in stigmatized domains - math for women and emotion recognition for men. These results are consistent with accumulating evidence about the "dark side" of positive stereotypes.

1Tel-Aviv Univ., 2Tel-Aviv Univ., 3Gonbadkouk Univ.

Does Social Class Moderate the Political Divide on Climate Change?: The Roles of Education, Income, and Individualism

In a nationally representative dataset of the U.S. public, we find that the ideological divide in climate change opinions exacerbates what are higher education and income. However, education plays a stronger role in polarizing the views of conservative and liberal whites. Further, differences in individualism partially explain the increased political polarization among more educated individuals.

Matthew Ballew, Adam Pearson, Matthew Goldberg, Seth Rosenthal, Anthony Leiserowitz

1Program on Climate Change Comm., 2Pomona College, 3Yale Univ.

Exploring the Complex Intersection of Race and Class in Implicit Bias

Five studies investigated the intersection of race and class in implicit bias. To avoid ambiguities associated with target-group-based approaches, I use analyses sensitive to multiple sources of variation at the individual target level. Via this approach, I find main effects of both target race and SES but counter-intuitively observe non-significant responses to occur toward low-SES Whites.

UC Berkeley

[90] Evolutionary Mismatches for Relationships, Politics, and Goal Pursuit

Room: Strand 10
Time: 12:45 PM - 2:00 PM
Chair: Juliana Fiore, Florida State Univ.
Co-Chair: Andrea Meltzer, Florida State Univ.

Modern advances lead to rapid environmental changes that outpace the abilities of humans to adapt. Many evolved psychological mechanisms thus may be maladapted to the modern environment. The talk in this symposium will draw upon this idea to understand how evolutionary novel features of the environment impact people's romantic relationships, leadership selection, and goal pursuit.

ABSTRACTS

It's a Mismatched World

Why are humans, who now live longer, safer, and freer lives than ever before, facing increasingly greater psychological dilemmas? In this talk, the evolutionary mismatch process is introduced as an explanation and platform for examining modern problems, areas of mismatch, and implications for psychological science and policy are considered.

Norman Li, Mark van Vugt, Stephen Colarelli

1Singapore Management Univ., 2Univ. of Amsterdam, 3Central Michigan Univ.

Hormonal Contraction: A Possible Evolutionary Mismatch for Relationships

Hormonal contraceptives (HCS)—a novel, modern development—alter hormones associated with pair-bonded relationships. HCS use after relationship formation may alter women's relationship outcomes. Indeed, two longitudinal studies of newlyweds demonstrated that when their HCS use is incongruent with their use at relationship formation, women report lower sexual and marital satisfaction.

Juliana French, Andrea Meltzer

1Florida State Univ.

The Appeal of a Strong Leader: Evidence for Mismatch?

People use evolved heuristics to select leaders that may be mismatched when applied in novel settings. Four studies and one election show that people (a) attend more to physical cues of leaders than competence cues; (b) attribute organizational successes disproportionately to leaders; and (c) base their leadership preferences on their own physiological and developmental needs.

1Univ. of Amsterdam, 2Univ. of Zurich

Evolutionary Mismatches in Self-regulation: Having Long-term Goals but Using Short-term Standards

Society has changed at a faster pace than human biology, leading to mismatches between the ancestral and modern context of goals and skills. We discuss one implication of modern goal pursuit—that long-term goal pursuits don't align with short-term standards. Across 5 studies, we show that the presence of these standards draws attention, leading to nonlinear biases in how individuals evaluate progress.

Michelle vanDellen, William Chiavone

1Univ. of Georgia

[91] The Developmental Origins of Dehumanization

Room: Strand 13
Time: 12:45 PM - 2:00 PM
Chair: Rachel Leshin, New York Univ.
Co-Chair: Jamie Barden, Howard Univ., Washington DC Govt.

Dehumanization is a psychological phenomenon that licenses acts of discrimination, moral exclusion, and violence (Haslam, 2006). Despite this harmful implication of modern goal pursuit—that long-term goal pursuits don't align with short-term standards. Across 5 studies, we show that the presence of these standards draws attention, leading to nonlinear biases in how individuals evaluate progress.

Rachel Leshin, Marjorie Rhodes

1New York Univ.

Generic Language Leads Children to Attribute Fewer Mental Attributes to Members of a Novel Social Group

We investigated the effects of generic input on 5-10-year-old children's attribution of mental life to a novel social group. Children either heard generic or specific descriptions about group members and attributed fewer mental disorders (e.g., feeling proud) to the "generic" condition. This pattern held when comparing children's attributions to both the "specific" and "generic" control condition.

Niamh McLoughlin, Telli Davoodi, Kathleen Corriveau

1Boston Univ.

The Role of Discrimination and Immigration Background in the Relationship between Mentalizing and Bystanders' Judgments about Bullying

Discrimination and dehumanization have been a focal interest for social psychologists, however, these constructs have infrequently been applied to bullying. Also, the role of theory of mind in discrimination and bullying has been understudied. This research examines the mechanisms underlying responses to bullying, attending to theory of mind, discrimination and immigration background.

Seçil Gönlütsal, Kelly Lynn Mulvey

1North Carolina State Univ.

[92] Psychologists in Politics: Getting Heard and Having an Impact

Room: Celestin E
Time: 12:45 PM - 2:00 PM
Chair: Chris Crandall, Univ. of Kansas
Co-Chair: Jamie Barden, Howard Univ., Washington DC Govt.

Psychologists who are elected officials/activists will discuss balancing professional and political lives. Topics include how intergroup awareness can help conflict resolution, how a scientific approach to politics can check ideology, how teaching contemporary issues can bring psychology to life, how research can be informed by public issues, and how to avoid alienating stakeholders.

Jamie Barden, Howard Univ., Washington DC Govt., Cynthia Pickett, UC Davis, Steve Newell, American Association for the Advancement of Science, Ellie Shockley, North Dakota Univ. System

Attitudes and support for public policy can shift as a function of numerous factors, from subtle changes in framing to large-scale interventions. The research in this symposium explores how framing and allocative decisions can be informed by insights from social psychology to address critical social issues, including redistributive justice, police-community relations, and environmental policy.

Barriers to Reparations: How Framing, Stereotype Endorsement, and Beliefs about Inequality Undermine Support for Restorative Justice

Reparations have gained much political attention, but little is known about the psychological barriers to their support. We find that Whites who support reparations were most opposed to reparations 1) framed as financial (e.g., cash) vs. material (e.g., education benefits) and 2) when they held stereotypical beliefs about economic disparities in America to individual vs. structural causes.

Amy Krosch, Mikaela Spruill, Stephanie J. Tepper

1Cornell Univ.

Choosing to Make a Difference: The Salience of Choice Increases People’s Support for Costly Environmental Policies

People are reluctant to support environmental policies that restrict consumption and individual freedom. This research identifies one driver of environmental policy support—a sense of choice. Across five studies, we find that people with a stronger sense of choice, and people exposed to environmental appeals framed as a choice, are more likely to support environmental policies.

Victimhood as the Gravitational Force in Moral Judgments

Room: Celestin F
Time: 12:45 PM - 2:00 PM
Chair: Cristian Rodriguez, UC Irvine
Co-Chair: Chelsea Schein, The Wharton School of Business

Moral concerns vary immensely, but can this complexity be reduced into basic processes? Emerging research suggests perceptions of victimhood underlie moral views. Asking who is victimized/capable of being harmed (abortion, mother or fetus) can explain competing moral perspectives. In this symposium, research from varied perspectives explores the role of victimhood in moral judgment.

ABSTRACTS

Liberals and Conservatives See Different Victims: Understanding Moral Disagreement through Assumptions of Vulnerability

We develop and validate a scale that measures vulnerability to harm. Our results show that assumptions about vulnerability in participants exclusive of predictive moral judgments across several domains, from religion to politics. Our approach connects moral taxonomies that describe interactions between accounts of moral cognition that ground moral judgment in common cognitive processes.

Duke Univ., Univ. of North Carolina at Chapel Hill

Victims of Abortion, Victims of Hate Speech: Victimhood Appraisal Explains Moral Disagreements in Multiple Domains

Is there a common process between moral judgments related to abortion and freedom of speech? Emerging research presents victimhood perceptions as the core of moral reasoning. We use a scale that measures the extent to which people believe that a group is vulnerable to harm. Our results show that assumptions about vulnerability in participants exclusive of predictive moral judgments across several domains, from religion to politics. Our approach connects moral taxonomies that describe interactions between accounts of moral cognition that ground moral judgment in common cognitive processes.

When They Go Low, We Go High, But Only If We Have Power: Low Power Licenses Greater In Civility

Michelle Obama famously noted, “when they go low, we go high.” A year into the Trump administration, this tone shifted dramatically when the adage shifted to: “When they go low, we kick them.” Although anecdotal, these set of statements highlight a larger reality about the nature of power and deference. People low in power have greater leniency to perform a wide range of deviant behaviors. Chelsea Schein, Nina Strohminger, Maurice Schweitzer

The Wharton School of Business, Univ. of Pennsylvania

The Costs of Moralizing: Investigating the Link between Moralization and Harm-reducing Policy Support

What do vaping, gun-safety training, and PrEP use all have in common? They are exact strategies that prioritize the reduction in harm over cessation of the action. In two experiments, we (1) investigated how moralization plays a role in support for harm reducing policy, and (2) explored how harm perception and moral emotions influence this relationship.

[97] Sharing Psychology: The View From Other Disciplines
Room: Empire A
Time: 2:15 PM - 3:30 PM
Chair: Negin Toosi, California State Univ. East Bay
Inspired by the concurrent calls to “give psychology away” and to decolonize “psychological science”, this symposium provides a chance to reflect on what happens when we share psychology with others—from their perspectives. The presentations will highlight projects in the fields of the economics and law. First, psychologist Laura Babbitt will introduce Drusilla Brown, economist, head of the Labor Lab, who will reflect on their interdisciplinary collaboration addressing working conditions for garment factory workers in countries around the world. The psychologist Sam Sommers will introduce Lisa Kavanagh, public defender and director of the CPCs Innocence Program, who will describe her work and the role that psychology can play. She will then introduce Fred Clay, who, after being wrongfully imprisoned for almost two decades, was exonerated with the assistance of psychologists who served as expert witnesses. Dr. Brown, Ms. Kavanagh, and Mr. Clay will all be invited to share their thoughts on what psychologists do well and what we could do better.

ABSTRACTS
Psychology Meets Economics: Improving Working Conditions for Factory Workers Around the World
As an economist who collaborates with social psychologists to understand what predicts practices such as sexual harassment, forced labor, and pay deception in factories, and to identify the interventions that should result in better working conditions. Dr. Brown will share her insights on the unique contributions psychology can make to address these issues.

Drusilla Brown 1, Laura Babbitt 2
1Tufts Univ.

Psychology Meets Law: Testifying on Behalf of Those Seeking Justice
Lisa Kavanagh, director of the innocence program at the state’s attorney’s office in Massachusetts, and her client Frederick Clay, exonerated after almost 38 years in prison for a crime he did not commit, will present the experiences insights into the potential contributions of psychologists to educate judges and the public about bias in the judicial system.

Lisa M. Kavanagh 1, Frederick Clay 2, Sam Sommers 3
1CPS Innocence Project Massachusetts, 2Lawler MA, 3Tufts Univ.

[98] Child’s Eye View: Learning Gender Stereotypes in the Modern Era
Room: Empire C
Time: 2:15 PM - 3:30 PM
Chair: Sarah Lamer, Univ. of Tennessee, Knoxville
By middle childhood, girls often believe they are less competent than boys and shy away from stereotypes. They learn that boys are more likely to do math and science. Yet it is unclear how children’s environments transmit these beliefs. This symposium showcases research on how children learn about gender from the environments they encounter.

ABSTRACTS
The Transmission of Gender Stereotypes through Television Patterns of Nonverbal Emotion
We hypothesized that gender stereotypes may be transmitted via patterns of nonverbal emotion. Study 1 indicated that gender-stereotypical (vs. counterstereotypical) tv characters were treated more positively by co-characters. Studies 2 & 3 indicated that exposure to this role that the general stereotype (vs. the reverse) caused girls to feel more pressure to be feminine and to perform more gender-stereotypically.

Sarah Lamer 1, Paige Dvorak 2, Kristin Pauker 1, Ashley Biddle 1, Max Weilsbuc 1
1Univ. of Tennessee, Knoxville, 2Univ of Denver, 3Univ of Hawai'i

Transgender and Cisgender Children’s Stereotypes and Beliefs About Others’ Stereotypes
This research assessed transgender and cisgender children’s gender stereotype endorsement, their perceptions of others’ stereotypes, and their gender-congruent behavior. Results indicate that cisgender and transgender children distinguish between their perceptions of others’ gender stereotypes and their own behavior. There were no significant differences between groups.

Jennifer Rubin 1, Sein Gölügöz 2, Daniel Alston 1, Kristina Olson 1
1Univ of Michigan, 2Univ of Washington

How Language Inadvertently Perpetuates Social Stereotypes
This research found that identity language (e.g., “Let’s be scientists! Scientists explore the world!“) elicits stereotypes and leads to subsequent disengagement among girls, whereas action language (“Let’s do science! Doing science exploring the world!“) leads to more inclusive representations and engagement. Thus, subtle linguistic cues can dramatically slow the spread of harmful stereotypes.

Marjorie Rhodes 1, Sarah-Jane Leslie 1
1New York Univ., 2Princeton Univ.

Ambivalent Gender Attitudes in Childhood
We report the first evidence that children’s gender attitudes, like adults’, are ambivalent—comprising distinct but correlated dimensions of hostility and benevolence. Hostile and benevolent attitudes were lower in older (vs. younger) children, except boys’ benevolent attitudes, which did not differ across age. Benevolent attitudes were also lower in a more gender-equalitarian context (NY vs. IL).

1New York Univ., 2Victoria Univ. of Wellington

[99] Turning Negatives into Positives: Negatively-Valenced Interactions Can Benefit Relationships
Room: Empire D
Time: 2:15 PM - 3:30 PM
Chair: Korri Krueger, Univ. of Pittsburgh

Turning a Negative into a Positive: The Effects of Verbal Support and Affectionate Touch on Stress Buffering and Relationship Growth
This study examines how different forms of support can turn a stressful discussion into an opportunity for relationship growth. Participants engage in a stressful speech task and are randomly assigned to receive experimenter-verbal support, affectionate touch, both forms of support, or no support from their romantic partner. Dependent variables include stress reactivity and relationship outcomes.

Delaney Wu 1, Paige Harris 1, Nancy Collins 1
1UC Santa Barbara

Listening to Negativity Can Be Beneficial: The Role of Feeling Instrumental
Four experiments reveal when negative expressivity has relational benefits or costs. Negative (vs. neutral/positive) disclosures provided more chance for listeners to be instrumental (i.e., helpful) to express a desire for help. Listeners made to feel instrumental in response to negative disclosures reported relational benefits, listeners made to feel ineffective non-instrumental relational costs.

Korri Krueger 1, Amanda Forest 1
1Univ of Pittsburgh

The Critical Role of Problem-Solving in Romantic Relationships
Newlywed couples discussed 4 problems for 30 minutes. Observers and spouses rated several related questions of the problems and behaviors and spouses reported their marital satisfaction for 3 years. Controlling for observable- and couple-rated qualities of the problems and behavior, observer ratings of the “progress” made toward solving the problems predicted more stable marital satisfaction over 3 years.

Lindsey Hicks 1, James McNulty 2
1Florida State Univ.

Behavioral Variability Determines Whether Partners’ Negative-Direct Behavior Generates or Improves Relationship Quality
Three dyadic longitudinal studies reveal when partners’ criticism and hostility generates or improves relationship problems. Partners’ negative-direct behavior predicted growing problems when partners exhibited non-diagnostic affective imbalance toward each other. Partners’ negative-direct behavior was more beneficial when partners exhibited contextually sensitive variable behavior across time.

[100] Challenges of Interracial Coalition-Building: Perceptions of Allyship from Multiple Perspectives
Room: Strand 10
Time: 2:15 PM - 3:30 PM
Chair: Michelle Lee, New York Univ.
Co-Chair: Maureen Craig, New York Univ.

This work examines allyship from the perspective of allies and the people with whom they are allied. We identify challenges that affect the ways that we approach acts to (guilt), targeted group members’ perceptions of ally-action (suspicion), differing thresholds for seeing an ally by considering the effects of different individuals’ endorsement of White male allies among White and Black women.

ABSTRACTS
Guilt Trip: The Effect of White Guilt on Willingness to Engage in Racial Justice Allyship
Guilt may be necessary to promote allyship, but too much guilt may lead to a lack of motivation. We test a curvilinear model of guilt to predict Whites’ racial allyship behaviors, such as willingness to engage in discussions of racial inequity. We find evidence in support of this model: moderate levels of guilt predicts allyship, while greater guilt may actually be detrimental to allyship behavior.

Olivia Foster-Gimbé 1, L. Taylor Phillips 1
1WU, Stern School of Business

Is This Place For Me? Target Perspectives of Workplace Ally Prejudice Confrontations and Organizational Attraction
Workplace allyship initiatives assume that dominant group members do not have to do more to reduce inequality. However, we found in an experiment that Black participants questioned the ethics of prioritizing an ally who was part of a workplace that conflicted with a Black woman who confronted prejudice, which led to worse attitudes toward the organization. These findings suggest important implications for developing more effective and inclusive allyship initiatives.

Charles Chu 1, Leslie Ashburn-Nardo 2
1Stanford Graduate School of Business, 2Indiana Univ. – Purdue Univ. at Indianapolis

What Makes Someone an Ally? How Race Impacts Allyship
Does race influence when people are deemed to be allies to Black Americans? Participants reported that White Americans were more likely to engage in more allyship actions to be considered allies (vs. Asian or Hispanic Americans) (S1 & S3). Participants also perceived that White allies were more externally motivated and morally-obligated to support Black Americans, compared with minority allies (S2-3).

Michelle Lee, Maureen A. Craig
1New York Univ.

Will the Real Ally Please Stand Up: Promoting Perceptions of Allyship among Black and White Women in STEM Environments
Among Black women high in stigma consciousness, only a Black woman in a research team engaged in more allyship actions to be considered allies (vs. Asian or Hispanic Americans) (S1). Black and White women in STEM environments are expected to engage in more allyship actions to be considered allies (vs. Asian or Hispanic Americans) (S3). Participants also perceived that White allies were more externally motivated and morally-obligated to support Black Americans, compared with minority allies (S2-3).

1Butler Univ., 2Indiana Univ. – Purdue Univ. at Indianapolis

101) Understanding and Responding to Others Across Political, Moral, and Economic Divides
Room: Strand 13
Time: 2:15 PM - 3:30 PM
Chair: Shalini Gopalan, New York Univ.

Individuals differ in the ways that they understand and react to others’ perspectives, needs, and experiences. This symposium includes studies that investigate the factors that shape our understanding of others’, and how these understandings shape our responses and behaviors in the contexts of morality, politics, and economics.

ABSTRACTS
Your Need Doesn’t Appeal to Me: How Social Class Shapes Charitable Giving across Causes
This article assesses how the degree of necessity of social causes shapes the social class-prosociability relationship. Across four field experiments, we demonstrate that, due to a gap in sensitivity to need, higher- (vs. lower-) class individuals donate less to causes targeted at more pressing needs.
OPENING KEYNOTE ADDRESS

[102] Why Are We Imaginative, Intellectual, and Creative? Processes Underlying Openness

Room: Celestin A
Time: 2:15 PM - 3:30 PM
Chair: Hayley Jack, Univ. of Melbourne
Co-Chair: Margaret Webb, Univ. of Melbourne

Why are some individuals more imaginative, intellectual, and creative than others? These traits are part of the personality domain openness to experience, and this symposium reveals new insights into the psychological processes that underlie openness. The speakers experiment, longitudinal, and network methods to explore mechanisms of openness to experience.

ABSTRACTS

Remotely Close Associations: Openness to Experience and Semantic Memory Structure

In the current study, we used a network science approach to examine if the organization of semantic memory differs between high (n = 258) and low (n = 258) openness to experience (O). We found that the high O group's network was more interconnected and flexible, and that they generated more responses on average, including more unique responses, than the low O group.

Alexander Christensen1, Yoed Kenet1, Katherine Cotter1, Roger Beatty2, Paul Silvia1
1Univ. North Carolina at Greensboro, 2Univ of Pennsylvania, 3Penn State, 4University of British Columbia

Do ‘Unusual Experiences’ Make ‘Unusual Responses’ Seem More Likely?

We examined which strategy—deliberately adopting the other’s perspective or asking the other about his/her own past experiences—likely to improve accuracy of Israeli Jews and Arabs in predicting their opponent’s attitudes. Accuracy of both Arabs and Jews benefited but not from taking the other’s perspective, yet confidence in predictions was equally high in all three conditions.

Yarden Ashur1, Tail Eyal1, Nicholas Epley2
1Ben-Gurion Law and Police, Univ. of Chicago, 2School of Business

Evidence for Meta-ethical Monism: Moral Conviction Predicts Perceived Objectivity and Universality across Issues

Are people meta-ethical pluralists who generally perceive their moral attitudes as objectively true and universally applicable, or are people meta-ethical pluralists who perceive some moral attitudes but not others as objectively true and universally applicable? Across three studies, 21 issues, and 4,640 cases, the current research documented evidence consistent with meta-ethical monism.

G. Scott Morgan1, Linda Skitka2
1Drum Univ., 2Univ. of Minn at Chicago

Atlas Shrugs: Economic System Justification and Indifference to Inequality

In a multi-method research program, we show that economic ideology predicts self-reported and physiological responses to inequality. Participants who regard the economic system as justified (vs. unjustified) reported feeling less negative emotion (studies 1, 2, and 6) and exhibited lower corrugator activation and skin conductance (studies 3–5) when exposed to exemplars of economic inequality.

Shahrzad Goudarzi1, Ruthie Pliskin1, J. John Jost1, Eric Knowles1
1New York Univ., 2Leiden Univ.

[103] Whatever It Takes: Anti-social Strategies for Advancing Social Rank

Room: Celestin B
Time: 2:15 PM - 3:30 PM
Chair: Eric Mercadante, Univ. of British Columbia

Four talks examine anti-social strategies people use to ascend social hierarchies. Presenters discuss how tactics like cheating, political maneuvering, and disrupting social order promote increases in social rank in adults and adolescents, compare these strategies to social-routes to rank attainment, and identify personality dispositions and social factors that predict these behaviors.

ABSTRACTS

A Paradox of Pride: Hubristic Pride Predicts Strategic Dishonesty in Response to Status Threats

Why is hubristic pride, an anti-social emotion, positively associated with social rank? Findings from six studies show that hubristically proud individuals lie about their performance on a task but only when (a) their current status is threatened and (b) lying can earn them status. Hubristic pride may therefore foment a willingness to cheat to get ahead in situations where social rank is at stake.

1Univ. of British Columbia

Is It Fair to Get Ahead By Playing Politics? The Ambiguity of the Merit of Political Maneuvering Enables Self-serving Judgments

In seven studies (N = 3,187), we find that people have self-serving judgments of political tactics. When people see others advancing political tactics, they are more likely to believe in the fairness of the process that rewarded those people as unmeritorious; however, when individuals themselves get ahead through political tactics they are more likely to believe the process is meritorious and the process as meritocratic.

Ascending through the Hierarchy: When Those Who Lack Power Disrupt the Social Order of Their Group

We propose and find that dominance-motivated group members seek to create social disorder within their group in a way to seize control over others and ascend the hierarchy. Shown specifically for our conceptual model, social disorder-inducing tactics were not employed by people who already possessed power, by individuals motivated toward prestige, or by members of egalitarian control groups.

Misperception of the Power Disrupt the Social Order of Their Group

One of the greatest challenges for the functioning of societies in the information age is the prevalence and impact of misinformation. The current symposium presents recent theoretical, methodological, and empirical advances in understanding the identification of misinformation, interventions to improve the identification of misinformation, and challenges for the correction of misinformation.

The Partisan Brain: Evidence for an Identity-Based Model of Political Belief

We present an identity-based model of belief for understanding the influence of partisanship on fake news belief. We then describe three experiments in which people read news that concerned behaviors perpetrated by their political in-group or out-group and measured the extent to which they believed the news, and were willing to share the news on social media.

Jay Van Bavel1, Andrea Pereira2, Elizabeth Harris3

A Signal Detection Approach to Understanding the Identification of Fake News

We discuss the value of Signal Detection Theory (SDT) to disentangle two components in the identification of fake news: (1) accuracy in discerning factual information from misinformation and (2) response biases. The benefits of SDT are illustrated with a reanalysis of two experimental data sets, providing new insights into the role of cognitive reflection and motivated reasoning.

Can Digital Literacy Save Us from Fake News?

Using data from a national experiment (N = 4,907), we showed that providing “tips” on how to spot false news, which make it easier to assess the truthfulness of content despite limited information, can have lasting effects on how well people evaluate the accuracy of headlines. These findings provide the most comprehensive evidence to date on how digital literacy training can reduce belief in fake news.

Misinformation Correction: Can Source Untrustworthiness Counteract the Effects of Repetition and Contradiction on Information’s Truth-Value?

Repetition increases claims’ truth-value. Also, contradictions of earlier claims are perceived less true. Most misinformation correction strategies entail repetition and contradiction of the false claims, strengthening their validity. We test if the untrustworthiness of the source of previous claims can counteract repetition and contradiction effects, by prompting deeper scrutiny of information.

[106] Why We Buy: Novel Insights from Evolutionary Consumer Psychology
Room: Celestin F
Time: 2:15 PM - 3:30 PM
Chair: Tingting Liu, Univ. of Michigan - Ann Arbor
Co-Chair: Jon Maner, Florida State Univ.

This symposium examines the motivational underpinnings of consumer behavior through an evolutionary lens. Four talks discuss how motivation for consumption in food, luxury, and appearance-enhancing products are shaped by life experience, context, romantic relationships, and preferences for mates.

ABSTRACTS
Intrasexual Competition Increases Women's Trust in Gay Male Sales Associates' Product Recommendations
Four studies draw on evolutionary psychology and intrasexual female competition to explain why women enhance their trust in gay men's product recommendations more than other heterosexual women's - particularly when the products function to enhance women's physical appearance to attract potential mates.

Eric Russell1, Hannah Brashavski2, Mark Rosenbaum3, Sarah Hill4

Conspicuous Consumption in Committed Relationships: A Signal of Relationship Dissatisfaction by Heterosexual Men
Three empirical studies examine an overlooked social signal of commitment and mating success: men's luxury spending. Using surveys and experimental manipulations, we show a link between men's increased luxury spending on themselves and low satisfaction in their romantic relationship, with impacts on their wives' mate-retention tactics. Implications for marketing strategy will be discussed.

Parenthood Increases Desire for Conspicuous Luxury Goods
Little is known about how parenthood influences consumer behavior. A series of studies show that parenthood—manipulated or measured—leads to an enhanced desire for certain kinds of products. Parenthood increased desire specifically for conspicuous luxury goods because parents believe that their social status impacts the social status of their children.

The prominent view of face impressions is that we track relatively universal dimensions of trustworthiness and dominance. Yet the boundaries of the model have remained relatively untested. We present four studies that advance the current model, showing the process of forming an impression varies meaningfully across social groups and different individuals, and to various extents around the world.

Gender Biases in Face Impressions
Face impressions have crucial real-world outcomes. Using dimension reduction, computational models, face morphing, and face ratings, we find that women are at a disadvantage due to gender biases in impressions. First, impressions of women (vs. men) are more influential, reflecting gender stereotypes. Second, facial masculinity underlies competence impressions in the absence of attractiveness.

Sally Xie1, Jessica Flake2, Eric Hehman3
1McGill Univ.

How Much Does Appearance Matter? Idiosyncrasy in Impression Formation by Race and Gender
How subjective are intergroup impressions? Using cross-classified multilevel models of 408,130 face ratings, we found that first impressions arise from “a person’s mind” versus “a target’s face”, and do so differently across race and gender groups. Social perceptions are highly subjective overall, but what women “look like” matters more for impressions of women than of men.

Lexical Derivation of the PINT Taxonomy of Goals: Prominence, Inclusiveness, Negativity Prevention, and Trajectory
What do people want? Existing models have reached no consensus. We thus adopted a lexical approach and asked participants to rate their commitment to 105 goal-relevant words from the English lexicon. Analyses yielded 4 replicable goals: Prominence, Inclusiveness, Negativity Prevention, and Trajectory (the 4P’s taxonomy), which related to each of the 4 past goal-content scales, the Big 5, & well-being.

To Which World Regions Does the Valence-dominance Model of Face Impressions Apply?
Oosterhout and Todorov’s model, in which two dimensions (valence and dominance) underpin social judgments of faces, has emerged as a leading account of how people evaluate faces on social dimensions. To which world regions this model applies is as yet an unanswered question. Thus, we replicated Oosterhout and Todorov’s method in a range of culturally distinct world regions (total n > 11,000).

[K-130] Methods/Statistics
QRPs and Best Practices: Comparisons across Social Science Disciplines and Types of Institutions
Helen Harton¹, Zachary Meehan¹, Anna Garner¹, Alba Karan²
¹Univ. of Northern Iowa, ²Univ. of Delaware, ³Univ. of Maryland, ⁴Florida International Univ.

#SPSP2020 / 117
SATURDAY/ 2:15PM - 3:15PM

Using Machine Learning (Word Embeddings) to Uncover Gender Stereotypes in Child and Adult Language Corpora
Victor Yang1, Tessa Charlesworth1, Thomas Mann1, Benedek Kurdi2, Mahzarin Banaji2
1Harvard Univ., 2Harvard Univ.

K-146] Methods/Statistics
Contact Modality and Representation of Mobile App User Characteristics: A Comparison of Email Distribution vs. In-app Message
Victoria Springer1, Carlene Gonzalez2, Kunal Seth1, Friedemann Wachsmuth1
1Abode Systems

K-147] Psychophysiology/Genetics
Social Disconnectedness - An Underrated Health-risk Factor?: A Systematic Review of the Literature on the Relationship between Social Connectedness, Everyday Stress, and Allostatic Load
Anders Larrabee1, Sonderlund1, Trine Thilsing2, Jens Søndergaard3
1Univ. of Exceter, 2Univ. of Southern Denmark

K-148] Psychophysiology/Genetics
Psychophysiology/Genetics
Variation in Female Sexual Orientation: Biological and Social Correlates in Congenital Adrenal Hyperplasia
Emily Reitz1, Lindsey Palmer1, Adriene Bell2, Kristina Bryk1, J. Michael Bailey3, Sheri Berenbaum1
1Penn State Univ., 2Univ. of Michigan, 3Northwestern Univ.

K-150] Psychophysiology/Genetics
The Effect of Social Psychological Interventions on Students’ Hair Cortisol Levels in Academic Contexts
Hyon Joon Park1, Peter Ruberton1, Jackson Harper1, Jonathan Cook1
1Penn State Univ.

K-151] Psychophysiology/Genetics
The Link between Cortisol Reactivity and Perceived Task Difficulty Depends on Cultural Background
Jeong Ha Choi1, Christopher Coe1, Yuri Miyamoto1
1Univ. of Wisconsin - Madison

K-152] Psychophysiology/Genetics
Learning to Relax: The Impact of Biofeedback and Yoga on Salivary Cortisol Reduction
Weston Phipps1, Rebekkah Wall2, Amber Abernathy2, Ca Sandra Stanbrough2,3
1Missouri State Univ., 2Springfield, 3Missouri State Univ.

K-154] Religion/Spirituality
Implicit and Explicit Measures of Death Attitudes
Abigail Ehrensfield1, Abraham M. Rutteck1
1California State Univ., Northridge

K-155] Religion/Spirituality
The Contributions of Eco-spirituality to Pro-environmental Commitments
Adam Baimel1, Ara Norenzayan2
1Univ. of Oxford, 2Univ. of British Columbia

K-156] Religion/Spirituality
Don’t Throw Stones at My Chapel! Defensive Religion/Spirituality and Benevolent Sexism beyond the White/Black Dichotomy
Lylian He1, Audun Archibald2, Yolanda Niemann3
1Univ. of North Texas

K-157] Religion/Spirituality
DeMISTifying Muslim American Adolescents: An Exploration of Social Networks and Civic Behavior in an After-school Youth Program
Maneeza Daswood1, Valerie Purdie-Greenaway1
1Columbia Univ.

K-158] Religion/Spirituality
Perceived Scope of Scientific Inquiry
Evan Balkom1, Virginia Alogna1, Jamin Halberstadt3
1Univ. of Virginia, 2Univ. of Kansas, 3Univ. of Otago

K-159] Religion/Spirituality
Religious Tolerance and Conservatism: A Comparison across Religious Groups
Cory Sanders1, Richard Remedios3
1Northernwest Univ.

K-160] Religion/Spirituality
Religious Priming Increases Self-Identification as a Pornography Addict
David de Jong1, Casey Cook2
1Western Carolina Univ., 2Univ. of North Carolina at Chapel Hill

K-161] Religion/Spirituality
When a Loving God May Not Matter: Generosity toward Strangers
Simran Kaur1, Dominique Treboux1
1Saint Joseph’s College

K-162] Religion/Spirituality
Religious Commitment Reduces and Increases Prejudice: The Important Mediating Role of Religious Ethnocentrism
Gary Leak1, Thomas Lee Budesheim1, Laura Finken3
1University of Exeter, 2Univ. of Kentucky, 3Clemson Univ.

K-163] Religion/Spirituality
Does Religiousness Have More Impact on Women? Gender Differences in the Effect Mechanism of Religiousness and Spirituality in Emerging Adulthood
Julianna Olah1, Beatriz Koronczai2
1Eotvos Lorand Univ., 2Budapest University

K-164] Religion/Spirituality
The Cleansing Purity of Religion: Disgust, Religious Conservatism, and God Concept
James Kucinski1, John Terrizzi2
1Texas Woman’s Univ., 2Texas A&M Univ.

K-165] Religion/Spirituality
Relationships among Stress, Sleep, and Spiritual Fitness: A Secondary Analysis of Data on Military Service Members
Zainah Abuhwaha1, Kathleen Charters1, Josh Kazman1, Patricia Deuster2
1Henry M. Jackson Foundation, Consortium for Health and Military Performance (CHAMP), 2Uniformed Services Univ.

K-166] Religion/Spirituality
A Habit Theory Perspective
Mary Arena1, Jennifer Labrecque1
1Francis Marion Univ.

K-167] Religion/Spirituality
Understanding the Role of Individuals’ Personal, Social, and Community Life
Wade Johnson1, Manyu Li1
1Univ. of Louisiana at Lafayette

K-168] Religion/Spirituality
Understanding Religious Service Attendance among College Students: A Habit Theory Perspective
Mary Arena1, Jennifer Labrecque1
1Francis Marion Univ.

K-169] Religion/Spirituality
Feeling Connected to Humankind and Nature: Impact of Religiosity, Spirituality, and Positive Emotions
Megan Haggard1
1Francis Marion Univ

K-170] Religion/Spirituality
Darwinian Discomfort: Terror Management Implications for Belief in Science
Meleah Marquis1, Ronald Wright2
1Southern Nazarene Univ., 2University of Southern Mississippi
[K-173] Religion/Spirituality
Investigating the Role of Relationships in Atheists’ Perceptions of Meaning Following Experiences of Death
Melissa Soenneken1, Kenneth Vail2
1California State Univ, Channel Islands, 2Cleveland State Univ

[K-174] Religion/Spirituality
Examining Spiritual Exercises and Self-transcendent Positive Emotions
Millicent Currie1, Anthony H. Ahrens1
American Univ

[K-175] Religion/Spirituality
Creating an Implicit Religious Association Word Fragment Completion Task
Nicholas Pipper1, Jaden Dynness1, Melissa Soenneken1
1California State Univ, Channel Islands

[K-176] Religion/Spirituality
The Relationship between Anthropomorphism of God and Beliefs in Tempting Fate
Richelle Joy Chia1, Albert Kai Chung Lee1
1Kyung Hee Technological Univ

[K-177] Religion/Spirituality
Doubt, Openness, and the Exploration of Religious Uncertainty
Robert Arrowood1, Cathy Cox1, Kenneth Vail2
1Texas Christian Univ, 2Cleveland State Univ

[K-178] Religion/Spirituality
Self-determination Theory and Religion: Determining when Religiousity Translates into Moral Behavior
Rosemond Lorona1, Stephen Martin2, Jo-An Tsang3, Wade Rowatt2
1Point Loma Nazarene Univ, 2UC Davis, 3Baytel Univ

[K-179] Religion/Spirituality
God and Country: Defending Against Reminders of the Cross in Christian Churches
Shelby Massy1, Scott Drabentst1
Southern Nazarene Univ

[K-180] Religion/Spirituality
The Influence of Same-sex Couples’ Religiousness on Finesses to Adopt
Travis Cronel1, Maria Maranjare1
1Univ of Houston-Downtown

Poster Session L
Room: Elite Hall
Time: 3:30 PM - 4:30 PM

ABSTRACTS

[L-001] Belonging/Rejection
The Role of In-group Norm Consistency in Protecting Psychological Well-being Following Social Exclusion
Adilene Osnaya1, Allison Skinner2, Alyssa Croft3, Clara Atkinson1, Jacob Cheadle2
1Purdue Univ, 2Univ of Georgia, 3Univ of Arizona, 4Univ of Texas at Austin

[L-002] Belonging/Rejection
Shame, Belonging, and Gender: Gender Differences in Strategies for Regulating Shame When the Need to Belong Has Been Heightened
Andrea Yetzer1, Wendi Gardiner2
1Northwestern Univ

[L-003] Belonging/Rejection
Eat, Don’t Feel – Emotional Suppression Moderates the Link between Exclusion and Unhealthy Eating Patterns
Carla Zimmerman1, Joshua Knight1
1Colorado State Univ - Pueblo

[L-004] Belonging/Rejection
Examining Belonging Pathways for Students Self-reporting as Disabled
Erick Gaudello1, Nicole Brocato2, Shannon Brady3
1Wake Forest Univ

[L-005] Belonging/Rejection
Collective Effervescence and Everyday Activities
Esha Naidu1, Shira Gabriel2, Elaine Paravati1, Carrie Morrison2, Kristin Ganye1
1Univ of Buffalo, 2Univ. at Buffalo, SUNY

[L-006] Belonging/Rejection
Belonging Uncertainty Mediates Racial, Ethnic and Gender Achievement Disparities in Advanced Math Courses
Fabiana De Lima1, Christopher Rozek1
1Stanford Univ

[L-007] Belonging/Rejection
Breaking Up Is Hard to Do: The Role of the Self in Romantic Re-Inclusion
Jacqueline DeAnda1, Michael Langlais2, Edward Anderson1, Shannon Greene1
1Univ of Texas at Austin, 2Univ of North Texas

[L-008] Belonging/Rejection
Effects of Social Exclusion and Affect-Regulation Drinking Motives on Implicit Alcohol-Related Cognitions
Jorge Martins1, Kristen Lindgren2, M Lynne Cooper1, Bruce D. Bartholow1
1Univ of Missouri, 2Univ of Washington

[L-009] Belonging/Rejection
Trait Rejection Sensitivity Moderates the Impact of Opioid Receptor Blockade on Social Threat
Kristina Tcholova1, Jennifer Bartz2
1McGill Univ

[L-100] Belonging/Rejection
Increasing Resilience in the Face of Social Stress by Changing Implicit Theories
Maire Ford1
1Loyola Marymount Univ

[L-011] Belonging/Rejection
Changes in Alcohol Use and Outcomes Predicted by Belongingness and Race
Mary Tomkins1, Clayton Neighbors1
1Univ of Houston

[L-012] Belonging/Rejection
Relationship between Characteristics of Recreation Behavior and Self-affirmation
Masako Teraguchi1, Shinji Ikamawa1, Kenichiro Nakashima1
1Kobe Univ

[L-013] Belonging/Rejection
Does Social Rejection Elicit Intercultural Approach and Intrapersonal Avoidance Motives?
Megan Knowles1, Yanine Hess2, Tamir Valdman2
1Franklin & Marshall College, 2Purchase College, SUNY, 3Cleveland State Univ

[L-014] Belonging/Rejection
Reminders of a Stigmatized Status Might Help Smokers Quit
Mihir Pyakuryal1, Marie Helweg-Larsen2
1Univ of Michigan, 2Dickinson College

[L-015] Belonging/Rejection
Rejection Sensitivity Influences Men’s Labeling of Nonconsensual Sex as Sexual Assault, Via Adversarial Heterosexual Beliefs
Monica Yndo1, Meghan Crabtree2
1Concordate Univ, Texas, 2Colorado State Univ

[L-016] Belonging/Rejection
Left out at Your Best Friend’s Benefit: Wariness in Response to Your Friend’s Inclusion at Your Expense
Randy Lee1, Gizehm Surenkok1, Vivian Zayas1
1Cornell Univ

[L-017] Belonging/Rejection
The Critical Role of Belonging: Racial Terrorism and Mental Health
Shoiya Shodiyas-Zeumault1, Michelle Aiello1, Cassandra Hinger1, Laura Coburne1
1Georgia State Univ

[L-018] Belonging/Rejection
Man’s Best Friend?: The Effects of Being Rejected by a Pet
Stephanie Richman1
1Brown Univ

[L-019] Belonging/Rejection
Bolstering a Sense of Belonging among Students from Low SES Backgrounds: The Mediating Role of Absenteeism and Teacher-student Relationships
Tara Rajagopal1
1Stanford Univ

[L-020] Belonging/Rejection
Is Self-awareness Always Beneficial? Self-concept Clarity Moderates the Effect of Social Rejection on Anxiety
Trevor Shannon1, Matison Mc Cool1, Brian Bulla2, Richard Pond1, Nora Noel1
1Univ of North Carolina at Wilmington, 2Univ of Southern Mississipp

[L-021] Diversity
Diversity Awards and College Admissions Decisions
Adam Smiley1, Cheryl Kaiser1
1Univ of Washington

[L-022] Diversity
“What Makes Us Complete”: Hybrid Multicultural Identity and Its Development
Andrea Belgrade1, Shima Sadaghiani1, Mari Kira1, Fiona Lee1
1Univ of Michigan

[L-023] Diversity
It’s Black and White: Expanding Who Benefits from Diversity in Order to Increase Support for Diversity Efforts
Ariana Munoz-Salgado1, Taylor Ballinger2, Jennifer Crocker2
1Univ of Michigan, 2Ohio State Univ

[L-024] Diversity
Parents’ School Choice for Their Children: Racial Attitudes and Racial Composition of Classrooms
Craig Brinkman1, Shira Gabriel1, Shelley Kimeberg1, Michael Poulin1, Jennifer Valenti1
1Univ at Buffalo, SUNY

[L-025] Diversity
Group Selection Decisions (vs. Case-by-case Selection Decisions) Lead to Diversity
Gaozhu Zhou1, Valerie Purdie-Greenaway2, Rainer Romero-Canyas2, Gregory Walton2
1Columbia Univ, 2National Environmental Defense Fund, 3Stanford Univ

[L-026] Diversity
A Diversity Ideology Intervention: Multiculturalism Reduces the Racial Achievement Gap
Hannah Birnbaum1, Nicole Stephens1, Sarah Townsend2, Maryam Hamedani2
1Northwestern Kogod School of Man, 2Marshall Sch. of Business, Univ. of Southern California, 3Stanford Univ

[L-027] Diversity
Effects of Minority Exclusion from Psychological Research
Hannah Snidman1, Samantha Lechowicz2, Claire Ettaugh1
1Texas Tech Univ, 2Bradley Univ

[L-028] Diversity
A Descriptive Examination of Everyday Discrimination at a Hispanic Serving Institution
Jacqueline Hua1, Angela Johnson1, Maryam Hussain1, Jennifer Howell1
1UC Merced

[L-029] Diversity
Instrumental Diversity Rationales Reduce Out-group Consideration in White Americans’ Affirmative Action Policy Preferences
Jordan Stark1, Stacey Sinclair1
1Yale Univ

[L-030] Diversity
The Effects of Race and Friendship Affiliation on Occupational Perceptions
Khahn Linh Duong1, Frank McAndrew1
1Knox college

[L-031] Diversity
Post-PhD Career Choices among STEM PhDs, Perceived Advisor Expectations, and the Feeling of Belonging in Graduate School
Lauren Ortosky1, David Sherman1
1UC Santa Barbara

[L-032] Diversity
Slippery Slope to Intolerance: Slippery Slope Thinking and Tolerance Judgments
Levi Aidelman1, Maykel Verkuyten1, Kumar Yogeesswaran1
1UCR Univ, 2Univ of Canterbury

SATURDAY/ 2:15PM - 3:15PM, 3:30PM - 4:30PM

Baris Sevi1, Natalie Shook2
1West Virginia Univ.

[L-043] Diversity Do Dark Personality Traits Predict Perceived Leadership Effectiveness across Varied Organizational Structures?
Denise Eme1, Nicholas Parkalap2
1Deanam College, 2Univ. of North Carolina at Charlotte

[L-044] Diversity Assessing the Impact of Social Anxiety and Surrogate Use in Friendships
Eliane Boucher1, Jorden Cummings2
1Providence College, 2Univ. of Saskatchewan

[L-045] Diversity The Role of Presence of Meaning in Life on the Relationship between Two Personality Characteristic Subtypes: Subjective Well-being
Elif Cankaya1, Clarissa Pinto Pizarro de Freitas2, Bruno Figueredo Damásio3, Helder Hikomi Katami1, Patrícia Renovato Tobi4, Silvia Helena Koller2
1Texas A&M Univ., 2Salgado de Oliveira Univ., 3Federal Univ. of Rio de Janeiro, 4Advanced Research in Sciences of Well-being, 5Federal Univ. at Rio Grande do Sul

[L-046] Diversity To Whom Do You Compare? Exploring Individual Differences in Temporal and Social Comparisons
Elizabeth Gallinani1, Jason Rose1
1Univ. of Idaho

[L-047] Diversity The Moderation Effect of Pragmatism Ideals on Efficacy Change
Feng Chun Hsiung1
1National Taiwan Univ.

Geoffrey Wetherell1, Jonah Koetke2
1Yale University, 2Univ. of Pittsburgh

Hyunjin Koo1, Peter Jinseok Kim2, Minsung Hong2, Paul Pitt2, Azim Shariff2
1UC Irvine, 2Univ. of British Columbia

[L-050] Diversity Fear of Being Single: Behaviors in a Romantic Relationship
Jacqueline Lechuga1, Stephen Crites1
1Univ. of Texas at El Paso

[L-051] Diversity Exploring Daydreaming Styles and Individual Differences
Jessica Curtis1, Emily Johnson1, Brandon Higdon1, Blake Higdon1
1Arkansas State Univ.

[L-052] Diversity In the Moment: Facets of Mindfulness Differentially Relate to Components of Impulsivity
Karen Kelley1, Maggie Walgren1, Hilary DeShong1
1Mississippi State Univ.

[L-053] Diversity Smartphone Shaming?: The Moderating Effects of PWE on the Relationship between Perceived Smartphone Use and Productivity
Katelyn Schwieters1, Danielle Ella1, Kerry S. Kleyman1
1Metropolitan State Univ.

[L-054] Diversity Reinvestigating the Relationships between Sensory Processing Sensitivity and Life Skills among Japanese Samples
Kosuke Yano1, Takayoshi Kase1, Kazuo Oishi1
1Tokyo Univ., 2Japan Society for Promotion of the Science

[L-055] Diversity Mate Poaching among College Students: An Examination of Gender Differences in Strategies, Perceived Outcomes, and Use of Social Media
Kristan Russell1, Peter Reirick1, Ava Wong1, Ayokunle Ologoke2
1Univ. of Nevada, Reno, 2Univ. of Illinois at Chicago

[L-056] Diversity The Role of Humility in the Link between Self-Determination and Prejudice
Maria Nefeli Scitellas1, Hetal Patel1, Kayla Jurchak1, Lisa Legault1
1Clarkson Univ.

[L-057] Diversity Integrative Complexity Scale Development
Mariele Machacek1, Kevin Blankenship1
1Iowa State Univ.

[L-058] Diversity Black or White. You Only Need to be Hot. Effects of Race, Attractiveness, and Social Status on Short-term and Long-term Matting Appeal
Maryam Tajmirriyahi1, Stephen Doerfler2, William Ickes1
1Univ. of Texas at Arlington

[L-059] Diversity Who are the Concept Creepers? Individual Differences in Holding Broad Concepts of Harm
Melanie McGrath1, Nick Haslam1
1Univ. of Melbourne

[L-060] Diversity Volatility in Expectations While Awaiting Important News
Melissa Wilson1, Kate Sweemy1
1UC Riverside

[L-061] Diversity Metaphorical Lay Theories in Education: Implications for Student Behaviors
Michelle Wong1, Bridgette Hard1
1Duke Univ.

[L-062] Diversity Culture of Justice? Belief in a Just World is Higher in Southern Culture of Honor States N. Kyle Smith1
1Amherst College

[L-063] Diversity Rumination and Reflection via Chronic Regulatory Focus Theoretical Prediction: Prachi Pathak1, Alysson Light1
1Univ. of the Sciences

[L-064] Diversity A Comparison of Social Vigilantism and Intellectual Humility in Persuasion Attempts
Samuel Harper1, Stuart Miller1, Donald Saucier1
1Kansass State Univ.

[L-065] Diversity Are Sex Differences in Matting Strategies Really Overrated? The Effects of Sex and Relationship Orientation on Long-term and Short-term Mate Preferences
Sascha Schwarz1, Lisa Bafeld2, Manfred Hessebrauck3
1Bergische Univ. Wuppertal, 2Univ. of Wuppertal

[L-066] Diversity Are Non-traditional Students the new Traditional? An Investigation of Individual Differences in Post-Secondary Education Success
Serena Carr1, Kerry Kleyman1
1Metropolitan State Univ

[L-067] Diversity Thankful People Are Happier Because They Have Fond Memories of Their Past
Shoumika Chodavaram1, Jia Wei Zhang1
1Univ. of Memphis

[L-068] Diversity Exploring the Relationship between Experience-taking and Performance
Stephanie Thomas1, Gabriella Harari1
1University of Wisconsin

[L-069] Diversity Accurate Self-knowledge
C. Randy Colvin1, Summer Harvey1
1Northeastern Univ.

[L-070] Diversity On the Association between Big Five Personality and Religiousity: The Importance of the Sociocultural Context
Theresa Entrenier1, Jochen E. Gebauer2
1German Institute for Economic Research, 2Univ. of Mannheim, Univ. of Copenhagen
SATURDAY/ 3:30PM - 4:30PM

[LO-072] Individual Differences
Does Perceived Postural Expansion Increase Self-Expansion? A Laboratory Experiment
Xinyi Chu1, Veronica Pickard2, Clio Dinan1, Benita Jackson1
1Smith College

[LO-073] Norms and Social Influence
The Virtuous Side of the Escalator: Political Orientation and the Moralization of Public Social Norms
All Javed1
1Univ. of Toronto

[LO-074] Norms and Social Influence
Social Influence of Artificial Intelligence in a Virtual Environment
Andrew Heim1, Macrea Love1, Alec Doede1, Garrly Shaver2
1Univ. of Tennessee

[LO-075] Norms and Social Influence
The Moderating Effects of Cultural Tightness on Value-behavior Links
Andrey Elster1, Michele Gelfand2
1Technion - Israel Institute of Technology, 2Univ. of Maryland

[LO-076] Norms and Social Influence
Comparing Self-Perceived Levels of Sexual Regret of the Self and Others: What Is the Cost of Feeling Disruptant?
Audrey Stromberg1, Catherine Sanderson1
1Amherst College

[LO-077] Norms and Social Influence
The Effect of Ambiguity on the Legitimacy of Medical Opinion and Mental Illness Labeling
Bianca Magano1
1Donders Univ.

[LO-078] Norms and Social Influence
Racial Differences in Theory-Based Constructs Related to Hypertension Management
Charleen Gust1, Angela Bryan1, Irene Blais1, Ed Havranek1, John Steiner2, Rebecca Hanratty2
1Univ. of Colorado Boulder, 2Univ. of Colorado Anschutz Medical Campus

[LO-079] Norms and Social Influence
Understanding Sociocultural Correlates of Health-related Risk-taking: A Latent Profile Approach
Jessica Perrone1, Eric Shattuck1, Colton Daniels1, Thanhkam Sunil1, Xiaohu Xu1
1Univ. of Texas at San Antonio

[LO-080] Norms and Social Influence
Norms and Beliefs about Alcohol Consumption and Risk of Consumption in Adolescents of Semi-rural Communities of Mexico
Jesus Higareda Sanchez1, Sofia Rivera Aragon1, Mirta Margarita Flores Galaz2, Angelica Romero Palencia3, Lucy Maria Reidl Martinez4
1National Autonoum Univ. of Mexico, 2Autonoum Univ. of Yucatan, 3Autonoum Univ. of Hidalgo State

[LO-081] Norms and Social Influence
The Effects of Visual Cues and Social Pressures on Women's Handwashing Compliance
Callie Hale1, Laney Alvarado1, Taylor-Nicole Kissel1, Julia Ettema1, Brandi Stupica1
1Ametur College

[LO-082] Norms and Social Influence
What Inhibits Male Allyship? Examining the Influence of (Mis)perceptions of Other Men's Beliefs
Lucy De Souza1, Toni Schmader1
1Univ. of British Columbia

[LO-083] Norms and Social Influence
Narrative Structure and Motivational Themes in Life Stories
Mariam Gogichaishvili1, Lili Khechuashvili1, Tamari Jananashvili1
1Tbilisi State Univ.

[LO-084] Norms and Social Influence
When the Strength of Social Norm Impacts Induced-hypocrite Effect: Application to Discrimination Prevention
Maxime Maudy1, Daniel Priolo2, Nicolas Margas3, Cécile Sénénaud4
1Univ. de Caen Normandie, 2Laboratoire ESPOLYON, 3Laboratoire CESAMS, 4Laboratoire de Psychologie de Caen Normandie

[LO-085] Norms and Social Influence
Normative Focus Theory and the Negative Effects of Communicating the Ubiquity of Implicit Bias
Naomi Isenberg1, Markus Brauer1
1Univ. of Wisconsin - Madison

[LO-086] Norms and Social Influence
Measuring the Campus Expression Climate
Sean Stevens1
1New York Univ.

[LO-087] Norms and Social Influence
Classical and Social Health: Does Control or Difficulty Explain Disparity?
Tatama Stimatze1
1Missouri State Univ.

[LO-088] Personality Development
Super Hero or Evil Villain: The Role of Parental Supportiveness in Child’s Subsequent Personality
Chynnna Friel1, Rebekkah Wall2, CaSandra Stanbrough1, Amber Massey-Abernathy1
1Missouri State Univ., 2Univ. of Texas at Dallas

[LO-089] Personality Development
Do Expectations and Perceptions of Personality Trait Change in College Students Match Reality?
Andrew Rakhshani1, Brent Donnellan1, Richard Lucas3, Robert Ackerman2
1McGill Univ., 2Univ. of Texas at Dallas

[LO-090] Personality Development
Beyond GPA: A Longitudinal Examination of How SES and Mindsets Relate to Academic Adjustment and Academic Narrative Identity
Lindsay Wytkind1, Sarah Jennings1, Jennifer Lindgalyzed1, Kate McLean1
1Haverford College, 2Bowdoin College

[LO-091] Personality Development
The Big Five, Work Ethic Endorsement, and Approaches to Learning: An Incremental Validity Study
Andrew Christopher1, Pam Marek2, Christopher Thorstenson2

[109] How Adults (Mis)understand and Shape Children’s Race and Gender Experiences
Room: Empire A
Time: 3:45 PM - 5:00 PM
Chair: Leigh Wilton, Simmons College
Co-Chair: Evan Apfelbaum, Boston Univ.

Race and gender fundamentally shape the human experience, guiding perception and behavior from an early age. Here, we explore how children process and experience race and gender, how adults think that children process and experience race and gender, and how these factors shape important outcomes, like willingness to talk about race, inter racial friendship choices, racial attitudes, and health.

ABSTRACTS

Adults Misjudge How and When Children Process Race
US adults profoundly misjudged when children develop capacities to process race—estimating that race-related capacities begin to emerge four years later than is suggested by the scientific literature. We also found the distance between participants’ estimates and scientific estimates was the best predictor of adults’ hesitation to talk to children about race.

Leigh Wilton1, Jessica Sullivan1, Evan Apfelbaum1
1Simmons College, Boston Univ.

“My Child Wouldn’t Do That”: Parents’ Beliefs about Their Children’s Racial Bias
White parents reported that their child would express less racial bias than the average child, exhibiting a Better-than-Average Effect in the race domain. However, the Better-than-Average Effect did not pertain to the gender domain: Parents thought all children would display gender biases, and the interaction between race and gender conditions was significant.

Katharine Scott1, Troy L. Ash1, Kristin Shutts1, Patricia G. Devine1
1Univ. of Wisconsin-Madison

The Development of Racial Bias: Parental and Media Influences
Racial bias is pervasive across the U.S. and is evident in children as young as 3-5 years. We examined 3 factors implicated in the formation of racial bias in childhood. Parental essentialism for economic disparities and lack of diversity in children’s media both predicted children’s racial bias. Interestingly, parental value of diversity was related to increasing bias for White children with age.

Gender Discrimination by Adults at School: Perceived School Unfairness, Depression, and Sleep Duration among Adolescent Girls
In a large, ethnically diverse sample of adolescent girls, we show that girls who report experiencing gender discrimination by adults at school in seventh grade come to view their schools as significantly more unfair institutions by eighth grade, which is associated with higher depressive symptoms and shorter sleep durations.

Ariana Bell2, Jaana Junonen1
1UCLA

[110] The Promises and Pitfalls of Admitting Personal Prejudice
Room: Empire C
Time: 3:45 PM - 5:00 PM
Chair: Aaron Moss, TurkPrime
Co-Chair: Laurie O’Brien, Tulane Univ.

In the US, denials of prejudice are ubiquitous. Talks in this symposium will examine why people deny prejudice and how others view those who admit and deny personal prejudice. Evidence suggests people generally believe that their denial of prejudice is effective. However, with just a few caveats, other people tend to respond more positively to those who admit rather than deny personal prejudice.

ABSTRACTS

Responding Defensively to Feedback About Anti-Latino(a) Bias
In two studies, we examined responses to feedback...
on a Latino(–)White IAT among two groups of students attending majority-Latina institutions. The results suggested that while White, but not other, students were particularly defensive in response to learning they preferred White to Latina targets and that increased defensiveness was predicted decreased intention to change behavior to be more egalitarian.

Jennifer Howell, Blanca Hinojosa
UC Merced

An Upside to Acknowledging Prejudiced Behavior
When people are accused of prejudiced behavior, they often respond by denying. In four experiments, we predicted and found that people who acknowledged prejudice were perceived as warmer, more moral, and less prejudiced than those who denied. These positive evaluations occur because acknowledging signals a willingness to learn and a focus on others while denying signals a focus on the self.

Aaron Moss, Laurie O'Brien, Rachel Budd, Annelise Blanchard
Tufts/Psych, Tufts Univ., "Catholic Univ. of Louven

Humility in the Face of Prejudice
In the context of prejudice, allies often struggle with how best to support those who are mistreated. Approaches to allyship that emphasize colorblindness are evaluated unfavorably by people of color but perceived as effective by those who embrace them. Allyship that involves humility and acknowledgement of personal and systemic biases is associated with positive academic engagement, students of color.

Alex Czop, Natalia Saavedra, Rachael Waldrop
Western Washington Univ

Ambivalent Reactions to People Who Admit or Deny Their Gender and Racial Biases
How do people react to those who admit or deny their social biases? In eight studies (N = 3,933), we found that reactions toward admirers and deniers of social bias were mixed depending on how they were judged. When considered together, admirers were perceived as less prejudiced and evaluated more positively than deniers; however, when independently assessed, the opposite was observed.

James Wages, Sylvia Perry, Allison Skinner
Northwestern Univ

[111] Psychological Perspectives on Why We Punish (So Much)
Room: Empire D
Time: 3:45 PM - 5:00 PM
Chair: James Dunfee, Columbia Univ.

Four papers investigate how group-decision making, reputational concerns, views of people’s “true selves,” and rigidity of implicit cognition may augment punishment. Four studies were conducted, with one study focused on social psychology, another on modeling, and a third on political cognition. The fourth paper discusses the use of punishment in the context of the psychological literature.

Oriel Feldman-Hall, Ross Otto, Liz Phelps, J. Young Son
Brown Univ, UC Irvine, Harvard Univ

Measuring the Size and Power of Reputation Motives for Morally Ambiguous Punishment
How do reputation motives shape morally ambiguous punishment? People can expect ambiguous punishment to look good, motivating them to override private reputational concerns, views of people’s “true selves,” and rigidity of implicit cognition may augment punishment. Four studies were conducted, with one study focused on social psychology, another on modeling, and a third on political cognition. The fourth paper discusses the use of punishment in the context of the psychological literature.

Jillian Jordan, Nur Kletly
Keele School of Criminology

Perceived Retributive Punishment Motives Hinge on Views of the True Self
People believe that humans and God punish others, but the presence of a spirit suggests that they view earthly and divine punishers differently. In Study 1, adults viewed God as less retributive than other humans. Study 2 suggests that adults believe God views humans “true selves” more positively than other humans; this difference explained why adults view God as less retributive than other humans.

James Dunlee, Larisa Heipelt
Columbia Univ

When Do We Implicitly Forgive Criminals?
How do we forgive criminals who have performed redemptive behaviors? Almost no work has examined people’s implicit response to criminals who have served their time and performed exemplary behaviors. In two studies, although people explicitly forgave a target who showed exemplary behaviors, they showed extraordinary redemptive behaviors, they continued to implicitly evaluate the person negatively.

Melissa Ferguson, Xi Shen, Vivian Rotenstein
Carnegie Univ

[112] Funding Agencies Offer Insights into Securing Support for Your Research
Room: Strand 10
Time: 3:45 PM - 5:00 PM
Chair: Amber Story, American Psychological Association

Funding for social and personal psychology is available from a number of public and private organizations, but it is highly competitive. Attend this session and you will learn how to target different funding agencies. The panelists will discuss the proposal and review process from representatives of funding agencies and foundations.

Steven Breckler, National Science Foundation, William Klein, National Cancer Institute, Nicholas Gibson, John Templeton Foundation

[113] Assessing and Responding to the Psychosocial Impacts of Climate Change
Room: Strand 13
Time: 3:45 PM - 5:00 PM
Chair: Amanda Carrico, Univ. of Colorado

This symposium features three talks about psychosocial and behavioral impacts of climate change and concludes with a fourth highlighting recent advances and research gaps. Social psychology has an essential role to play in addressing climate change; yet, research in this area is underdeveloped. Opportunities for psychologists to contribute to climate change planning and policy will be discussed.

ABSTRACTS
Measuring Climate Distress
Increasing awareness of climate change has led to increased levels of concern and stress. Anecdotal reports suggest some people have strong emotional reactions, but there is very limited empirical evidence to date. In three studies, we present and validate a measure of climate change distress, its associations with social and personality variables, and its correlations with measures of coping.

Susan Clayton, Bryan Karasza
The College of Wooster

Outdoor Recreation and Vulnerability to Climate Change
This paper considers social vulnerability to climate change by assessing effects on outdoor recreation in the Sierra Nevada bioregion, thus providing the information needed to manage for risk and to minimize loss. We consider benefits such as the opportunities for risk, current and projected impacts, and strategies for adaptation. Work extends analyses for the western U.S.

Patricia Winter, Jose Sanchez, David Olson
US Forest Service, PSWRES, US Forest Service

Extreme Weather and Marriage in Bangladesh
We test the theory that climate change exacerbates the conditions that contribute to child marriage. Using data from 615 Bangladesh women, we find that girls and women aged 11 to 23 are more likely to marry in the year of or following heat waves. Those who wed during years with extreme weather events had more household members and to men who hold more regressive gender values.

Amanda Carrico, Katharine Donato, Kelsee Best, Jonathan Gilligan
Univ. of Colorado, Georgtown Univ, Vanderbilt Univ

Climate Change Impact Assessments: Opportunities and Challenges
The psychosocial impacts of climate change are potentially far-reaching, but research in this area is limited. This talk will review the types of impacts psychologists have or could study, and discuss the challenges associated with making causal inferences. This talk will also recommend ways for psychologists to make a bigger contribution to climate change policy and planning.

Janet Swim
Penn State

[114] Inequality 2.0: Examining Novel Social Impacts of Economic Inequality
Room: Celestin A
Time: 3:45 PM - 5:00 PM
Chair: Anita Schmalor, Univ. of British Columbia

We explore when and why economic inequality causes decreased well-being and negative interpersonal effects. In four talks (13 studies, N > 350,000), we show that the relationship between inequality and well-being depends upon perceiving inequality accurately and how inequality came about, and that inequality worsens emotion recognition and perspective taking most for people of high social class.

ABSTRACTS
Population Density Shapes Perceptions of Economic Inequality
We propose that population density shapes perceptions of economic inequality, such that economic inequality is more accurately perceived—and more strongly affects subjective well-being—when population density is higher. We provide evidence for this hypothesis across an agent-based simulation and three empirical studies (N = 355,858; one pre-registered).

Jon Jachimowicz1, Erin Frey1, Christopher To2, Oliver Hauser1
1Harvard Business School, 2Univ of Virginia, Northwestern Univ, Univ of Toronto

Inequality and Perceived Unfairness: Would the Sources of Inequality Matter?
Although societal inequality has been linked to negative outcomes, less is known about the effects of different pathways to inequality. Our findings indicate that equality, skill-based inequality, and luck-based inequality are associated with differences in affect, perceived fairness, desirability, and prosociality, with predominantly the luck-based condition differing from the other two.

Shigeo Oishi1, Margaux Winken2
1Columbia Univ, 2UCLA

Social Class Predicts Theory of Mind Performance in Adults
Four studies show that higher social class is associated with attenuated Theory of Mind ability. First, we document a negative association between social class cultures and empathic accuracy. Second, we show that social class predicts perspective-taking ability; individuals who are worse at taking the visual perspective of another person than their lower-class counterparts.

Pia Dietze1, Eric Knowles1
1Univ of Arizona

Inequality, SES, and Social Cognition: Economic Inequality Makes High SES People Less Attentive to the Emotions of Others
We replicate past research showing that people of higher SES are worse at accurately recognizing the emotional expressions of other people. We further show that the difference in emotion recognition between people of higher and lower SES is most pronounced when economic inequality is high. This suggests that the level of inequality matters for social class differences.

Anita Schmalor1, Steven Heine1
1Univ of British Columbia

[115] Talking across Divides: Novel Interventions to Create Common Ground
Room: Celestin B
Time: 3:45 PM - 5:00 PM
Chair: Yuan Zhao, Univ. of Chicago, School of Business

Today more than ever, we need to talk across divides to bridge differences and form collaborations. This symposium showcases how conversations, when used effectively, can serve as a vehicle to reduce political polarization. We discuss the role of surprise, discomfort, and bridge gender-linked power disparities, and highlights the critical role of receptivity to opposing views in such conversations.

ABSTRACTS
Epistemic Cooperation: A Quiz-Game Intervention to Reduce Political Polarization
We test an intervention in which partisan liberals and conservatives earn money by cooperating with each other as teammates in an online quiz game. The
A widespread complaint in the United States is that men are not very adept listeners (Tannen, 1990). We find that men listen to connect less often than women do, and that women report feeling more powerful when men are asking questions. We conclude that bridging gender divides in conversation is less an issue of whether men are listening, and more an issue of how men are listening.

Erik Santoro1, Hazel Markus1

[Stanford Univ.]

**Receptiveness to Opposing Views: Antecedents and Consequences**

We introduce a research program on receptiveness to opposing views—willingness to access, consider, and evaluate information that is stigmatized or debatable (Mikula & Tinsley, 2019). Receptiveness can be evaluated via self-report, behaviorally or interpersonally. We integrate the inter-switches discussed in this symposium under a broader framework of antecedents and consequences of this construct.

Julia Minson1

[Howard Univ.]

**[116] Exploring Differential Outcomes by Gender in the Workforce and Academia**

Room: Celestine C

Time: 3:45 PM - 5:00 PM

Chair: Francesca Manzi, Utrecht Univ.

This session explores differential outcomes for men and women in the workplace and careers in the workforce and academia from the perspectives of personality and social psychology — using longitudinal, cross-sectional, and field data — and using underrepresentation of women in academic faculty and leadership as well as their self-evaluations of confidence.

**ABSTRACTS**

Who Becomes a STEM Leader? Corresponding Life Priorities between Age 25 and 50

In 1992, 714 STEM graduate students (48.5% female) were surveyed. They were used publicly available data to identify STEM leaders. Male STEM leaders (n=97), Female STEM leaders (n=55), Male nonleaders (n=271), and Female nonleaders (n=29). Discriminant function analyses showed clear leadership and gender differences among these groups, showing a mixture of influences that combine to produce STEM eminence.

Kira McCabe1, David Lubinski1, Camilla Benbow1

[Vanndelt Univ.]

Gender and Racial Disparities in Psychological Science: Publishing and Peer-review Involvement

A "leaky pipeline" exists in psychological science—women and racial/ethnic minorities are underrepresented as faculty members. Using a sample of psychologists (n = 905), we found that female PhD holders and racial/ethnic minority graduate students reported fewer publications and were less likely to be invited in the peer-review process, compared with male PhD holders and White students, respectively.

Malachi Willis1, Ada J. Bridges1, Kristen N. Jozkowski2

[Univ. of Arkansas, *Ana Univ. bamboo.**

Using 20+ Years of Conference Participation to Examine Psychology's "Leaky Pipeline"

Although women earn about 75% of psychology degrees, they are under-represented in upper-level roles in academic psychology. By coding nine program guides from a psychology conference over 24 years, we found that as role prestige increases, women are less represented, with little evidence of improvement over time. As a field, psychology should promote 

advancement for women in all career stages.

Emily Redler1, Laura Sockol1

[Davison College]

A Change Will (Not) Do You Good: The Effects of Gender Stereotypes on the Updating of Self-perceptions of Competence

In two experiments (N = 1,015) and a longitudinal field study (N = 169), I explore how stereotype-based performance expectations affect the way women and men update their self-perceptions of competence when performance fluctuations over time. Together, these studies provide a multi-method approach to understanding the effects of gender stereotypes in impression updating.

Francesca Manzi1, Madeline Heilman1

[Utrecht Univ., *New York Univ.]

**[117] Student/Early Career Data Blitz 2**

Room: Celestine D

Time: 3:45 PM - 5:00 PM

**ABSTRACTS**

Mental Maps in our Heads: More Diversity, Less Dispersion

Mental representations of social groups are constructed by immediate ecologies. In county-level (49 countries), state-level (50 US states), individual-level (N = 1500), and 5-year longitudinal (N = 3924) data, people evaluate social groups as more similar to each other in warmth and competence under diverse rather than homogeneous ecologies. Diversity breeds similarity, and this is one reason why we all share similar conceptions of social groups.

Xuechunzi Bai1, Miguel Ramos2, Susana Fiske1

Perspective-taking Attenuates Intergroup Bias in Visual Representations

Participants created visual representations of ingroup-outgroup faces in a reverse-correlation paradigm after engaging in perspective-taking or not. Evidence from both direct and indirect measures of evaluation revealed that engaging in perspective-taking before generating visual representations reduced intergroup evaluative biases in the positivity and trustworthiness of group members’ faces.

Getting More from Interaction Effects: Estimating the Point of Intersection Where Regression Slopes Meet

We propose a method to better understand interaction effects between continuous and categorical variables via the estimation of Points of Intersection (POIs)—levels at which POIs exist of continuous variables at which categorical variables shift in the direction of their effects. We present the results of simulations that yield both direct and indirect estimates of the POIs which people show in engaging in perspective-taking.

Do You Need Some Help? Understanding Factors That Contribute to Gender-stereotype Restricted Prosocial Behavior

This research examined barriers to gender-stereotype inconsistent helping. We found that negative attitudes, restrictive norms, and low self-efficacy contribute to decreased gender-inconsistent helping intentions. Future research will expand on these findings by including recalled and actual helping behavior.

Misguided Preference for Mysterious Consumption

We find that mysterious consumption, whereby the nature of the consumption item is unknown at the time of purchase, represents a rare case in which people seek out uncertainty. This shows how preference is misguided. The uncertainty associated with mysterious consumption encourages wishful thinking with a respect for the nature of the consumption item, which makes people less happy upon reveal.

Reducing Perceptions that Black People Overreact to Bias by Fostering Interracial Humility and an Understanding That the Effects of Bias Accumulate

Three studies tested an intervention to help White people understand the cumulative nature of bias and develop interracial humility. In two weeks post-intervention, intervention (vs. control) participants perceived Black people as more fair, less deserving of bias, and more likely to acknowledge the validity of Black people’s biases and the limits of their own perspective on bias.

Beauty is in the Psychophysics of the Beholder: Facial Attractiveness, Sexual Selection, and Weber’s Law

Weber’s law describes the tendency of perceptual systems to utilize relative rather than absolute differences to discriminate between stimuli. Weber’s law may have implications for the processes that shape mate choice. Across three studies, we found that participants’ facial preferences were better explained by relative (compared to absolute) differences between facial stimuli.

[Texas Christian Univ.]

Automatically Activated Perceived Associations between Advantages and Just World Beliefs

People’s beliefs in a just world (JWB) are not consistently related to their experiences of higher/ lower advantage (e.g., power, status). We conducted two experiments (several preregistered) using both direct (scale responses) and indirect (rating tasks, paradigm, context) methods to show that people believe this association exists.

Manifestation of Honor Norm Violations in a Middle Eastern Cultural Context

In four studies, we investigated ghehar, an honor-related concept among Iranian adults. We discovered three situations of ghehar and their unique emotional and cognitive profiles. We did not find the expected gender differences in honor-related experiences. However, there was a considerable gender double-standard in character evaluations of individuals who express ghehar.

Bodies and Minds: Obese Targets Are De- mentalized as Lack of Mental Agency

Mental agency (e.g., memory), but not experience (e.g., emotion), is denied individuals as their bodies increase in weight. As a result, obese targets are seen as less suited than average targets for agentic (e.g., stock investor) but not experiential (e.g., scientist). Finally, both disgust and perceived physical incapacity contributed to this de-mentalization of obese targets.

Detecting Depression from Daily Behaviors Sensed by Smartphones: Comparing Machine Learning and Regression Approaches

Smartphone sensing approaches use data collected from phone usage logs (e.g., call/text records) and onboard sensors (e.g., accelerometer, GPS) to record daily behaviors automatically, unobtrusively, and in great detail. We compare traditional regression methods and recent machine learning approaches to predict depression scores from two weeks’ worth of behavioral data collected online.

Race, Blame, and Harshness: Factors That Predict the Constructiveness of Conversations about Racial Injustice

Two studies assessed the role of moral outrage in conversations about racial injustice. Study 1 indicates that when communicating with White people about racial injustice, White (vs. Black) people are less harsh and blaming. Study 2 shows that White people are more receptive to communication that is gentle regardless of whether the communicator is Black or White.

[SPSP2020]
[118] New Directions in Attachment Theory and Research
Room: Celestin E
Time: 3:45 PM - 5:00 PM
Chair: Katherine Rogers, Zillow Group
This session examines the ways in which attachment styles predict behavior through threat-related events. Study 1 (N = 179) explored how attachment-related behaviors manifest in a commercial haunted house. Study 2 (N = 206 couples) adjudicated between theoretical predictions about the expression of attachment behaviors by experimentally inducing a sense of dread in participants with a horror film. In Studies 1 and 2, participants high in attachment anxiety displayed more avoidance behaviors, such as avoiding or running away from the haunted house, while participants high in attachment security displayed more affiliation behaviors, such as staying and helping others. These results support the hypothesis that attachment styles influence behavior in threatening situations.

[120] New Approaches to Fundamental Questions in Facial Emotion Perception
Room: Celestin G
Time: 3:45 PM - 5:00 PM
Chair: Jeffrey Brooks, New York Univ.
This symposium showcases cutting-edge approaches in the field of facial emotion perception. Using novel methodologies and experimental designs, the presenters explore various aspects of facial expression processing, including the role of context, cultural factors, and individual differences in emotion recognition. The symposium aims to advance our understanding of how people perceive and interpret facial expressions of emotion in different contexts.

ABSTRACTS

Benevolent Sexism Appeals to, and Benefits, Highly Anxious Women
Across 4 studies, women higher in attachment anxiety were more attracted to, and experienced more security, when male endorsers endorsed benevolent sexism (BS). Highly anxious women, who endorsed BS as more attractive and responsive, showed increased anxiety reduction and decreased distress in response to BS. These findings highlight the potential for BS to be supportive for women, particularly those with anxious attachment styles.

Attachment and the Organization of Behavioral Strategies in Threatening Conditions
This research examines the ways in which attachment styles predict behavior during threat-related events. Study 1 (N = 179) explored how attachment-related behaviors manifest in a commercial haunted house. Study 2 (N = 206 couples) adjudicated between theoretical predictions about the expression of attachment behaviors by experimentally inducing a sense of dread in participants with a horror film. In Studies 1 and 2, participants high in attachment anxiety displayed more avoidance behaviors, such as avoiding or running away from the haunted house, while participants high in attachment security displayed more affiliation behaviors, such as staying and helping others. These results support the hypothesis that attachment styles influence behavior in threatening situations.

The Impact of Culture on Reading Emotions from Crowds
People can quickly read a crowd's overall emotion. Cultural exert a powerful influence on this process. Accuracy was influenced by a culture supporting the socialized attention hypothesis (Park & Kiyatama, 2010). Culture also influenced laterality effects in threat perception. These findings reveal a powerful influence of socio-cultural learning on the ability to "read a room's" emotion.

[121] Social Psychology in Political Processes and Corresponding Intra-/Intergroup Relations
Room: Celestin H
Time: 3:45 PM - 5:00 PM
Chair: Anielle Lewis, Indiana Univ., Purdue Univ. Indianapolis
This symposium discusses social psychology within political processes and corresponding intra-/intergroup relations. We review research on the limitations of political campaigns, the role of social influence, and the impact of political polarization. The session provides an overview of current trends and challenges in the field of social psychology.

ABSTRACTS

Intersectional Allies: Exploring Whether Non-White Women Act as Allies and Promote Belonging for Black Women
We examined whether women from racial outgroups act as allies to promote belonging for Black women. Across 4 studies, we found that Black female participants believed an Afro-Latina employee cared about helping Black women as much as a Black female employee and more than a White-Latina or Asian female employee. Viewing an ally at a company related to higher expected belonging at the organization.

Professional Development

Beyond UX: Exploring Industry Careers
Room: Celestin F
Time: 3:45 PM - 5:00 PM
Chair: Katherine Rogers, Zillow Group
Interested in jobs outside of academia? Want to do something besides UX, but unsure where to start or what valuable skills you have? Four social/ personality PhDs who work in different positions and sectors will share their background and experiences to provide broader career perspectives. The session is primarily Q&A, come with questions or email anonymously: psy.beyond.ux@gmail.com.

System-justification Differentially Predicts Empathy for Individuals of Dominant vs. Non-dominant Groups
Zheng Li1, John Edwards1
1Oregon State Univ.

[M-180] Stereotyping/Prejudice
Prevention Versus Exclusion Mindsets among School Principals Predict Discipline Endorsements
Zoe Ferguson1, Shoshana N. Jarvis1, Stephen Antonoplis1, Jason A. Okonofua1
1UC Berkeley

Collabra: Psychology—the official journal of the Society for the Improvement of Psychological Science (SIPS)—is a mission-driven, open-access journal from the University of California Press that shares not only the research it publishes, but also the value created by the psychology community during the peer-review process. Collabra: Psychology has seven sections representing the broad field of psychology, and a highlighted focus area of “Methodology and Research Practice.”

SOCIAL AND PERSONALITY PSYCHOLOGY

New from Guilford Press

New Edition—A Major Revision!

HANDBOOK OF CULTURAL PSYCHOLOGY
SECOND EDITION
Edited by Dov Cohen, PhD
Shinobu Kitayama, PhD
“A ‘must read’ for all who are interested in the many ways in which culture influences psychological phenomena. The editors have masterfully selected contributors with deep expertise on a surprisingly broad range of topics.” —Ed Diener, University of Virginia
and University of Utah

2019, 7” x 10” Hardcover, 930 Pages
ISBN 978-1-4625-3623-8, $88.00

New in Paperback

ATLAS OF MORAL PSYCHOLOGY
Edited by Kurt Gray, PhD
Jesse Graham, PhD
“The tremendous recent growth of interest in moral psychology has yielded no shortage of deep debate and thorny thickets. Gray and Graham have brought together a talented array of scholars who are working to cut through these intellectual brambles….This volume is a major achievement.” —Linda J. Skitka,
University of Illinois at Chicago

2019, 7” x 10” Paperback (© 2018), 586 Pages
ISBN 978-1-4625-4268-0, $36.00

New

ATTACHMENT IN RELIGION AND SPIRITUALITY
A Wider View
Pehr Granqvist, PhD
“A ‘must read’ for researchers and students concerned with the psychology of religion, and for anyone interested in understanding the psychodynamic basis of religious beliefs. Granqvist advances his innovative thesis with tight logic and irrefutable evidence, revealing that religion and spirituality have a surprisingly simple beginning in infant–parent interactions.” —Mario Mikulincer,
Interdisciplinary Center (IDC) Herzliya, Israel

2020, 6” x 9” Hardcover, 414 Pages
ISBN 978-1-4625-4288-9, $36.00

New Edition—A Major Revision!

INTERPERSONAL PERCEPTION
SECOND EDITION
The Foundation of Social Relationships
David A. Kenny, PhD
“A comprehensive, up-to-date overview of person perception through the lens of Kenny’s social relations model—arguably the field’s most innovative and creative tool for gaining insights into how people view themselves and others.”

—William B. Swann, Jr.,
The University of Texas at Austin

2020, 6” x 9” Hardcover, 400 Pages
ISBN 978-1-4625-4151-5, $40.00

New

THE UNCONSCIOUS
Theory, Research, and Clinical Implications
Joel Weinberger, PhD
Valentia Stoycheva, PhD
“If you have wondered about the powers and pitfalls of the human mind that lie outside of conscious, deliberate thinking, or if you are merely curious about the deep processes that produce the remarkable capacity of human thinking, this book is the place to start.”

—Roy F. Baumeister,
University of Queensland, Australia

2020, 6” x 9” Hardcover, 396 Pages
ISBN 978-1-4625-4105-8, $36.00

New

HANDBOOK OF PERSONALITY DEVELOPMENT
Edited by Dan P. McAdams, PhD
Rebecca L. Shiner, PhD
Jennifer L. Tackett, PhD
“This extraordinary volume is likely to become the seminal resource on personality development. The diversity represented is truly amazing—an international group of junior and senior scholars present the best science the field has to offer, from a host of different perspectives.”

—Laura A. King,
University of Missouri–Columbia

2019, 7” x 10” Hardcover, 623 Pages
ISBN 978-1-4625-3693-1, $58.00

New Edition—Revised & Updated!

THEORY CONSTRUCTION AND MODEL-BUILDING SKILLS
SECOND EDITION
A Practical Guide for Social Scientists
James Jaccard, PhD and Jacob Jacoby, PhD
“Jaccard and Jacoby teach the tricks of the trade—the cognitive maneuvers, representational strategies, and creativity heuristics—that any researcher can employ to build stronger, more informative, and testable theories.”

—Hart Blanton, Texas A&M University

2020, 7” x 10” Paperback, 506 Pages
ISBN 978-1-4625-4423-7, $44.00

PROFESSORS: This book is available Free for Adoption Consideration. If you are teaching a relevant course, go to www.guilford.com/p/jaccard to request your free desk copy.

New Edition—Revised & Updated!

BECOMING A BEHAVIORAL SCIENCE RESEARCHER
SECOND EDITION
A Guide to Producing Research That Matters
Rex B. Kline, PhD
“I know of no other intermediate-level text that places front and center the need to register and replicate research, to prepare reports using disciplinary guidelines, and to share data….This is truly a new book for a new time.”

—Harris M. Cooper, Duke University

2020, 6¼” x 9¾” Paperback, 384 Pages
ISBN 978-1-4625-3879-9, $40.00

New

QUASI-EXPERIMENTATION
A Guide to Design and Analysis
Charles S. Reichardt, PhD
“An important contribution to the literature on research designs that may be implemented when randomized experiments are not feasible or are limited….A notable feature is Reichardt’s careful attention to issues that arise in each research design.”

—Stephen G. West, Arizona State University

2019, 7” x 10” Paperback, 381 Pages
ISBN 978-1-4625-4020-4, $32.00
